Moon Rises	p. m.	Moon Rises	p. m.

Jan. 1st the Sun rose at 7.23, set at 4.45.

The Weather.

Signal Office Prediction.—Rain and partly cloudy weather in northern portion of Middle Atlantic States, fair weather in southern portion, westerly winds, nearly stationary temperature.

Chronological Events.

Earthquake at Lisbon in 1755.

JOTTINGS.

—Plainfield's registry foots up over 1,500 voters.

—C. E. Dunham of Bound Brook is about to remove from North Plainfield, to Bound Brook.

—The weather permitting, the different Democratic organizations of this city will parade Monday night.

—A mail route agent with a distributing car has just been placed on the Bound Brook Route to Philadelphia.

—The Democratic Clubs of this city will not participate in the parade at Westfield Monday evening on account of their parade here.

—The Westfield Republicans could not participate in the New York parade last evening, they not being able to get their torches.

Numerous gaming parties were out today in the country shooting game, the time set by the law against this having ended last evening.

—Mr. William I. Marshall lectures at the Congregational Church Monday evening on "Colorado, The Treasure House, Sanitarium and Switzerland of America."

—Robert S. Manning, Sec'y of the Reform Club League by invitation of the ladies of W. C. T. U., of Paterson, N. J., will speak in that city this evening and to-morrow.

—Hon. Robert S. Green, the Democratic nominee for Congress from this District, is a Middlesex County man, having been born in the village of Dayton, South Brunswick township.

—Hugh Gaston, the County Collector of Somerset county, has removed from North Branch to Somerville. There are now residing in Somerville three Hugh Gastons, Hugh M., Hugh K., and Hugh.

—The contest for the set of jewelry at St. Mary's Fair was decided last evening and resulted as follows: Miss Mary Flannigan, 168 votes; Miss Alice Kealy, 310; Miss Alice Quinn, 55; Miss Winifred Kealy, 650.

—Mrs. Eleanor, widow of the late John Lambert, of Bound Brook, who died on the 20th ult., was 87 years old, was born in Monmouth county, resided in Bound Brook for 18 years, and was highly respected by all who knew her.

—The sale of Reserved seats for Y. M. C. A. course is to take place at Reynold's Pharmacy on Tuesday (election day) commencing at 9 a. m. Mrs. Judge McKennan, Mrs. Karl Pelsinger will take part in the opening entertainment with Miss Helen Potter.

—The provisions provided as a collation for the visiting clubs in the Democratic parade which was to have taken place here last Wednesday, but for the storm, were distributed yesterday to the callers therefor at the appointed place in Front street.

—The wife of Rev. C. H. Pool, of Raritan, died unexpectedly Thursday morning. She has recently returned from an extensive western trip with her husband, and, though ill, her condition was scarcely considered dangerous. She was well known in this county as a loving, cheerful Christian, who will be sadly missed by her family and friends.

Casino Rink Rules.

The following are the rules and regulations prevailing at the Roller Rink, at the corner of Grove street and Craig Place, which has its "opening" this evening, when a large attendance is expected:

The use of tobacco at the rink is strictly forbidden. Spitting or throwing any substance on the floor is dangerous, and will not be permitted.

No intoxicating liquors allowed on the premises.

No person without skates will be allowed on the skating surface.

Not more than one should skate abreast. Skaters must observe a uniform direction, keeping to the right.

All persons who stop skating before the rink closes will return skates at once to the skate room, and no one will be allowed to let other persons use their skates.

Pushing, tripping, racing, tagging or taking hold of the garments of others, or any rude and dangerous actions are strictly forbidden.

When a march is announced, gentlemen will choose partners and follow the leader.

The ringing of the bell once is to call your attention; ringing the bell three times is for the skaters to retire from the floor, which should be done at once, and all should keep quiet; continuous ringing of the bell is to announce the close of the session.

Shouting, whistling, other rude and boisterous demonstrations are not allowed within, and should be avoided on the streets while going to or returning from the rink, by all who wish to maintain the good name of the institution.

When the time for closing is announced all skaters will please buckle their skates together and return them to the skate room.

Private skating, the charge of the rink, will be looked after and kept oiled free of charge.

A cheerful compliance with the above, and a careful regard for the comfort and enjoyment of others, is respectfully requested by the management.

Personal.

Miss Lillie Marsh, of Hartford, has been spending a few days at her father's, Mr. Randolph Marsh on Plainfield ave., and was to return to Hartford to-day, her sister Bertha accompanying her.

Mr. E. O. Chamberlin, of this city, formerly of the Trenton Times, is now reporting on the Philadelphia Press.

ROBERT LORD LIVINGSTON,

Democratic Candidate for State Senator of Union County.

Robert Lord Livingston was born in Elizabethtown, Essex county, New York, in the very heart of the Adirondacks, in the year 1838, making him forty-six years of age. He was the oldest of four children, two sons and two daughters, and his father, Robert W. Livingston is a veteran of the War of the Rebellion, from which he received wounds which crippled him for life. Mr. Livingston's father started in Elizabethtown the Elizabethtown Post, prior to the birth of Plainfield's Democratic nominee, who therein served a regular apprenticeship at the printing business. His brother still owns the paper having succeeded the elder Mr. Livingston, upon the latter's retirement. The elder Mr. Livingston, is now seventy-four years old, and hale and hearty, except from his war wounds.

At the age of eighteen Robert L., went to Troy, N. Y., and engaged as a clerk in a wholesale dry goods store in Troy N. Y., continuing there at three years, then removing to New York, where he engaged in the wholesale dry goods establishment of C. W. and J. D. Moore and Co., from 1859 to 1868. The Moore's failed at the outbreak of the war, but Mr. Livingston continued with their successors. The next five years Mr. Livingston spent in Wall street speculations, from which he acquired a snug fortune, losing the bulk of it in the panic of 1873. Mr. Livingston then entered the Insurance business in New York, in which he is still engaged.

Previous to his coming here Mr. Livingston lived a couple of years in Westfield, where he is well and favorably known.

He has been a resident of Plainfield since 1876, has been three years a member of the Plainfield Common Council, during one term of which he was its President, and that in this Republican city speaks volumes for his popularity and general reputation. For record in the Council is that of a thorough business man in every sense of the word which he had any connection.

He is warmly endorsed by Plainfield merchants and mechanics, for his many likeable qualities of head and heart. He is married to a daughter of Mr. Henry J. Taylor, ex-Mayor of Jersey City, the latter now one of the Park House permanent guests, and has an interesting family.

Ineligible.

A few days ago, we quoted from the Kansas City Journal an article relating to the nomination for State Senator on the Republican Ticket of Dr. Charles W. Scott, brother of Julian Scott, the artist, of this city. This morning we find among our exchanges the same excellent paper, with the following announcement:

The many friends of Dr. Charles W. Scott will be exceedingly disappointed to learn that a requirement of the constitution of the State of Missouri necessitates his withdrawal from the Republican ticket as a candidate for State Senator from this county.

Dr. Scott is the victim of a constitutional provision which requires that a senator shall have been a qualified voter of the State for three years next before the day of his election.

Dr. Scott has not been a resident in this district quite three years, but he has been here long enough to acquire a host of earnest friends and to demonstrate "paper ity and fitness for the State Senate. The lawmakers of Missouri have always been possessed of a remarkable fear of outsiders. They have seemed to have imagined that people on the outside were plotting to take possession of the State, and the constitutional enactment presumes that outsiders are able to make things lively for the natives if they are only admitted on equal terms.

We very much regret that Dr. Scott has been put to so much trouble and inconvenience. He was urged to take the nomination against his inclination, and only consented on account of his loyalty to party and friends. He was making a vigorous and, we believe, a successful canvass. His election seemed entirely probable. By his active efforts and sacrifice in behalf of the entire Republican ticket, Dr. Scott has won the thorough appreciation of his party, and is only deprived of a seat in the senate by an exceeding unfortunate technicality.

The section of the statute in reference to the eligibility of legislators is appended:

Section 6, article IV, Constitution of State of Missouri.

No person shall be a senator who shall not have attained the age of 30 years, who shall not be a male citizen of the United States, who shall not have been a qualified voter of the state three years, and an inhabitant of the district whilst he may be chosen, for one year next before the day of his election, if such district shall have been established one year, but if not, then within such time as shall have been within one year next preceding the election. When any county shall be entitled to more than one senator, each senatorial district shall be composed of contiguous counties, and of portions of such county as may be contiguous, according to numbers, to which each county may be entitled; and no county shall be divided unless it shall be entitled to two or more senators; nor shall a part of such district, shall be elected by the qualified voters thereof."

P. & R. R. v. P. R. R.

It is probable that the dispute between the Pennsylvania road and the Reading Railroad Company over the right of the former company to use the tracks of the New York and Long Branch road, which is leased to the New Jersey Central road, will be arranged. Wednesday morning Mr. MacVeagh had a spoken some time in defence of the existing contracts which secured the use of the disputed road by the Pennsylvania company, while Judge McKennan, of the United States Court, before whom the case has been heard, intimated that the parties should get together and amicably end the controversy. The Judge suggested that another contract be entered into which would be devoid of the objectionable feature of pooling the business, as is complained of by the Jersey Central. In answer to this Mr. McVeagh said the Pennsylvania railroad had always expressed a willingness to come to such an understanding. Franklin B. Gowen, for the New Jersey road, replied that this matter could be arranged on such a basis. There apparently being no difference in views between the gentlemen representing the different interests as to the method of reaching a settlement, the argument for the time being came to an end, with the understanding that if the two companies could not reach a definite conclusion, upon notification of that fact to the court, Judge McKennan would decide the matters in dispute.

Mangled and Killed.

Wednesday evening at 8:30 o'clock, while Engineer Wagner, of the Philadelphia and Reading Railroad, was backing locomotive 309 up to the round house at Bound Brook, he struck and ran over an unknown man, supposed to be a tramp. The engineer did not know he had hit anyone until told of it. The body was horribly mutilated, and was carried to the freight house. Coroner H. G. Wagoner, of Somerville, was summoned but no inquest was deemed necessary, and the remains were buried on Tuesday.

Sunday Services.

The four o'clock Gospel Temperance meeting of the Women's Christian Temperance Union will be held in Reform Hall as usual, when Rev. Mr. Tuttle and others will deliver addresses. Those who wish to do a good thing for their fellow men, can do so, by attending this meeting and speaking a few earnest words in behalf temperance and religion.

Gospel Temperance Meeting.

The attendance at the Warren Mission chapel Gospel Temperance meeting last evening was not as large as usual, but a spirit of earnestness pervaded it. In the absence of President John H. French, Mr. Frank Dodge took charge of the meeting. An interesting, general reformed men made short addresses.

VOX POPULI.

Where Cain Got His Wife.

EDITOR EVENING NEWS:—Queries are many in this world; and the "query" raised in your paper as to how or where Cain got his wife has not yet been satisfactorily solved, but we think we have it. He obtained his wife in the land of Nod, Nod being the land of "Nod." He doubtless was under a little embarrassment, as many a young man is. Quite likely the girls in those days and in that country were very much as they are at this time and in our country. A cock of the hat, wink of the eye, or a nod of the head is quite acceptable, and will be received as a bid, and a bargain struck there from. They are usually ready for a bid at any time of the proper kind. Who hits next?

L.

How to Make Mud.

EDITOR EVENING NEWS:—I was thinking about making mud, and how our Street Commissioner could supply our streets at the least expense to the city. He has succeeded well thus far in picking up clay and barn yard manure; but would it not be a matter of economy to purchase mud by the acre from Cedar Brook swamp, and then keep teams hauling all Winter. This would keep the stones on the streets well covered; and then it will keep the crossings well besmeared for pedestrians. If it cannot be done without let us vote another $5,000 for the benefit of our streets.

MUD.

—No. 113 has drawn the case, No. 175 the velvet cross, No. 99 the paper weight, No. 191 the gold scarf pin, No. 192 the half dozen silver spoons, No. 193 the album, No. 80 the silver napkin ring, No. 185 the plush frame and No. 191 the cuspidor, at the St. Joseph's fair. The parties are requested to call at VanDeventer Hall for the articles. There is a contest going on to give a clock to the Presidential candidate receiving the largest number of votes. Blaine is ahead, but the Clevelanders rally to-night.

State Items.

The Hudson County Grand Jury, which is still sitting for the September term of the courts, has the investigation of three murder cases on hand.

A party of men from Philadelphia, belonging to fishing and gunning clubs that own the islands on the Delaware river above at Bellingsport, were arrested on Sunday by Fish Wardens for gunning on Sunday. They were required to give bail in $500.

The suit of Mrs. Carrie B. Woodman against the Pennsylvania R. R. Co. to recover damages for the death of her husband, thrown over a seat in a car at Jersey City by the violent jerk which the engine gave to the train, was settled in a verdict in her favor for $7,500.

The Anti-Bribery Association of Burlington county has issued a circular calling attention to the duties of voters and officers, which is signed by District Attorney Hendrickson. A reward of $100 is offered for the arrest and conviction of the offender.

Hince Sullivan, the boy murderer, has had his doom pronounced. His courage has entirely collapsed, and he has asked for the services of a clergyman. His appetite has failed him, and he is rapidly growing emaciated. A touching meeting took place between him and his mother on Sunday, which brought tears to the eyes of the men who heard it.

A Sensible Man.

Would use Kemp's Balsam for the throat and lungs. It is curing more cases of coughs, colds, asthma, bronchitis, croup and all throat and lung troubles, than any other medicine. The proprietor has authorized H. J. Shaw, Front street opposite Park avenue to refund your money if after taking three fourths of a bottle, relief is not obtained. Price 50 cents and $1. Trial size free.—Adv.

W. F. HUTCHINSON,
Gen'l Eastern Passenger Agent.

SATURDAY, NOVEMBER 1, 1884.

Poor German Girls.

[Ell Perkins.]

The girls in Germany outnumber the boys by several millions. This and the fact that many more girls are born than boys leaves about 5,000 women who have to remain single. The rich girls get married, but the poor ones have to earn their own living as best or hard labor. In Munich no young man is permitted to marry until he has proved to the authorities that he is able to support a wife. If children are born and the parents cannot support them, the state holds the city authorities responsible for their maintenance. When an unmarried German woman becomes old and poor she is allowed to starve. She cannot starve, so she carries burdens in the street. Often she is hitched like a horse to a wagon, and does as much work. I happy indeed ought a young lady to feel when any good fate has permitted her to be born in America!

Brains for the Kitchen.

[Chicago News.]

The happiness of home life and worldly success are dependent to a large measure on what comes from the kitchen to the table to be eaten. Mental poise hinges on the physical condition, and a man's stomach can play the dickens with him, not to say anything of his liver. The subject of preparation of food and the creation of appetizing dishes is one which the world of diamonds, gold and broadcloth has not given sufficient consideration. It is quite possible to be well informed, cultivated, and accomplished, and also to give due attention to the requirements of the table to furnish it in proper shape, so that the most fastidious palate shall be satisfied and danger of dyspepsia and indigestion averted. In the economy of the women of brains and judgment cook better than those of untrained mental capacities.

Engagement Bracelets.

[American Queen.]

Engagement bracelets are more used than engagement rings. Some of them are very pretty; they are set with diamonds, pearls, or sapphires, and having the initials of the engaged pair engraved on the back of the lock. Chain bracelets are extensively worn, and are the most popular kind. Silver in Roman gold is preferred by a great many people to gold. It is more stylish and never looks shoddy.

Children's Novelties.

Little girls are wearing odd bangle bracelets made of silver, the bangles being of ivory tusks, sea-beans and carved images.

New cambrics for the fall days show designs of fox-hounds, elephants and race horses, in blue, red and brown.

Wide satin ribbon sashes are worn by girls of all ages, of brown-pink, sea-foam green, myrtle green, pale blue, yellow, and cardinal are the favorite colors.

For Grease Spots.

[Philadelphia Call.]

Dry buckwheat flour if repeatedly applied will entirely remove the worst grease spots on carpets, and any other woven cloth, and will answer as well as French chalk for grease spots on silk.

Staircase Carpet.

The staircase should always be carpeted, at least with a narrow carpet running down the centre, even if the sides be of handsome wood, wax-polished. The unyielding surface of the wood is very trying to the feet.

Be Cheery at Meals.

Be pleasant at meal times, if you cannot say hour in the day. It is a powerful aid to digestion to have the table cheery and bright when taking our food.

Bangs are seldom seen now, the hair being brushed straight back from the forehead, and arranged in little "bean-catchers" over each temple.

Brown will be as fashionable for tailor-made dresses this fall, as gray was last spring.

Pink is to be the fashionable color for all evening dresses next winter.

BY GLARE OF TORCHES.

Mr Blaine Stands for Hours Reviewing his Adherents.

The Cleveland Parade Tonight in New York—An Eulogy of John Sherman—Merchants for Cleveland—Politics Generally.

NEW YORK, Nov. 1.—The grand parade in honor of Blaine and Logan, for which such extensive preparations have been in progress for several weeks past, took place last night. The number that participated in the 50,000 and 60,000 persons were in line, fully one-half of whom were in uniform and carried either torches or lanterns. The centre of the march was at the corner of Fifth avenue and Madison avenue, to Thirty-third street, to Fifth avenue, and past the reviewing stand near the Worth monument. The head of the procession was formed on Vanderbilt avenue, Brevoort Carr and his aids, numbering over 200 horsemen, arrived at Madison square shortly after 8 o'clock. Madison square presented a great morning from the immense multitude of spectators. These were followed by the Capital City clubs, of Albany, and the Rifle Rangers of Jersey City. The latter had a particularly very brilliant and novel spectacle.

The officers of the different companies rode in front each wearing in his bronze helmet under a white plume an electric light of 300 candle power. The first division was under the charge of Gen. A. E. McKibbin and staff, and among the forty companies and clubs that made up the division were the Ellinger plumed knights, of Flushing, L. I., the Veteran Corps of Artillery, the Veterans of the Richmond county Boys in Blue, the New Rochelle Zouaves, the Hoyt guards of Stamford, Ct., the Phoenix club, of Jamaica, Queens county, N. Y., and the Republican Invincibles. All these organizations marched in splendid form and were loudly cheered as they passed the reviewing stand.

The second division was in charge of Gen. Henry A. Barnum and staff. It consisted almost entirely of uniformed companies from the various county districts. The Invincibles of the Young Men's Republican Club, of Philadelphia, presented a fine appearance, their splendid marching created great applause.

Mr. Blaine seemed much pleased with the gorgeous spectacle, and was kept busy for hours rising his hat to the vast throngs of humanity as they marched by saluting.

At midnight only about half of the procession had reached the reviewing stand.

Tammany's Big Parade.

NEW YORK, Nov. 1.—The parade of the various district organizations of Tammany Hall, which took place here to-night, was the kind ever witnessed in this city. The refusal of the County Democracy and Irving Hall to join with Tammany in the parade to Tammany man, has only served to stimulate them to greater efforts. It is confidently expected that over 60,000 men will be in line. The line of march will be from the park this afternoon, and will review the parade from the stand opposite the Worth monument. The line of march will be from Washington square up Fifth avenue to Forty-second street and dismiss. So as to prevent any confusion or coming in contact with each other, the marching to the polls assigned to each district, Fifth avenue from Washington square to Forty-second street will positively be avoided and kept clear. The head of the column will start promptly at 8 P. M., and district leaders have been instructed to have their commands on the square prepared to them ready to march at 7:30 P. M. sharp.

An Eulogy of John Sherman.

NEW YORK, Nov. 1.—A large crowded meeting was held in Chickering hall under the auspices of the Republican central union. It was announced as a Sherman mass meeting, but Hon. John Sherman was the first to address the audience. Hon. B. F. Manierre presided, and among the vice-presidents were many distinguished citizens. The speech of the audience was that of Hon. Aiter Senator Sherman had concluded his remarks Mr. Blaine appeared on the platform and was received with the wildest manifestations of welcome and admiration. When the ball became quiet Mr. Blaine said: "I deem it an honor to follow the Senator Sherman before this meeting. I deem it an especial honor to follow Secretary Sherman. (Applause.) For I can say, though with some apology for self-praise his modest fame, that in our financial history he takes rank with the four or five really illustrious men of Washington, Hamilton, Gallatin and the United States." Mr. Blaine then paid a warm eulogy to Senator Sherman for his resumption services, and said it was eminently proper that as he had framed the act in the legislative department that he should have carried out its provisions in the executive department. The enthusiasm of Mr. Blaine's remarks *brief speeches were made* by Wm. M. Evarts and Gen. Fremont. Rabbi Hewson was also called on by the chairman but severed his inability to speak to an audience who had listened to the "three greatest Americans of to-day." He closed with a prayer, thanking the Supreme for the appearance of a "prayer meeting than of a political meeting, and he would dismiss it with a benediction. This he did by repeating first in Hebrew and then in English the familiar invocation, "The Lord preserve and comfort you, and lead you on to victory."

Merchants for Cleveland.

NEW YORK, Nov. 1.—A mass meeting of merchants and others in favor of the election of Cleveland was held yesterday afternoon at the foot of Wall street. Among the many distinguished men were the Black Republicans, Wall street clerks, Coffee Exchange, Petroleum Exchange and the Down Town Merchants' Cleveland and Hendricks club. Two stands decorated with flags had been erected for the speakers and invited guests. Lewis Maddox called the meeting to order at the lower stand and introduced Rev. Henry Ward Beecher, who delivered an address on the issues of the campaign. At the conclusion of Mr. Beecher's address, Cleveland and Hendricks were made by Carl Shurz and David A. Boody.

Ex-Secretary Robeson's Address.

PHILADELPHIA, Nov. 1.—Gen. George W. Robeson, of New Jersey, ex-secretary of the navy, who has thus far taken no part in the pending campaign, has issued an address calling upon his followers in south and west Jersey to vote for Blaine and the whole Republican ticket.

Gov. Hoadly in Brooklyn.

BROOKLYN, Nov. 1.—At the Brooklyn Academy of music, Gov. Hoadly, of Ohio, was received with loud cheers. He said that the Ohio democracy had fought a good fight and had kept the faith, but they had been sorely disappointed over the result, as they had hoped to head the column in the presidential contest. They were soon confident to put that point of honor to New York.

Why David Healey Resigned.

HORNELLSVILLE, N. Y., Nov. 1.—David Healey, superintendent of the Erie police station, who was dismissed some time ago and afterward reinstated, addressed a Butler meeting here, and in the course of his remarks announced that he had resigned his position. He accused his superior officers of unfair treatment toward him.

Gov. Hendricks in Indiana.

FORT WAYNE, Nov. 1.—Gov. Hendricks addressed a magnificent audience here. Leaving Indianapolis at 7, his first stop was at Muncie, where a train met him and in the square, he spoke to a crowd estimated at 10,000. The next stopping place was Marion, where the train arrived at noon. Here an audience estimated at 20,000 awaited him. His speech of perhaps thirty minutes was received with manifestations of such enthusiasm as to astonish the occupants of party again boarded the special train for Bluffton there it was similarly received.

Veterans Call on Logan.

INDIANAPOLIS, Nov. 1.—At 9 o'clock a committee of veterans called at Hon. John C. New's residence and were presented to Gen. and Mrs. Logan, and extended a most cordial greeting to the honored guests. All the morning there was a constant stream of callers on the general. The city is alive with people, and is profusely decorated. The industrial parade took place in the afternoon.

AN OLD SENSATION REVIVED.

A Man Supposed to have been Murdered Turns Up Alive.

WHEELING, Nov. 1.—A sensational story which was heralded all over this section has collapsed. The story goes that in 1865 a man by the name of A. McKeever, of Fort H. Thurber, had come to the vicinity of Marietta to prospect, bringing $50,000 with him; that he stopped with a man named Hurst, Co., the latter's son suddenly disappeared. A short time ago Ward died, and it was rumored that on his death bed he confessed to the murder of McKeever; that he held him while Andrew Kirkbride, a butcher, cut his throat, and that the body was then thrown in a well. The affair created considerable excitement and was printed in all the neighborhood papers besides being telegraphed broadcast.

Yesterday Kirkbridge and afterward Kirkbridge and a son of Ward appeared in Wheeling, and began three libel suits, denouncing the story as false. Investigations were at once set on foot and the well searched, but no skeleton was revealed. Most of the papers retracted the story, and compromised with the aggrieved men. Letters have just been received by Gen. R. Brown, Gen. Francis B. Thurber, of New York, completely vindicating Ward and Kirkbridge. Both of these gentlemen had been in the vicinity at the time mentioned, and both returned safely.

A Bunch of Hangings.

BATON ROUGE, La., Nov. 1.—Albert and Charles Goodman, brothers, were hanged here this morning by Sheriff Smith, for the brutal murder of Louis Wasper last winter. Both men said they had experienced religion, and expected to meet in heaven. Their necks were broken. Only a dozen spectators were allowed to be present.

SAVANNAH, Nov. 1.—Henry Cato, colored, was hanged at Statesboro, Bleatur, for the murder of Jack Dukes, has been reprieved by the governor for two weeks.

CANTON, Ga., Nov. 1.—Geo. Hill, a negro, was hanged here this morning for killing Bryant, a negro, on February 18, 1883. The cause of the murder was jealousy, Bryant thinking become intimate with Hill's sweetheart. Hill died from strangulation, the drop being only three feet.

ROCHESTER, Nov. 1.—The general term of the supreme court here affirmed the judgment of the lower court in the case of Peabody, the Auburn murderer.

French Newspaper Enterprise.

LONDON, Nov. 1.—So many conflicting reports have reached France from the Isthmus of Panama regarding the delay of operations on the De Lesseps canal, the fatality of the climate, etc., that the directors of La France newspaper at Paris have determined to send a staff of their employees to report on their own account. They have organized a corps of observation composed wholly of professional journalists, who have had some experience in journalism. Their orders are to go from one end of the works to the other, to note carefully and report dispassionately to follow the course of Sherman before him, nothing. I deem it an especial honor to follow Secretary Sherman. (Applause.) For I can say, though with some apology for self-praise his modest fame, that in our financial history he takes rank with the four or five really illustrious men of Washington, Hamilton, Gallatin and the United States." Mr. Blaine then paid a warm eulogy to Senator Sherman for his resumption services, and said it was eminently proper that as he had framed the act in the legislative department that he should have carried out its provisions in the executive department. The enthusiasm of Mr. Blaine's remarks *brief speeches were made* by Wm. M. Evarts and Gen. Fremont. Rabbi Hewson was also called on by the chairman but severed his inability to speak to an audience who had listened to the "three greatest Americans of to-day." He closed with a prayer, thanking the Supreme for the appearance of a "prayer meeting than of a political meeting, and he would dismiss it with a benediction. This he did by repeating first in Hebrew and then in English the familiar invocation, "The Lord preserve and comfort you, and lead you on to victory."

Merchants for Cleveland.

NEW YORK, Nov. 1.—A mass meeting of merchants and others in favor of the election of Cleveland was held yesterday afternoon at the foot of Wall street. Among the many distinguished men were the Black Republicans, Wall street clerks, Coffee Exchange, Petroleum Exchange and the Down Town Merchants' Cleveland and Hendricks club. Two stands decorated with flags had been erected for the speakers and invited guests. Lewis Maddox called the meeting to order at the lower stand and introduced Rev. Henry Ward Beecher, who delivered an address on the issues of the campaign. At the conclusion of Mr. Beecher's address, Cleveland and Hendricks were made by Carl Shurz and David A. Boody.

Ex-Secretary Robeson's Address.

PHILADELPHIA, Nov. 1.—Gen. George W. Robeson, of New Jersey, ex-secretary of the navy, who has thus far taken no part in the pending campaign, has issued an address calling upon his followers in south and west Jersey to vote for Blaine and the whole Republican ticket.

FROM FIRE TO THE SEA.

Hours of Horror Spent by the Passengers of the Masadam.

Rescued Just Before a Severe Gale Would have Destroyed Every One of Them—Bravery of Officers and Crew.

NEW YORK, Nov. 1.—Late yesterday afternoon the steamship Rhein, of the North German lloyd, arrived in the bay, bringing the passengers, crew and crew of the ill-fated Masadam, which was destroyed by fire on the 24th of last month. None of them were lost, and, strangely enough, the destruction of the vessel in which they started across the ocean has not detained them more than a few hours at the utmost, as the Masadam was due here yesterday. The party consisted of forty-five men, and the passengers numbered 141, of which number eight were cabin and the remainder steerage.

The rescued passengers number 103 adults and 21 children.

Capt. Van der Bee, of the Masadam, made the following statement: "On the 24th of the Masadam sighted cabin passengers, 133 steerage passengers and a crew of forty-five men. Nothing of importance happened until the morning of the 25th, when the first of the complaints had been made that the oil tank, situated under the bridge on the upper deck, was leaking. On that date, about 7 o'clock in the morning, I was awakened by the cry of fire. I sprang out of my bed and entered the room in which the tank is situated and began to look for the leak. A few moments after the cry of fire was heard, and from the vicinity of the oil room, and the sailor, his face burned and his beard singed, rushed out upon the deck and cried: 'Fire!' I at once knew that every effort to extinguish the flames, but were unsuccessful. Finding that the fire had the best of us, I ordered the boats to be made ready, and at 8 o'clock we placed all the passengers and crew in them and left the steamer. None of the baggage was saved. The Rhein picked us up soon after 9 o'clock. There was little room for the people on board. Therefore the passengers were too much frightened to say anything."

James Hoffman, a passenger on the Masadam, says: "The fire began about 7 A. M. There was much confusion at first, but the admirable conduct of the captain and crew helped to allay the excitement. The efforts at extinguishing the flames were limited, but the men worked well. When it became necessary to take to the boats, an officer was assigned to each boat, with orders that the women got in first, and that there were casks of water and biscuits provided. We floated about all night, and at dark began firing rockets and burning blue lights. When the Rhein came up, some of the women were so prostrated from anxiety and exposure that they had to be hoisted on board with ropes. The captain gave up his room to them and did everything to make all the rescued passengers comfortable. We saved everything that belonged to us. We were. I think we floated from 3 to 12 P. M."

Abraham Satt, of Montague, Mich., another passenger, says: "The fire and smoke were out from 1 to 10 P. M. The sea was quite rough. Many of the emigrants lost considerable sums of money. Satt's father had taken to have had $8,500 in gold in his trunk.

An officer of the Rhein says: "The sea was heavy. When we sighted the burning vessel we changed our course and ran down on her. The first boat we reached was the captain's. We picked him up with thirty sailors. Then we saved the officers and children. We soon came across the other five boats and took all the occupants off. Had they floated two hours longer they would have been lost. The fire was under control when we left. It was being fought by a steam ship could outride."

Castle Garden Superintendent Jackson says that the authorities will not allow any of the Masdam's passengers to suffer, but would assist and forward them to their destination.

Sir Moses Montefiore's Health.

LONDON, Nov. 1.—The friends of Sir Moses Montefiore are somewhat alarmed as to his condition, and his physicians fear that he is incapable of sustaining a severe illness on account of advanced age. He is suffering from an attack of bronchitis, caused by his exposure during the parade last Tuesday in honor of his centenary. The doctors have been compelled to take great care of his health, and he has not been any solid food for the past ten months.

The Duke of St. Petersburg recently arranged to give a ball in honor of the venerable philanthropist on the night of his one hundredth birthday. The duke stopped the preparations, and refused to allow any demonstration to take place. The reason given for their action was that any such large assemblage would tend to increase the anti-Semitic spirit among the people, and lead to dangerous riots.

Mr. McCulloch Qualifies.

WASHINGTON, Nov. 1.—Secretary Hugh McCulloch visited the treasury department this morning for the purpose of qualifying as guardian and a few others. The oath of office was administered by Mr. J. N. Fitzgerald, the appointment division. Secretary McCulloch was congratulated by a great many callers and telegrams. He will make public announcement of his future plans, and in the meantime, while not owning to pressure of business, he is unable to make personal acknowledgment to his correspondents individually. The heads of divisions were formally presented to the new secretary at 11 o'clock this morning by Assistant Secretary French.

Sensationalism and the Sabbath.

CINCINNATI, Nov. 1.—The synod of the Ohio Presbyterian church, now in session here, has under the report of the standing committee on the observance of the Sabbath and desecration, in which the following resolution occurs:

"That the increased desecration of the Sabbath calls for prayer and for united and vigorous effort on the part of all good and law-abiding citizens, to secure a faithful observance of the Lord's day, and to prevent the profanation of the Sabbath by the running of excursion trains, the opening of saloons, and the sale of intoxicating liquors as a beverage."

Under Christianity's Cloak.

PROVIDENCE, Nov. 1.—Rev. F. F. Southwick, who has been at the head of a series of revivals, and who has followed the clergymen and evangelists, has been arrested on a charge of obtaining money under false pretenses. Mr. Southwick came to this city, and an earnest Christian worker, was employed at his request by the committee having charge of the meeting to conduct the singing. Mr. Southwick's methods of raising money for the meetings were peculiar. He would pass a subscription paper around the audience, and then, after the collection had been taken up, would announce that he had received a telegram from some person in Fall River. A person from Fall River, of a similar name to the one mentioned, would arise in the audience and announce that he had sent the telegram. Mr. Southwick would then announce that the person had generously donated a certain amount to the meeting. The arrest was made on complaints of persons who claim that they were defrauded out of large sums of money, and that large sums had been expended for entertainments and convictions, yet no person was punished.

The minority admit that the star route frauds were stupendous and enormous, and that the conviction was not expected, but they deny that want of success was due to any lack of earnestness, sincerity or ability on the part of the prosecution.

A Miraculous Rescue.

UNIONTOWN, Pa., Nov. 1.—Jerry Bingner's house fell into Youngstown mine after the lake explosion was almost undermined. He was among the last brought out and was found after seven hours. He had pulled his head from the water and got a full mouth, and breathed with difficulty, but with kept the after-damp out of his mouth. When taken out he had a death grip on his coat and it could only be removed in strips.

The Price of November Coal.

PHILADELPHIA, Nov. 1.—The committee of the Lehigh and Schuylkill coal operators have agreed to make no change in the line and city and harbor prices of coal during November. It is understood that no change will be made in the southern prices, the shippers being satisfied with the present circular rates, which are said to be pretty firmly maintained.

THE CRIB CLUB

Open the Season with a Most Brutal Prize Fight.

BOSTON, Nov. 1.—The Crib club opened its winter season sport with three hard glove fights, one of which was the most brutal that has taken place in Boston for years. Billy Mahoney, master of ceremonies, and Edward A. Moseley, a wealthy lumber dealer, was time keeper. Jimmy Carroll, of Boston, and J. O'Neil, of Providence, and Tug Daly, Duffy and Ray Collins, local fighters fought drawn battles. George LeBlanche, "the marine," and Jimmy Coleman, who has stood up before Sullivan, were the principal fighters. In the first round lively and hard give-and-take fighting prevailed. In the second LeBlanche planted a heavy blow on his opponent's ribs and then swung his right on to "the marine's" optic putting it in mourning. He then brought a stream of blood from the latter's nose and fought "the marine" to the ropes. The latter swung his left, but, missing, fell to the floor just as time was called. When time for the third round was called both men were "groggy" and sparred for wind. Kelleher got in a blow that sent the marine to the floor. When he arose he rushed at Kelleher and gave him a right hander in the stomach, burning the tables in his favor. The fighting in the same groove as before up until time was called. Both were weak when they came up for the fourth round, but the marine had gained his second wind. He rushed at Kelleher like infuriated bulls, and when two minutes and forty-six seconds had passed they got to close quarters. "The marine" then delivered a terrific upper-cut which knocked Kelleher senseless to the floor. Patsey Sheppard and Dr. Bryant went to the rescue and with difficulty brought him to. The marine fought gamely, but was intense and the blue bloods of Boston went home highly pleased with the evening's entertainment.

SPECKLED BEAUTIES.

How the Artificial Propogation of Fish is Progressing.

WASHINGTON, Nov. 1.—Prof. Spencer F. Baird, United States commissioner of fisheries, has just returned from his labors connected with the artificial propogation of fish and the culture of the marine fauna of the North Atlantic coast. In the course of an interesting conversation in regard to the extent and nature of his work, he said:

"The shad and salmon hatching operated very successfully on the Potomac and Susquehanna this year. The supply of grown shad, however, was not as abundantas usual in the Potomac this spring as we have had them out, but they appeared in great numbers in the Delaware and Connecticut. It is probable that the larger number were shad hatched in the Potomac.

"How are the salmon and lake fish turning out?"

"The salmon in Maine is a success. The parties are now on the lakes, and we expect to take 100,000,000 eggs for propagation."

"What success has attended the stocking of the waters of the west?"

"The system of waters," said Professor Baird, "is so large that it would be impossible to gauge the increase. We hear of shad being caught, but could not say anything else than the shad placed there by the fish commission. To catch shad requires special training and special appliances. They might be passing in the ocean and the fact not be known to the people on the shore."

"How are the German carp progressing?"

"The introduction of carp has been an immense success. We are just beginning the distribution of this crop. Since this work began there have been from one to one hundred plantings in every congressional district, and, with few exceptions, in every county in the country. The carp grow in the same as poultry. They are liable to destruction by snakes and turtles."

Dr. Newman's Fighting Congregation.

NEW YORK, Nov. 1.—The old quarrel between the factions of the Madison Avenue Congregational church, of which Dr. John Newman has been the pastor, was again in the supreme court to day upon an order to show cause, which had been granted at the request of the pastor, why Dr. Newman, why he should not be restrained from acting as pastor of the church; why the trustees should not be restrained from employing him in any capacity; why they should not be suspended from their office as trustees or enjoined from interfering with the church property; why the seats of the property should not be appointed. By an arrangement between counsel the motion was adjourned for one week.

The Rhinelander Case.

NEW YORK, Nov. 1.—William Rhinelander, father of Wm. C. Rhinelander, who has been declared sane and who will be tried for trial for shooting lawyer Drake, has instructed the family lawyer, Mr. Condert, to withdraw the plea of insanity, and rest for his defense on the trial. He claims that in permitting the inquiry into the prisoner's sanity he was acting in his son's best interest. He also claims he established every comfort for his son in the Tombs. W. C. Rhinelander, on the other hand, claims to have been neglected and persecuted, and it is said that he will not consent to be released through his family's aid.

Respected Citizens Commit Perjury.

PLYMOUTH, Mass., Nov. 1.—Cyrus W. Ripley, Charles A. Cole, Levi E. Ford and Ichabod Peterson, respected citizens of Kingston, were arrested for perjury in that their sworn statement of Jan. 14, as officers of the Old Colony Cooperative association, misrepresented the affairs of the association. They pleaded guilty, and gave bonds in $1,000 each to appear on Wednesday. The store for several years past has been a general loan business. It was burned, building and contents, July 18, and a commission has since been investigating the cause of the fire.

Ran Off With a Child.

PAWTUXET, Nov. 1.—Henry Thomas Chandler, 35 years of age, who boarded at William Fuller's during the summer, on Oct. 4 accompanied the 14-year-old daughter of Mr. Fuller to Foxpaugh's circus, in Providence, and neither he nor the girl has returned. It recently been learned that Chandler left Foxpaugh, and it is supposed that he obtained employment with the circus and induced the girl to go with him.

Killed While at Work.

NEW HAVEN, Ct., Nov. 1.—John Joyce, an employe of the New Haven Clock company, was engaged in the boiler room about 1:30 P. M. in shifting a pulley, when he was struck by a part of the machinery and thrown against a stone tier in the room. He struck on his head. He died in about an hour later from contusion of the brain. He was 40 years old and leaves a family of nine children.

To Spread Humanity in the South.

BOSTON, Nov. 1.—George T. Angell will attend the meeting of the Massachusetts Society for the Prevention of Cruelty to Animals that the New Orleans exposition, with a view to founding similar societies in the southern and western states.

RATES AGAIN SLASHED.

The New York Central This Time Takes the Initiative.

And the West Shore Promptly Follows Suit, and Does a Little Better—Complications Likely to Soon Follow.

NEW YORK, Nov. 1.—The New York Central railroad took its first direct step in the railway war by reducing its rates to Chicago to $15 for first-class tickets and $10 for second-class. The reduction was expected for some time, as the road had not been getting its share of the business west, much of the travel, which is very light, going by the Erie and Pennsylvania lines. Soon after the announcement of the reduction of $1.50, as soon as the New York Central's announcement was made public the agents of the Chicago roads commissioned immediately reduced their rates to $13.50 and $12.50, the brokers, of course, following suit. The reductions apply to Chicago and points beyond. Lake steamers, the Michigan Central, Detroit, Cincinnati and Indianapolis, remaining unchanged. This decisive step by the Central is regarded as the beginning of a policy intended to force the issue between the warring roads to a settlement. It is estimated that the rate will be lowered as often as may be necessary to bring about the result aimed at, viz.: the adoption of a rule by all the roads with direct connections to Chicago, requiring a uniform rate of fare, and the abolition of the differential allowance made under the rules of the old pool agreements by the Pennsylvania and New York Central to the other roads.

The Pennsylvania has made no change, the decision on this point having to be made at the general office in Philadelphia. Unless rates go lower than $15 and $10, it is likely this road will maintain its rate, as it claims that it is getting a fair share of the current business, travelers apparently being willing to pay the difference for the better equipment of the accommodations provided. Should there be any considerable cut from ruling rates, the Pennsylvania will probably take part in the struggle and protect itself.

Among the brokers the announcement of the reduction by the New York Central was received with general satisfaction. The business has been injured by their adherence to the unwritten compact which they have observed with the roads since the beginning of the season, and which required the selling tickets at the same rates as those charged by the roads, much of the business has gone direct to the latter. They decided to no longer observe the compact, and they will return to their old custom and undersell the rates fixed by the roads. This done in regard to the reduction to all interior points, the cut averaging $1 from the schedule rates. Late in the afternoon they openly sold New York Central tickets at $14. That this will lead to further reductions by the roads is certain and the situation is one in which changes are likely to be made almost from day to day. The cut in rates was not made known by the Central or West Shore, but it material reductions are made in the through rates local rates will undoubtedly be affected also.

Business Failures Increasing.

NEW YORK, Nov. 1.—The business failures of the last seven days, as reported to R. G. Dun & Co., of the mercantile agency, indicate that the commercial embarrassments usually observed just before the close of the year has already set in. The number of failures in the United States during the week is 218, in Canada 30, a total of 248, against a total of 258 last week, and 216 the week before. The increase is noticeable in the Pacific states, the western and southern states, and Canada.

Washington Deserted.

WASHINGTON, Nov. 1.—There are neither Republicans nor Democrats left here now except a few Maryland and Virginia voters who came over to vote for Cleveland and Hunt. The Virginia Democratic voter will be provided with transportation free, through the efforts of Mr. John Barbour, member of congress from the Eighth district, chairman of the Virginia State committee, and president of the Virginia Midland road.

Stopped On by a Train.

NORRISTOWN, Pa., Nov. 1.—Mrs. Joseph Tyson, wife of a well-to-do farmer residing near Upper Merion, committed suicide by casting herself in front of an approaching train, a short distance above Gulagerville, on the Perkiomen railroad. Mrs. Tyson had been insane for some time, and had threatened several times to end her life in the manner as above described.

McCaffrey to Fight Sullivan.

PITTSBURG, Nov. 1.—In reply to John L. Sullivan's expressed desire to meet him, Patrick McCaffrey, who defeated Hall for $1,000 in a fight, telegraphs the following from New York: "I have posted $500 with Fox, of The Police Gazette, for a match to fight John L. Sullivan with bare knuckles for $5,000 and the championship of the world."

He Used the Bank's Money.

CHICAGO, Nov. 1.—About two weeks ago J. J. Baillie, bookkeeper for the National Bank of Commerce, was discharged for incompetence and gambling. It has been discovered that he had falsified his accounts and had appropriated to his own use in the neighborhood of $6,000 of the bank's money.

Assets Almost Nothing.

CANTON, Ill., Nov. 1.—The People's bank has succumbed to the inevitable. C. D. Baillie, the manager, claims that the bank is in a very bad condition and the accounts badly mixed. He estimated the liabilities at $100,000 and the assets at less than twenty-five per cent. of that amount.

Murdered After Selling a Horse.

QUINCY, Ill., Nov. 1.—Joseph Schatzer, a young man of Fowler, Ill., came here and sold a horse. He got drunk, and several men allured him across the river. His body was found in the woods, his face mashed and skull crushed. Detectives are at work on the case.

CONDENSED NEWS.

The post office department has decided that post offices must be kept open all day on election day.

Julia Ward Howe has been re-elected president of the Association for the Advancement of Women.

Jas. F. Joy has written an answer to Mr. Beecher's last letter. He denies all of Mr. Beecher's statements, and says he does not look any one in the face.

The earnings at Sing Sing, N. Y., prize for the month of October were $21,623.79; convictions, 218, 207, 69; leaving a profit for the month of $6,000.

Indignant citizens took Thomas Tracy, a citizen of Rochester, out of his house and soundly horsewhipped him, because he had been a little habit of ill-treating his wife.

Col. Stewart, who has been inspecting the Yellowstone park, under a commission from Gov. Hale, of Wyoming Territory, says there is no truth in the report that Crook is on the warpath, and that depredators are being driven out.

THE STANTON-NASH MURDER.

The Murderer Said to be Hiding in New York City.

NEW YORK, NOV. 1.—It is now certain that young Daniel R. Stanton, who shot and killed his schoolmate, Frederick P. Nash, in a lonely spot near Germantown, on the outskirts of Philadelphia, about four weeks ago, has been, since the commission of the crime, and probably is now, a resident of this city, though in hiding from the officers of the law. Since the murder he has written no less than three letters, all postmarked from this city, addressed to old friends of his family, and all indicating a desire to ascertain whether if he surrenders he would stand any chance of successfully defending himself against the charge of murder in the first degree.

The last of these letters was received by Prof. Buckiyn, of the Mystic Valley Institute, Mystic, Ct., which both Stanton and Nash attended as pupils. This fact becoming known to the chief of police, Kelly, of Philadelphia, a Philadelphia detective called on Prof. Buckiyn, on Sunday, the 26th inst., and demanded possession of the letter. Prof. Buckiyn declined to accede to the request, on the ground that the document placed him in the position of counsel for Stanton and that he had placed the letter in the hands of a lawyer, who it is presumed, has been engaged in Stanton's behalf. Photographs of Stanton have been forwarded to the chief of police of all the principal cities and towns in this country and Canada.

Inspector Byrnes, of the detective squad, declined to make any statement whatever regarding the case, except that he had been requested to aid the Philadelphia police in their inquiries.

AN ELOPEMENT'S SEQUEL.

The Daughter of a Wealthy Englishman Dying in an Almshouse.

PITTSBURG, NOV. 1.—A woman, aged 36, who is undoubtedly the daughter of a wealthy Englishman of high social position, is dying in the Pittsburg almshouse. Two weeks ago she sought admission. After a private audience with the poor board, to whom she told her story, she was placed there. She was born in Wolverton, England, and was the youngest of three children. At 16 she eloped with a family servant named Langdon. Her father disowned and disinherited her. When her child was born, he offered to rear and adopt it. As the husband was growing dissolute and neglectful, she consented, and then emigrated with her husband to Pittsburg with $1,000 given her by an aunt. In 1877, when times were hard and the money had been spent, Langdon deserted her. Since then she has lived in private families. Her brother, the head of the largest tool manufacturing firm in England, visited Pittsburg five years ago as a guest of the iron kings. As he passed through the streets in an open barouche his discarded sister watched him from the curbstone. Two weeks ago her health broke down and she sought shelter in an almshouse, with the promise from the poor board, who verified her story, that her name should not be told until after her death. She is rapidly sinking.

Milwaukee's Narrow Escape.

MILWAUKEE, NOV. 1.—This city had a narrow escape from another conflagration at an early hour. At 3 o'clock the head of one of the purifying boxes in the purifying house of the gas works blew off, and the explosion was so great that all the houses in the Third and Seventh wards were shaken as if by an earthquake. Window glass was broken in all directions within three or four blocks of the gas works. Immediately after the explosion the skies were brilliantly illuminated, and three fire alarms were turned in, causing great confusion and alarm. The escaping gas had caught fire, and it seemed for a while as if the whole works would be destroyed. Prompt action saved everything except the purifying house, which was destroyed. No one was injured by the explosion, although twenty men in an adjoining room had a miraculous escape from a horrible death. The damage is between $20,000 and $30,000, fully covered by insurance.

"Big Thunder" Dead.

TROY, N. Y., NOV. 1.—Peter Finkle, famous during the old "anti-rent" troubles as "Big Thunder," died yesterday at Schodack, aged 75. In 1844 he killed a man at a sheriff's sale and was sent to state prison for life, but was pardoned by Gov. John Young, who had been elected by the aid of the anti-renters. He claimed to have obtained the land he occupied by direct grant from the Indians, but was dispossessed by the supreme court, which held that the property belonged to the patroon, Stephen Van Rensselaer. Finkle has been in litigation over this land for thirty years.

Mutiny in New York Harbor.

NEW YORK, NOV. 1.—Capt. Beardsley, of the United States steamer Powhatan, in a report to the secretary of the navy, dated New York harbor says: "On the 27th inst., a signal of distress being shown on an English bark, anchored in the lower bay, the steam cutter of this ship, under charge of Ensign R. O. Dent, with a surgeon and five marines, was sent to render assistance. Mr. Dent found that the crew had mutinied, attacking the two mates with knives and pins, seriously injuring them. The ring leaders were arrested and given over to the police boat."

Gordon Surrounded by Rebels.

CAIRO, NOV. 1.—The government has received trustworthy advice to the effect that on Sept. 28 there were 40,000 rebels surrounding Khartoum, and that active preparations were being made to attack the place. No official information has been received confirmatory of the native reports that Khartoum has fallen into the hands of the rebels, but the above advices cause much uneasiness in government circles, and every effort is being made to obtain further news from Gen. Gordon.

Trouble with Canadian Red Men.

OTTAWA, NOV. 1.—At the request of the Dominion government a British war vessel has proceeded to the Indian mission at Metla Katla, B. C., where trouble between whites and Indians has been brewing for some time. The chief cause of the trouble is the arrest and conviction of an Indian for murder and an attempt of Bishop Ridley to remove Rev. Mr. Duncan, a missionary at whom the natives have implicit confidence.

Henry George Goes to Scotland.

NEW YORK, NOV. 1.—Henry George sailed for Europe to-day on the steamer Germanic. He goes abroad upon the invitation of the Scottish Land Restoration league, and will speak chiefly in Scotland. His tour will extend from Nov. 12 until about the month of January. Mr. George will return to the United States the latter part of January, when he will lecture in this country.

A Sixty Foot Whale.

THOMASTON, Me., Nov. 1.—A whale sixty feet long and six feet across the tail was found on the shore of Mosquito, St. George, Thursday morning. It is believed to have been driven on shore Wednesday night. It is being cut up and tried out.

How to Come to American Headquarters.—Nov. 1.—It has been discovered that Scott, the clerk of the Merchants' bank, who disappeared recently, stole no express package containing $4,000.

A NEW PAVEMENT.
The undersigned has secured the exclusive agency for the sale of the
Diebold Patent Iron Stone,
which for elegance and durability, is unsurpassed, and in price will compare favorably with any other pavement now in use. It is the most beautiful pavement for carriage ways and vestibule entrances, floor tiling and street blocks. Also used to build fire and burglar proof vaults, and for building purposes generally. These pavement blocks have many striking excellencies. They are perfectly even; are non-conductors; repel ice and snow, as well as all kinds of moisture. When dampened are not affected by the ordinary brick, the material remains perfectly free from it. These Blocks are cast 1 to 12 the molten Iron Slag of the Iron Furnaces, and can be seen on exhibition at Warner's Fancy Store, opposite Millman Music Hall. For further particulars call on or address

THE VANDERBILTS.

A Domestic Group of the Family of Railroad Magnates.

WILLIAM H VANDERBILT

Mr. Wm. H Vanderbilt, whose wealth exceeds $200,000,000 and who controls more miles of railway than any other man in the world, is a native of Staten Island, N Y., and is about 60 years of age. His life has been comparatively uneventful only in the fact that he fell heir to the greatest fortune ever acquired in this country. His recent gift of $500,000 as a building fund to the College of Physicians and Surgeons of the city of New York is an agreeable surprise to the public, and may be the forerunner of greater benefactions which will bring honor to the name of Vanderbilt.

Who Resides in a $2,500,000 House.

CORNELIUS VANDERBILT

Mr. Cornelius Vanderbilt is the chairman of the board of directors of the New York Central and Hudson River railroads, in appearance and characteristics he resembles his grandfather, the founder of the Vanderbilt fortunes. He is living in a palace, which cost $2,500,000 and to secure the site of which he purchased and razed to the ground two new houses worth $300,000. He is the most clear-headed and affable member of the Vanderbilt family.

A Son of His Father.

WILLIAM K. VANDERBILT

Mr. W. K. Vanderbilt owns the most beautiful house exclusively in America. It is of white stone, and built in the style of the French renaissance. In this reside-nce have been held some of the most magnificent entertainments. Mr. W. K. Vanderbilt is in disposition and appearance considerable like his father, William H. Vanderbilt. About a year ago he became chairman of the board of directors of the Lake Shore and Michigan Southern railroad, on the abdication of that position by his father.

Taking Care of the Sick.

[New York Sun.]

"Oh, dear," sighed a farmer's wife, wearily, as she dropped into a chair after a hard day's work, "I feel just as if I were going to be sick. My head throbs, my back aches dreadfully, and—"

"By gosh," interrupted the farmer, starting up and seizing his hat, "that reminds me. I forgot to give the two-year-old colt his condition powders to-night, an' she's been a wheezin' all day," and he hurried to his barn.

A Venerable Historian.

GEORGE BANCROFT.

Mr. Bancroft, who recently celebrated his 84th birthday in excellent health, is a native of Massachusetts. He graduated at Harvard and pursued a course of three years further study in Germany. On his return to this country he contemplated entering the ministry, but settled down to a literary life. His principal work has been his history of the United States, the first volume appearing in 1834, and the tenth and last forty years later. At times he has taken a lively interest in politics; was collector of the port of Boston in 1838, secretary of the navy under Polk, minister to England in 1846, to Prussia in 1867, to the North German confederation in 1868, and to the German empire in 1871. He is still engaged in literary labor.

"Phil Fool Him Yet."

[New York Star.]

Henry E. Dixey, the comedian, at the commencement of his current engagement in this city, took board at a Broadway house near the theatre. He wrote his name on three lines of the register, after the modest manner of his actor, and then the clerk put down the number of the room assigned to the guest. Simultaneously a huge mosquito alighted on the page, straddled slowly to the figure-4 and stood still by them. Dixey gazed in affected alarm, and held his dramatic attitude until the insect flew away.

"Phil fix me, you see," exclaimed the change my room.

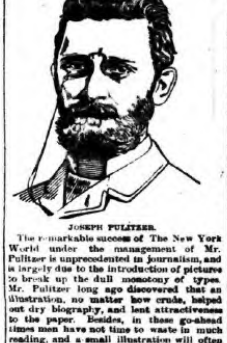
"Grace Greenwood."

MRS SARA J. LIPPINCOTT.

well-known in literature as "Grace Greenwood," born in Onondaga county, N. Y., Sept. 23, 1823; was the daughter of a distinguished physician, Dr. Thaddeus Clarke. She published occasional poems from a very early age, but her first prose sketches appeared in The New York Mirror and The Home Journal. She also contributed much to The National Era, Washington, and to The Saturday Evening Post and Graham's and Godey's magazines, Philadelphia. In 1850 many of these sketches and letters were republished under the title of "Greenwood Leaves." In 1853 she married Leander K. Lippincott, Esq., and for several years devoted herself to juvenile literature, publishing nearly a dozen books for children in which historical information was conveyed in an exceedingly happy manner. Her volumes intended for older readers number seven, the last, entitled "Victoria, Queen of England" was published in 1883.

Mrs Lippincott has of late been unknown as a journalist, having contributed much, chiefly as a correspondent to leading American weekly and daily papers and also occasionally to leading London publications. She is now residing in Europe for the benefit of her health and for her daughter's education in music.

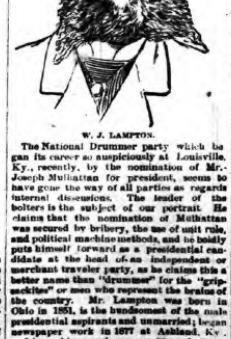
Proprietor of the New York World.



JOSEPH PULITZER.

The remarkable success of The New York World under the management of Mr. Pulitzer is unprecedented in journalism, and is largely due to the introduction of pictures to break up the dull monotony of types. Mr. Pulitzer long ago discovered that an illustration, no matter how crude, helped out dry biography, and lent attractiveness to the paper. Besides, in these go-ahead times men have not time to waste in much reading, and a small illustration will often tell at a glance more than columns of type. With these facts in view, Mr. Pulitzer has in one year raised The World from one of the poorest to one of the best newspaper properties in New York. When Mr. Pulitzer arrived in this country about twenty years ago he could not speak a word of English and was not overprovided with means. At present he is also owner of The St. Louis Post-Dispatch and a candidate for congress from New York City. How this has all been accomplished his appearance shows, for he is the personification of indomitable energy and pluck.

Editor of The Merchant Traveler.

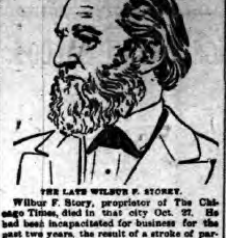


W. J. LAMPTON.

The National Drummer party which began its career so seriously at Louisville, Ky., recently, by the nomination of Mr. Joseph Mulhattan for president, seems to have gone the way of all parties as regards internal dissensions. The leader of the bolters is the subject of our portrait. He claims that the nomination of Mulhattan was secured by bribery, the use of unit rule, and political machine methods, and he boldly puts himself forward as a presidential candidate at the head of an independent or merchant traveler party, as he claims this a better name than "drummer" for the "grip-sackites" or men who represent the brains of the country. Mr. Lampton was born in Ohio in 1851, is the tenderfoot of the male presidential aspirants and unmarried; began newspaper work in 1877 at Ashland, Ky., and here his experience as a "traveler" was earned in drumming up subscribers to his paper. He is a member of the same church as Mulhattan, but claims to be a better Christian. He is genial and will continue editor of the Merchant Traveler unless called to the presidency.

New York Journal: Bankers' sacks will soon be ripe.

A Veteran Editor Gone.



THE LATE WILBUR F. STOREY.

Wilbur F. Storey, proprietor of The Chicago Times, died in that city Oct. 27. He had been incapacitated for business for the past two years, the result of a stroke of paralysis received while in Europe four or five years ago. Mr. Storey was born at Salisbury, Vt., in 1819. His ancestors were also those of the great Chief Justice Storey. At the age of 19 he entered the office of The Middlebury (Vt.) Free Press as a printer's apprentice and there he remained for five years. Thence he went to New York and worked for a year and a half at the case in the office of The Journal of Commerce. In 1838 he went west, first finding employment at South Bend, Ind. Later he appeared as business manager, owner and editor of the Detroit Free Press. His next move was Chicago, where he made arrangements to purchase The Times. He sold The Free Press for $60,000 and carried out this scheme. He found The Times with old type, slow presses and no facilities for printing a first-rate paper, but as rapidly as possible he bought presses and material, and when the great fire of 1871 came it was one of the best equipped newspapers in the country. The fire wiped the property out of existence for the time being, but a new building was quickly erected and the paper was soon better equipped than ever. Mr. Storey spent vast sums in making his paper a thorough vehicle of news, his telegraphic bills increasing from $35,000 in 1872 to $105,000 in 1873. The cost of single years' improvements was $103,000. Several years ago his mind began to fail, and within a few months his relatives began against him legal proceedings, which terminated in placing his estate under their control.

A Texas Rip Van Winkle.

JUDGE A. B. NORTON

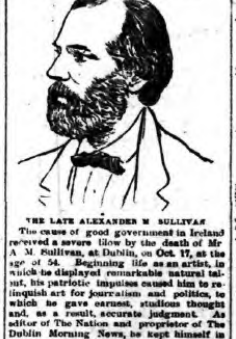
one of the living examples of the foolishness of many pre-election bets, or vows, is that of the editor of The Intelligencer, of Dallas, Texas, who made a vow in the dim distant past, to let neither shears nor razor come near his hirsute excrescences till Henry Clay had been elected president. He is now the Republican candidate for governor of Texas, and will be defeated, as the ladies will not allow themselves to be kissed by him, while on his stumping tour.

An Appropriate Hymn.

[Christian Standard.]

At a recent Sunday school meeting in Chicago a long-winded clergyman consumed too much of the time with a wordy address. When beast down the leader of the meeting unwittingly announced the hymn beginning, "Hallelujah! 'tis done!"

A Patriotic Irish Statesman.



THE LATE ALEXANDER M SULLIVAN

The cause of good government in Ireland received a severe blow by the death of Mr A M. Sullivan, at Dublin, on Oct. 17, at the age of 54. Beginning life as an artist, in which he displayed remarkable natural talent, his patriotic impulses caused him to relinquish art for journalism and politics, to which he gave earnest, studious thought and, as a result, accurate judgment. As editor of The Nation and proprietor of The Dublin Morning News, he kept himself in the front as a leader of Irish thought and a moulder of opinion. He was a member of parliament for eight years, and one of the founders and the best advisers of the land league, believing as he did that it was only through practical agitation, within the law, that the grievances of his country could be remedied. An evidence of this was shown in his opposition to the Fenian conspiracy. In 1861 Mr. Sullivan married a New Orleans lady, who, with her eldest daughter, accompanied him on his last visit to the United States in 1882.

Getting a Picture Taken.

[New York Sun.]

"Now," said the photographer, taking hold of the cloth over the instrument, "are you ready?"

"Yes," replied the customer.

"Well, just keep your eye on that [illegible]," pointing to a legend on the wall which read "Positively No Cheating—and don't please."

Reciprocity.

[Life.]

Think not the girl you love, loves not,
Who loves, depend upon it;
With willing heart she'll share your lot—
If there's a building on it.

Signal Office Prediction.

Fair weather, northeasterly winds, shifting to east and south, a slight fall, followed by slowly rising temperature, rising, followed by falling barometer.

Chronological Events.

Nov. 2. The Erie canal began in 1825. St. Johns captured in 1775.

JOTTINGS.

—Common Council meet to-night.

—Republicans and Democrats parade to-night.

—Changes on your local ticket should be made in ink.

—Election returns will be received at Daly's City Hotel to-morrow evening.

—There will be trotting at the Fair grounds to-morrow afternoon at three p. m.

—Returns to-morrow night will be shown with a stereoptican, interspersed with comic pictures.

—Lincoln Club members report that there was a very unpleasant time in the Republican parade at Somerville.

—Hot coffee will be served free all day and evening Tuesday at the Holly Tree Inn by order of the President W. C. T. U.

—Cordial invitation is given to attend the monthly meeting of the W. C. T. U. at Reform Hall to-morrow afternoon at three o'clock Mrs. W. B. Maxson, Secretary.

—A German citizen called on us to-day to say that the statements of Eli Perkins published on our second page Saturday, about the hardships of German girls in Germany was incorrect.

—A young lady having a tight hold on the arm of a young man was inquiring at the drug stores last evening for a plain gold ring, and very much blushed when one druggist asked her if a key ring would answer.

—The friends of the temperance cause are solicited for donations of cuff or to supply the free coffee to-night and all day to-morrow, and to be delivered at Holly Tree Inn. Mrs. W. B. Maxson, Secretary W. C. T. U.

—St. Mary's Fair closed Saturday evening to reopen again Wednesday. A handsome wax doll was won by Miss Annie Fitzgerald, a pin cushion by Miss Maggie Savory, the parlor lamp for the gold-headed cane will be decided Wednesday evening.

—The ladies who helped serve refreshments after the Republican parade of Oct. 16, stood ready to assist in serving the Democrats this evening, but, on account of the short notice, request us to express their regrets that nothing can be done.

—At a meeting of the Y. M. C. A. Literary and Debating Society, held Saturday evening, Nov. 1st, the following officers were elected for the coming term: J. Ulrich, President; P. L. Willis, Vice President; *T. N. Horn, Secretary; T. Raymond, Treasurer.* Applications for membership will be received by the Secretary.

—The nomination of Jacob Kirkner of Plainfield, Republican nominee for Assembly from the Third District, is conceded to be a strong one, and *he will poll his full party* vote, and by reason of his personal qualifications, worth, and popularity will draw not a little from the Democratic ranks.—Rahway Advocate.

—The comic opera of the "Beggar Student" will be given by Thompson's Opera Company at the Stillman Music Hall on Saturday evening. This opera has had a long run in the various European capitals, and is now being performed in New York to crowded houses. Seats can be obtained at Reynold's and Shaw's drug stores. The sale has already been large.

—During the intermission at the grand ball to be given at the Casino by Engine Co., No. 2, the two hundred dollar organ will be drawn for. A small girl will be selected from the audience and blindfolded. The tickets will be put in a large box, and the box will be well shaken. The blindfolded girl will then draw the lucky number. A silver caster will also be given the best lady and gentleman waltzers.

Republican Parade To-Night.

According to previous announcement the Republican clubs of this city will parade this evening. The line of march will be the same as heretofore given the public for this evening's parade and is as follows:

The column will form on North avenue, with right on Park avenue, *and, march as follows:* To Front, to Washington avenue, to Willow, to Sycamore, to Mercer, to Rockview, to Washington, to Linden, to Duer, to Craig Place, to Somerset to Front, to Washington street, to Second, to Peace, to Fifth, *to Franklin avenue, to Ninth, to Park avenue,* to Crescent avenue, to Seventh, to Central avenue, to Fifth, to Liberty, to Second, to Park avenue, to Front and dismiss.

Line of March of Democratic Parade To-Night.

The line of march for the Democratic parade to take place this evening is as follows:

Line form on Somerset street, right resting on Craig Place, and proceed as follows: Somerset to Linden avenue, to Grove, to Front, to Richmond, to Fifth, to Sycamore street, to Sixth, to Peace, to Broadway, to Ninth, to Park avenue, to Crescent avenue, to Seventh, to Liberty, to Front, to Central avenue, to Fifth, to Park avenue, to Front and dismiss.

PROTECTION TO VOTERS.

To protect readers of the NEWS from having spurious tickets imposed on them, we present all the tickets in the field. Take a copy of the News and compare it with the ticket you want to vote.

Republican Nominations.

For President, James G. Blaine, of Maine.
For Vice President, John A. Logan, of Illinois.

People's National Ticket, Somerset County.

For Member House of Representatives, Aaron W. Davis.
For State Senator, No Nomination.
For Member of the General Assembly No Nomination.

CASINO RINK OPENING.

A Grand Success.

Stirringly evening about one-thousand persons attended the opening of the Casino Rink, at the corner of Grove street and Craig Place, and the occasion was one long to be remembered.

The approach to the Rink was festooned with Chinese lanterns, presenting a very pretty effect, and as one neared the building the sounds of the roller skating rose mingled the sounds of a surging sea.

Inside the rink, which was brilliantly lighted with eighty-five argand burners, between 600 and 800 persons were on roller skates moving gracefully and in one direction around on the spacious floor, keeping time in their swaying movements to the music of the full band, which occupied a raised platform at one end of the building.

That the sport was in an eminent degree exhilarating and healthful was evident by the sparkling eyes, rosy cheeks and happy smiles of the handsome young ladies and those not as handsome or young, and by their escorts, among the skaters, while the spectators seemed fully as happy.

Briefly the opening was a grand success, and augurs well for the permanency of the institution, which while conducted as at present cannot fail to meet with hearty encouragement from the people of this vicinity.

About nine o'clock a bell was rung as a signal to clear the floor for exhibition skating by Miss Elna McKibbins and Master W. Ike Hyde, who for the next half hour displayed the possibilities of roller skating, performing feats such as standing on the toes on the skates and picking up handkerchiefs from the floor, skating together around the rink each carrying a glass of water on their heads and showing how gracefully a couple may skate together. They evoked much applause, and are to repeat their exhibition this evening.

The *building of the Casino Rink* was begun last September. The lot on which it stands is 102x230 feet, and the building has a frontage on Grove street of 90 feet, extending along Craig Place 155 feet. The building is 35 feet high. Inside, the space for skaters covers an area of 55x145 feet, or nearly 8,000 square feet. The first layer of the flooring consists of two inch plank, covered with tarred paper, on which is laid the skating floor, which is made of hard maple, four years old and kiln dried, cut in strips, two and a half inches wide, and nailed with steel nails. When entirely finished the floor will have been planed and cross planed, scraped and sand papered.

On each side of the skating space is a wing eight feet wide, provided with chairs. Both wings have a seating capacity for 1,000 persons. *There is also* a gallery near the entrance, from which a fine view of the rink is obtained.

Besides the main room, there is a ladies' parlor, a gentlemen's room, a cloak room, a skate room, refreshment rooms and an office.

The entire rink is patterned from best models in the country, and arranged with every convenience for the pleasure and comfort of patrons. Read the announcement for this evening.

The proprietors of the Rink are Messrs. R. Jones and M. Decker. Mr. C. L. Skinner is manager.

Opening of the Plainfield Bicycle Club Rooms.

The new rooms of the Plainfield Bicycle Club, over the Stillman Music Hall, were opened on Saturday evening, when a regular "house warming" took place, a large number of the wheelmen being present, brimful of health and good-nature, and evidently intent on honoring the occasion in a manner in accordance with ideas most agreeable to the gentlemen composing the club.

The committee to decide as to who should be the possessors of the medals awarded to those making the best record, met at eight *o'clock, when it* named as the winners Mr. D. M. Runyon, Mr. R. Pound, Jr., Mr. A. L. C. Marsh and Mr. J. H. Cooley, who accordingly received them in a manner befitting the occasion. The medals are very handsome, of silver and gold, set with a ruby, and enclosed in a morocco case.

At the conclusion of this part of the business, the inner man had to be attended to, and the bountiful collation, in the shape of cake, lemonade, etc., etc.,' was attacked with a courage worthy of these exponents of muscular development. The NEWS representative didn't escape either, for he was seized, quicker than it takes to tell it, by the arm by the genialemanly President and led up to the tempting and well-laden board, where he had to assist in the attack on the edibles with the same degree of rapidity as the "other fellows."

General congratulations followed, when each member wended his way to his home, bearing with him pleasant recollections of *the evening spent in his future retreat.*

The following is a list of the records made, which is indeed very creditable, and not to be surpassed by any other club in the State:

For six months—D. M. Runyon, 3,008
" " " R. Pound, 1,650.
" " " A. L. C. Marsh, 1,466.
" " " J. H. Cooley, 1,141.
" " " H. Serrell, 887 1-2.
" " " T. S. Burr, 793.

For 24 hours—A. L. C. Marsh., 150.
" " " J. H. Cooley, 140 1-2.
" " " R. Pound, 136 1-2.
" " " T. W. Yates, 120.

—Mr. Jacob Kirkner, a resident of Plainfield *for over twenty years*, has been nominated by the Republicans. His personal worth and his well known integrity and ability entitle him to the support of every lover of good government irrespective of party.—Rahway Advocate.

A Sensible Man.
Would use Kemp's Balsam for the throat and lungs. It is curing more cases of coughs, colds, asthma, bronchitis, croup and consumption than all other remedies. The proprietors have authorized R. J. Shaw, Front street opposite Park avenue to refund your money if after taking three fourths of a bottle, relief is not obtained. Price 50 cents and $1. Trial size free.—Adv.

Special Notices.

THE BLAINE and LOGAN CITIZEN'S CLUB will assemble this evening at the Lincoln Club Rooms, 25 in number to take part in the parade.
E. R. Stevens, Sec. Wm. Adams, President.

DIANO LESSONS—MISS NETTIE MATTISON is now prepared to give piano instruction either at her own or at the pupil's residence. Refers to Mr. S. V. Woodruff, proprietor of Hotel Netherwood, and to others. P. O. Box, 1581.

DRAWING AND PAINTING IN ART.
No. 7 East Front street. I am now prepared to open classes in drawing, painting in oil, crayon, etc., from nature and from copy. Studio at Room No. 7 East Front street (over Dr. Shaw's Drug Store.) Terms satisfactory.
My method of teaching is considered much easier than the old in anyone with taste for art can learn to *sketch and paint from nature in a very short time* and with less expense and less study. Everything made perfectly clear to the understanding of the pupil. Special inducements to teachers in the public schools. Private lessons where desired. Pictures for sale and to rent to order. Very Respectfully,
MRS. H. H. JOHNSON.
Orders or calls at Park House will be received with pleasure.

Diplomats at Washington.

[Washington Cor. Baltimore American.]

The diplomatic circle in Washington is a pretty wide one, and very interesting to those permitted to see the inside of it. It is exclusive, vicious, except in the few who are brought in contact with it, either in official or social relations. Your average diplomat is fond of society and its leaves and fishes. He is quite at home at a ball or brilliantly as the most favored, and can do as ample justice to a "small" dinner as any. Yet, aside from state occasions, formal events in the foreign circle are few, and all the published accounts, the foreign representatives here are little known, except among themselves. Their personal relations are purely confined to their own circles.

"Your average diplomat," said a gentleman thoroughly acquainted with their ways to your correspondent, "is not nearly so much a social person as he is given credit for in papers. There are three or four in the large diplomatic circles here who entertain largely, but that is all. Of the representatives of all the civilized countries there are not a half dozen who give more than perhaps a couple of entertainments a year. Of course, they go and come, and their names are in print often enough, but that is only to keep the idea that they are always entertaining or being entertained, but that is a mistaken idea. Indeed, a majority of them do not get salary enough to do so, even if their inclinations led them in that direction. There are, perhaps, a half dozen whose governments allow them to entertain largely, but they do not entertain largely. Of course, they go where they are invited, but they are not expected to entertain lavishly in return."

Portrait of the Big Farmer.

[Buffalo Express.]

He was a tall man, with rather sandy and long hair and an iron-gray chin whisker. He wore a linen suit of diminutive and yellowish-brown slouch hat. There was a red buttonhole bouquet in his coat lapel. His stand-up collar was surrounded by a black tie, continuing from which was a gold chain hung from the second buttonhole of his vest. As he walked up from the Western Union office he jogged along carelessly, looked neither to the right nor the left, but seemed engaged in a sort of communion with himself. The man was Mr. Oliver Dalrymple, the chief of the Dalrymple ring in the United States. Mr. Dalrymple, although he lives in St. Paul, Minn., confines his farming operation to Dakota, where in Cass and Trail counties he has two distinct farms of 20,000 acres of as fine wheat land as the sun ever shone upon. The product, as indicated by that so far threshed, will be about 600,000 bushels this year. Mr. Dalrymple supplies in his farming operations 1,000 men, 800 horses and mules, 200 self binding reapers and 30 steam threshers.

Paddling Around New York.

[New York Times.]

There is not a city in the world, probably, which can claim such a variety of cruising waters and charming scenery in its immediate neighborhood as New York itself. First of all, paddle from Manhattan island, a little over thirty miles, and the space of life will be yours—if that is "variety." Take a day to do it in, and study the tides, so no adverse currents will have to be overcome. The trip can be made by starting from the Battery at the right stage of tide, so that a strong current will be under the canoe all the way around, and with fair luck—wind and weather—the whole distance can be made in from five to six hours.

Sitting Bull's real name is Tatanka-Yotanka.

CLEVELAND'S DAY.

Hours Spent in Reviewing New York Democrats.

Tammany's Big Parade—John Kelly Greets the Governor—Ex-Senator Conkling's Peculiar Actions. What He They Mean.

NEW YORK, Nov. 3.—As early as noon Saturday crowds of people were met hurrying to and fro in the vicinity of Madison square and seeking points of vantage on doorsteps and at the curb to view the great parade. As the hour appointed for the review arrived the crowd grew more dense until at 3 o'clock the entire space between Twenty-third and Twenty-sixth streets and Broadway and Madison avenue was a vast field of human heads, in the middle of which was swung an electric lamp, which was lit up after dark and threw a brilliant glare over the crowd. At 4 o'clock Governor Cleveland crossed from the Hoffman house, leaning upon the arm of Gov. Abbett. His appearance on the stand was followed by cheers. The cheers which broke up at the first view of Mr. Cleveland kept on increasing until a squad of mounted police rode up Broadway and cleared the way for the parade.

In their wake came Gilmore's band of fifty pieces, leading the Wholesale Dry Goods Boulders' Cleveland and Hendricks club, under command of Major Cady, chief of the firm of Tefft, Weller & Co., and Marshal Thomas F. Cullin. The various divisions of the club aggregate, according to Marshal Cullin, an aggregate of 10,000 membership of 10,171 Democratic voters. While the club was being reviewed, a color sergeant approached the grand stand bearing beautiful silk banner, which he laid at the feet of Mr. Cleveland.

During the passage of the dry goods dealers the crowd became so dense that the marchers could not keep step. Then in rushed

THE RAILROAD WAR.

Baltimore and Ohio's Strategy Shown Against the Pennsylvania.

BALTIMORE, Nov. 2.—The practical cut in the western rates embodied in the direct issue made by the Baltimore and Ohio road against the Pennsylvania in combating the policy of forcing excess rates on fast trains has stirred up things in railroad circles here and in Washington. When the trunk line pool was in force the Pennsylvania company allowed the Baltimore and Ohio a differential rate as against that exacted on the noted limited trains, permitting the sale of tickets at a lower rate than charged on the limited. By the new schedule on the Baltimore and Ohio the time made by its limited train from Washington is four hours and a half faster to St. Louis than the Pennsylvania limited, four hours faster to Cincinnati, an hour and a half faster to Pittsburg, and a half hour faster to Chicago. On the Pennsylvania limited the charge in excess of the regular ticket rate is $8 from Baltimore and Washington to Chicago, Cincinnati or St. Louis—one-half for sleeper, which must be taken, and the other half extra fare. On the Baltimore and Ohio, limited, not a penny additional is exacted, and the passenger takes sleeper or not, as he pleases. This policy of the fastest time and no extras is a cut in reality in rates and one at the same move, and is the first evidence of open hostilities from either this city or Washington, notwithstanding the demoralization elsewhere. The business westward out of the two cities is very large, and the counter action of the Pennsylvania is waited for with no little interest.

And Still Lower the Rates Go.

NEW YORK, Nov. 2.—The New York Central Railroad company made a further reduction of its through passenger rates by lowering the rate to Chicago another $1.50 to $15.50. This cut was promptly met by the West Shore and the Erie, which put their rate down to $13. These companies maintain that they are entitled to a differential rate that will make their tickets $1 50 below the Central, and they propose to keep lowering their rates on that basis as fast as the Central does. The ticket scalpers are getting excited because the companies are making the reductions at their own offices, and time, of course, interfere with the profits of the scalpers. The latter predict that the rate to Chicago will be down to $8 early this week, and say they will sell below the companies.

THREE TIMES BURNED.

Montcbo's Attorney General the Victim of Mob Law.

WINNIPEG, Nov. 2.—The most remarkable scene ever witnessed in the northwest occurred here Saturday night. The city had been silenced all the evening with the shouts and noise of an angry mob. On Thursday, by order of Attorney General Miller, John McCormick, from Dakota, who was sent to jail for eight months for larceny, was taken out in the jail yard, tied up to a triangle, stripped, and flogged with a cat of nine tails because he made an attempt to escape from the guard when the latter was not looking. Public indignation against Miller was so great that 5,000 citizens assembled and hanged and burned him three times in effigy, singing, "Hang Judge Miller to a sour apple tree."

A procession then formed, marched to the jail, and demanded the person of McCormick, but the authorities would not deliver him up. The mob then ransacked and blazed for half an hour, and then went to the government building and demanded that Miller be produced. Premier Norquay came out and addressed the crowd, saying that the government would give a proper account of its position to the public in a few days, when the blame would be put upon the proper shoulders. The crowd howled for Miller, but it was announced that he had fled the city in the afternoon. He was seen to take a train for St. Vincent, Minn.

When the mob was at the government building, the militia, with fixed bayonets, marched up and attempted to disperse the crowd, but without success. The streets were paraded by the mob, howling for satisfaction, until a late hour.

He Left the State.

DES MOINES, Ia., Nov. 3.—In June last, as a circus company showing at Rock Rapids, Ia., was a man named Robinson, an all lover of the wife of Herman Burnhantz, a resident of Rock Rapids. Four days after the circus left, Burnhantz died. His wife soon afterward went to Chicago, where she married Robinson, and they were married. This week the couple returned to Rock Rapids to live. On Wednesday night about 400 citizens went to their house, destroyed it and the contents, put a rope around Robinson's neck, and would have hanged him had he not promised to leave the state at once, which he did.

A Father's Fatal Carelessness.

BALTIMORE, Nov. 3.—Mary C. Clifford, age only 2 years, went to sleep in her father. Mr. Clifford always sleeps with a revolver under his pillow, and when he arose he neglected to remove it. About an hour after the family were alarmed by a loud report, and hurrying to the bedroom found the child lying on the floor with a large hole in her head through which her brains protruded. Death was instantaneous. The child had found the weapon, and in playing with it killed herself.

Nineteen People Injured.

MANSFIELD, O., Nov. 3.—Passenger train No. 1 on the Baltimore and Ohio railroad, run here at 5:58, jumped a frog near Alta, Ohio, while going at the rate of forty miles per hour. The first two cars were not damaged, but the third car struck a freight car standing on a siding, and the cars following were telescoped and totally demolished. No one was killed, but nineteen people were injured.

The Ex-Gov. and Spiritualism.

LONDON, Nov. 3.—The recent spiritualistic seance at which Mr. Gladstone and four ladies of the nobility were the only spectators has been the cause of much chaff at the premier's expense. The report that he is a convert to spiritualism is denied by the Tory papers, but they say it should cause no surprise, as his mind has always been alive to the clouds in political affairs.

Victoria Morosini Annoyed.

NEW YORK, Nov. 3.—It is reported that Mrs. Schalling (Victoria Morosini) has been greatly annoyed by the receipt of several anonymous, scurrilous letters. She and her husband have been living quietly on West Twenty-second street to avoid notoriety. Mrs. Schalling, it is said, intimates she knows the writer of the letters.

Seven Thousand Cholera Victims.

NAPLES, Nov. 3.—After lasting seventy-four days, and causing the death of 7,025 persons, the cholera epidemic in this city seems to have disappeared. No new cases or deaths were reported yesterday.

Mission Day Treaty.

NEW YORK, Nov. 3.—The federal and state officials have signed an agreement to prevent a conflict of authority between the police and United States marshals to-morrow.

A NEW PAVEMENT.
The undersigned has secured the exclusive agency for the sale of the
Diebold Patent Iron Stone,
which for elegance and durability, is unsurpassed, and in price will compare favorably with any other pavement now in use. It is the most beautiful pavement known for walks and yards, gutter pavements, floor tiling and street blocks. Also used to build fire and Burglar proof vaults, and for building purposes generally. These pavement blocks have many striking peculiarities—They show no perceptible wear; are non-conductors; repel ice and snow, as well as all kinds of moisture. When dampness accumulates on the ordinary brick, this material remains perfectly free from it. These Blocks are cast in the molten iron Slag and Furnace of which may be seen on exhibition at Warner's Fancy Store, opposite Stillman's Music Hall. For further particulars call on or address
W. H. WARNER,
31 1-2 West Front street, Plainfield, N. J

PREPARING JOHNSTON

For Pacing a Mile in Two-Six and One-fourth.

An Interesting Interview with John Splan on His Training—A Trainer Who Is Willing to Learn.

[Chicago Tribune.]

"Tes," said John Splan, the driver of Johnston, when referring to the *wonderful mile* which his horse paced at the Driving park recently, "it seems like a wonderful thing for a horse to go as fast as that, and yet it has been my opinion all along that Johnston could be got to beat 2:08. Of course I didn't know to a certainty that he could do it, because I had not driven him a mile at anything like that rate of speed, but from what he had shown me for a fraction of the distance it seemed as if he ought to beat 2:10 quite a little bit."

"Then you had never tried him very highly?"

"No. In training horses, as in anything else, you can't have your cake and eat it too. It has always been my idea that in order to get the very best work possible out of a horse he should never be driven so fast or so much as to get sick of the work himself. I remember well enough that the winter after I got Rarus this fact was impressed upon me very strongly. Up to that time I had never driven a mile better than 2:20, and knowing that Rarus could beat that quite a little bit, I was naturally anxious regarding his training. It struck me then that a man who might be very clever at sharpening a jack-knife would not do at all when it came to putting an edge on a razor. I thought that Rarus was the fastest trotter in the world, and so in the winter of 1870-'71, when we took him to California in company with Goldsmith Maid, I resolved to profit by an other man's experience. So I asked Budd Doble how to go along with my horse, and he told me. I had him put in a stall adjoining that of the Maid, and tried to learn exactly how Doble trained. We were a pretty good pair. He was willing to tell me what he knew about *training very fast horses*, and *I* was willing to learn. I very soon found out that a man could get a fast trotter right at an edge to speak of without working with comparatively little work—nothing like the old-fashioned poundings and long drives that we used to consider necessary before a horse was fit to go to a race. Doble, by the way, is the best conditioner of horses I ever saw, and he is a man that is always learning something. You never see him splitting out a horse so fast as he can go two or three times every week. On the contrary, he always drives them within themselves, and the result of this is that when the day of the race arrives they are able and willing to go faster and further than he has ever asked them to in their preliminary training.

"That is the system that I adopted in dealing with Johnston, and the result shows that it is the correct one. When I got the horse last fall he was rather thin, having been sick during the summer, and my first move was to get him in good flesh, for I never was an advocate of the theory, held by some people, that a horse after being reduced to skin and bones by a thorough course of old-fashioned training is then in shape to make a reliable showing. The fact of the matter is that I trained Johnson just the same as I trained Rarus. I took him to Cincinnati and gave him a great number of slow miles. I never asked him to go fast, but kept letting him step along every day a good many miles. Of course I knew that he had speed, but I never kept asking him to show it to me every day as a boy would look at a new jack-knife. What I wanted to do was to beat all the trotting and pacing records with that horse, so as far as I was concerned the breadth of an old vice that has clung to us for years like—like a vice, as it were. Paid fifty cents for a pound of marshmallows to gladden the children's hearts and, while in a seal-brown study on the way home, ate them all. When I quit the use of tobacco I notice that I want to eat everything I see. Came very near eating the infant class at the Sabbath-school yesterday.

"My pipe was a solace when lonely."

sort of vice. But I wanted to get fat, so one day when I was over at Bootjack Camp I threw my pipe over into the woods as far as the strength of a great resolution could send it.

I can still remember how it went hustling through the air, and how I went hustling through the air, the following week, on my hands and knees hunting for it.

It was about these days that I rashly resolved to keep a diary. It hardly shows the marks of use, but I will sell it at a reasonable price to any one desiring an easy running diary, with a place in it to stick the pencil when not in use. I quote a few entries from the same:

January 1, 1886—Have resolved to quit the use of tobacco and to keep a diary showing what I did each succeeding day. Have decided to keep a strict record here of my various private expenses, so that I may know from month to month where my money has gone.

January 2—How gloomy everything looks to-day. Made several New Year's calls yesterday, I am told. In an unguarded moment perhaps, I did; but it was unintentional. I did not smoke, however, yesterday. I feel much better without tobacco in any form. Think I am gaining flesh. I do not notice it so much in my body, but my head and feet are certainly much larger than they were yesterday. How much more happy and light-hearted we are when torn from under the thraldom of an old vice that has clung to us for years like—like a vice, as it were. Paid fifty cents for a pound of marshmallows to gladden the children's hearts and, while in a seal-brown study on the way home, ate them all. When I quit the use of tobacco I notice that I want to eat everything I see. Came very near eating the infant class at the Sabbath-school yesterday.

Getting a little bit irritable.

Jan. 3.—I am getting a little bit irritable I notice, and several of my friends have called my attention to it. A policeman first noticed it as I was down town. Guess we can fix it up for $5 or $6. I shall have to get a new coat and, perhaps, a new nose. I cannot tell you yet as to the nose. When the swelling goes down, so I can see over it better, I shall be better able to judge. At present it shuts out the landscape a good deal and gives me a sinister expression.

Jan. 4.—Went out walking in the woods to-day. The air was crisp and frosty. I strolled over about where I threw my pipe along in the latter part of the year '85. I did not want the pipe, and *yet*, when I found it, after searching three or four hours, I felt a secret thrill of pleasure. I do not know why. I thought it some things it might be convenient for some one who had no pipe, and who might still be a slave to the abominable habit. I have in my mind a party who might thus be benefited. He is a young man of great promise, and none knew him but to love him, none name him but to speak well of him. He is my friend. He will be pleased and gratified. He is my wife's first husband.

When I started out I announced in this column that I would quit the use of tobacco and keep a diary. I shall continue to do so, making, however, a slight change in the arrangement, by which I shall keep the tobacco and quit the use of the diary. This diary is now for sale. Smoking tobacco taken in exchange. No additional charge for the four days' work already done on the work.

A Capital Scheme.

[New York Sun.]

"What do you do when people come in and bore you?" a warm personal friend asked of a merchant.

"When they stay too long the office boy, who is very bright and knows just when to interfere, tells me that a gentleman is in the counting room waiting to see me on important business."

"Ha! Ha! That's a capital way to get rid of bores who don't know—"

"And then the boy opened the door and said:

"'Gent in the countin'room waitin' to see you on importance business.'"

DAYS IN 'FRISCO.

A City Claimed to Be the Most Fascinating in the World.

How a Town Should Be Painted Red—In Chinatown—A New Style 5 o'clock Tea —Picturesque.

["Ruhemah" in St. Louis Globe-Democrat.]

The fascinations of that blessed city of San Francisco are too many for any one to attempt to enumerate, and on each of the many days I am to be during my short stay there was an echo to Lord Ronald Gower's raptures and an indorsement of his belief in its being the most picturesque city in the world. Its picturesqueness might be heightened and its appearance made to harmonize more with its real character if the dear Californians would only eschew the bilious tan-ers of house painting and tint their walls and roofs on a stronger scheme of color. Along the miles and miles of city streets the bay-windowed houses are all painted the same dull dirty gray or yellow, that looks like a priming coat and matches in monotony the long sand dunes along the shore. The rich red-wood of which they are built for the warm, fine color of *mahogany*, but they willfully and wickedly cover it up with this universal yellow gray paint that robs any building of character.

On one street there is a large residence that is a masterpiece of the new school architecture, abounding in all the quaint angles, recesses, gables and windows that the canons of the Queen Anne creed will allow, and even that house that ought to be a harmony of India red on dark brown, or olive and the tawny shades of waxen shingles, is painted in the one universal color; roof, foundation and window lines unrelieved by any contrast or accent. The architect made a model in the beautiful outlines and ornamentation on the exterior, but the painter spoiled it all as completely as if by malice prepense. A little more color in the outer walls would transform San Francisco, make it brighter an I gayer than ever, and declare its character to the stranger at the harbor gate. It would not be necessary to paint the whole town red, as there is enough on the spot, but just to touch up the *roofs, chimneys* and moldings with that enlivening hue.

CRAZY FOR CHINAMEN.

"I believe they are getting crazy, all crazy," sighed our recl ant friends, as we found unending amusement and delight in Chinatown and constantly bent our footsteps that way of the end of every outing. The best true Californians despise nothing more than the sights and smells of Chinatown, and it is a weariness to them when eastern people affect to find pleasure in them. There and there over the odd things, in the odder shops, that are sold by the oddest people. The Chinese children in the queer, foreign streets are animated bits in a picture new to a stranger, and the full-grown Mongolian is a being of endless possibilities in the way of study and entertainment. There was that second-floor balcony of the King Perkow restaurant, where we sat on ebony stools, and sipping the fragrant oolong that was steeped before us in the little covered cups, looked down in narrow streets swarming with blue-bloused Chinese, to the blue waters and golden brown shores of the bay. There was also Mr. Ching Chung Chow, the Celestial restaurateur, who has a swell restaurant, a suave, courteous old soul, whose broken English and mended China was most diverting. Mr. Ching Chung Chow was always laughing most of the time, or else sitting in attentive circle around his ebony table we listened to that connoisseur talk about tea, porcelain and the wonderful fruits of the home empire, while his servants bought in all sorts of queer looking things to illustrate his discourse.

FIVE O'CLOCK TEA.

Better yet was an afternoon tea drinking at the house of Mrs. Ching Ling, wife of the Chinese vice consul, a lady of tiny feet and gracious manners, whom *I had had the fortune* of meeting in a former episode. The interpreter sent her word beforehand that we were coming, but she arched her thin eyebrows with the finest astonishment and welcomed us with great protestations of pleasure in our unawares. Yet Mrs. Ching Ling was arrayed in all her glory with a blouse of lavender brocade lined with yellow satin, and trousers of dark blue silk, while her conical little two inch feet were cased in red shoes covered with gilt and gold embroidery. Her glossy black hair was dressed in the most elaborate yet butterfly fashion, piled in the air in great loops and stuck full of long gold pins and combs and jade ornaments. A faint flush of rouge covered her eyelids and high cheek bones, and her lips were of the true red-dened in a broad line of the deepest carnation. Her ear-rings, finger-rings and bracelets were of heavy gold and jade, and she carried an embroidered handkerchief in her hands.

She had all the little airs and affectations of a woman of society and fashion, and giggled delightedly when we said we thought her broad Chinese foot beside Mrs. Ching Ling's diminutive slipper, and made a great pantomime of dismay. Through the interpreter she complimented her with flashingly acute wit-out-stint, and the two Chinese ladies whom she had invited to meet us joined in the merriment like children. Her friends, Mrs. Low Ti and Mrs. Ching Chung Chow, had large feet, and spoke even less English than the hostess, and while we examined and praised their lovely feet, the ladies selected cigarettes and returned the compliment, and through the interpreter we had a great discussion as to the rival costuming of nations.

AN ARISTOCRATIC GROUP.

Then Mrs. Ching Ling bobbled across to her tea-table, her middle-aged serving-woman brought in the beautiful teapot steaming in the hands of high caste, and the aged mamma in her dark-blue cotton dress and tight black cap, and the three little children in their quaint costumes made a picture; and when the interpreter had explained to us that we were only too sorry that we could not have a photograph of them just as they were, so as always to see the picturesque group, they laughed and chattered in strange gutturals together.

Of the three, Mrs. Lee Ti, the vice consul's second wife, was an unusually pretty woman judged by any standard. Even without speaking or understanding their tongue, we could guess something of her attitude towards her blue-blooded co-laborer, Mrs. Ching Ling. It is not in human nature, Mormon or Chinese, for women to get along amicably together in such circumstances, and although the cultured ladies of Chinese rank did not pull hair in our sight, a certain indifference and unconsciousness of the other's presence, and a blank fixity of gaze when the other held the floor, betrayed the sisterly feelings of the first and second wives.

London police are now allowed to carry revolvers, but only at night.

Signal Office Prediction.

Increasing cloudiness and rain, a slight rise in temperature, east to south winds, lower barometer.

Chronological Events.

Gunpowder Plot discovered in 1605.

JOTTINGS.

—Don't fail to vote—one vote may elect your man.

—The Democrats claim that a cloudy day augurs well for Democracy.

—To-day being a legal holiday the public schools of this city closed at noon.

—Fanwood uses crushed stone for side-walks, much to the detriment of fine shoes.

—The man who votes for Kean will not be Green. Nor will he be Kean, who votes for Green.

—Hot coffee at the Holly Tree Inn to-day, by the Woman's Christian Temperance Union.

—Final appearance of Miss McKibbins and Master Hyde, the expert roller skaters, at the Casino this afternoon and evening.

—The latest Stiles in vogue will very likely greatly please Elizabeth, by George M. George is going "char," his many friends say.

—The Republicans are to have a stereop-tician opposite VanDeventer Hall on which to project returns and funny pictures this evening.

—Robert Lord Livingston is receiving a big vote in Plainfield and Westfield, and his friends are confident that the Vail won't be drawn over him this season.

—The Fourth Ward will soon have to have two polling districts or be divided, as the number of registered voters is now within six of the limit prescribed by law.

—Gov. Abbett has issued a proclamation against bribery. Those who attempt to bribe had better be careful. They will de-serve and receive the full penalty of the law.

—Every man who desires to settle the debt and get rid of the old-time prosperity will vote for Robert L. Livingston, who is an honest man, and does not train with the railroads.—Elizabeth Herald.

—To-day, being a legal holiday, the Eliz-abeth papers issue no paper. THE NEWS is issued as usual, however. To-morrow we hope to have the fullest reports of the local and general results.

—The Plainfield News, with considerable enterprise, publishes in its Friday's issue a very good picture of George Stiles, Re-publican nominee for Sheriff of Union county.—Elizabeth Herald.

—Parties from New York to-day say that Tammany tickets contain the name of Blaine electors on them with Grant, Tammany's candidate for Mayor, notwithstanding that assurance is regarded in the Cleveland demon-stration of yesterday. If this is true, good bye Cleveland.

—There were twenty signatures to the pledge obtained Sunday evening at the Reform Club meeting, at which President French presided. Rev. Mr. Cleaver led in prayer and read the Scriptures, and a num-ber of citizens made addresses, the principal address being by Mayor Manson, who was greeted with the most hearty applause.

—Butler ballots flooded the city to-day. They were enclosed and sealed in envelopes, loaded with shot. People wondered what the shot were for. Some thought they were to "shoot 'em off." Others thought the ballots "trifles light as air" and that the shot was to make them weighty. But now that they weigh in the result will be known to-morrow.

—One of the finest, and probably one of the most original, discourses of the day was listened to by the attendants at the Metho-dist Episcopal church on Sunday evening, when the Rev. A. A. Tuttle spoke on the "Personal Appearance of Jesus." The con-gregation listened most attentively through-out. It would be well to have it repeated.

—The Democrats had a fine parade last evening, and it was expected that the Re-publicans would also parade, but as the latter have been parading almost every night, the members were thoroughly tired out and not enough could be got together, so the parade was abandoned. There was a fine general illumination of the city by Demo-crats and Republicans, the Republicans ex-pecting that the Republican clubs would ap-pear.

A Target Excursion.

Three hundred of Newark's policemen together with the mayor, common council-men and other officials, are going to this city Thursday on a target excursion. Plainfield's city officers will meet them at the depot and join them in the day's sport. After which the entire company, together with other invited guests, will partake of dinner at the Park House.

Votes that may be Polled.

The total number of votes registered in the various wards in this city is as fol-lows: First ward, 661; Second ward, 486; Third ward, 581; Fourth ward, 884; making a total of 1557. This represents the number of votes that may be polled. At the election for governor last year 1272 votes were polled. This number will undoubtedly be greatly ex-ceeded to-day.

ANOTHER NEW MARKET BLAZE.

The Barn and Outbuildings of a Well-to-do Farmer Totally Destroyed.

Last night about 11:45 o'clock as a young man was driving along the Round Brook road about three quarters of a mile from New Market he discovered the barn upon the premises of Mr. Nelson Blackford to be on fire. He at once proceeded to Mr. Black-ford's residence and awoke the family, who, within a few minutes, were joined by sev-eral neighbors who aided in saving some of the property contained in the buildings, and by throwing bits kets and water on the roof of a building between the barn and house probably saved the latter. The barn with fifteen tons of hay, carriage house, hennery, barrack of wheat of about 250 bushels, barrack of oats of about 300 bush-els, stack of hay of about 15 tons, three valuable horses, threshing machine, two fanning mills, hay loader, five calves, sleigh, three sets double harness and miscellaneous articles were all totally destroyed.

Mr. Blackford states that, upon examina-tion, when he first saw the fire he found it burning in four or five different places, which convinces him it must have been the work of an incendiary. He estimates his loss at $4,000. Insurance in the Plainfield Mutual upon the building for $1,000.

Common Council.

The regular monthly meeting of the Com-mon Council was held last evening, Presi-dent Coriell, in the chair, with Councilmen Dumont, Marsh, Simpson, Wadsworth and West present.

The reading of the minutes was dispensed with and, on motion of Councilman Marsh the rules were suspended, to receive any com-munications to be presented.

Councilman Dumont presented a communi-cation from property owners on Front street, protesting against the erection of a frame building in the rear of the house of the Steam Fire Engine Company No. 2, on the ground that it was in violation of city ordinances, and endangered property in the vicinity, and was likely to break the insurance. The communication was signed by *Schepflin, Baldwin & Tweedy, Mr. Lane* and others. After it was read, Councilman Dumont stated that Councilman Livingston, who was not present, had a petition relative to the erection of the building referred to, and suggested that action on the communi-cation be suspended until after the petition had been presented at the next meeting. The clerk was directed while to notify the Fire Department not to proceed further with the construction of the building, until Common Council had so authorized.

On motion of Councilman West the meet-ing was then adjourned until Friday evening at eight o'clock.

Casino Rink.

There was a good attendance at the rink last evening notwithstanding the political excitement, and the parades.

Miss Edna McKibbins and Master Willis Hyde gave another exhibition of their skill as roller skaters, to the great delight of the audience, and will be on hand again this e-main another evening. Master Hyde, but little over a year ago was an emaciated cripple on crutches. He became strong enough to try roller skating for exercise, and got fond of it. By practice he eventu-ally became so proficient and graceful on the skates, and as to his physical improve-ment it is only necessary to witness one of his exhibitions, including the feet feat of carrying the young girl, Miss McKibbin, on one foot, while he skates around the rink on the other, although she, being stouter, will weigh probably twenty pounds more than her carrier. It is possible that Billy may be induced to give an exhibition of roller skating, after election, carrying the junior Democratic organ on one foot and the senior imbecile on the other. Nothing mean about Billy. He will outdo Master Hyde, if it requires all his own hide to do it.

The Telephone Service for Election Returns.

The New York and New Jersey Telephone Company have made arrangements for receiving the election returns by telephone. The company has had a Western Union wire put in their main office at Jersey City, and an operator will be on hand to attend to it. The returns will be transmitted direct to this city. Plainfielders are promised the latest news five minutes in advance of the regular telegraphic bulletins. Mr. H. R. Miller, the manager, has taken great pains to have everything operate satisfactorily. The Democrats will receive the telephonic news at their headquarters on West Front street.

Burial of Mrs. Farragut.

Mrs. Virginia Loyal Farragut was buried yesterday beside her husband, Admiral Far-ragut, in the beautiful family plot at Wood-lawn. The funeral was held at the Church of the Incarnation, Thirty-first street and Madison avenue, New York, and conducted by the Rev. Arthur Brooks. The church was well filled with personal friends and acquaintances of Mrs. Farragut and the Admiral, a large number of them being officers of the navy. Her son, Mr. Loyal Farragut, resides near John Taylor John-ston's place on East Front street, and one of Plainfield's streets is named after the family.

German Gathering.

The German Republicans were to have met in Mass Meeting in Lincoln Club rooms Friday evening. A ground floor room having been secured for the occasion, it was found, when wishing to open the rooms, that the janitor of the club had closed the rooms placed the key in his pocket and left with the club for New York to vote in the particular in this city. An impromptu meet-ing was then organized in Association Hall with Mr. John Stiner as chairman and true a success in every particular.

Political Estimates.

A prominent Plainfield Democrat makes the following estimate of the result to-day:

FOR CLEVELAND.

Alabama	10	Missouri	16
Arkansas	7	Mississippi	9
Connecticut	6	New York	36
Delaware	3	New Jersey	9
Florida	4	North Carolina	11
Georgia	12	South Carolina	9
Indiana	15	Tennessee	12
Kentucky	13	Texas	13
Louisiana	8	Virginia	12
Maryland	8	West Virginia	6
Total			219

FOR BLAINE.

California	8	Ohio	23
Colorado	3	New Hampshire	4
Illinois	22	Oregon	3
Kansas	9	Pennsylvania	30
Michigan	13	Vermont	4
Maine	6	Wisconsin	11
Iowa	13	Rhode Island	4
Nevada	3	Massachusetts	14
Minnesota	7		
Nebraska	5		
Total			189

An equally prominent Republican makes the following estimate of the result of to-day's battle:

FOR BLAINE.

California	8	Ohio	23
Colorado	3	New Hampshire	4
Illinois	22	Oregon	3
Iowa	13	Pennsylvania	30
Kansas	9	Rhode Island	4
Michigan	13	New York	36
Maine	6	Vermont	4
Massachusetts	14	Wisconsin	11
Nebraska	5		
Nevada	3		
Total			218

FOR CLEVELAND.

Arkansas	7	Missouri	16
Delaware	3	New Jersey	9
Florida	4	North Carolina	11
Georgia	12	South Carolina	9
Kentucky	13	Tennessee	12
Louisiana	8	Texas	13
Maryland	8	Virginia	12
Mississippi	9	West Virginia	6
Indiana	15		
			188

The Man Who was Whipped Gets Arrested and Fined.

On Saturday evening about six o'clock passers by on West Second street near Park avenue were attracted by a loud altercation between two colored persons. To settle differences they stepped into Prudon's Alley, but were kept from harming each other then by several friends who endeavored to heal the breach. They were unsuccessful in doing this, and finally concluded to allow the two men to maul each other to their heart's con-tent. This they did, at least one of them did. One of the men was drunk and the other sober. The drunken man was roughly handled. He sprawled himself all over the alley, rolled around in the dirty water, stag-gered to his feet, but gamely called out that he was not "licked till he was killed." To About this time the sober man was per-suaded by his friends to leave, as a policeman was thought to be coming. But the drunken man was too drunk to head this good advice, and kept parading up and down and talking of his muscular abil-ity. Officer Nicholas Kelly came along and arrested him. When brought before Judge Good he gave his name as George W. Hur-ling. He was fined two dollars for being drunk. The sober party in the affair, Frank Nelson, was also arrested by Officer Kelly, but as no evidence was brought against him, he was discharged. The fight arose from Nelson, who is Hurling's brother-in-law, at-tempting to prevent him from spending his money for drink.

Personal.

Mr. Clark W. Evans will shortly publish another of his charming compositions: A Minuet.

Miss Clarkson of East Front street has just returned from a short visit to friends in Brooklyn.

Mr. and Mrs. Lawrence Meyers of East Front street, gave a Halloween party on Saturday evening in honor of their two nephews who have returned home from college for a short visit.

Robert D. Gibby, the Democratic candi-date for Assembly, is a son of Judge Gibby, who was on the bench in this county for about ten years. Mr. Gibby is at present the City Editor of the Rahway Advocate.

Mr. R. Jones, the proprietor of the Casino Rink, is a graduate of Columbia College Law School, and has been practicing in New York city for over ten years. He has a large practice, which he attends to during the day, and spends his evenings at the rink. Mr. M. Decker, who is his general manager was formerly a manager in the employ of the Empire Skating Rink Company. The rink manager, Mr. C. L. Skinner, is a professional rink manager, having come here from a large rink at Elmira, N. Y.

The Park Avenue Course.

As already announced, the Young People's Association of the Park avenue church are arranging another course of popular enter-tainments for the coming winter. They have already secured the well-known "Ideal Quartette" of Brooklyn, all soloists, for De-cember 11th and the charming reader, Miss Nellie Brown, of Boston, whose portrayal in the Methodist church on an entertainment of the Y. M. C. A. some years ago, will not be forgotten, for January 22d. They are also arranging with the Colonia Orchestra for an evening in February, of which further notice will be given.

The price for course tickets with reserved seat will be the same as last season, viz: $1.50, single admission 50 cents.

The sale of seats will begin next Saturday at Reynolds's Pharmacy.

A Sensible Man.

Would use Kemp's Balsam for the throat and lungs. It is curing more cases of coughs, colds, asthma, bronchitis, croup and sore throat and lung troubles, than any other medicine. The proprietor has authorized R. J. Shaw, Front street opposite Park avenue, to refund your money if after taking three fourths of a bottle, relief is not obtained. Price 50 cents and $1. Trial size free.—Adv.

Position in Sleep and Dreams.

[Phrenological Journal.]

Dr. Delauney, a French observer, in a communication to the Biological society of Paris, states certain observations of his with reference to the involution of dreams by the manner in which one lies while sleeping. When one sleeps upon the right side, that is to say upon the right side of the body, the dreams have marked and rather unpleasant characteristics. These characteristics, however, are those essentially of those which enter into the popular definition of dreams. One's dreams are then apt to be illogical, absurd, childish, uncertain, incoherent, full of vivacity and exaggeration. Dreams which come from sleeping on the right side are, in short, simply deceptions. They bring to the mind very old or faint remembrances, and they are often accompanied by nightmares.

Dr. Delauney points out that sleepers frequently compose verse or rhythmical language while they are lying on their right side: this verse, though at times correct enough, is absolutely without sense. The moral faculties are then at work, but the intellectual faculties are absent. On the other hand, when a person sleeps on his left brain, his dreams are not only less absurd, they may also be intelligent. They are, as a rule, concerned with recent things, not with reminiscences.

Wanted To Be an Angel.

[Harper's Bazar.]

Little Willie was fond of throwing stones at the passing school boys and, when taking refuge behind the hall door. One day he did not get away so easily, and, firing pretty badly, he burst into his aunt's presence with the tears rolling down his cheeks, and sobbed out in great wrath, "I just wish I was an angel way up high, where the policeman couldn't catch me, with my pocket full of rocks, if I wouldn't give it to them boys!"

Cleveland Voice:

The type-writer is opening a new field of work for women more than all the legislation of Europe and America combined.

A circle of rubies forms the newest engagement ring.

Hays from the Lone Star.

(San Antonio Light.)

A life of mere existence is always a failure, because you will get as much as you want. The poorest people in this country are the millionaires, and next to them those who have $500,000.

John Randolph: Economy—the adapting of your supplies judiciously to the intended end. This is a gift of God. Its son not be taught.

A RED ROSE.

[William Bossey.]

Ah, passionate, red, red rose,
A snap in her bosom so fair,
You may well be proud, I said there
On those driven mountain snows.

Do you tremble to hear her faint heart beat
With a murmur of love and longing sweet?
Her heart is for, as her bosom is fair,
Ah, red, red rose, shall I bid her go.

Ah, passionate, red, red rose,
With that ruby flush divine,
Her lips must have kept in the kiss,
How thy being blushes and glows.

Did they murmur to thee of life and love
In the summer of love's delight?
Her lips are for that hour of death,
Ah, red, red rose, shall I die on a knight?

THE LAST SPEECHES.

Both Candidates Say a Few Words to Their Admirers.

Election Items the Country Round. Troops in Cincinnati—Feeling in New York at Headquarters. Speculations in Washington.

NEWTON, Mass., Nov. 4.—The Blaine train made the run from Natick to Newton in ten minutes. Mr. Blaine was greeted with great enthusiasm by a crowd of 7,000. He proceeded to a temporary stand guarded by police. The stand was filled with citizens. As he appeared at the front the audience cheered lustily and cannons roared a welcome. He had just opened his mouth to address the audience when with a crash the entire forward part of the platform fell about four feet. A cry of alarm went up from the multitude. Several gentlemen caught Mr. Blaine but he clung to the rail and needed no assistance. He at once climbed upon a detached portion of the framework, and holding fast to an upright soon prevented the fall of the crowd, by remarking first that there was always a Republican platform to stand upon. His few remarks were received with cheering.

BOSTON, Nov. 4.—The train arrived in Boston at 5:30 last night. The Boston and Albany depot was filled and as soon as the candidate stepped from the train he was greeted with prolonged cheers. A squad of police kept the crowd from sweeping Mr. Blaine and party off their feet, only by the most forcible and persistent exertions. The crowd pushed and struggled to get to him and surrounded his carriage on all sides. Many tried to shake his hand and there were calls for a speech. Finally he bowed his acknowledgements and was immediately driven to the Hotel Brunswick, a vast crowd speedily assembling there. At the hotel the crowd attempted to rush the entrance, but were kept out by a squad of porters. Before the carriages containing the members of Mr. Blaine's family arrived, the crowd had been dispersed from in front of the hotel.

At 6 o'clock Mr. Blaine and family were entertained at a grand banquet in the hotel at which Hugh C. Leighton, chairman of the Republican state committee, presided. Many of Mr. Blaine's most prominent supporters in New England were present, including Judge Amos Otis, of Maine, ex-Collector Beard, Congressman W. A. Russell, Oakes Ames, Asa A. Potter, John Quincy Adams Brackett, ex-Congressman Candler, Gen. Sam. Judd, Jr., H. E. Hoyt, Rev. C. A. Barton, Speaker Warden and Hiram Atkins, of Vermont. The Blaine party at the dinner was made up of Mr. Blaine, Mrs. Blaine, Miss Blaine, Mr. Walker Blaine, Miss Dodge, J. C. Crawford, of The New York Tribune, and Postmaster Manley and wife, of Augusta, Me. After dinner a brief reception was held in the hotel parlors and at 8 o'clock Mr. Blaine and party reviewed the great parade, postponed from last Friday night, from a platform constructed in front of the hotel. The procession consisted of 5,000 torch bearers, numerous bands and drum corps and mounted squadrons, and numerous Blaine and Republican organizations, besides many from other cities and towns near by, and a large number from the state at large. The Boston business men marched in a battalion by themselves, also the Harvard students and Massachusetts Institute of Technology students. There were several floats, the Salva Lecture corps cadets in Mother Hubbards, with fans. One company in particular, the "Belles of Lowell," attracted much attention, being arrayed in long, flowing white dresses, bangs and white night caps, with lighted candles in their hands.

The Loyal League, of Bangor, 100 strong, Col. J. C. Hatch, commander, which left for Boston to meet Mr. Blaine and escort him home, led the procession.

GOV. CLEVELAND AT HOME.

A Short Speech to the Buffalo Legion—Warm Gratitude.

BUFFALO, Nov. 4.—Long before election was a busy one for Gov. Cleveland. He spent nearly all day at his law office, where he was visited by a continual stream of people of all sorts and kinds. Many of the throng were business and professional men, mechanics and laborers. Even a score or more of boatbanders called and asked permission to shake his hand. Gov. Cleveland's friend, Richard Frean, who was fifty years ago one of the pioneer wagon peddlers of Western New York.

"I have voted sixty times," said Frean, "and I guess I'm good for once more."

The governor received the veteran with great cordiality. He visited the Academy of Music and witnessed the "Our Governor." He received an ovation, the audience greeting him with a whirlwind of cheers, which was repeated when he left at the close of the third act.

The rest of the evening was spent quietly at the City club. The governor left for Albany at noon to-day. There was no local excitement over the election runs high.

BUFFALO, Nov. 4.—While the governor was at the City club the First Ward Cleveland and Hendricks club, 1,000 strong, marched by and saluted him, after which they returned and the governor shook hands with each member as they passed. They insisted upon a speech and he responded to their request. He said: "What shall I say to the Buffalo Legion? I have on one or two occasions spoken to you in behalf of the old city and been received with the utmost kindness. I stand here in the presence of those devoted to my interests—devoted personally to me. They will not blame me because they see in my records in this city something which they admire and something they approve of. You can be assured that no certain circumstances which have occurred in this campaign have touched me deeply. When I have read in the newspapers of the legion and their efforts in behalf of the ticket and me in which they have upheld the cause, every feeling, save gratitude, is absent from my mind. We are on the eve of a decisive battle. I am confident from the reports that have at my home the battle shall be waged successfully, and I know the burden of the fight is upon you. I beg to assure you that my thankful heart is full, to my dying day I shall remember the efforts and the attachment of the Buffalo Legion."

Troops for Cincinnati.

CINCINNATI, Nov. 4.—The Cincinnati battery of the Second Ohio regiment, consisting of 100 men and four guns, left here this afternoon by Sheriff Hawkins to the city stables to be in readiness for use in case of rioting such as occurred at the last election here.

What the Mayor Says.

CINCINNATI, Nov. 4.—Mayor Stephens was interviewed in regard to the authority of Sheriff Hawkins in calling on the governor for troops to guard the city. The mayor said: "That right belongs to me. Troops are not wanted or needed. It is a most outrageous proposition, and the act of the sheriff to make the demand. If troops are sent him here I will have charge of them and not Hawkins. I don't say that I will send them back, but they will not be used. The law gives control of them while here and I will command them." The mayor was subsequently worked up over the affair. Many other Democrats share his opinion that the sheriff was too quick. The governor will probably ask his legal authority to prevent any call for troops, and will use his influence to countermand the requisition of the sheriff.

The Feeling at Both Headquarters.

NEW YORK, Nov. 4.—A general feeling of confidence pervaded Democratic and Republican headquarters. As the former telegrams have been received from prominent politicians in California, Indiana, Connecticut, New Jersey and other states, assuring the committee that their respective states are certain to give Democratic majorities.

John Kelly said to a reporter: "Everything looks encouraging. I have no doubt of Cleveland's election."

Chairman Barnum, of the national committee, said: "We shall carry New York state for Cleveland, and there is every probability of his election by a flattering majority. We have all the south, and at least three northern states with heavy electoral votes."

At the Republican headquarters every one seemed jubilant and certain that Blaine would not be defeated. They all declared that New York state was certain, to go Republican, and the only matter was on the majority. Advices received from California stated that Blaine would receive 5,000 majority in that state. One member of the committee declared that Blaine would carry every northern state, and would have 340 electoral votes.

Preventing Frauds in New Orleans.

NEW ORLEANS, Nov. 4.—Reports from Nashville, Memphis and other river points, that a large number of colored voters there were en route to this city for the purpose of raising a disturbance and repeating, put the city authorities on guard, and the police force ordered to arrest all suspicious looking strangers who could not give an account of themselves. About 500 men who could not tell where they lived were arrested. They were brought principally in low dives on the levee and gambling dens on Franklin street. Most of those arrested are negroes who claim to be transients, but they could not give the names of their boats, however, and all were arraigned as dangerous and suspicious characters. Two hundred and fifty were discharged, and 250 held. None was found in the entire party. Some proved they were tramps on the way to the sugar plantations, and a few others were found to be residents of the city. The effect of the great majority, however, could give no account of themselves and were sent down for thirty days.

England and the Elections.

LONDON, Nov. 4.—The Times devotes a leader to the American election. It says: "In the course of which it says: "Although the numbers polled will probably exceed those polled at any previous contest, nevertheless it would not be surprising if the vast majority of Americans regard the issue with indifference. Foreigners have still less reason to feel a keen interest. The campaign has been almost exclusively managed by experienced and adroit professional politicians. To them alone the result will bring gratification or disappointment. The most satisfactory feature of the whole campaign is the failure of all attempts to revive, for party purposes, the sectional jealousies of the north and south. Mr. Blaine's famous mare marched in a battalion by themselves, also the Harvard students and Massachusetts Institute of Technology students. There were several floats, the Salva Lecture corps cadets in Mother Hubbards, with fans. One company in particular, the "Belles of Lowell," attracted much attention, being arrayed in long, flowing white dresses, bangs and white night caps, with lighted candles in their hands.

The Loyal League, of Bangor, 100 strong, Col. J. C. Hatch, commander, which left for Boston to meet Mr. Blaine and escort him home, led the procession.

Washington Almost Deserted.

WASHINGTON, Nov. 4.—"Gone home to vote" is said of every man in Washington, regardless of his residence. The effort to help the female clerks run the government. Many of the women have volunteered to take the places of men who wished to go home. To-morrow will be a busy day for leave. The estimated number of votes furnished from Washington is 4,000. But this is somewhat exaggerated. About 900 men left on the Pennsylvania road, 300 Maryland, 700 to Pennsylvania and about 1,500 to western states. Secretary McPherson has gone. To show the absolute desertion of Washington, there was only seven arrivals at all hotels in the city Monday.

Police Protection in New York.

NEW YORK, Nov. 4.—All the available police force will be on duty to-day. Various precincts have been reinforced from the steamboat squad and the Twenty-sixth precinct, and a sufficient force is held in reserve in each station house to quickly quell any disorder. Two policemen are detailed at each polling place to preserve the peace, and in case of any disturbance they will be reinforced by a squad from the station house. Supt. Walling issued a general alarm calling the attention of the force to general orders and instructions governing the duties of the police commissioners are on duty at police headquarters to promptly fill all vacancies of election officers.

Gen. Logan in Chicago.

ENGLEWOOD, Ind., Nov. 4.—When Gen. Logan and his party left Indianapolis the weather was rainy and disagreeable. A large party of prominent Indianians were on the train. The first stop was at Frankfort, where a great crowd was gathered. Gen. Logan spoke for ten minutes. The next stop was at Columbus. All the intervening stations were decorated, and a large crowd was present at each. The rainy weather prevented Logan spoke briefly, and then continued the journey to Chicago without further stops.

Election Speculations in Washington.

WASHINGTON, Nov. 4.—Discussion of the political situation and speculations as to the result of the election is the prevailing topic here to-day. There is less anxiety manifested on the part of government employes than there was the day before the Ohio election. Democrats here speak with confidence of a Democratic majority in New York state, and of Cleveland's election. On the other hand Republicans claim that they are confident about carrying New York, feel confident Blaine will be elected either with or without New York.

Butler's Last Speeches.

BOSTON, Nov. 4.—Gen. Butler addressed an audience of 7,000 sympathizers at Natick last evening. He was very successful. An enormous open spoke in the Marlboro town hall to an audience that filled the building to the doors. Both places are Butler strongholds.

Were the Women Lynched?

MEXICO, Mo., Nov. 4.—Mrs Pringle and Ida Smith, alias "Big Six," two notorious social outcasts of this city, were taken from the good people of the vicinity of Flat Rock and they would lynch, were taken from the jail by a masked outlaw band, but what has become of them is a mystery. Various rumors are afloat, some thinking they have been lynched, others that they were taken to the outskirts of town and made to leave in their night clothes, and others that they were confined in the calaboose. The women have been servers to Mexico. Parties are now searching for them.

THE BALLOTS BATTLE.

Some Figures Which Will be Very Interesting to Our Readers.

A Table Showing the Popular Vote Cast Four Years Ago—The Full Tickets of All the Parties.

Presidential electors will be to-day chosen in 33 states, 297 members of the Forty-ninth congress in 34 states, territorial delegates in 6 territories, governors in 16 states and legislatures in 31 states. Constitutional amendments will be voted upon in 7 states and propositions to call constitutional conventions in 3 states. Seventeen Republican and 13 Democratic congressmen have already been chosen in Maine, Ohio, Oregon and Vermont. There are 6 presidential tickets in the field as follows:

REPUBLICAN.

For president—Ex-Secretary James Gillespie, of Maine.

Vice-president—Senator John Alexander Logan, of Illinois.

DEMOCRATIC.

For president—Governor Grover Cleveland, of New York.

Vice-president—Ex-Gov. Thomas A. Hendricks, of Indiana.

GREENBACK-LABOR AND ANTI-MONOPOLY.

For president—Ex-Gov. Benj. F. Butler, of Massachusetts.

Vice-president—Gen. Absolom M. West, of Mississippi.

PROHIBITION.

For president—Ex-Gov. John F. St. John, of Kansas.

Vice-president—William Daniel, of Maryland.

EQUAL RIGHTS.

For president—Mrs. Belva A. Lockwood, of Washington.

Vice-president—Mrs. Marietta L. Stow, of California.

AMERICAN ALLIANCE.

For president—W. T. Ellsworth, of Pennsylvania.

Vice-president—Charles H. Waterman, of New York.

THE VOTE FOR PRESIDENT IN 1880.

The official vote for president in 1880, and the pluralities in each state, are given below:

States.	Rep. Garfield.	Dem. Hancock.	G'b'k Weaver.	Pro. Dow.
Alabama	54,291	91,169	4,642	
Arkansas	42,436	60,775	4,279	
California	80,265	71,986	7,982	
Colorado	27,824	27,316	1,435	
Connecticut	67,071	64,415	1,355	1,115
Delaware	15,454	18,883	120	1,865
Florida	24,654	27,261		4,359
Georgia	57,232	102,911		1,497
Illinois	318,037	277,321	20,356	
Indiana	232,164	255,544	12,986	2,401
Iowa	183,737	105,348	32,761	592
Kansas	64,321	27,703	8,570	1,617
Kentucky	103,356	149,068	11,499	259
Louisiana	20,295	46,857	699	
Maine	70,929	50,151	4,607	93
Maryland	67,044	71,390	1,406	
Massachusetts	165,755	111,560	4,348	961
Michigan	185,355	131,636	8,772	1,347
Minnesota	86,879	54,388	8,307	787
Mississippi	30,016	73,561	1,406	
Missouri	202,887	236,319	16,186	
Nebraska	52,538	29,293	8,180	1,021
Nevada	4,732	9,456	244	
New Hampshire	43,456	36,825	1,006	175
New Jersey	120,555	122,565	3,877	131
New York	555,544	534,511	20,702	1,517
N. Carolina	115,328	124,210	1,126	
Ohio	400,082	373,804	17,336	5,611
Oregon	20,619	19,948	1,000	
Pennsylvania	444,704	407,428	30,099	1,939
Rhode Island	18,195	10,779	994	10
S. Carolina	22,828	64,071		1,417
Tennessee	169,814	195,191	5,919	14
Texas	57,444	150,230	27,243	
Vermont	45,566	18,321	1,155	89
Virginia	139,493	145,350	11,582	
W. Virginia	46,683	56,193	1,939	
Wisconsin	144,400	131,049	7,986	99
Total	4,454,416	4,444,952	308,578	30,809

Total vote, 9,219,947, including 707 American votes and 980 imperfect and scattering votes. †In Louisiana there were two Garfield tickets. The "regular" ticket polled 36,997 votes, and the "Seattle" ticket 10,947. ‡In Maine the "Hancock" vote was for a Fusion ticket containing four Greenbackers and three Democrats; there was also a straight-out Greenback ticket. §In Virginia the Conservative Hancock ticket polled 98,912 votes, and the Readjuster Hancock ticket 31,674.

PLURALITIES.

	Rep. Garfield.	Dem. Hancock
Alabama		36,878
Arkansas		18,339
California		8,279
Colorado	2,508	
Connecticut	2,656	
Delaware		1,115
Florida		4,359
Georgia		45,679
Illinois	40,716	
Indiana	22,620	
Iowa	78,389	
Kansas	36,718	
Kentucky		45,712
Louisiana		26,562

Virginia		5,868
W. Virginia		9,510
Wisconsin	39,351	
Total	527,381	527,767
Plurality	386	

THE ELECTORAL VOTE OF 1880.

The following table will also be useful. It gives the number of electoral votes each state is entitled to in 1884, with the electoral votes cast for Garfield and Hancock in 1880. Since 1880 congress has made a reapportionment of congressmen and increased the number, so that the total number of electors this year will be 401, or 33 more than in 1880. The electoral vote of each state is equal to the number of its senators and representatives in congress:

	1884.	Rep. Elect.	Dem. Elect.	1880.	Rep. Elect.	Dem. Elect.
Ala.			10			10
Ark.			6			6
Cal.		6			6

W. Va.		5			5	
Wis.		11			10	
Total		401	219		369	185

Colorado is the only state that divided its electoral vote in 1880, in that year five candidates on the Democratic electoral ticket received votes varying from 40,398 to 40,915, and received 3 votes each. The vote of the six Republican candidates ranged from 40,259 to 40,976. Consequently one Republican and five Democrats were elected, and the electoral vote of the state was cast accordingly.

The Pennsylvania Coal Dividend.

PHILADELPHIA, Nov. 4.—The Pennsylvania Railroad company has declared a semi-annual dividend of 5 per cent upon the capital stock of the company out of the net earnings, also all profits of the coal trade left in the calaboose. The dividend has been for two years past, the company has declared a dividend of 10 per cent.

BRIGHAM YOUNG'S DISCIPLES.

Glowing Prospects Held Out to Proselytes to Embrace Mormonism.

NEW YORK, Nov. 4.—On board the steamship Oregon, from Liverpool, which arrived at this port, were 200 converts to the Mormon faith. These people were in the care of two elders and on the way to Utah. They will settle upon farms which will be sold to them by agents of the Mormon church. Nearly all of the company were adults, and fully half of the number were. Elder Lorenzo Jacobson said to a reporter:

"We have gathered these converts from among the most industrious and destitute classes of people in their country. The men are able-bodied and healthy and the women are well calculated for farm life."

"What inducements have you offered to get them to go the land of the Latter Day Saints?"

"Well, sir, in the first place, we have shown them that it would be very pleasant over there. Secondly, the great benefit their faith they have adopted. Secondly, we have held forth great pecuniary inducements."

"What advantages can they hope for fa a pecuniary point of view?"

"We sell them land on credit, and those those who have no money are afforded an opportunity of working out their own way and paying for the property when they are able. We also prepay their steamship and railroad passage from England to Utah."

One of the Mormon officers who overheard the statement made by the elder observed:

"That is all pretty fair on the face of it, but the new converts to the Mormon faith should be given to understand that in taking the land they will be required to get so deeply in debt that they will be forced to extricate themselves during their natural lives."

FIFTY YEARS OLD.

A Crock of Butter Very Ancient, But Still Good.

GUILDERLAND STATION, N. Y., Nov. 4.—Fifty years ago the Jupp family, famous Helderberg valley butter dairyers of that day, occupied the farm now belonging to Charles McChesney, near this station. Mrs. Jupp's butter was always packed in peculiar shaped earthen crocks, and considered of a higher price in the Albany and other markets than other makes. Before sending a crock of butter to market it was her custom to lower it into a well, where, which was noted for its very cold water. Mrs. Jupp would leave the butter hanging in the water for several hours, and when taken out it would be as hard and cold as ice. One day in 1834 she was lowering a crock of butter in the well when the rope broke and the crock fell to the bottom. No effort was ever made to recover it.

For the first time in its history this well became almost dry during the recent long drought in August, and Farmer McChesney was cleaning the well out when he found the crock Mrs. Jupp had lost fifty years ago. In taking the crock from the well McChesney's head accidentally broke it. It was about one-quarter full of butter, which was as solid and sweet as it was the day it was put down, half a century ago. The crock and its contents are on exhibition at the McChesney farm, and hundreds have called to see them.

A Child Commits Suicide.

NEW YORK, Nov. 4.—Lottie Francis, age 13, of Jamaica, L. I., who some day's ago borrowed her father's pocket knife and cut her throat with it, in order to commit suicide has died. Her mind became affected, it is said, by domestic troubles between her parents and her grandmother. The latter was sued by his son for $10,000 damages for alienating the affections of his wife. The children were put on the stand to testify against their grandmother. The first was decided in old Francis' favor. A short time previous to the suit, Lotta's father and mother were committed to the asylum at Flatbush. The unfortunate girl was found on the ground that they were not insane.

The Greely Expedition Records.

WASHINGTON, Nov. 4.—The diaries kept by the members of the Greely Arctic expedition are being copied by clerks of the naval bureau of navigation. The chief curator of the data and general information on Arctic life they contain. This is rendered necessary by the fact that some of them were lost when the vessel was damaged by sea water. What is considered the most interesting diary is that of Sergt. Rice. It abounds in pen pictures of the natives and descriptive powers to be of the highest order. Dr. Pavy wrote his diary in some three or four different languages, and the penmanship is so poor that it can scarcely be deciphered.

A Disorderly Scene in the Commons.

LONDON, Nov. 4.—In the house of commons Mr. Bigger, Liberal, of Kirkcudbright, moved an amendment to the address in reply to the queen's speech, and a nine hours' debate ensued. At 2 o'clock the house adjourned. During the discussion Mr. Bigger, member for Cavan, was twice called to order by the speaker for irrelevant remarks, and Mr. Sexton and several Irish members declared that the speaker was deficient in disciplining powers to be of the highest order. Dr. Pavy wrote his diary in some three or four different languages, and the penmanship is so poor that it can scarcely be deciphered.

A Disorderly Scene in the Commons.

LONDON, Nov. 4.—In the house of commons Mr. Bigger, Liberal, of Kirkcudbright, moved an amendment to the address in reply to the queen's speech, and a nine hours' debate ensued. At 2 o'clock the house adjourned. During the discussion Mr. Bigger, member for Cavan, was twice called to order by the speaker for irrelevant remarks, and Mr. Sexton and several Irish members declared that the speaker was deficient in disciplining powers. The rulings of the speaker provoked cries of "Shame! Shame!" from the Parnell benches, and several Irish members declared that the speaker was deficient in disciplining powers to be of the highest order. The speakers were frequently interrupted by cat calls, cheers and hisses.

A Mammoth Floating Hotel.

LONDON, Nov. 4.—Commissioner Pine, of the New Orleans exhibition, has chartered the steamer City of Rome for one year. She is to carry the exhibits from the Hebrides and elsewhere to New Orleans free of charge to the owners of the consignments, and in after years be used as a floating hotel. The managers of the exhibition expect to fasten the big steamer to the levee, and to give entertainments and receptions on board every evening while the exhibition lasts. The Great Eastern expects to sail during the last week in November.

Distributing Carp.

WASHINGTON, Nov. 4.—The first carload of carp shipped this season left Washington last night. The crop this year is unusually abundant, and the commissioner will be made frequently from this time forward until the work closes in January. About 10,000 carp will constitute the first car load. The car will go to New York City, and from there distribute the carp through New York, New Jersey, Pennsylvania and New England. Some of the carp will also be sent to Canada.

A Gay Insurance Man.

FAIRBURG, Ill., Nov. 4.—It is reported that Mr. Milner, insurance agent, representing the Northwestern Life Insurance company, of Milwaukee, has eloped with Clara Gross, daughter of an old resident of this place. Mr. Milner at the time was engaged to be married to a young Baptist preacher, but he was discarded for Milner, who had already left his wife and children residing in Newark, N. J.

Hand & Trego a Mile.

[Associated Press.] WOOD, Nov. 4.—Hand & Trego, of Lancaster, Pa., ran a 5,280 mile heat against her own record to-day at Driving.

A LONG LITIGATION.

The Estate of Peter Herdic, the Investor and Millionaire.

Fighting Over Titles—Some Peculiar Manipulations—Claims Supposed to be Worth Thousands Sold for a Few Cents.

ELMIRA, N. Y., Nov. 4.—In 1879 Peter Herdic, the great lumber king, lobbyist and speculator and inventor of the Herdic cab, of Williamsport, Pa., who was worth $10,000,000, made an assignment. In all accounts his financial wreck was complete, and the consequent disaster was widespread throughout the lumber and semibituminous coal regions of Pennsylvania. Chiefly heaviest creditors were William Weightman, the Philadelphia chemist and quinine monopolist, and E. J. Walker. Weightman's son-in-law. These creditors were able to manipulate the affairs of Herdic so that at a marshal's sale of over half a million dollars worth of his property they bought the whole of it in for $4,000. This property consisted of $300,000 worth of real estate in Williamsport, 16,000 acres of coal land in Tioga and Lycoming counties, and 14,000 acres of timber land in the same region.

In 1880, Herdic having passed through bankruptcy, his assignees, Frederick and Bentley, sold $1,350,000 of his assets. Herdic had sworn that he was not worth a dollar, but at the sale he was the principal bidder. The assets consisted of $250,000 in the stock of the many ventures of Herdic, in which his fellow townsman had invested largely. These included the Williamsport and Canada Lumber company, the Robert Morris Land and Coal company, and the Lycoming Gas and Water company. The balance of the assets were in accounts, ranging in items of from $5,000 to $60,000 each in amount. An account against William Stodard was sold for fifty cents. A claim against the Lycoming Gas and Water company for $45,000 brought thirty cents, and one for $40,000 against the Williamsport Manufacturing company was knocked down for thirty cents. Other accounts of from $25,000 to $60,000 sold for a few cents. The entire list of assets realized but $1,500, and all that represented any value were secured by Herdic.

The matter of the marshal's sale of 1879 was allowed to rest without question until 1883, when Herdic's attorney, on the ground that the sale was illegal, procured an order for another sale, and he had the same property sold and bought it in for $6,000. In this transaction, under the name Herdic's attorney, Clinton Lloyd, has entered suit against Weightman and Walker to have set aside the sale of 1880 and the sale of 1883 made valid. This suit is to be tried at the December term of the Lycoming county court, and will reopen the Herdic affairs and disclose transactions in the bankruptcy. It will doubtless result in counter proceedings, in which the peculiarities of the assignee's sale of 1880 will be made known. It was understood under this sale Herdic's attorney, Clinton Lloyd, has entered suit against Weightman and Walker to have set aside the sale of 1880 and the sale of 1883 made valid. This suit is to be tried at the December term of the Lycoming county court, and will reopen the Herdic affairs and disclose transactions in the bankruptcy. It will doubtless result in counter proceedings, in which the peculiarities of the assignee's sale of 1880 will be made known. It was understood under this sale Weightman & Walker in the coal and lumber property of Lycoming and Tioga counties would materially affect those great interests in that region.

THROUGH THE AIR.

Three Children Thrown from a Burning Building—Fatally Injured.

PITTSBURG, Nov. 4.—A special to The Commercial Gazette from Huntingdon, Pa., says: A dwelling house, belonging to the Pennsylvania Canal company, two miles west of this city, occupied by James Holt and George Rogers and their families, the former having a wife and four small children, and the latter a wife and three children, was destroyed by fire. The fire originated in the lower story, immediately beneath the rooms of the occupants, who were in bed at the time. Before they were awakened by the fire the usual means of egress had been cut off and they were obliged to escape through the upper windows.

Holt and Rogers and their wives threw his wife and children out on it. Rogers assisted his wife to a short ladder which leaned against the house, but before she reached the ground she fell to the hard earth. One side of the building and burned her hair and clothing completely off. Rogers then threw his children from the second-story window and jumped after them as the window fell. The house, together with the contents, was totally destroyed. All the inmates of the

THE RAILROAD WAR.

Further Cutting Reported—Where Will It End?

NEW YORK, Nov. 4.—The Erie railway has made a passenger rate of $12 to Chicago to meet the rate of the West Shore, and the New York Central offered tickets at $13.50. There is no doubt that cuts were made from even these rates, especially to persons purchasing a number of tickets. The rate to Cincinnati was made $13.50, a total reduction of $5 from the tariff, and that to St. Louis $16, a reduction of $6.50. The Bee Line allowed $1 to brokers on Cincinnati tickets. All the great lines, except the Erie, have stopped paying commissions to brokers, and the latter are naturally turning all the business they can over to that line. C. G. Lansing, the head of the Trunk Line Association, said: "The brokers are in business to give low rates, and they will not work under the rates of the railroads. Reductions of $1 on tickets to Chicago to $5 on tickets to points beyond the Missouri river are allowed."

Amid all the cutting the Pennsylvania adheres to its full tariff rates, and its agents say it retains its share of the business to an astonishing degree. The rate on its limited train from New York to Chicago is $28, including sleeping car accommodations. Under the cut the New York Central's rate is $21.50. The Baltimore and Ohio has put on limited trains from Baltimore and Washington in opposition to the Pennsylvania's, charging nothing extra for riding in them, and deducting still further the differential rate allowed it when in the pool. The rate on the ordinary trains of the Pennsylvania from Philadelphia to Chicago is $18.35. The rate from Philadelphia to New York is $2.50, which added to the rate of $12 from New York to Chicago, makes only $14.50 for a ticket from Philadelphia to Chicago, by way of New York. Not only this, but tickets to Chicago can be bought at less than $12. The stand of the Pennsylvania has been a most decided and remarkable one. The second-class rate from New York to Chicago is $11. The emigrant rate of $13 is to be reduced to all points affected by the cuts.

STOREY'S SUCCESSOR.

A Probability that J. Sterling Morton will Edit The Times.

ST. LOUIS, Nov. 4.—A special from Omaha to The Globe-Democrat says: "It is not improbable that when the will of Wilbur F. Storey is made public on Monday next it will be found that the editorial direction and management of The Chicago Times has been intrusted to Hon. J. Sterling Morton, of Nebraska. Morton and Storey have always been close personal friends, and the proprietor of The Times had a high estimation of the Otoe county statesman's journalistic ability. Some ten years ago a will was drawn by Mr. Goudy, Storey's legal adviser, in which the latter named Morton as his successor. Whether that will is in existence now or not no one knows. During the years of Mr. Storey's mental decadence it is claimed he made a number of codicils and new testaments, none of which could stand if contested. If the will drawn by Goudy can be found it will undoubtedly take precedence over the rest. If not, a dispute seems inevitable.

"Mr. Morton being absent on a stumping tour of the state, it is impossible to learn whether he has personal knowledge of those facts, or whether Mr. Storey ever told him directly that he was to succeed him."

A Fastidious Tramp's Revenge.

NORRISTOWN, Pa., Nov. 4.—The barn on the farm of Mary Ann Davies, tenanted by Adam Miller, in Lower Providence township, was destroyed by fire at an early hour, together with the hay and grain crop, some of the farm machinery, and ten cows and three horses. The building was insured in the Union Mutual company, of Montgomery county, for $3,000. There was no insurance on the live stock or other contents. The fire is supposed to have been the work of a tramp who applied to Mr. Miller's family on Saturday for something to eat, and grew insolent because the bread and cold meat given him were not accompanied by hot coffee. He was ejected and muttered something of a threatening nature. He secreted himself under a neighboring bridge, but was driven away during the evening. It is thought he returned and fired the barn

Gordon's Fate Still in Uncertainty.

LONDON, Nov. 4.—It is impossible to state with certainty whether the report of Gen. Gordon's capture is or is not true. The officials at the war and foreign offices are very reticent, and this is a bad sign. The nearest official representative of the Duke of Cambridge says that he has no news to impart, and that it may be many weeks before accurate intelligence is received as to Gen. Gordon's condition. Most of the people in London believe that some terrible disaster has befallen Gen. Gordon, and hope is abandoned as to Col. Stewart. In all the cathedrals and churches in the country the disquieting chapelse special prayers were delivered for Gen. Gordon's deliverance from peril

Want More Than Six Hours Sleep.

NEW ORLEANS, Nov. 4.—The Street Railroad Benevolent association has sent a committee to the railroad president to obtain a final answer in regard to their new tariff of hours. The committee received a satisfactory answer and the association struck immediately. There are only a few street cars running. The car drivers now receive $45 per month, and say they work eighteen hours. They demand $60 per month and fifteen hours' work per day. The community sympathizes with the drivers.

Candy Not Infectious.

PHILADELPHIA, Nov. 4.—The Italian bark Marie, the last of the vessels expected in this port from Cette, France, where the cholera raged with such violence, has arrived here. She has a cargo of terra alba. She sailed from Cette on the 22nd of August, after the breaking out of the scourge. In view of the character of the cargo the health authorities did not deem it necessary to detain the vessel.

Death from Starvation.

CHATTANOOGA, Tenn., Nov. 4.—A few week ago Henry Johnson died, leaving his wife and four small children, leaving them in destitute circumstances, and sick. One of the children, a 12 year-old boy, was found dead in bed, having perished of starvation and exposure. A younger brother was also nearly dead. His wants were at once relieved.

A Steamer on Fire.

NEW YORK, Nov. 4.—Shortly after 9 o'clock a fire broke out between decks on the steamer Ramon de Herrara, of the Spanish line of steamships, lying at pier 18, N. R. The fire originated in the bonded cargo and the loss is estimated at $50,000, which is partially covered by insurance.

Bishop O'Farrell Explains.

ROME, Nov. 4.—The pope has received a telegram from Bishop O'Farrell, of Trenton, saying that he made the statement credited to him that his holiness had expressed himself in favor of home rule in Ireland, or that he has said anything that could possibly be so construed.

A NEW PAVEMENT.
The undersigned has secured the exclusive agency for the sale of the
Diebold Patent Iron Stone,
which for elegance and durability, is unsurpassed, and in price will compare favorably with any other pavement now in use. It is the most beautiful pavement to walk on and travel, for horses, cows, floor tiling and street blocks. Also used to build fire and Burglar proof vaults; and for building purposes generally. These pavement blocks have many striking peculiarities—They show no perceptible wear; are non-conductors; repel ice and snow, as well as all kinds of moisture. When dampness accumulates on the ordinary brick, the materials remains perfectly free from it. These Blocks are cast from the molten Iron Slag and are the basic kind of substance. Specimen on exhibition at Warner's Fancy Store, opposite Stillman Music Hall. For further particulars call on or address

FRANK CHANFRAU.

Looking Back Over a Professional Career of Forty-Two Years.

Weary of Wandering—The Hardships of a Life Upon the Stage—Something Keener Than Physical Suffering.

[Philadelphia Times.]

Frank S. Chanfrau, the actor, who was buried the other day in his family plot in the little Methodist cemetery at Lee's Branch, was above all things a domestic man. He was devoted to his art, he loved it sincerely, unaffectedly, yet above all the glitter and applause of the theatre he valued the sweet delights of home. He was on the stage for forty-two years. He played everywhere in the United States and achieved an extraordinary popular success. With the first fruits of his triumphs he purchased the home by the sea that year after year it was his pleasure more beautifully to adorn. He looked forward to his summers there with his wife and children around him with the joy of a simple loving nature. He entertained them a good deal, in an easy, hearty way. He loved grass and flowers, and would spend hours, in old clothes tramping through the fields or lounging under trees. When he began to show by the silver in his hair and the lines across his brow and round his eyes that youth and prime had gone, he clung with the strength of an old man's yearning to the pleasure of his own hearth. In his later years the thought of breaking up his home ties to go the weary round of the theatrical star's annual career was intensely painful to him. He was weary of the wandering life, almost inseparable from the stage to-day, and dreamed of a time when he would have a theatre of his own, or by some other means be enabled to be in his own home all the year round. A few weeks ago, sitting on a pine board in the midst of a field adjoining his home at Long Branch, he confided to the writer of his career, of his intense weariness and of his desires.

WEARY OF WANDERING.

"Eight years more," said he, "and I shall have been fifty years before the public. But I hope to heaven," he added, not dreaming then of what was so soon to follow, "that I shall not continue it that long. I hope that I shall be out of the profession before that time comes. I'm getting on in years and I'm weary of wandering to and round the country. I want my home."

"Well, now that you have been on the stage so long, would you advise any young man or woman to adopt the theatrical profession?"

"I would not; as it is now. It is a dog's life. The hardships of a sailor's existence are nothing to what an actor must endure. You are on the march all the time for eight of nine months in the year. You have got to hold yourself in readiness to move at the shriek of a whistle or the sound of a bell. All matters are one to you. Disease and death may threaten, but still you must not falter; trains must be caught, dates must be kept. Home life is something that the actor knows only as a treasure cherished by other men. It exists not for him. If he can manage to gather his family round him and settle down beside his own hearthstone, he I have done here, it is for a few weeks only. Then at the sound of the old bell he must pack up his household idols, nail up his door and march, march, march the weary round of the months once more. He goes one way, his wife perhaps goes another and his children go a third. They may not see any of the others again until the summer returns. At most, all that can be hoped for is a chance meeting now and again when business engagements bring one within reach of the other. My wife and I travel together now. We could make money apart, but I have waived all that."

"Do you grow weary of hotel life?"

"Weary! That does not half express it. Many of the hotels into which one must go are abominations. I have time and time again gone away hungry, from hotel tables because the stuff set before me was unfit to eat. The hotels in the big cities are all right, but no one can tell what sort of place he will get into in the little towns. But it is not the physical discomforts that are the most painful. There are mental sufferings that are keener than those."

KEENER THAN PHYSICAL SUFFERING.

"I do not understand."

"Well, it is a painful subject to touch upon. You know that prejudice always is strongest and lasts longest in country towns. We actors know and feel that. The people in the little places sometimes forget that the theatrical profession, like all others, is made up of the good and the bad. They make no distinction of class. They treat us all alike, and that is as if we were pickpockets; yes, as if we were pickpockets. When we strike a town of this sort the wives of the company sometimes lock themselves up in their rooms and have a good cry. And the same thing often takes possession of the men, too, and I many a time feel like remaining in my apartments and never leaving them, except to go down to the theatre. But the whole system that now prevails in theatrical management must soon go under. It will fall of its own weight. Under it now the smallest country towns have a greater number of attractions than even like New York or Philadelphia. If a star goes to either of these cities he will remain a week at least. But a little town must have Edwin Booth and Joe Jefferson and Maggie Mitchell and Madame Janauschek one night after the other. It is too much for the community and the business doesn't pay the star. Besides, the combination system of supplanting the stock company has destroyed the school of acting and lessened the number of capable artists. There never was a time when managers and actresses with a knowledge of their business were so few and they are in a position to demand almost their own terms."

The Parlor Picnic.

[Courier-Journal.]

"Sam," said a coal-cart driver, stopping a gentleman in front of a large fourth-story building, "is dis de Parlor Picnic s'iety? Yo see, I've got a load o' coal to deliver, and I ain't earth about it." "Parlor picnic! parlor picnic! I cannot be paralyzed if you mean to see your father. Oh, you, it's the Polytechnic society. You, boss, thunky; don't it—de Parlor Picnic s'iety. I thought I knowed de name right!"

The First Telephone.

[Harrisburg Herald.]

The cable reports that the ladies recently attached a number of residences in Brussels with "speed reveral documents." The plot thickens. Mischief is brewing. What "documents" were "public documents," such as patent office and agricultural reports, bound volumes of the Congressional Record and the acts of 1881, liberally will flow cannot matter. Probably later.

Back Taking His Task.

The Paris Soir, in criticising the English preparations for the Soudan expedition, is not sure of all by the officers each taking a turn to wash in.

HAZEN ON TORNADOES.

Police Compasses and Bayonets Essential in Times of Danger.

[Washington Cor. New York Sun.]

Now that the tornado season closes its engagements for the summer after a brilliant and busy season, those who have not read Chief Signal Officer Hazen's "Characteristics of Tornadoes, with Practical Directions for the Protection of Life and Property," should do so, for it is a unique work. It shows that the tornado, although wild and untamed, is regular in its habits, and that it follows a daily track from the southwest to the northeast. It most frequently leaves its lair between the hours of 3 o'clock and 4 o'clock p. m., and never later than 6 o'clock p. m., although it may take until after the latter hour to finish its awful work.

Statistics in the work embracing a period of six years show that Illinois, with seven tornadoes and two-tenths of a tornado a year, and Kansas, with six and nine-tenths tornadoes per annum, were the favorite haunts of this storm, while Connecticut, with only two-tenths of a tornado a year, is at the foot of the twenty-five tornado-producing states in the list.

With respect to protection from tornadoes in towns and cities the following suggestions are made: "On any day when the weather conditions presage the probable approach of a violent tornado storm it should be the duty of those in authority to deputize certain persons —one or more in each ward—the number depending upon the size of the town, to watch the character of the sky * * * and give timely warning of the tornado's advance to the various families in their respective wards, and take charge of the removal of persons and property to places of safety. In the matter of warning it would probably be to advantage to make use of the church and schools bells by ringing them in some peculiar manner. It should be well known that the persons above referred to are possessed of special authority. * * * They should be active, intelligent and judicious men." The book further advises that every one should obey these tornado guards, and the author earnestly suggests that no one "should scoff at the novelty or minuteness of the arrangement." He says: "It will not be necessary for these persons to be adepts in the science of meteorology, or devote their time from the 1st of April to the 1st of September exclusively to observations of the sky." The instructions as to how one should conduct himself on the approach of a tornado are:

"If, in the center, or half way between the center and southern edge of the storm), always run to the north. If further to the south, move directly to the south, bearing slightly east. Never run east or northeast."

A dugout is highly recommended as a retreat, but the best one is a cellar, and reads: "Retreat instantly to your cellar and place yourself face forward against the west wall. A south wall at a point as near the southwest corner as possible is the next best place, but under no circumstances take a position in a northeast room or a northeast corner."

If out of doors "throw yourself prone (face downward) upon the ground, head to the east, and arms on the head. If near a large stone or stump take a position directly to the east of it, head toward the object."

A Brakeman's Plea.

[Boston Globe.]

If there was a law compelling the companies to pay for smashing brakemen you couldn't find a link and pin coupler in the country. Dangerous! I don't suppose you have any of the dangers to his body a brakeman's work on a freight train. He's got to have muscle, activity and judgment, and if he fails in one of these for a moment—why, they just scrabble him up in a blanket. Married men won't couple cars, except when they can't get any other job. It's all done by young fellows—poor boys who can better afford to get killed. Some day the poor boy is helping make up a long train. He's 300 yards away from the engine. He's standing on top of the train passing signals with his hands to the engineer. The engineer don't want to kill anybody, but he can't see the whole length of the train, and it's hard to tell by the motions of a man's hands just how much more to back. The brakeman gets in between the cars holding a pin in one hand and a link to fit the link and the pin. Along comes the train like the hammers of hades; the draw-bar gives way, retreats clear to the head, or the brakeman loses his footing in the shock. They carry him home, tell his folks that Johnny got killed on the road, and get another brakeman.

Then in the winter there's ice and snow on top of the cars. Everything is slippery and it's awful easy to miss a step and go down between the cars. Overhead bridges break a good many heads. It's dangerous work, and we get paid $1.35 for ten hours' work. It costs a brakeman $80 a year for $1,000 life insurance, about six times what it we all cost you. In some parts of the country the brakemen have associations, and when one gets killed the association pays his widow or his mother or his sister $3,000. There is no association like that here. There was, or that the companies had to pay for us. The only coupler that will ever catch them will be one that saves money. That may sound rough, but it's God's truth.

Get up a coupler that doesn't cost much more than a link and a pin and doesn't lose pins, and you'll have us. Let me tell you why. The average cost of pins five a year to each freight-car. Boys steal 'em for junk, and they get lost in a hundred ways. Pins cost 2½ cents apiece. That's 12½ cents per year. There are nearly 1,000,000 freight-cars in this country. That's $300,000,000 worth of pins lost every year. Looks big, don't it? Well, reckon of a third for pins that are recovered and you still have a sum worth saving. Show the railroads a self-coupler that doesn't cost more than $5.00 at the most, and saves pins, and the brakeman's job is a better show for his life than seven chances in eight.

Looking for a Safe Investment.

[Wall Street News.]

He was a tall, solid man. In fact, the boys said he looked just like a man who felt that the ordinary route to heaven was altogether too long for him. When he had passed the time of day with the broker, and stated that he lived in Indiana, he added:

"I am the guardian of an orphan who had $80,000 left her."

"I see. All right—have a case like yours every day in the week. John, bring me an armful of those New York, St. Louis & Chicago securities of yours. Sell 'em to you to-day at 5 per cent. $80,000 wants will cost you $1,200. You think 'em on the poor orphan at face value and clear $19,000."

"—about that."

"That's all right, sir—guardians doing the same thing all over the land—here they are, dirt-cheap, if you please. See day's quotations!"

What Will Work Up.

[Washington Capital.]

Speaking of railroads, that was a capital order which the general manager gave recently to the operator who had a disagreeable job to perform. "Now, Jones," he said he, "what you owe a special and have the right of way. During the night run eighteen wild cattle on the track. What you must do is to run over them and keep the train moving. During the rest of the time when you are not

---

SUMNER AND HIS WIFE.

Intellect, Statesmanship and Dignity—Beauty, Balls and Society.

[New York World.]

Mrs. Sumner had no money and beauty, but was not an intellectual woman and did not belong to the circle of Boston society to which Mr. Sumner had the entree. She was especially fond of a fashionable, wealthy society-loving woman, ambitious of the position in Washington society which a marriage with Charles Sumner would give her. She had a house in Washington always which many pretty women, when they have an object in view, exercise, and with them she accomplished her object and became Mrs. Sumner. She had married Mr. Washington and intended to enjoy it, and when Mr. Sumner, who did not dance, would mildly suggest that it was late, that he had important duties for the next day in the senate, and would like to go home to rest, she would tell him to go and she would come when she had danced her list down.

In Mr. Sumner's eyes this was too indecorous for endurance, and, too, with the prestige his own endowments had given him in politics and literature, he naturally supposed there was no attraction about him superior to balls and society beaus. His self-esteem was wounded and his sense of propriety shocked, and particularly so when Mrs. Sumner chose on a cavalier who would attend her in society. By the advice of friends Mr. Sumner endured his wife's whim for gayety, hoping one winter's surfeit would be enough. But when the actions of his wife provoked the voice of scandal he sought redress from official quarters. The youth whom Mrs. Sumner had chosen for a favorite was one of those younger English men who are attached to the British legation that the position may give them opportunities in society here which they would not otherwise have. Mr. Sumner represented to the then secretary of state that this young Englishman had stepped beyond his diplomatic duties, which he was there for, in becoming a gentleman and representative of her majesty. The matter was reported to the home government, and Earl Newcastle, a personal friend of both Mr. Sumner and the secretary of state, in his official character as secretary of foreign affairs recalled his young countryman. This gave offense in many ways to Mrs. Sumner, and the fact that admiration was her constant attendant, it deprived her of her personal liberty of action, and implied that her conduct had met the disapproval of her husband's friends. Then she came to be returned to her father-in-law in Boston.

It was afterward determined she should join a sister living in Europe, and there she has been with her daughter, whose eligible marriage was noticed in the papers a little over a year since. The Sumner marriage and unhappy Sumner were society talk for a season. Mr. Sumner had the sympathy of his friends throughout the whole, and their approval of his course in requiring the dismissal of the English attache. After Mrs. Sumner's departure he returned to the society of his more intimate friends, and appeared the same as in his bachelor days.

Bangles and Eyeglasses.

[New York Letter.]

I regret to say that the number of men who wear bangles in their eyelets is slowly increasing in New York. The fashion has not spread with unusual rapidity, but is surely and slowly gaining ground, and the noticeable part of it is that the affectation is most prominent among Americans than among foreigners. I have observed that the same is true of the use of eyeglasses. In London almost every man who pretends to be a gentleman in a certain sphere wears a single eye glass. As a rule he does not wear it in his eye, contenting himself with allowing it to dangle over his breast from a short black cord. It is usually a plain glass without a rim and rather small. Everybody wears them over there, and it attracts no attention whatever.

On this side, however, the single glass has always been considered a special badge of idiocy; until four or five years, a man who walked up Broadway with an "eyeglass in his ocular" was stared at on all sides by the crowd, and often guyed by men whom he passed. Now, however, the single glass no longer attracts attention in the fashionable quarters of the town, and a man may walk up Fifth avenue impunity, painting idiot or he goes. In Delmonico's at all times one may see anywhere from five to a dozen men attempting to eat soup and hold their glasses in their eyes at the same time, and it is a rare night that doesn't witness one or two accidents from this affectation. When a man is opening his mouth in the vicinity of the soup-spoon, the muscles of his face naturally relax, and the eye-glass drops from his eye. Of course it drops on the edge of the soup-plate, and that is the end of the soup, the eye glass, and the dude for that particular evening.

With the exception of one or two cockneys and a few of the more affected American sons an Englishman habitually wearing a single glass in this country. They have the good sense to see that it makes them conspicuous, and they drop it when they find in the mould-be Englishman and the Anglo-maniac the single glass is an element of ecstatic joy. Nearly all of the habitual slaves of this curious affectation are young American born youths. Their grimaces and facial contortions indicate so plainly the agonies they undergo, that it is probable they are punished enough by their folly without being condemned to public ridicule.

Substitutes for India Rubber.

[American Queen.]

The Swiss Gewerbe-blatt thus discusses the subject of a substitute for India rubber. In the first place, such a substitute must be cheaper than the real India rubber. There are many kinds of material that fulfill this requirement. Sulphur if one of the things that is manufactured in retailers' pens and salts. Its great brittleness gives place to a softness, pliability, and elasticity similar to rubber if it is poured into cold water while melted. (In melts two at different temperatures, and it is only after this second melting that it possesses this elasticity.) It remains soft enough to be modeled for several days, and these qualities it retains permanently if it is mixed with more or less linseed oil varnish before it is poured into the water.

There is no doubt that sulphur is of import-ance in the manufacture of vulcanized India rubber, and so less so as a substitute for gutta-percha. The first thing is to endeavor to discover some preparation of this substance which shall destroy that crystalline structure which makes the sulphur brittle, and renders it impossible for it to return to the condition of elasticity. This discovery once made deserves consideration, for it is likewise a tenacious substance that can be stretched, and is capable of many curious applications. Combined with fresh linseed oil and resin, Stagler has, in fact, patented a composition of sulphur, copal, oil of turpentine and alkohol. Although substitutes for gutta-percha may be obtained with the aid of some of these substances, it will always be difficult to imitate the elasticity of India rubber, and the "working well" of India rubber, and the elastic property does not come into present use.

Workers in bleacheries where chlorine is largely used are singularly exempt from all throat diseases, but suffer special diseases peculiar to themselves.

Colder, clearing weather, with light rains.

Chronological Events.

Guy Fawkes Day.

JOTTINGS.

—Carry off the dead.

—It looks as if the Mugwumps did the business.

—The Butlerites excuse their small vote of 28, instead of 240 as they claimed, by saying that all the other Buts. went fishing and hunting the day before election.

—The Saintly Johnnies were very near the truth. They said that they were sure of fifty votes. They actually received forty-six. They had, however, great expectations, as they expected to poll one hundred votes.

—A false alarm of fire last night about eight o'clock brought out the fire department. The fire was believed to be somewhere in the region of Morristown. The vigilance of the bellringers of Plainfield is truly remarkable, and their sphere of operations ought to be extended to include the entire State. Plainfield ought to excel in this respect as it seems to in every other it takes a hand in.

AN OUTRAGE ON A WOMAN OF SEVENTY.

Escape of the Villain—The Woman not Expected to Live.

Yesterday a most dastardly outrage was committed in North Plainfield township back of Fanwood, near the mountain, at the home of William Gould and wife, an old couple, who are said to be each about seventy years of age. The old man had come to North Plainfield to vote, and, during his absence, a colored tramp called at the house for food. While the old lady was engaged in getting it for him, he seized her by the throat so that she could not scream for help, and when the helpless old woman was in his power, he ravished her and fled. After the negro's departure Mrs. Gould managed to get to a neighbor near by, and sent for a doctor. The doctor says it is doubtful if Mrs. Gould will survive.

Constable H. Hand, of Fanwood township was notified, and he immediately took steps to find the villain, sending telegrams in all directions.

The last heard of the man, he was moving in the direction Morristown, although he may have turned in this direction. He is described as of medium height and of rather light color, rather stout and about thirty-five years of age. When last seen he wore as a part of his clothing, a slouch hat and light colored pants, and he carried in his hand a small bundle.

There is great excitement over the outrage, and it is hoped that the tramp's arrest will be secured and that he will receive the punishment he so richly deserves.

In Plainfield.

The Republicans of this city were very much disappointed over the morning intelligence received from over the country, notwithstanding that they done as well as they have probably ever done in this locality, The Democrats were correspondingly elated.

Van Deventer Hall was filled all last night with Republicans and the Democratic headquarters with Democrats, each receiving different sets of returns, which made both parties happy. Prior to the arrival of the New York papers both sides were confident of victory, but thereafter the Republicans conceded the Presidency to Cleveland as extremely probable. They were, however, ready up to the arrival of the New York papers to cover any bets—that is, those who bet—although they seemed to bet as they expressed it, to show that they had grit and "would not squeal," even when the returns were so disappointing.

The campaign throughout has not been wanting in excitement, and party spirit has run so high that coolness and ill-feeling have sprung up between many men who have hitherto been warm friends. Now that the battle is over, it is hoped that sentiments better than those which engender enmity, will lead to reconciliation and the restoration of good feeling all around. "Life is short" and he who has a thousand friends has not one friend to spare. Therefore, if you have made even one enemy in the heat of the campaign, do the manly part—shake hands and be friends again.

The Colonel's Third Night.

Notwithstanding the rain last evening, and the intense political excitement, there was a fair attendance at the Casino Rink, many of the young skaters. Master Hyde and talented young skater, Master Hyde and Miss McClellan, gave another fine exhibition of their talent at roller skating, repeating many of the feats of the previous evenings, Master Hyde performing a new one also, which evoked the most enthusiastic applause. This feat was skating around a number of bottles placed standing on the floor, about two feet apart. After the exhibition the skating was continued by the audience as usual, the corset band furnishing music.

Whoop 'Em Up!

The Result in this City.

Every Ward Goes Republican.

Blaine's Majority 188.

The County 700 Democratic!

THE NEWS' COUNTY TICKET—LIVINGSTON, STILES AND KIRKNER—ELECTED.

The Result in Detail.

The various political headquarters were crowded all last night by enthusiastic politicians eager to get the latest information of the result of the election. The news was nearly uniformly in favor of Cleveland, and his supporters shouted themselves hoarse for joy.

In this county THE NEWS' ticket swept the field, Stiles receiving large majorities for Sheriff, Livingston defeating Vail, the present incumbent, for Senator, and Kirkner winning in the assembly contest.

The returns from the townships in the county come in slowly, as do the returns on this result in the State. The result in this city is given below, the names of the successful candidates being printed in heavy type.

PLAINFIELD.

The result in this city is as follows:

The First ward gives

For President.

Blaine, Rep	202
Cleveland, Dem	187
Butler, Nat	2

The Second District gives Blaine 105, Cleveland 137, Howey for Congress 106.

CRANFORD.

Cranford gives Stiles 65 majority.

LINDEN.

Returns from Linden give Stiles 75 majority, with a probable increase to 100.

RAHWAY.

Rahway gives Stiles 228 majority. Vail 201, and Gibby 69.

THE RESULT IN THE COUNTY.

[SPECIAL TO THE NEWS.]

Elizabeth, N. J., Sept. 5, 11:30 a. m.—The returns are coming in very slowly. Cleveland's estimated majority in the county is 700. Elizabeth gives less than 500 for Keron for sheriff. Stiles therefore elected by several hundred majority. Livingston is elected senator by about 150 majority. Green defeats Kean for Congress. by 3000.

MERCER COUNTY GIVES 600 REPUBLICAN MAJORITY.

[SPECIAL TO THE NEWS.]

Trenton, N. J., Nov. 5.—Mercer county gives Blaine about 600 majority. The State will give Cleveland about 300 majority.

Last year Mercer county gave 347 Democratic maj rity; in 1880 575 Republican.

MIDDLESEX COUNTY GOES DEMOCRATIC BY SMALL MAJORITY.

[SPECIAL TO THE EVENING NEWS.]

New Brunswick, N. J., Nov. 5.—Cleveland carries Middlesex county by a small majority; also Green for Congress, Slack for County Clerk, Savage and Martin for assembly and Convery for Sheriff are all elected. Carson for assembly is the only Republican in the county, and he has 600.

Last year Middlesex county gave 781 Democratic majority; in 1880 1137 Democratic.

Latest on the General Results.

[SPECIAL TO THE NEWS.]

It is now thought New York will give a slight majority for Blaine.

Indiana is set down by the Republicans for Blaine by 5,000.

Y. M. C. A. Notes.

Young Men's Christian Association Literary and Debating Society, whose election of officers was reported a few days ago, starts out on its career with vim, and promises to be a felt power among the young men connecting themselves with the Association.

Its object is a significant one. It will tend to cultivate a correct mode of speaking and qualify its members by practice to express their opinions in a correct manner. Subjects will be selected calculated to improve the mind. All will have an opportunity of participating in debating upon various subjects of the day. Orations are promised at each meeting. Original essays to be written, and critics for the evening will be appointed.

The subject for debate at its next meeting will be, "Resolved that women are eligible to citizenship and to hold office." Disputants, John Ulrich, E. H. Lewis, affirmative, H. J. Runyon, E. L. Suffron, negative.

The following appointments were made for the coming meeting: F. Willis, Critic; W. R. Coddington, Orator; Tiemann Horn, essayist.

The association promises the public interesting public meetings, when they may expect orations, debates and readings to be given by its members.

To Save Men from Harm.

A number of the noble ladies of the Woman's Christian Temperance Union of this city volunteered their services to supply hot coffee and crackers and cheese election day and evening at the Holly Tree Inn, to voters generally, in the hope of keeping the latter away from temptation to drink anything intoxicating.

All day long and until midnight the Christian ladies labored incessantly in their work of love, and served over seven hundred cups of coffee, from the Inn from noon on to twelve p. m. Two hundred cups of coffee were sent in gallon jugs to the various polling places. A barrel of crackers, fifty pounds of coffee and the requisite sugar and milk were used. The ladies of the W. C. T. U. express their sincere thanks to the many who so generously responded to their call on the occasion referred to.

A Fortunate Discovery.

A new light is thrown on consumption by Dr. Pierce's Golden Medical Discovery. Its balsamic and healing properties are wonderful in their effects upon the lungs, and it will soon be proved beyond question that consumption is a curable disease when this remedy is faithfully given a fair trial. Sold by R. L. Hand, Front street opposite Park avenue.

WEDNESDAY, NOVEMBER 5, 1884.

THE SONG OF MARIANA.

[Samuel Minturn Peck in The Current.]

I linger at the gateway where once we stood together,
The withered lilies glimmer and beckon sorrowfully.
O Trusty Heart! come straightway; through fair and stormy weather
My love has now grown dimmer—Dear Heart, come back to me!

The amber wine is fading. The gloom begins to thicken
Above the streamlet lorry a-sobbing to the sea;
With tender light upbraiding, sweet thou the hearth quicken!
Thou heedest them too slowly.—Dear Heart, come back to me!

Ah, were I like the swallow, with joyful flight to thee fleeing,
The cruel distance cleaving, I'd swiftly fly to thee;
But still I may not follow; amid the darkness drifted
I cry out in my grieving—Dear Heart, come back to me!

MEXICO'S INDEPENDENCE DAY.

The Capital City and its Attractive Decorations.

[Clara Bridgeman in N. O. Times-Democrat.]

On the morning of the 16th the city presented a scene of unusual animation, and the streets were filled with crowds of well-dressed people that, by the 8:30, mingled in many places with the banners of other nations; flags of all sorts and sizes floated in the fresh morning breeze from the innumerable balconies; poles were decked with pennons, and garlands of evergreens adorned the whole length of the principal thoroughfares. At each corner of the main avenue a triumphal arch had been erected; the first two composed of flags tastefully draped, were the offerings of the military college and of the German citizens; another was gracefully festooned of Spanish moss, from Chapultepec, which, when illuminated by electricity looked like curtains of the finest lace, was donated by the Jockey club, while the Mexican colony contributed one that was a model of elegance and good taste, as a delicate token of appreciation for the sympathetic interest shown by the Mexicans in the fearful visitation of July 4th.

Among all the decorations, however, the one that attracted the most attention and drew the largest circle of admirers was the archway erected at the entrance of Intaxaleo—a small Indian village situated on the canal in the midst of the Chinampas or floating gardens which supply the capital with the greater part of its table products. This work of art, which was unique of its kind and truly extraordinary on account of the material employed as well as the time and patience expended in arranging them, was composed almost entirely of vegetables so grouped together as to form designs resplendent with color and delicate tints. The Mexican coat of arms was perfectly represented, the eagle being formed of garlic, but mounting a branch of real cactus, with a background of yellow blossoms well known by the Indians as the "flowers of the dead," which apparently have a mystic signification to them.

When one thinks of the accurate idea of this column—about forty-five feet high, and wide in proportion—and the quantity of material in the shape of cabbages, cauliflowers, turnips, onions, carrots, etc., that required to cover it, as well as the elaborateness of the ornamentation, one is filled with amazement at the thought that untutored Indians could show such perfect specimens of curious and beautiful a piece of work. The "agriculturos" of Intaxaleo certainly had reason to be satisfied with the tributes of admiration paid to their vegetable arch, for from early morn until far into the night a dense crowd of wondering spectators stood before it, constantly changing in character and size, and the air was filled with the incessant murmur of comments which resembled the hum of an immense bee-hive.

THE ELECTIONS.

The Long Political Agony Over at Last.

RETURNS FROM ALL STATES.

Indications Which Seem to Point to Democratic Success.

New York, New Jersey and Indiana Claimed by the Democrats—The Complete Returns Still to be Heard From—Connecticut Close—Opinions of the Press on the Result.

NEW YORK.

NEW YORK, Nov. 5.—Soon after the polls closed politicians began to reassemble at political headquarters to hear the returns read. It was not until 6:30 P. M. that the first returns were received and the crowds in the corridors made a rush to the court room. At the rooms of the national Democratic committee there was an ever changing crowd during the entire afternoon and the greatest anxiety was manifested to hear the latest returns from the polls. The headquarters of the Republican national committee were also crowded by an excited throng. Bulletins of the latest returns were displayed at the various newspaper offices in Park row, and despite the rain the crowds at times made the sidewalks impassable. Bulletins were also displayed at various uptown hotels, and never before has so much interest been displayed in any presidential election. Later in the evening crowds assembled in front of the Times and the Fifth Avenue hotel and anxiously watched the stereopticon returns.

BINGHAMPTON, Nov. 5.—This city completes given Cleveland 194 majority. The Democratic vote is 194 in excess of that of 1880, an increase of 15 per cent.

THREE CELEBRATED MEN.

NEW YORK, Nov. 5.—President Grant did not vote. He was confined by lameness to his residence at No. 3 East Sixty-sixth street. He said yesterday that from all he could learn the division had been caused by President Arthur voted at the polling place on Third avenue, near Twenty-ninth street. Henry Ward Beecher was greeted by three hundred ballots of the ballot box in Brooklyn, and no one asked his name or what ticket he voted.

THE WORLD'S EDITOR-ELECTED.

NEW YORK, Nov. 5.—Joseph Pulitzer, dem., editor of The World, is elected to congress in the Ninth district of this city by a large majority.

CLEVELAND'S PLURALITY.

NEW YORK, Nov. 5.—The total vote of this city for Cleveland is 132,842 and for Blaine 80,005; Cleveland's plurality, 42,777. Butler receives 3,415 and St. John 1,367 votes.

SYRACUSE, Nov. 5.—Syracuse gives Blaine 1,898 majority.

TROY, Nov. 5.—Rensselaer county gives Blaine 800 plurality, a Republican gain of 150.

ROCHESTER, Nov. 5.—Monroe county completes gives 5,544 plurality for Blaine.

SYRACUSE, Nov. 5.—Auburn 1,100 majority for Blaine. Cayuga, 3,500. Seneca county complete gives Cleveland 300 majority.

ALBANY, Nov. 5.—Accurate returns have been received from only fourteen counties in this state above New York city. They give Blaine a plurality of 25,000. The same counties gave Garfield a plurality of 27,719, showing a net rep. loss since 1880 of 2,092.

THE CITY AND COUNTY TICKET.

NEW YORK, Nov. 5.—The result in this city on the city and county ticket is probably as follows: Hugh J. Grant, Tammany dem., is elected mayor, defeating William R. Grace, County dem., and Frederick S. Gibbs, rep. Edward V. Loew, County dem., is elected comptroller, defeating Willis S. Paine, Tammany dem., and J. F. Plummer, rep. G. H. Forster, Tammany dem., is elected district attorney, defeating F. B. Martine, County dem., and Charles S. Spencer, rep.

NEW YORK, Nov. 5.—Returns at the Republican state headquarters make the plurality for Cleveland in Kings county 15,259.

NEW YORK, Nov. 5.—The chairman of the Republican state committee says that outside of New York city and Brooklyn, Blaine's majority will be 30,000. Democrats here claim that Cleveland will have 60,000 majority for state ticket.

SAMUEL J. TILDEN VOTES.

NEW YORK, Nov. 5.—About 10 o'clock a cab drew up in front of the polling place at 277 Third avenue. Within it was Samuel J. Tilden, accompanied by his private secretary. He was immediately recognized and greeted with hearty cheers. Mr. Tilden was dressed in a black broadcloth suit and wore an overcoat of the same color and a silk hat. He appeared to be in excellent health. The ticket peddlers swarmed about, anxious to secure the honor of handing him a ballot. He called for a Cleveland and Hendricks electoral ticket, and leaning on the arm of his secretary stepped up to the ballot box. In answer to the inspector's question, he replied: "Samuel J. Tilden, No. 15 Gramercy park." Cheers from the crowd packed inside the polling shop greeted the announcement of his identity.

BUFFALO, Nov. 5.—The vote of Buffalo city complete is: Cleveland, 14,061; Blaine, 13,915. Butler, 1,039. Cleveland's majority, 146. The vote in 1880 was: Garfield, 16,396; Hancock, 13,918.

THE HERALD CLAIMS WISCONSIN.

NEW YORK, Nov. 5.—The Herald now claims that Wisconsin has gone Democratic.

UTICA, Nov. 4.—Oneida county, complete, gives Blaine 13,218; Cleveland, 18,509; St. John, 858; Butler, 1,026. Lewis county gives Blaine 87 majority.

NEW YORK, Nov. 5.—In 1880 the Republican vote in Kings county was 51,735, and in New York 81,720; a total of 133,451, the Democrats polling 61,092 in Kings county and 120,913 in New York.

BROOKLYN'S VOTE.

BROOKLYN, Nov. 5.—Until this city Gov. Cleveland's majority is estimated at 14,000. Archibald M. Bliss is elected to congress. The Democratic city ticket is elected, with the exception of Controller Campbell, Republican, outside the election of the twelve assemblymen.

NEW YORK'S ASSEMBLY VOTE.

NEW YORK, Nov. 5.—The revised Democratic majority in New York city is 61,000.

NEW JERSEY.

NEWARK, Nov. 5.—Essex, Bergen and the other counties in northern New Jersey show Democratic gains over 1880. Atlantic and Monmouth show Republican gains. Governor Abbett announces that Cleveland has carried the state by 1,000 plurality.

NEWARK, Nov. 5.—Returns from Jersey City are unusually heavy, though the vote is not registered 484 not turn out. The rapid

motion was 30,414 and the vote was 30,930, a falling off of 3,000. Next to Jersey City Hoboken is expected to show the largest gains. The day passed off very quietly and the best of order prevailed. It was the general impression in this county and the principle manifested of the party vote was the fact that the people turn out in earnest. The full vote has not yet been canvassed, some of the outlying districts being very slow, but enough is known to warrant the claim that Cleveland has carried the county by over 6,000, while William McAdoo, dem., is re-elected to congress over Frederick H. Teese, Republican opponent, by a 6 like majority. The full county ticket is elected by about the same majority. Denis McLaughlin is elected county clerk, by defeating Peter Ivers, and George R. Fielder, register. The Butler and Prohibition vote was very small. The only Butler candidate who received any support at all was Edward F. McDonald, the Butler nominee for county clerk, who was indorsed by the Republican and received the Republican vote. In the assembly districts the Democrats succeeded in electing seven out of the ten members to which the county is entitled. In the state the best estimate places Cleveland's plurality at 10,000. At 11 o'clock Abbett, Democrat, of the Republican state committee, conceded the state to Cleveland, though he thought 10,000 too large an estimate. He said, however, that he claimed that the Republicans had elected Phelps in the Fifth congressional district, Bires in the First, Lehlbach in the Sixth, and also the second district. Abbett, however, changed over, in the statement of Prosecutor Jenkens, of Camden, who claims Ferrell's election in the First district, because he was a Labor, Democrat. Prosecutor Jenkins, also, told Mr. Jenkins says that when he parted with Ferrell that gentleman had every assurance of his election. The Democratic committee likewise claim that Ferrell, in the Third, Fourth and Sixth, while the Seventh is known to have been carried by McAdoo. Cumberland county, Livingston, Dayton, De Velil, Bep., State auditor, which is a gain. Sussex county gives Cleveland 1,700 majority, a gain of 180. Orange, in Essex county, also gave Cleveland a gain. Gloucester gives Cleveland 100. A dispatch received by the state committee from Bunderdon county, shows a Democratic gain in the Fourth district of 2,500.

OHIO.

CINCINNATI, Nov. 5.—Two hundred and thirty-three wards and precincts in Ohio show net rep. gain of 3,440 over 1880; dem. gain of 707 over 1880.

CINCINNATI, Nov. 4.—Seventy-one precincts out of 106 in Hamilton county show a rep. gain of 2,557 over October election. This county will give a rep. majority of about 4,500 majority. Republicans claim the state by 25,000. Garfield's plurality was 26,227.

A LITTLE RIOT IN CINCINNATI.

CINCINNATI, Nov. 5.—A small riot broke out in West Eighteen. Officer Hunneman interfered, when Pete Kelly quickly stabbed him in the left side, the knife presumably penetrating the lung. The wounded man was immediately conveyed to his home, Father Burke accompanying him, under the impression that the wound was fatal. About 5:10 P. M., in the same ward, William Hennessy was fatally shot. He was removed to the hospital in a dying condition. The man shot in the eye by Frank McMars. Trouble also began brewing all day at this voting precinct, and large numbers of policemen were around the polls.

HAMILTON COUNTY'S VOTE.

CINCINNATI, Nov. 5.—Returns from Hamilton county give Blaine 37,379 Cleveland, 33,422; Butler, 355; St. John, 301. Dem. gain of 1,227 over the vote of 1880.

PENNSYLVANIA.

PITTSBURG, Nov. 5.—Allegheny county gives Blaine 15,000 to 17,000 majority, a gain of 2,000 to 4,000 over Garfield's vote.

HARRISBURG, Nov. 5.—The Republican plurality in Pennsylvania will be about 25,000. Returns from about half the state show Blaine's net rep. loss since 1880 of 2,092, the same vote as Garfield in 1880. Both the Butler and St. John vote were very small.

RHODE ISLAND.

PROVIDENCE, Nov. 5.—Vote of the city of Providence: Blaine, 6,275; Cleveland, 4,871; Butler, 211; St. John, 73; scattering, 20. This is 1,213 behind Garfield's majority of 1880.

PROVIDENCE, Nov. 5.—Blaine's majority in the state is expected to be 3,000. The total vote is 39,691, the largest ever polled.

ILLINOIS.

CHICAGO, Nov. 5.—Carter Harrison, the Democratic candidate for governor, runs 600 ahead of his ticket in Cook county. Returns from 1,000 precincts in Illinois outside of New York city and Brooklyn, Blaine's majority will be 30,000. Democrats here claim that Cleveland will have 60,000 majority for state ticket.

SAMUEL J. TILDEN VOTES.

NEW YORK, Nov. 5.—About 10 o'clock a cab drew up in front of the polling place at 277 Third avenue. Within it was Samuel J. Tilden, accompanied by his private secretary. He was immediately recognized and greeted with hearty cheers. Mr. Tilden was dressed in a black broadcloth suit and wore an overcoat of the same color and a silk hat. He appeared to be in excellent health. The ticket peddlers swarmed about, anxious to secure the honor of handing him a ballot. He called for a Cleveland and Hendricks electoral ticket, and leaning on the arm of his secretary stepped up to the ballot box. In answer to the inspector's question, he replied: "Samuel J. Tilden, No. 15 Gramercy park." Cheers from the crowd packed inside the polling shop greeted the announcement of his identity.

BUFFALO, Nov. 5.—The vote of Buffalo city complete is: Cleveland, 14,061; Blaine, 13,915. Butler, 1,039. Cleveland's majority, 146. The vote in 1880 was: Garfield, 16,396; Hancock, 13,918.

THE HERALD CLAIMS WISCONSIN.

NEW YORK, Nov. 5.—The Herald now claims that Wisconsin has gone Democratic.

UTICA, Nov. 4.—Oneida county, complete, gives Blaine 13,218; Cleveland, 18,509; St. John, 858; Butler, 1026. Lewis county gives Blaine 87 majority.

NEW YORK, Nov. 5.—In 1880 the Republican vote in Kings county was 51,735, and in New York 81,720; a total of 133,451, the Democrats polling 61,092 in Kings county and 120,913 in New York.

BROOKLYN'S VOTE.

BROOKLYN, Nov. 5.—Until this city Gov. Cleveland's majority is estimated at 14,000. Archibald M. Bliss is elected to congress. The Democratic city ticket is elected, with the exception of Controller Campbell, Republican, outside the election of the twelve assemblymen.

NEW YORK'S ASSEMBLY VOTE.

NEW YORK, Nov. 5.—The revised Democratic majority in New York city is 61,000.

NEW JERSEY.

NEWARK, Nov. 5.—Essex, Bergen and the other counties in northern New Jersey show Democratic gains over 1880. Atlantic and Monmouth show Republican gains. Governor Abbett announces that Cleveland has carried the state by 1,000 plurality.

NEWARK, Nov. 5.—Returns from Jersey City are unusually heavy, though the vote is not registered 484 not turn out. The rapid

MICHIGAN.

DETROIT, Nov. 5.—Russell A. Alger, the Republican candidate for governor, is running behind his ticket in Detroit. Returns from 40 of the cities give Blaine 7,650; Cleveland, 1,682; Alger, 6,440; Begole, Dem. candidate for governor, 6,885.

DETROIT, Nov. 5.—The Republican state central committee claims that Blaine has carried the state by 15,000 plurality. Gov. Alger, for governor, runs slightly behind the state ticket.

DETROIT, Nov. 5.—Returns thus far indicate a majority of 2,000 for Mayberry, dem., for congress in this district. Ex-Lieut. Gov. Holbrook, Dem., is elected in the Third district. The Democrats elect their entire state ticket throughout the state, show a dem. gain of 1,000 over the vote of 1880.

TOLEDO, Nov. 5.—Dispatches from Michigan show the probable election of the fusion ticket and Gov. Begole, dem.

INDIANA.

INDIANAPOLIS, Nov. 5.—Returns in from nearly one-half the precincts in the state give Cleveland 2,000 dem. gain. Returns from 1,200 precincts give Cleveland 2,000 majority. Democratic committee claim the state by 10,000.

FORT WAYNE.—In spite of the rain the vote polled about 75 per cent. Returns, so far from, had been very heavy. The city shows heavy Democratic gains, and it is estimated that Cleveland's majority in the county will be 3,000—a gain of 900 over 1880.

The Democratic committee now claim Cleveland's majority in this county to be 4,000—a gain of over a thousand; Lowery, Dem., for congress, by 1,200, and the state by from 8,000 to 10,000.

HENDRICK'S FIGURES.

ALBANY, N. Y., Nov. 5.—Mr. Daniel Manning has just received a dispatch from Hendricks, of Indiana, intimating that state to the Democrats by 8,000.

HENDRICKS GLAD IT IS OVER.

INDIANAPOLIS—Dem. Hendricks cast his ballot at the polls at precinct No. Twelfth ward near noon, and then, in company with Mr. James H. Rice, editor of the state, made a tour of the polls of the city. Everywhere he was met with the greatest cordiality and respect. Returning home, he spent the evening in his library, where in connection with a few friends, he received bulletins. To a reporter who called on him early in the evening, Mr. Hendricks expressed himself as gratified more than anything else by the reflection that the struggle was at an end.

"You doubtless feel comfortable over the result?"

"Well, having accomplished the object of the contest, I feel like laying it aside now like an old mitten. I entered upon a campaign the like of which I never expected again in my life, having been drawn into it of course I wanted to succeed."

The governor expressed great anxiety over the result in Indiana. He said the people were more excited in the state in 1884 than even than in 1876, which was the prettiest political contest he had ever witnessed. He did not care to express an opinion as to the principles of the result in this state confirmed by returns, but none were at hand. At that time the only messages he had received were of inquiry. He expected to stay up until midnight receiving returns and then retire.

A RIOT.

INDIANAPOLIS, Nov. 5.—The election in Indiana was remarkably quiet. Probably the only serious disturbance reported was at Fairland, in Shelby county, where a row occurred when the polls opened, resulting in a riot. The precinct is strongly Democratic and the Democrats largely outnumbered the Republicans. Henry Smith, a merchant, was knocked down with a club and seriously injured. In this county no arrests were made by the United States deputy marshals.

STILL IN DOUBT.

INDIANAPOLIS, Nov. 5.—Perry township in Allen county, shows a dem. gain of 12. This is in the Republican stronghold. One township in Dubois county shows a dem. gain of 68. Returns from Fort Wayne give a dem. gain of 188. Fort Wayne, it may be remarked, had a strong force of deputy marshals in the field, but they were met by two special policemen for every deputy marshal. Returns are coming in very slowly and the Republican committee is making no claims, except to say all. They have almost conceded the state. Every return thus far, official or unofficial, shows a dem. gain, and the majority may reach 15,000 after all.

MASSACHUSETTS.

FALL RIVER, Nov. 5.—The vote of Fall River gives Blaine 3,202; Cleveland, 2,276 Butler, 237; St. John, 93.

BOSTON, Nov. 5.—One hundred and six out of 107 precincts in Boston give Cleveland 11,365 plurality. One hundred and forty-four towns outside of Boston give Blaine 11,961 plurality. Henry B. Lowerson, dem., is elected to congress in the Sixth district over Henry Cabot Lodge, chairman of the Republican state committee, by about 93 majority.

BOSTON, Nov. 5.—Boston complete gives Cleveland 39,500; Blaine, 30,939; Butler 3,803; St. John, 1,295. Cleveland's plurality 11,562.

BOSTON, Nov. 5.—The returns from 23 towns indicate that the full vote will be a little short of 300,000, against 310,000 in 1880. Of the Blaine vote of 126,000 to 140,000 Cleveland 130,000 to 132,000. Butler 18,000 to 20,000, and St. John 8,500 to 10,000.

MAINE.

AUGUSTA, Nov. 5.—The official vote of Augusta gives Blaine, 1,594; Cleveland, 852; St. John 40; Butler 10. Blaine's plurality 538. In 1880 the vote stood: Garfield, 1,122; Hancock, 749; scattering, 98. Garfield's plurality 373. Republican loss, 165; the Republican plurality was 468, a falling off of Blaine of 115 from Robie. Ward 1, Blaine's own ward, gives Blaine 13 less than it gave Robie.

MR. BLAINE VOTES STRAIGHT.

AUGUSTA, Nov. 5.—As Mr. Blaine, leaning on the arms of his two sons, approached the dark and dingy entity which was the polling place, the crowd that was sitting about the entrances arose and quietly formed two lines between which the three passed to the polls. Mr. Blaine voted the straight Republican ticket.

NEW HAMPSHIRE.

CONCORD, N. H., Nov. 5.—Secretary Chandler claims 800 Republican majority in both congressional districts.

CONCORD, Nov. 5.—Returns from 66 towns show a net rep. gain over the vote of 1880 when the Republicans had about 4,000 majority. The indications are that the Republicans have elected Frank Jones, dem., governor, Carl Storrell, dem., for governor, runs largely ahead of his ticket in this city. Edward Gawtin, dem., is elected mayor of Concord by the usual majority.

WISCONSIN.

MILWAUKEE, Nov. 5.—Forty towns and precincts in Milwaukee county, Democratic, give a net Democratic gain of about 1,000. There are 1,180 towns and precincts in the state. Both sides claim the state, the Republicans by 10,000 and the Democrats at 2,000. In Milwaukee, city and county, the Democrats claim a gain of 3,000. It is generally conceded that the coast proposals very slowly. The vote is very close and both sides claim a majority with the probabilities in favor of the Democrats. Yeomans, dem., is elected in the Fourth congressional district, and the indications are that Dem. Taylor, in the Second district, will be elected. The Republican state ticket is probably elected by 10,000.

MILWAUKEE, Nov. 5.—The Republicans here say that the Republicans have elected the state by a reduced majority. Secretary Fairchild, the Republican state committee, claims the state by a majority of 15,000 against 20,000 for Garfield in 1880.

MILWAUKEE, Nov. 5.—The returns from 125 towns and four wards in Milwaukee show a net Democratic gain of 1,000 over 1880, while the dem. gains to 10,000. Both sides are claiming the state—the Democrats by 10,000 and the Republicans by 12,000. Both sides claim six out of the eight congressmen.

CONNECTICUT.

NEW HAVEN, Nov. 5.—Complete returns from this city give Blaine 6,185, Cleveland 5,776.

HARTFORD, Nov. 5.—This city gives Cleveland 735 majority, dem. gain of 816 over 1880. Also Democrats gain two representatives.

HARTFORD, Nov. 5.—Waller carries Hartford by 823 plurality; Cleveland has 68 plurality; Eaton for secretary has 797 plurality, but is defeated in the district. Both Democratic representatives are elected. Returns throughout the state indicate that Waller has a large majority, and that Cleveland carries the state.

NEW HAVEN, Nov. 5.—The congressional delegation will stand two Republicans and two Democrats, a rep. gain of one.

VIRGINIA.

RICHMOND, Nov. 5.—Returns received from barely one-third of the state. These show considerable gains for both parties, compensating the vote with that of Wise and Massey for congressman at large in 1883. The latter was a poll tax paid vote, while the former was a free ballot any pecuniary restriction. On this account such a comparison indicates nothing. It is apparent that a very full vote has been polled, and the result is looked upon as still a matter in mystery. Both parties claim a victory. The Republicans have largely increased their strength in the First, Second and Fourth congressional districts, which contain the black belt of Virginia. The Democrats have made great gains in the sixth, seventh and eighth, which are the heavy Democratic districts. In the Fifth, which is now the most an intelligent estimate, or even a conjecture, as to the result. Democrats say they have the state for Cleveland by from 7,000 to 10,000, and claim the congressmen in eight districts. A Republican estimate claims the state for Blaine, but gives no figures. They also claim the congressmen in the First, second, fourth, sixth and tenth districts. Later unofficial returns seem to indicate that the Republican gains are largely in excess of the Democratic gains in the state. The Democrats are still claiming the state, but give no figure. The Republicans are more confident, and claim the state by 10,000. There are no returns to show gains which indicate the state has gone Republican. In twenty-two counties and precincts, in which Richmond, Petersburg and Norfolk precincts are not included, the Republicans claim about four thousand gain which rests, if it holds good, would give them the state by from eight to twelve thousand majority. Democrats are so meagre that all estimates are not much better than guess work.

NORFOLK, Va., Nov. 5.—Returns from this city gives rep. gain of 396. Portsmouth goes rep. by 35, a gain of 206 over 1880. Libby, rep., will probably be elected by over 3,000 majority.

RICHMOND, Nov. 5.—This city gives Cleveland 1780 majority, a Democratic loss of 606.

WASHINGTON, Nov. 5.—So far the Republican vote shows a gain. Gains and Mahone has telegraphed that the state would give Blaine and Logan 12,000 majority. The later returns from West Virginia are encouraging to the Democrats, showing considerable gains over their October vote. It is probable, however, that the full returns from West Virginia and North Carolina will not be received for several days and any prediction about them is likely to be premature.

RICHMOND, Nov. 5.—Later and fuller returns indicate that Virginia has elected the Cleveland electoral ticket by a small majority.

WEST VIRGINIA.

WHEELING, Nov. 5.—There is nothing very definite upon which to base an estimate of the result in West Virginia. The vote has fallen off very decidedly since the state election and Clevelands majority will be less than Wilson's for governor, but still a gain over 1880, when Hancock's majority was 7,000. The Democrats claim to be safe with chances favoring Goff, rep., but it will be very close. Wilson, dem., in the Second, Synder, dem., in the Third and Gibson, dem., in the Fourth are elected. The Republican counties are negotiating slight Republican gains in majorities and in the Democratic counties slight Democratic gains, with a decided falling off in all. Cleveland's majority will not fall below 5,000.

IOWA.

DES MOINES, Nov. 5.—Latest returns indicate majority of 18,000 for Blaine over the Democratic vote. The Democrats probably elected congressmen in the first, second, fourth and sixth districts. The third, fifth and ninth are in doubt, and the seventh, eighth, tenth and eleventh are Republican.

VERMONT.

WHITE RIVER JUNCTION, Nov. 5.—Returns from 140 towns give Blaine 38,341; Cleveland, 18,655; Butler, 886; St. John, 1,183. Blaine's plurality, 15,547. The same towns in 1880 gave Garfield a plurality of 19,051; if the remaining 120 towns give a proportionate increase Blaine's plurality will be upward of 25,000. The vote for St. John is drawn mostly from the Republican party. White Butler's comes from the Democratic party.

COLORADO.

DENVER, Nov. 5.—Returns from the state, although incomplete, show that Blaine will carry Colorado by a majority of 4,000.

DENVER, Col., Nov. 5.—But few precincts have been heard from yet, and those show large Republican gains. The complete vote will be very slowly, with a long ticket to count. The state has undoubtedly gone for Blaine.

TEXAS.

GALVESTON, Nov. 5.—A heavy Democratic vote has been polled in this state. Cleveland's plurality will be 100,000, and Democratic congressmen are elected in all the seven districts.

NEVADA.

VIRGINIA CITY, Nov. 5.—Nevada gives from 800 to 1,000 majority for the Blaine electors. Woodburn, rep., is elected to congress.

LOUISIANA.

NEW ORLEANS, Nov. 5.—The elections passed off quietly. No trouble so far has been reported in any part of the state. Few returns have been received, but they in indicate a clean sweep for the Democrats, though the Republicans claim the election of Lewis, Republican, in the Second district and Kellogg in the Third.

NEW ORLEANS, Nov. 5.—Returns from the state are meagre and indicate about the same vote as in 1880 with Cleveland's majority a few hundred.

ALABAMA.

MONTGOMERY, Nov. 5.—The election throughout Alabama was quiet. The full white ticket was polled. Usual Democratic majority. Indications point to the election of all Democratic congressmen.

DELAWARE.

WILMINGTON, Nov. 5.—A very heavy vote was polled here. The anticipated rioting was avoided, and no trouble was experienced by the presence of marshals at the polls. The state has gone Democratic by about 3,000 majority, an increase of nearly 1,000 over 1884. Charles B. Lore, dem., has been re-elected to congress.

TENNESSEE.

NASHVILLE, Nov. 5.—The election in this city was very quiet. The vote is the largest by 1,000 ever polled. The Democratic candidates for railroad commissioners were generally scratched in the city and state, and are undoubtedly defeated. Caldwell, dem., is returned to congress from this district. The Democratic electoral ticket in the state is elected by the usual majority. State, district and congressional is probably elected by a reduced majority. The vote for governor in this county is close and doubtful. The Republican legislative ticket is Bedford county is probably elected.

MARYLAND.

BALTIMORE, Nov. 5.—The total vote polled in this city was 86,299, of which Cleveland gets 54,196; Blaine, 37,580; Butler, 114; St. John, 1,209. Cleveland's majority over Blaine 6,716; over all 5,393. In 1880 Hancock's majority over Garfield was 9,324.

BALTIMORE, Nov. 5.—The Democrats have elected congressmen in seven of the eight congressional districts in this state. Barton, rep., was defeated in the fifth by Compton. The delegation from Maryland in the forty-ninth congress will be five Democrats and one Republican, a Democratic gain of one.

BALTIMORE, Nov. 5.—Cleveland's majority in Maryland will not be less than 14,000.

MISSOURI.

ST. LOUIS, Nov. 5.—Latest returns indicate that Marmaduke (dem.) for governor runs 30,000 behind his ticket. The full state Democratic ticket is elected.

ST. LOUIS, Nov. 5.—Cleveland's majority in this state is about 40,000. The Democrats elect congressmen in all districts except the fifth district, Warner, rep., is elected over Graves, dem., and in the thirteenth, which is in doubt.

MISSISSIPPI.

JACKSON, Nov. 4.—The indications are that the vote in Mississippi will be light owing to the fact that no general canvass has been made, the state being considered certain Democratic. No disturbance was reported in any part of the state. Meagre returns indicate the defeat of Chalmers, rep., for congress in the Second Mississippi by 1,500.

KENTUCKY.

LOUISVILLE, Nov. 5.—The returns from the county and state throughout the state say that the election passed off quietly. The full vote was polled. The state will give the usual Democratic majority. The Democrats elect a full congressional ticket. There is a Republican loss of two in the house of representatives.

FLORIDA.

JACKSONVILLE, Nov. 5.—The Democrats have apparently elected their national, state and congressional ticket in Florida.

ARKANSAS.

LITTLE ROCK, Nov. 5.—The entire Democratic congressional and state ticket is elected, but majorities cannot yet be given.

SOUTH CAROLINA.

CHARLESTON, Nov. 5.—There was a full Democratic vote throughout this state, and not a single disturbance. Gov. Thompson is re-elected and Cleveland has a plurality of about 55,000.

NORTH CAROLINA.

RALEIGH, Nov. 5.—All the counties show dem. gains. There are no rep. gains in any county. Scales, dem., is elected governor, and Cleveland's majority will be about 10,000.

GEORGIA.

AUGUSTA, Nov. 4.—The vote in this city is 4,070, and the vote in the county is about 6,000. Cleveland's majority in which is 3,808. The returns indicate the election of the entire Democratic delegation to congress. Cleveland's majority in the state will approximate 80,000.

NEBRASKA.

OMAHA, Neb., Nov. 5.—The Republican plurality in Nebraska will be between 20,000 and 22,000.

KANSAS.

OLATHE, Kan., Nov. 5.—Gov. St. John appeared at the polls in the Third Ward and cast his vote for himself. Being accosted by a reporter he declared himself "as happy as a clam." He boasted that the state of Kansas had gone wild during the day instead of weakening his cause.

CALIFORNIA.

SAN FRANCISCO, Nov. 5.—Indications point to a small majority for Blaine, but the state is still in doubt. In the fourth district, Hastings, dem., probably defeats Barrow, rep., for Congress. In the fifth district, Sullivan, dem., is probably beaten by Felton, rep.

ELECTION SCENES.

NEW YORK, Nov. 5.—The rain poured down in torrents last night, but fully 30,000 people remained in Madison square to witness the election returns as they were displayed on the transparency at Twenty-third street, Broadway and Fifth avenue. A large number of the people who were there protected by umbrellas, but a fair proportion of them stood unprotected from the rain, which at times fell in torrents. The crowd extended in all directions, and the triangular space between the Fifth Avenue hotel and the park was packed to its full capacity. An immense horde of people also clustered Twenty-third street in either direction from Broadway.

A stereopticon in front of the Everett house displayed the returns upon which the election returns were received, also announcements of the result. The bulletins were received by telegraph. The former were favorable to the candidacy of their particular choice.

But in Newspaper row the greatest excitement prevailed, and for several hours the crowd on Park row, Nassau and Printing House Square was densely packed. The office were besieged

Sold by Newsdealers.

...e house by an animal multitude, who, at every fresh heat-ats, uttered loud shouts. Bodies were crushed and maimed, and no place had to clear the way for the street cars. The sea of up-turned faces in front of The Herald building presented a quaint spectacle Thousands of men, women and children elbowed each other unmercifully about while endeavoring to get closer to the board upon which the returns were published. The sidewalk in front of the Astor house was jammed to suffocation, and even the iron railings around St. Paul's churchyard were utilized as a coveted place by enterprising spectators. When any figures favorable to Blaine were posted up at The World, Sun or other offices, three of Republican predilections in the crowd would bawl "Blaine, Blaine, James G. Blaine." On the other hand, when Cleveland's prospects looked encouraging, the Democratic vote would shout, "Left, left, Blaine got left." If the day was remarkable for its unusual quietude, the night was noticeable for its unprecedented noise and clamor.

EDITORIAL UTTERANCES.

New York, Nov. 5.—The *Herald* (dem.) says: At midnight, when we are compelled to put our first edition to press, the result of the presidential election is still uncertain, as the returns have come in very slowly. Sufficient is known, however, to make the election of Mr. Cleveland probable. If he has carried New York he is undoubtedly elected.

The Journal (ind.) says: It looks at the hour of going to press as though James G. Blaine was elected yesterday president of the United States. He seems to have carried the state of New York by a very small plurality of probably not more than 3,000, and probably less. New York city's plurality of 63,777 and King's plurality of 15,229 seem 4,000 short of carrying the state for Cleveland against the Blaine majorities beyond the Harlem river. If, however, further returns should cut these down, nothing but the official count will settle the election. New Jersey apparently holds her own in the Democratic column by 10,000 plurality. Connecticut, from best advices, has gone Democratic. Massachusetts is probably Republican by a small plurality of 1,000 or less. Indiana is claimed by both parties.

New York, Nov. 5.—The *World* (dem.) says: We congratulate the Republic on the election of Grover Cleveland as its president. The Democracy is again in ascendancy in the nation. After twenty-four years of exclusion from power the party of Jefferson and Jackson once more places a firm grasp on the reins of government, with the determination, by God's help, to guide the Republic back into the straight path of Democratic simplicity, economy and honesty, and to re-establish firmly and permanently the constitutional rights which have been gradually stolen from the states and the people.

Chicago, Nov. 4.—The Times in its first edition says that Cleveland is undoubtedly elected.

The Sun says: The extraordinary closeness of the vote for president yesterday in nearly all of the states which have been considered as doubtful and decisive left the result still uncertain when The Sun went to press. At the national headquarters of each of the parties sanguine and vociferous politicians were claiming the election of their candidate. Their opinions were merely the expression of hope. Here, at the present writing, the figures already received from much of the election districts in the interior of New York state have completed their count, taken in connection with the assured Democratic majority in New York county and Kings, indicates that Mr. Cleveland may possibly have carried New York by a plurality of as many thousands as may be reckoned on the fingers of one hand; and it is already apparent that the vote of New York is this year, as usual, the determining factor. One thing is certain. If Grover Cleveland it is in fact, he will owe his election, as he owed his nomination, solely and conspicuously to the efforts of Republican voters. The Democratic party has still to elect a candidate representing Democratic principles.

The Times, dem., says: Grover Cleveland has been elected president of the United States. The dispatches received by The Times show that he will receive the 183 electoral votes of the southern states, the 36 votes of New York, the 6 votes of Connecticut and the 9 votes of New Jersey, a total in these three states of 51 votes, giving him 204 electoral votes in all, which is a majority of 7 in the electoral college. This leaves among the now doubtful states Indiana, with 15 votes; Wisconsin, with 11; and California, with 8, still to be heard from. The Republican party has suffered the penalty of its blindness and its folly.

Polygamist Clawson's Speech.

SALT LAKE CITY, Nov. 5.—Clawson, the convicted polygamist, before his sentence made this speech which is indorsed by the leading Mormons, who consider that the judge was vindictive, and that the grand and petit juries were packed and illegal: "Your Honor: Since the jury the jury that sat on my case have seen proper to find a verdict of guilty, I have only this to say why judgment should not be pronounced. I very much regret that the laws of my country should come in conflict with the laws of God; but whenever they do, I shall invariably choose the latter. If I did not so express myself I should feel unworthy of the name I profess and am. The constitution of the United States expressly says that congress shall make no laws respecting an establishment of religion or prohibiting the free exercise thereof. It cannot be denied, I think, that marriage, when amended and sanctioned by religious rites and ceremonies, is an ordinance of religion."

Dying at the Polls.

BROOKLYN, Nov. 5.—Daniel Gildersleeve, aged 80 years, was assisted to the head of the line by a policeman at the fifth district polls, twentieth ward yesterday so that he might not be detained. His son handed him a set of Republican "tickets, and, as the old man fumblingly examined them, the people around the pool approached.

As he advanced to the box he staggered, and before his son could reach him he fell to the floor, and almost instantly expired. He was carried to his late home, at No. 200 Park avenue. The aged voter had been in feeble health for some time, and when his son tried to dissuade him from going to the polls he said:

"I will go, my boy; it will likely be my last vote."

An Old-time Recollection.

NEW YORK, Nov. 5.—An old-time Republican said: "I shall never forget the scene in the large hall of the Cooper union on the night of Lincoln's second election. The place was packed, and as the ball in a neighboring tower struck twelve there was a deep silence. Some one sang and suggested that we sing 'Old Hundred.' Instantly, as if inspired by a common impulse, every head was bared, and every voice joined in that grand old hymn. It was the grandest and most solemn sight I ever saw. Here were all sorts of men, religious and irreligious, yet all alike helped to make those walls resound with 'Praise God, from Whom all Blessings Flow.'"

A NEW PAVEMENT.

The undersigned has secured the exclusive agency for the sale of the

Diebold Patent Iron Stone,

which for elegance and durability, is unsurpassed, and in price will compare favorably with any other pavement now in use. It is the most beautiful pavement known for brick stables, carriage rooms, floor tiling and street blocks. Also used to build fire and burglar proof vaults; and for building purposes generally. These pavement blocks have many advantages over other pavements, principally over, as no sub-structure; road or foundation, as well as all kinds of moisture. When dampness accumulates on the ordinary brick pavement, this pavement is entirely free from it. These blocks are cast from the molten iron direct from the furnace, and will be on exhibition at Wetherill Road, Somerville, Somerset County, at Stillman's Rock Hill. For further particulars call on or address

W. H. WARNER,

PIT HOLE.

[New York Times.]

The death of ex-City Chamberlain J. Sidney Tappan has recalled to the minds of many of the older men in Wall street the remarkable circumstances attending the financial growth, and final extinction of a city which Mr. Tappan founded as a business enterprise in the spring of 1865. The city has grown from a mere pinpoint on the memories of Wall street men, and is slowly but surely slipping from the pages of commercial history, but the casual review of the events of Mr. Tappan's life brought back in its strange career with more than usual force and distinctness.

It was called Pitt Hole, and the wooded hills of northwestern Pennsylvania held it in such unrelenting grasp that only the most primitive of civilization's ranges gained footholds there. In the spring of 1865 the site of Pit Hole was an almost unbroken wilderness; three months later, 10,000 people were camped on the hillside, and before Christmas the city had a population of fully 20,000. To-day only the ruins of a hotel and half an old log house are found within a radius of many miles. To the people of northwestern Pennsylvania it is remembered as the most remarkable town ever known in the erratic and excitable history of the petroleum industry. The history of this strange place and Mr. Tappan's connection with it are best told, perhaps, in the language of an old Wall street man, whose restless nature many years ago led him to become a pilgrim to that bleak country, up to that time the attention of speculative persons in all parts of the world.

The closing days of June, 1865 (said the old gentleman, seating back in his easy leather chair, and gazing with half-closed eyes across the dimpling waters of the bay), marked the beginning of the most violent commercial excitement that this country, up to that time, had known. Early in January the United States Petroleum company, which was organized in the spring of 1864, drilled an oil well on the Thomas Holmden farm, in Cornplanter township, Venango county, Pennsylvania. A flow of oil exceeding 250 barrels a day was found, and this subsequently increased to more than 300 barrels. This caused great surprise, as several imperfect tests of the region had been made some time before. Mr. Tappan and Mr. Frazier, in whose hands the drill was steered, were confident that oil in paying quantities could be found in a fourth sand, which, up to that time, was thought did not exist. Leases of land were purchased upon the Thomas Holmden, the Walter Holmden, the Blacksmer, the Luther Woods, the McKinsay, the Haworth, the Van Wyck, the Tyrrell, and the Bissell farms. With the exception of a few cleared fields, the territory was almost unbroken forest. Pit Hole creek, a rocky, precipitous stream, ran through the center of the purchase. New wells were at once started along the valley of the creek and upon the flat portion of the Thomas Holmden farm.

Early in June word went out to Oil City, Titusville, and the surrounding country, that if the wells then approaching completion produced oil the whole of the Cornplanter township would be a paying territory. On the 3d day of June the Homestead well No. 1, which was drilled on the House-stead farm by eastern capitalists, began to produce oil in large quantities, and the excitement in almost breathless suspense. Two weeks later, on the Thomas Holmden farm, well No. 1 confirmed Mr. Tappan's predictions, and began flowing at a tremendous rate. On the 19th of June, three days after the well, No. 2 threw oil over the top of the derrick.

Then the rush began. The war of the rebellion was over, and thousands of men, eager for excitement and with plenty of money, charged down upon the quiet Pit Hole valley with resistless force. The neighboring oil towns left their work and ran too. The place was a wilderness; lumber there was none, and money could not buy shelter anywhere. The log cabins, buildings in the vicinity—the Widow Lyon's log cabin, a small frame building occupied by the Thomas Holmden family, and an unpretentious structure on the Walter Holmden farm. But men who had slept on hard-fought battle-fields, camped out under the health giving pine trees, and were content to cool their rude meals over a blaze of pine knots, never thought of hardship. Their greatest and perhaps only trouble was the scarcity of lumber with which to build oil derricks and the difficulty of handling the boilers, engines, and powerful drills over the mountain roads from Titusville and the Miller farm.

The last day of July saw a long, narrow street laid out on the Thomas Holmden farm, and a few scattered yellow pine buildings sprang up along both sides of the way. The first of these buildings bore the word "Hotel" above its rough, unpainted door; the next was advertised by a cloth sign, "Saloon and Restaurant," and a "boy" busily in possession of needle or paint brush, entered into business with a whisky barrel placed conspicuously beside the entrance. The street was full of people, and when each log hut was regarded as a first-class roadway. If a teamster found fault with the new Holmden street, he could drive his team through the woods and so pick a wagon trail to suit himself. The path to the first frame building on the street was pitch dark, and everybody stumbled, and fell. As well after well began to pour its flood of oil into the general production the excitement became furious. Men from all parts of the world—principally from Europe—capitalists from Wall street, miners from the Rocky mountains, oil producers, workmen, sailors, negroes, and Indians—rushed and clawed and tore one another to get search for wealth. Merchants went into bankers under awnings; hotel-keepers served meals in the open air and rented banks in buildings constructed of rough boards, and lined with rag sides. An enterprising real-estate agent hoisted a sign, "Oil Leases Bought and Sold Here," and in the interests of business built his office up on the roof. The first barber-shop was in an army tent, and the first bootblaking den was in a dry-goods box on Main street. The Astor House, the fashionable $10 to $20 hotel, A laundry, however, was not started for several weeks.

Nothing in all America has been just like Pit Hole City. The oil fields of West Pennsylvania had been wonderful. They grew up in six weeks counted in the wilderness a city of 15,000 or 20,000 inhabitants brought no regulations. Order was not known. Men were hounded down, beaten, and robbed in the streets; shooting and stabbing affrays were of nightly occurrence, and brawling was up-heard for a week's lights on one block of these streets. Speculation in oil lands was made a province of gambling that simply astounded, but it is an open question whether these gamblers were better or worse than the oil producers. The town grew so fast that one in six weeks had the presence of organization to look after its necessities. The Pit Hole Record only 37 by Capt. H. S. Hill, was rushed into its inseparable life new circulation. It had a business second in importance only to that of Oil City. Its subscription list of 4,000 thousand believed its sales at the price fixed on the block, the office would be besieged by long lines of men waiting for news from "Pit Hole's discovery." An editor would hand the narrow Pit Hole valley. As street after street became filled with stores, saloons, banks, offices, and saloons, and as business constantly increased, the most absurd rents and among the wells grew deeper and deeper. Quite often a gusher would, by pouring out its flood of oil, drive all the tenants in Holmden street, and flounder about until pulled out by main strength, ropes and pulleys. In the scarcity of water, mud was used to extinguish fires.

The first evidences of permanent growth in the new town was the erection of the Chase house, at a cost of $100,000, by H. Patchen and S. H. Allen. It was originally called the Patchen house, but the name was changed when the place was sold to George E. Chase, of New York city. The Bonta-Bell, the W. Bissell, and Bonta hotels was next built, at a cost of $20,000, on the bluff above the town. Then followed the Danforth house, which cost A. D. Danforth $40,000, and the Mansion Farm hotel, a magnificent building, worth $70,000. Before summer closed there were about fifty hotels in the town, exclusive of boarding-houses and restaurants. The better protection of life and property a burgess and a borough council were elected on Dec. 11. The fact that some of the candidates were in the penitentiary of the state was not permitted to interfere with the general result.

In January, 1866, the town was at the height of its prosperity. It had banks, churches, daily newspapers, water-works, several theatres, a good opera house, large hotels, two telegraph offices, pipe lines, plank roads to neighboring towns, and a narrow-gauge railroad from Pit Hole to Oleopolis and Oil City. The Reno, Oil City & Pit Hole Railroad company had a road-bed graded and ties laid from Reno to Pit Hole, but the work was never finished. The Pit Hole Daily Record—the first daily newspaper published in Venango county—was started by Col. Lee M. Morton, Sept. 26, 1865. It was printed on a Washington handpress and had a circulation of 1,500—the limit of the pressman's working capacity. The paper did a good business and was prosperous so long as the town had a paying existence.

The town held up well for nearly a year, and then began to fade. It went very suddenly. A few weeks before its decline the people were confident that the big wells could never cease to produce oil in immense quantities. The pressure of production in the town was so strong that on Feb. 13, 1866, The Daily Record printed this:

"The Daily Record is now a fixed fact; and as long as a single hole shows signs of oil, or a derrick is visible, it will continue to make its appearance. While Oil City, Petroleum Centre, Tidioute, and other older and so-called Rueller towns have been without a paper, Pit Hole from its birth has supported a daily paper, and is likely to do so for years to come."

What a vain boast that was I never realized fully until I visited the ruins of Pit Hole a few weeks ago. I had known, of course, that the oil wells had suddenly ceased to pour out their floods of petroleum; that the people had gone elsewhere to speculate, and that the erratic city had fallen into decay. But I was not prepared for what I saw when, in an endeavor to live the old days over again, I hired a saddle-horse at Titusville and pushed my way through the almost forgotten country that leads to the Pit Hole valley. On the edge of the Holmden purchase I came upon an old man, shabby, decrepit and weather-beaten, who sat upon a log at the upper edge of the field, with bearded chin in his hands, looking vacantly down the still valley. He glanced up a little to speak as I approached, and then resumed his doubled-up attitude.

"Lookin' for Pit Hole, stranger?" he asked. "If y'are, jest tie your gray to that saplin', there, an' come an' sit down here on this stick o' timber 'n look till you're tired."

I had ridden eleven miles through mud and water, over rocks and logs, up hill and down, to see this—an old log cabin, the dismantled wing of an old hotel, and a lonely field upon which neither tree nor shrub would grow. And this was Pit Hole! I had left it teeming with busy people, bustling with business, and half mad with the excitement of a wild speculation. Now, everything was forsaken it, leaving only the half-crazed old man to guard its dead and ashes. The harmless old man had lived in peace and contentment on a little clearing on the site of Pit Hole all his life. The oil fever had found him poor, it made him fabulously rich, and when it subsided it left him poorer than before, for it had wrenched his poor old mind off its bearings.

"What do you see?" I asked, musting myself beside the old man, and not letting him know that the landscape was by degrees becoming strangely familiar to me.

"What do I see?" said he slowly, without moving his eyes from the long, brown valley, "I see a city full of people; I see a valley swarming with life and business; the smoke of countless furnaces, the steam from countless engines, the hum of a busy hive of men and swift, the roar of swift wheels, the rattle of cranks and bolts, the voices of busy men, the hum of industry."

"Tha," said the sad, old man, laying his hand sorrowfully upon the rotting timber—"this is all that is left of the Bonta house, a noble structure, sir, as you can see, you see a woodchuck burrowing, stood the Chase house, the best hotel in northwestern Pennsylvania. The pavilion occupied one of its big grocery, and a couple of saloons filled the store of rubbish. Right across the street, where a sapling grows, a murder was done, and just above is where the first woman in Pit Hole died of shock of the heart in a fit of remorse. Drink, sorra said, but I knew better. A short distance below there's a cow mudding dry grass there now—stood the Methodist church, dedicated with great pomp by Bishop Simpson, of Philadelphia; Dr. Loomis, president of Allegheny college, and Rev. G. W. Maltby, presiding elder of the Jamestown district; never had a dollar of debt, as I know personally.

"Oh, yes, I remember all cut—banks, churches and theatres (there was Murphy's theatre over that pool of water), machine-shops, pipe-line offices, the railroad station, hotels; there stood the Mansion Farm hotel, destroyed by fire by an incendiary. And the big oil wells! Why, over there among those now-grown bushes was the great Pool well, the pride of the town. It flowed for 6 days at the rate of 1,200 barrels a day! Then there were the old Frazier, good for 900 barrels a day; the big Grant well, 600 barrels; the Burtis, 800 barrels; the Homestead wells; the Eureka, which produced 50,000 barrels all told; the famous Twin wells, No. 1 and No. 2, on the Thomas Holmden farm, and finally the Phillips well, the last all-around here was covered as thick as bees with them. What do you see now? Here and there the blackened end of a length of iron casing sticking a foot above ground—that is all. Everything is gone, even the population. Scattered over the world, they are all dead, I suppose, but I have remained true to my old place. Sometimes at night I can almost hear the old boom of the town, I live over the days of '65, I see the rushing of speculators and oil-men, I breathe the intoxicating air of excitement, I hear the shouting, I witness the fights, I see the gambling, I witness the wild deals; only to old, again, leaving me desolate and my dream. For I am the last man left in Pit Hole, and I am waiting for the end. I am waiting for the end, and I will not have long to wait. Soon I shall be gone, and the world will forget that there was ever a Pit Hole."

PLAINFIELD SCHOOL OF ART.

No. 3 East Front street. I am now prepared to receive pupils in drawing, painting in oil, crayon, India ink, monochromatic and water colors at Room No. 3 East Front street (over Dr. Shaw's Drug Store). Terms moderate.

My method of teaching is considered much easier than the old as anyone with home for art may learn to draw at once from nature in a very short time and with less expense and less study. Everything made plain and simple for directly to the point. Public advancement to my pupils at the public exhibitions. Pictures of all grades for sale to order.

Very Respectfully,

A. H. JOHNSON.

Queen, or Calla, at Park House will be received with pleasure.

Thermometer Record.

The following is the record of the thermometer for this day and for the corresponding date last year as kept at Stelle's drug store, corner of Front and Cherry streets.

Signal Office Prediction.

Fair weather in southern portion, local snows and partly cloudy weather in northern portion; cold northwest to southwest winds, higher barometer.

Chronological Events.

Abraham Lincoln elected in 1860.

JOTTINGS.

—John Vetterlein of North Plainfield is considered elected Democratic Assemblyman by 150 majority.

—Several counterfeit $5 pieces are reported to have been passed in this vicinity. Look out for them.

—Mrs. Antoinette Brown Blackwell, lately of Somerville, has been elected one of the Vice Presidents of the Association for the Advancement of Women.

—The Somerville Messenger says that members of the Plainfield Reform Club will conduct a meeting in the Basking Ridge Presbyterian Church this evening.

—The State Agricultural Society has declared a dividend of 8 per cent. The meeting this year was a very successful one, the receipts being $30,375, and the expenses $17,860.

—The contest for the gold watch and chain which was to have taken place last evening at St. Mary's Fair has been postponed until Saturday evening. The contest for the gold headed cane is to be decided to-night.

—The cotton tails must have been holding a mass meeting on the farm of Mr. Benjamin J. Bonney near Bound Brook recently. On Saturday last Mr. Bonney's two sons, Frank and James, accompanied by two or three of their young friends, slaughtered 40 rabbits and 2 quail without going off their own farm.

Election Notes.

The New York papers of to-day seem all at sea over the result of the Presidential contest. The Sun, Times, Herald and World say that Cleveland has won. The Tribune says that Blaine will. Yesterday our telegrams from various sources deemed authentic conceded Blaine's election. But the indications this morning point the other way. Later telegrams may put a different phase on the matter.

A leading Plainfield Democrat telegraphs as follows:

NEW YORK, Nov. 5, 7:45 p. m.

To the PLAINFIELD NEWS—I am satisfied, being in the New York State Committee rooms, that we have carried New York.

JOS. YATES.

A private despatch from Mr. Walter Bass of this city, sent from New York city at noon to-day, stated that Cleveland carries New York State by 2,000 majority. The Democrats were so much enthused over the despatch that it was proposed to have a parade this evening.

1:30 p. m.

Cleveland 1,000 ahead. 107 Republican districts to hear from which gave Garfield over 3,000 majority. Democrats concede Indiana to the Republicans.

The Public School.

The following resolutions, which was passed by the Board of Education at its meeting on Monday evening, April 15, 1878, is being enforced:

"Resolved: That any pupil who shall have been absent from the school four half days during any one term, without satisfactory excuse, may be reported by the principal, any pupil so suspended shall not be allowed to re-enter the school without a written permit from President of the Board of Education; and such pupil shall be liable upon his return to be transferred to a lower grade."

Pupils think it unjust in cases where they furnish proper excuses from their respective parents, and parents think the resolution unlawful, as the law requires school attendance.

Vote of Thanks.

EDITOR EVENING NEWS—It is with pleasure I advise you of a resolution passed at the meeting of the Board of Managers of the W. C. T. U. whereby they wish to express their appreciation of your repeated favors extended to them through the columns of your friendly paper.

Most respectfully,

Mrs. W. B. MASON, Sec.

Not Dead.

Patrick Clement, of North Plainfield, who on the night of the principal Republican parade of the campaign, Thursday, Oct. 30th fell, while intoxicated, into an embankment on Dorr street, remaining there all night, and until about seven o'clock next morning, when his cries for help were heard by occupants of a passing carriage, by whom he was rescued and taken to Muhlenberg Hospital, is reported to be entirely out of danger from his injuries. The report is not true. On the contrary he is recovering.

Policemen's Target Excursion.

About 200 Newark policemen, together with about 100 citizens, and a full brass band, arrived in town this morning and marched through Front street to Front street, and thence through Park avenue to the Fair grounds, to shoot at a target, and to have a time generally. A dinner was prepared for them at the Park House, by Mine Host Johnson, the popular proprietor, which dinner is disappearing as we go to press.

Teacher's Association.

The meeting of the Somerset County Association was held on Saturday in the school house at Bound Brook. The attendance was large.

The meeting was called to order at 10 a.m., Mr. Ayers presiding, the President being absent on account of the death of a near relative.

Devotional exercises followed, then a cornet solo by a young gentleman of the place. The roll was called and the minutes of the last meeting were read and approved.

A committee consisting of Mr. Bos of Plainfield, Miss Anna H. Lane of Bound Brook, Mrs. E Tu dson of North Branch and Mr. Hoffman of Bound Brook were appointed by the President to select and arrange a program for the next meeting.

Literary exercises followed.

Mr. R. B. Doyle gave some pertinent ideas on "Rapid Addition," and a practical drill in adding mentally long columns of figures! Few were able to keep up with him. To be rapid in addition is of great value to any business man.

Mr. Hoffman followed with a paper on "School Management," a bright, crisp, clear exposition of the subject.

After recess Mr. Bos of Plainfield read a paper on "Teachers' Work." It treated another phase of school work, and was the result of the experience of one of our most successful principals.

Queries were handed in by the teachers, and discussion on the work of the morning followed.

Previous to the adjournment of the morning session an invitation to refreshments, prepared by the young ladies of Principal Weed's room, was sent. It was a pleasant surprise.

The afternoon session convened at 1:30. Singing followed.

Mr. Potter of Plainfield gave a drill in penmanship.

Mr. Hayes continued "Analysis and Parsing." This exercise is one of the best and most beneficial exercises of the meeting.

Miss Claypoole read a most interesting selection, which was heartily applauded.

After a short recess Mr. Whetten of Harlingen read a paper on "The Teacher in the School Room." It was a lively description of the failings teachers are guilty of, and was full of humor and piquant remarks.

E. L. Keenan described the difference between the arc and incandescent systems of electric lighting, prefacing his remarks with a short history of the discovery of induced currents by Farraday, and the "dynamo" or generator.

An invitation was extended by Mr. Bos to hold the next meeting of the association in North Plainfield. The association decided to do so, on the first Saturday in February.

The committee on program reported the following for the next meeting:

Development work with class—by teacher of the place where association meets.

Grammar the Outgrowth of Language—should it be taught when the pupil first enters school?—Geo. A West.

Penmanship—Miss Veghte.
Oral Spelling—Mrs. Hansen.
Arithmetic—Percentage or Rates—Mr. Holderness or no recess—Miss M. M. Steele.
Vocalism, W. T. F. Ayers.
Reading—Miss A. Hudson.
Reading or Recitation—Mrs. Dayton.
Recitation—Miss Carrie Stryker.
Continuation of Parsing and Analysis—J. S. Hayes.

A vote of thanks was tendered by the association to the young ladies who furnished the collation for the teachers, after which the association adjourned.

Y. M. C. A. Notes.

Young Men's Christian Association Literary and Debating Society, whose election of officers was reported a few days ago, starts out with bright prospects, and promises to be a felt power among the young men connecting themselves with the Association.

"In of pet is a significant one. It will tend to cultivate a correct mode of speaking and qualify its members by practice to express their opinions, in a correct manner. Subjects will be selected calculated to improve the mind. All will have an opportunity of participating in debating upon various subjects of the day. Orations are promised at each meeting by original essays to be written, and critics for the evening will be appointed.

The subject for debate at its next meeting will be, "Resolved that women are eligible to citizenship and to hold office." Disputants John Ulrich, E. H. Lewis, affirmative, H. J. Runyon, E. L. Suffren, negative.

The following appointments were made for the coming meeting: F. Willis, Critic; W. R. Coddington, Orator; Thomas Horn, essayist.

The association promises the public interesting public meetings, when they may expect orations, debates and readings to be given by its members.

Next Sunday, Nov. 9th, is the commencement of the week of prayer for young men, observed throughout the world, and will be observed as a young men's day in this city. In the morning at 9.30 a prayer and consecration meeting will be held in the Y. M. C. A. Hall, to which all workers of the association are invited to attend. All of the pastors of the city will preach sermons especially to young men in the morning.

In the afternoon a union prayer meeting in the interest of young men will be held in the First Baptist church at 7.30 p. m.

A mass meeting will be held at Stillman Music Hall. Rev. Mr. Tuttle will preach a sermon to young men, and the choirs of the city will unite and form one choir under the leadership of Mr. C. W. McCutchen. The gallery will be reserved for young men only. All are invited.

Rev. Mr. Richards of the Crescent Avenue Church will lead the meeting of the Boys' Branch next Friday. Subject, "Boys' Prayer Meeting." Let every boy be present and give Mr. Richards a hearty welcome.

There will be a meeting of the managers of the Ladies' Auxiliary on Monday afternoon, Nov. 10th, at four o'clock, to elect officers for the coming year, as this is a very important meeting of the managers it is hoped to see every lady present.

WHAT THE WOMEN WANT.

The Association for the Advancement of Women was in session in Philadelphia last week. The rush of politics has caused the meeting to be compressed very closely in the newspapers.

This isn't right. Anything that interests women should interest mankind. Especially is this true when women discuss the subject of man and his attitude toward the other sex. This was the question most thoroughly and profoundly treated in Philadelphia.

The question was first coddered from a statistical standpoint. Figures were produced to show the number of men and women over twenty-one in the land and the number of families. From these statistics the argument advanced to a consideration of the duty of every man and women over twenty-one years of age to become a part and parcel of a family.

The force of the argument is readily perceived. These women, advanced women, if you so please, desired to prove that both the bachelor and the old maid were foes to society, but the bachelor more especially so. The deduction was drawn that there need be no old maids if the bachelors acted right. In other words, there were old maids because some men will remain bachelors.

These women, herefore, want for womanhood the abolition of bachelorhood. They consider the bachelor a public nuisance. He obstructs the progress of the family and impedes the advancement of the fairer sex. Compel the bachelor to marry and society will be more firmly united and the land would prosper more than ever.

Of course the bachelor is now put on the defensive. He must put in his plea or get non-suited by the public.

Special Notices.

THE LADIES OF THE AUXILIARY BOARD of Muhlenberg Hospital, on Tuesday evening, Nov. 18th, and Wednesday afternoon and evening Nov. 19th, hold a fair in Reform Hall for the benefit of Hospital. Admission 25 cents. Children 10 cents. Mrs. T. H. Robertson, Sec.

Garrett on Lincoln and Grant.

["Guth" in New York Tribune.]

Col. Tom Ochiltree, who tells more truth than newspaper jaygraphers, writes me: "The last time I met John W. Garrett was in the private logs of Minister Morton at the grand opera in Paris. I was accompanied by Mrs. and Miss Garrett, and was in an excellent reminiscent humor. I remember he told me he was present when Andrew Johnson gave his memorable arrest to Gen. Robert E. Lee, J. E. Johnston and other Confederate leaders. He spoke of the way in which Gen. Grant indignantly refused to be a party to such a proceeding. He said it was the only time he had ever seen Grant's equanimity disturbed, that his eyes literally blazed with anger, and that he informed Mr. Johnson that he would attempt to deal with the status of those southern generals as arranged by him would cause his instant resignation as general-in-chief of the army.

"Of course," continued Mr. Garrett paid a high compliment to the ability, honor and bravery of Gens. Lee and Johnston and their family, and said that he would not be made to humiliate them or break faith with them. He accompanied Mr. Lincoln to Fort Monroe to the day after the assassination of the latter. Mr. Lincoln visited the wards of both armies in the improvised hospitals, and he would never forget a scene that occurred between him and a young soldier from North Carolina whose wound was pronounced mortal by the physicians in charge, pampering the patient. Mr. Lincoln put his arm under the neck of the poor boy, and talked with him of his mother and sister at home until, said Mr. Garrett, the tears welled up from his great heart and fell upon the wondering face of the dying Confederate."

Twain as a Talker.

A Philadelphia compositor who worked on a local literary paper with Mark Twain, tells the following:

"One evening Clemens came into our room and found Ned and me shining our boots.

"'Why, boys,' he asked, 'going out?'

"'We're going to the theatre.'

"'But it's not 7 o'clock yet; you've plenty of time. Until then sit down on the corner of the bed. I want to tell you a good story,' and he proceeded to entertain us with an account of his latest practical joke. The recollection of a personal experience on a steamboat, which in turn led him on to a description of his life on the Mississippi. He talked on without pause, holding our closest attention by his graceful flights of humor, vivid descriptions and thrilling incident until at length, breaking off suddenly, he said with a laugh:

"'Well, if you're going to the theatre it's time you were off.'

"We drew our watches. It was 11 o'clock."

Fishing for Bats.

[Exchange.]

Fishing for rats is popular sport in Red Bluff, Cal. They bait their hooks with little pieces of meat and throw under the edge of the sidewalk, where the rats walk in them and are yanked out, kicking and squealing.

To Amuse the Cat.

A German newspaper lately printed the following advertisement: Wanted, by a lady of quality, for altogether recuperation, a few well-behaved and respectably dressed children to amuse a cat in delicate health two or three hours a day.

It appears that there is a class of "sports-men" in England who find nothing more to buy sea gulls. An indignant man writes to the London Times that he saw a boat ashore at Flamborough Head with two stolid cockneys, who shot every fewer minutes at one of these harmless creatures. A few were taken up to the village, but the remainder were left for a troop of boys to pelt at one another amid shouts of laughter. The writer, without raising the question of cruelty in the destruction of the gulls, protest against their slaughter on the ground that it detracts from scenic effects along the coast. He says, truly enough, it is a pleasure to watch sea birds skimming over the waves, or hovering, with wild cries, about the cliffs.

STILL FIGURING.

Trying to Find Out Who Has Been Elected President

The Situation Still Favorable for Cleveland, Although the Republicans Claim the Victory—Claims on Doubtful States.

NEW YORK.

NEW YORK, Nov. 6.—Returns come in very slowly. New York and Indiana are so close that the result can not safely be reported by the official count. The Democrats claim New York by 4,710 plurality. These figures are estimated from private telegrams received from districts not heard from.

THE TRIBUNE'S REVIEW

NEW YORK, Nov. 6.—The Tribune rep. says: "The latest advices received from New York state Democratic headquarters are that the state is Republican by a small plurality—about 2,000—nearly every precinct complete, the Democratic gains being offset

ABE BUZZARD'S LIFE.

It Resembles That of Jesse James on a Small Scale.

The Home of the Outlaw on the Welsh Mountains—A Close Parallarity with a Repeating Rifle—A Desperate Man.

PHILADELPHIA, Nov. 6.—To the northward and westward of Honey Brook, a busy little Pennsylvania village, in the Welsh mountain, says The Press. In this mountain, during the past eighteen months, Abraham Buzzard, one of the notorious five brothers who were sent to jail for varying terms of years some time ago, and one of the three "Buzzard boys" who, it is the fact more than two years since, has made his home. His most companion is a horse thief, and also a jail breaker, known as "One-eyed Frankfort," his proper name being William Frankfort, though he has a number of aliases. Since his escape from the jail at Lancaster and return to his old haunts about the Welsh mountain Abe Buzzard has been a conspicuous figure at several picnics, camp meetings and festivals, and the people of the vicinity have woven quite a romance about him. He is the subject of many friendly conversations, and doubtless comes in for his share of attention in moonlight walks.

Not long ago he became hungry when within a short distance of the dwelling of a farmer named Lafferty. He at once made his way to the house, walked quietly inside, and the negro table being laid and loaded, he placed his repeating rifle across his lap, after seating himself, and began to enjoy a substantial repast. Miss Lafferty, who was in the dining room, was about to make her exit, when Mr. Buzzard, coolly placing his right hand on a pistol in his belt, invited her to remain. She did so, and says "he acted like a perfect gentleman." He went so far as to thank her for his supper, and said that if there was anything wrong with the victuals he would hold her accountable. After he had eaten all he wanted, Buzzard resting his rifle and backed out of the house, his invariable custom when in a strange abode. Miss Lafferty left as he was going to and the mountain, and "felt sorrow for the poor fellow!"

A few weeks ago a store in this village was robbed, and it being inconvenient for the burglars to carry away their plunder without assistance they went into a neighboring farm, stole a horse and wagon, loaded the goods and, as those who made search say, went up into the mountain. At any rate, the horse was turned loose up there, and came down without a driver, stopping in front of the Patterson house, in this place, at an early hour of the following morning. Soon after the robbery another store near Cambridge, two miles west of Honeybrook, was robbed and a horse stolen to remove the goods. This horse and empty wagon were found the next morning near the road in the southern slope of the mountain.

Mr John Emrey, who is a prosperous farmer, said to the writer that Buzzard was undoubtedly a bad man, and was opening the way to an increase of crime in this vicinity. From him it was learned that until recently Buzzard had lived the life of a hermit and roamed in the mountain, sleeping in barns or vacant tenements at its base on whichever side he happened to be, but he has now brought his wife to his home on the north side of the mountain, and goes regularly home to eat and sleep when not engaged in thieving. He has a number of associates, and Mr. James Reary, who lives within a mile of the mountain, says Buzzard is gradually forming a gang of the dissolute characters of the mountain and vicinity. He is usually seen in company with "one-eyed Frankfort," and both go armed at all times. Frankfort claims to be a super-honed thief than Buzzard. Recently it became necessary for Buzzard to have his horse shod. Frankfort accompanied him to the smithy, and while Buzzard made terms with the blacksmith and throughout the shoeing he was on a wayside fence-rail with his Enfield repeating rifle at easy command—the blacksmith says at full cock. It was on this occasion that Frankfort said Buzzard could steal little things, but casually informed the blacksmith that he never stole "nothin' supplier'n a horse!" A number of horses have been stolen from the neighborhood of the mountain that have not been tracked home, and the discriminating one-eyed thief is accredited with the crime of stealing them.

A Press correspondent made three trips to the mountain, one with Mr. Patterson, of the Patterson house, for the purpose of interviewing Buzzard, but he was not at home on any occasion save when the call was made. He has a rude, but substantial dwelling place, showing neatness and thrift. Mrs. Buzzard is not unpleasant looking, but she was on the occasion of these visits a woman of few words. Failing to get an interview with Buzzard, the correspondent called on Mr William Evans, the village blacksmith of Sweet Home, and heard some of the stories previously. Mr. Evans throws considerable romance about the "mountain ranger," as he is generally called by those who do not see much of him, but so he might be." Said Mr. Zorns: "Buzzard is a tall, athletic fellow, with black curling hair and keen black eyes. He always goes armed with a sixteen shooting rifle, and has from three to six pistols in a belt around his waist. He goes and comes when he pleases. He will talk to you, but will not tell you of where he has been or what he has done. Abe Buzzard is a pretty bad fellow, no doubt, but he is not so bad as some make him out. He says that he never stole and never will steal from a poor man; and he wouldn't steal at all, only nobody will trust him to work and earn a living. He has said over and over again that he will not be taken alive, and that he don't care how soon he is taken or what is done with him after he has settled with two men who swore against him at his trial."

His Last Words to his Wife.

TRENTON Nov. 6—James Green, a laborer living on Lamberton street, committed suicide by drowning himself in the rolling mill basin. He had been ill for eight days, complaining that his head felt strangely, and this morning told his wife that he was going to see Rev. Father Magee and would then go to the asylum for a week. He told his wife he was going out to get fresh air. The workmen at the rolling mill heard a splash in the water, and half an hour later recovered his body. He leaves a wife and six children.

Are Most Men Crazy?

MONTREAL, Nov. 6.—Evidence in the case of young Harold De Wolfe, of New York, for a choke of $250 in the Canadian Bank of Commerce, was given to-day. Dr. Henry Hesore testified that De Wolfe is suffering from "alcoholic mania." In the course of his testimony he asserted that the greater number of mankind are crazy, and held that a great many criminals confined in prison should not be there at all, but should be receiving cure in asylums.

Did Not Know It was Loaded.

CHESHIRE, Nov. 6.—Bertie Kain, aged 14, a cowboy, was shot and almost instantly killed by Thomas McCormack, 16 years old. The latter was accidentally shooting a toy pistol at him, when it exploded. McCormack "did not know it was loaded."

A NEW PAVEMENT.
The undersigned has secured the exclusive agency for the sale of the
Diebold Patent Iron Stone,
which for elegance and durability, is unsurpassed, and in price will compare favorably with any other pavement now in use. It is the most beautiful pavement known for walks and yards, gutter stones, floor tiling, and a most desirable article to build fire and Burglar proof vaults; and for building purposes generally. These pavement blocks have many striking peculiarities. They show no perceptible wear, are non-conductors; repel ice and snow, as well as all kinds of moisture. When damaged, can be taken up the ordinary brick, thus material remains perfectly free from it. The blocks are cast in the molten iron from slag and are the hardest of substances. Specimens on exhibition at Werner's Fancy Store, opposite Stillman Music Hall. For further particulars call on or address

A HOLIDAY MYSTERY.

Mr. Joseph Battledore and Mr. Samuel Newell were old friends and cronies, and although very readily reconciled, their respective wives had rather cemented the intimacy by becoming violently attached to one another. The two ladies were in the habit of visiting Brad on the closest terms of friendship and good-will, and not unfrequently went to the same holiday resort for the summer vacation. This year they had chosen Long Branch as their destination, and according to custom, Mr. Battledore and Mr. Newell remained in town on the plea of business, running down to the seaside on Saturday to Monday, and occasionally staying for a few days at a time. The fact was that these old gentlemen made business an excuse for a little mild dissipation in the absence of their excellent helpmates. The ladies naturally viewed the arrangement with some uneasiness, and each had an uncomfortable suspicion that the other's husband might lead her spouse away. But nothing ever transpired of the old gentlemen's proceedings which was calculated to disturb domestic harmony, though they were both subjected to a rigorous and searching cross-examination during their periodical visits to their families at the expiration of each week spent in town.

Mr. Battledore and Sam Newell—for it would be affectation to speak of him as Mr. Samuel Newell, since everybody calls him Pam, though he was well past 30—were seated after dinner enjoying their wine one Monday evening, having returned from Eastbourne in the morning, when Mr. Battledore remarked:

"I'm not sure they haven't got the best of it down there," nodding vaguely over his shoulder in the direction of Eastbourne. "It is rare holiday weather—much too hot for town."

"Precious slow at the seaside," rejoined the other as he sniffed at his claret.

"Well, yes; certainly," acquiesced Mr. Battledore.

"Jolly in Paris, though, I expect," suggested Sam, insidiously.

"Hoh!" exclaimed Mr. Battledore, with an abstracted air.

"Pooh! It was hotter than this when we went together three years ago, and yet we contrived to enjoy ourselves."

Mr. Battledore coughed uneasily, and helped himself to wine. The occasion referred to called forth mingled reflections. He and the other had been left unchaperoned for a short trip, with the full consent and approbation of their wives, and had what the Americans call "a high old time." But after their return Mrs. Newell, through undue appreciation of his own claret, had suffered himself to be beguiled into making unguarded confessions of rather an awkward nature, which he recollected with only partial success, to explain away the next morning. The wives accordingly laid their heads together, and, though no unpleasantness ensued, it was tacitly understood that an edict had gone forth which effectually banished from the breasts of the delinquents the smallest hope of ever being again allowed to visit the continent without an escort.

"I feel very much inclined to run across," said Sam Newell, tentatively.

"I could not get away," returned Mr. Battledore.

"Why?"

"Oh, business, of course," answered Mr. Battledore.

"Won't do, Joey Don't come the humbug over me," said Sam, with a wink.

Mr. Battledore frowned slightly, and then suffered his features to relax into a smile. He was rather a pompous and dignified old gentleman, but he knew from experience that it was no use being pretentious with Sam.

"My wife wouldn't hear of it; I'm sure yours won't either," he said after a pause.

"Why should she?" asked Sam, with another wink.

"Eh?" exclaimed Mr. Battledore, starting.

"Let us go and say nothing about it We could start to-morrow morning and come back on Friday night in time to go to Eastbourne as usual. We should get three clear days over there."

Mr. Battledore leaned back in his chair, lately amazed by this audacious proposal Had he been staying at home the suggestion would have appeared impracticable on the face of it, but he had been fortunate enough to let his house, and for the time was Sam's honored guest. Now, Sam's household was devoted to their master, who did not disdain to bribe them to hold their tongues about his abnormally late hours when his wife was absent. Sam might, therefore, safely leave for a week without fear of being betrayed, and this circumstance removed a great danger. There would be no difficulty with regard to his office, for Mr. Battledore had an easy and accommodating partner, who could be safely trusted to keep his secret. There remained only considerations of styles about deceiving his wife, and these, and to relate, vanished like snow beneath a monday sun as Sam proceeded to expatiate upon the attractions and gayeties of Paris capital.

The upshot was that Mr. Battledore and Sam Newell started for Paris the next morning, and enjoyed their brief trip amazingly—in an extreme fashion enough as dictated. They returned to London on the Saturday evening, as arranged, and were relieved to find that no communication awaited either of them from their respective wives. In the afternoon they took their usual train to Eastbourne, as though nothing had happened, smiling tolerantly when a regretful Sam Newell certainly did, but then he was the more hardened sinner, being a member of the stock exchange. Mr. Battledore's misgivings were not unreasonable to a blister on his nose, caused by exposure to the sun; and this troubled him a good deal, especially as they approached their destination.

"What shall I say if my wife notices it," he inquired, gazing reproachfully at himself in the polished cone of his watch.

"Oh! she won't notice it," said Sam, in his off-hand way.

"But supposing she does," insisted Mr. Battledore irritably.

"Tell her you've been smelling a flat-iron to cure a cold," suggested Sam.

This was all the assistance Mr. Battledore received from his companion, and he worked himself up into a nervous state before his blistered nose should give rise to awkward questions. Fortunately, however, Sam's opinion turned out to be correct, for when they reached the house all was rosy and very bribing. Mrs. Battledore made no remark upon her husband's appearance, and as it soon became evident to Sam that what happened that she hardly referred to his supposed sojourn in town. Sam Newell's wife made no suspicious inquiries either; and the two gentlemen were quietly congratulating one another upon their happy escape from detection.

Sam looked toward the small hours of the night, however, Mr. Battledore was aroused from his first doze by an outcry proceeding from his wife, who inquired, rather inconsequently as he imagined, whether he had received a letter from her.

"A letter! What letter?" he asked, taken aback.

"The letter I wrote to your office on Tuesday," said Mr. Battledore.

It would have been perfectly simple, and she pretty well was, for Mr. Battledore to have answered in the negative. The next moment he bitterly repented not having done so. But somehow or other, when the question was asked him he was thinking no reasoning paste about it from a gulp of conscience, and the idea flashed across his mind that if he said he had not received the letter, his wife would suppose that he had been absent from the office. An instant's reflection would have convinced him of his foolishness of such a notion, but he replied before he had thoroughly inspired by moral uneasiness and his evil genius.

"Oh! the letter. Oh, yes. Certainly," he said, burying his head in the pillow again.

"Will it be there to-morrow, Joey?"

"What!" mumbled Mr. Battledore, pretending to be dozing off again.

"Shall it be there to-morrow?"

"To-morrow! Eh! what! Oh! of course, of course!" answered Mr. Battledore. "What on earth made you write to the office?" he added, by way of changing the conversation.

"I thought it would be more convenient. You would only have to step round to the shop," replied his wife.

"What the deuce does this all mean?" thought Mr. Battledore, with a groan.

"I hope it will be ready in time, Joseph! Joseph!" cried his wife emphatically, as he feigned to slumber. "Will it be ready in time?"

"Of course," said Mr. Battledore, shortly, trembling with apprehension.

"What color did you choose, Joseph" demanded his persistent spouse little suspecting his mental perturbation.

"Color!" murmured Mr. Battledore, faintly.

"Yes; I left that entirely to you."

"I think it was a sort of bluish-green," said Mr. Battledore with desperation.

To his unutterable relief his wife appeared satisfied with this answer, or more probably she became drowsy herself at this juncture. At all events she asked no more, and Mr. Battledore was left to reflect upon the conversation.

By this time he had realized that he had made a fatal mistake in professing to have received the letter, and a greater mistake still in feigning to have executed some mysterious commission. He tossed about restlessly as he perceived how foolishly he walked into a dangerous trap. Should his wife now discover that he knew nothing of the letter, and had answered her at random, her suspicions of something wrong would be immediately aroused, and Mr. Battledore was haunted by a dismal foreboding that the smallest clue would lead to the discovery of the recent escapade. He dared not anticipate the scene that would ensue when his wickedness and deceit stood revealed, for the truth was that he was afraid of his wife, and though pompous and self-important in the world, he was pretty severely henpecked at home.

However, it occurred to him that the case was not absolutely hopeless. For Sam might find out through Mrs. Newell what the letter was about, and by putting him on his guard enable him to avoid sinking deeper in the mire. Accordingly, next morning, having previously arranged with his friend to have an early dip into the sea, he started off before his wife was awake, and confided his trouble to his faithful companion. Sam scoffed at his fears and undertook to find out the necessary information from his wife without delay. Fortunately Mrs. Battledore made no allusion to the subject during breakfast, and on the ground of overwork at the office during the week, the friends seated themselves on the beach and threw pebbles in the glistening water which rippled musically at their feet.

But to Mr. Battledore's dismay it transpired that Sam had failed in his mission. His wife pretended to know nothing about the letter, and had in her turn questioned him quite sharply about it.

"She put me in a corner by asking what you had told me about it, and why I was putting questions to her," said Sam, rubbing his nose in a perplexed way.

"What did you say?" inquired Mr. Battledore, breathlessly.

"I said I only asked for fun. That was a little weak, wasn't it? But I don't think she twigged that I was disconcerted. She seemed more curious to know what you had let drop about the letter," said Sam.

"Yes, yes," murmured Mr. Battledore.

"I said I had forgotten, but believed you had mentioned something about light green, turned up with blue or some other color. Evidently Maria did not know what to make of my answer."

"Then she will go and speak to my wife, who will be at me again," moaned Mr. Battledore.

"I shouldn't wonder. I say, Joe, what an ass you've made of yourself," said Sam, revealing a little uneasiness on his own account. "Who knows what your stupidity may lead to. It may turn out to be the little cloud no bigger than a man's hand. There is no trusting you. You would let out everything if you had a chance."

Sam Newell had much more reason to be afraid of his wife than his friend had of his, but he was animated by a bolder disposition. Nevertheless he had a wholesome dread of having to confess to the Paris trip in the face of distinct prohibition, and, in a minor degree, he began to feel a little alarmed himself. Mr. Battledore's nervousness gave him just cause to fear that he would betray them both on the smallest provocation, and he resolved to make it a condition that they should return to town that evening, instead of waiting till the morrow.

"I think we had better," said Sam, you will be out of harm's way all the sooner."

"That will put an end to the difficulty, for I shall no doubt find the letter somewhere about the office to-morrow, and can set everything right," said Mr. Battledore eagerly.

Accordingly these two dissemblers shirked their difficulties as much as possible all day, and then created considerable surprise and consternation by unexpectedly announcing their intended departure by an early evening train. Business was, as usual, the excuse put forward, and after an uncomfortable afternoon they started back to town, consoled by the reflection that the danger was happily over.

On the following evening, however, Mr. Battledore greeted his friend with a very frantic countenance.

"The letter is safe to be found anywhere. Those idiots at the office must have mislaid it."

"Or else it miscarried," suggested Sam, with an exasperating grin.

"But I said I posted it! Now, what am I to do? What is it I'm supposed to have ordered. It might be anything from wall-paper or curtains to a pair of gloves or a drawing-room sofa," exclaimed Mr. Battledore quite tragically.

"It is certainly awkward, but if I were you I should not worry myself," said Sam, with a view to reassuring his friend, but he continued to give more and more uneasy, especially after receiving a post-card from his wife a day or two later, saying that she had changed her mind, and was going to come down with him on Saturday without fail, the last remark sounding decidedly unwelcomed.

"If I could I would. I've forgotten it after all!" said Mr. Battledore, peevishly, as he threw the post-card on the table.

"You will have to. It's the only chance," said Sam, looking quite serious.

"Why, you might have mentioned the article instead of saying fiff" exclaimed Mr. Battledore, tearing the card viciously into small pieces.

"I'll tell you: whist, old fellow, I shall take Mrs. N. a bracelet or something when we go down on Saturday," said Sam thoughtfully. If there should be a row it won't do any harm, and it may enable us to assist you to ascertain what you wish to know."

Mr. Battledore's apprehensions reached to a dangerous pitch when his friend announced his intention of indulging such a precaution. But a little calm reflection induced him to follow Sam's shrewd example, and the result was that Mrs. Newell received a propitiatory offerings to be sacrificed on the altar of conjugal affection.

On reaching Eastbourne they were met by their wives in the carriage, and Mr. Battledore, at all events, felt by no means grateful for this little attention. However, he and Sam took their seats opposite the ladies, trying to get back to look as if they had nothing on their minds, and, above all, no guilty secret. But before Mr. Battledore had time to recover his self-possession, his wife said:

"Joseph, you remember my speaking to you about a letter I wrote to you last week?"

"Ye—yes," said Mr. Battledore, wincing at a nudge from Sam.

"Well, I never sent it at all! Only this morning I discovered it between the leaves of my blotting book. I forgot to post it."

It is of no consequence, of course," chimed in Mrs. Newell; "only you will be the loser, Sam. Mrs. Battledore wrote to her husband to buy you a cigar case on my behalf, and to have your initials engraved upon it. To-morrow, you know, is your birthday."

Mr. Battledore was by no means reassured by these speeches. On the contrary he realized that he was in a worse fix than ever, since he would be now called upon to explain what he meant by saying he had received the letter. A sort of deadly feeling came over him as his wife said:

"By the way, Joseph, you said you had received the letter, and talked as though you knew all about it."

"And you, Sam, said Mr. Battledore had mentioned the subject to you; and I was vexed at the time, as, of course, it was a secret," interjured Mrs. Newell.

"Why," said Sam, coming gallantly to the rescue, for Mr. Battledore was at a loss to find words, "as Joe said to me afterward, we have been at cross purposes. We each had a secret, and we thought you had discovered ours. Joe let out that blue was the color he had chosen. I tried, to find out how the land lay from you, and nearly made me betray everything by asking questions. However, I dare say neither of you guess what it is."

"No, indeed!" cried both the ladies, considerably mystified by this incoherent explanation, and on tiptoe of excitement.

"Well, here, Maria," he said, producing a bracelet, like a conjuror. "Emeralds, you know. I don't you remember my saying it was a sort of blush-green or something. Well, Joe's offering, I believe, has blue stones—turquoises."

Mr. Battledore took the hint, and handed to his wife the bracelet he had bought as a peace offering, inwardly marveling at his friend's wonderful tact and impudence, and beginning to breathe quite freely again. In fact, it was evident that Sam's extempore discourse, followed by the bracelets, had effectually explained what was mysterious in their recent behavior, and the secret of the unhallowed expedition to Paris seems unlikely ever to be revealed.

A NEW PAVEMENT.

The undersigned has secured the exclusive agency for the sale of the

Diebold Patent Iron Stone,

whether elegance and durability, in connection, and in price will compare favorably with any other pavement now in use. It is the most economical pavement for sidewalks, as it is proof against stones and grass, and is free from the annoyance and lasting cost of repairing. Also for cellars, stables and hanging grand coaching and for building purposes generally. Very desirable blocks have been ordered for the Public Library, Stillman Music Hall, Post Office, Court House, and others, as well as all the manufactories, many of the stores and residences in this city. Those desiring to use this pavement are requested to call and examine samples of the same. The material remains perfectly cool to the feet. These blocks are coated with a preparation which prevents the absorption of moisture. Specimens can be seen at Warner's Livery Stable, opposite Stillman Music Hall. For further particulars call on or address

W. H. WARNER,

32 and West Front street, Plainfield, N. J.

Chronological Events.

Battle of Tippecanoe, 1814.

JOTTINGS.

—The Reform Club had a business meeting in the hall last evening.

—Ramonetti supplied the oysters at the Park House banquet yesterday.

—The Public Library has been in Egyptian darkness the past week. What is the matter?

—Common Council meets this evening, the time to which the regular meeting has been adjourned.

—The Pennsylvania Railroad has just declared a dividend of three per cent, a falling off of two per cent.

—Snow was in the air yesterday but failed to whiten the ground. The autumnal leaves are quickly vanishing.

—Newark's "cops" and reporters paid us a friendly visit yesterday, during their target shooting in this city.

—The Democrats hereabout whoopenup every morning and the Republicans every evening. Each believe they have won.

—Democratic enthusiasm bubbled over this afternoon and a parade with brooms in honor of the election of Cleveland took place, the men carrying Bi-lea's brooms.

—The stable being erected in the rear of the house occupied by Gazelle Engine Co., No. 1, has already got the roof on, and the building looks as if it will soon be finished.

—The contest for a gold-headed cane at the St. Mary's Fair was decided last night in favor of Mr. James Muldowney. The contest for the baby carriage will be decided this evening.

—To-morrow evening Mr. Schneider, a trick and contortionist skater of Poughkeepsie, New York will give an exhibition at the Casino. Next week there will be an exhibition of fancy bicycle riding.

—The negro who brutally outraged old Mrs. Gould as related in the NEWS of Wednesday, was seen in Westfield before the account of the affair reached that place, and is now supposed to be in this vicinity, as we stated at the time was probable.

—It is difficult to find the entrance to the rooms over Stillman Music Hall. Most people dive into the main entrance and after groping around in search of doors emerge in bewilderment and wonder on what plan the building was constructed. A sign would save much inconvenience and annoyance.

—The November term of the New Jersey Supreme Court commenced at the State House, Trenton, Thursday. There are 62 cases on the list of causes. Among the most important is that of the inhabitants of the township of Woodbridge, Middlesex county, vs. E. B. Savage, vs Penn. R. R. Co., E. T. Green.

—Betting goes along yet. Last evening on Front street, a gentleman, at one time in the drug business here, made a bet of $50 that Cleveland would be elected, which was taken up by an adherent of Blaine, who it seems, backed out at the eleventh hour. The crowd going to demonstrate, an officer of the law appeared on the scene, and requested them to disperse, which they accordingly did.

Crumbs of Comfort.

New York, 1:15 p. m.

Tribune flag still flying. No flag on Herald office. Tug firing in the City Hall Park is for Grace.

[It was telegraphed so to this city. The Democrats construed it for Cleveland, and brooms were issued for a parade]

Jay Gould is said to have congratulated Cleveland by telegram to-day on his election.

A prominent Democrat this afternoon refused a bet of two to one, which a Republican offered on Blaine.

[SPECIAL TO THE NEWS.]

New York, 3:35 p. m.

Associated Press still claims fourteen hundred for Blaine. G.

[SPECIAL TO THE NEWS, 8 p. m.]

"Guy" says it is a blank blank lie.

[SPECIAL TO THE EVENING NEWS.]

New York, 3 p. m.—The World and Herald have ceased to display any more Cleveland bulletins. The Republicans are jubilant.

The World says Stiles Democratic, is elected Sheriff of Union county. In the same column, it states that Stiles Republican is elected Sheriff by 397 majority over Karon. So according to the World, Union county is to have two Sheriffs—one a Republican and the other a Democrat. Happy Union of Stiles and Stiles.

The Sun says Vail has been elected over Karon Sheriff of Union county. This is getting things a little mixed, putting the defeated Republican candidate for State Senator in place of the defeated Democratic candidate for Sheriff. Gen. H. Stiles goes to the sheriff's office with 397 majority.

At the hour of going to press the betting in this city is $100 to $10 that Blaine is elected.

The New Jersey Legislature.

The next Legislature will be as follows, election being for a part of the Senate and the full Assembly:

SENATE.

The Congressmen elected in New Jersey are:

First District, Hires (Rep).
Second District, (Buchanan (Rep).
Third District, Green (Dem).
Fourth District, Phelps (Dem).
Fifth District, Parkin (Rep).
Sixth District, Fabiaban (Rep).
Seventh District, McAdoo (Dem).

In the Senate there are 11 Republicans to 10 Democrats. In the House there are 36 Republicans to 24 Democrats. The Republican majority on joint ballot is 13.

THE NEWARK POLICE GUARDS

Their Target Excursion to this City Yesterday.

The Newark police guards on their target excursion to this city yesterday attracted considerable attention. They numbered nearly two hundred and had with them about seventy guests. Among those prominent among them were Chief of Police John S. Bell, Chapain William F. Valk, Captain-of-Guards Thomas Dunn, Lieutenants Finnigan, Castin, Schuck, Bolandy, Sergeants Jackes, Nash, Barnet, Quinn, Police Clerk Rinney, Mayor Joseph Haynes, Chairman of Police Committee George Smith, City Clerk Joseph Atkinson, Chief-of-Police Donivan of of Hoboken, Chief-of-Police Murphy, of Jersey City, Col. William H. Hamilton and reporters of the Freie Zietung, Deutche Zietung, Press, Journal, News, Sunday Call and Morning Register, of Newark.

The shooting was participated in by one hundred and sixty men, and four hundred eighty shots in all were fired at the target, which in consequence was considerably riddled.

The first prize was won by officer James W. Allen, the second by officer Dennis —, the third by Officer Rowe, Chief-of-Police Dodd of this city, made the best record among the invited guests. The shooting was materially interfered with by the strong north-west wind which was blowing at the time.

After the shooting the guards and their guests partook of dinner, which was served in excellent style by Proprietor Johnson of the Park House.

A WOMAN'S HORRIBLE DEATH.

A Fast Train Decapitates Her Head and Arms.

Mrs. Kate McCue, who was employed at the City Hotel, New Brunswick, left that place Thursday morning and went out for the purpose of meeting Mrs. John Corliss, both ladies having the intention of going to Somerville, where Mrs. McCue formerly resided.

They paid a call and returned on the railroad track. While nearing the tanks which are situated near George and Washington streets, they noticed a fast train coming. Mrs. Corliss called out to her friend to cross over on the east-bound track.

The lady did as requested, when from some cause or another she seemed to have changed her mind and walked back to the west-bound track. Whether she endeavored to reverse is not known, but from the testimony of her companion and the flagman, it appears that she stumbled and fell. Before she could recover herself the train was in front of her and the cow-catcher of the locomotive caught her, whirling the unfortunate woman under the wheels.

The train was at once stopped, when a ghastly sight presented itself. The woman's head was cut off, and also were her two arms up to the elbow. The head was a shapeless, unrecognizable mass, while several pieces of her skull lay scattered around on the track. A stretcher was procured and the remains carried to the dead house. Dr. J. W. Rice, the County Physician, was notified and after making an examination deemed an inquest unnecessary.

Detective Gregory was instructed to take charge of the remains until the arrival of Mr. McDade, the undertaker, to whom the care of the body was entrusted.

Gregory said it was the ghastliest sight he had seen for some time. The hair of the woman was entirely removed from the scalp as if it had been shaved by a razor. Mrs. McCue was a person of about 35 years of age and of middle stature. In her possession was a $20 gold piece and several bills. Her husband, it is said, owns a farm near Somerville. She had not lived with her husband for some years owing to a misunderstanding.

Apple Racing at the Casino.

The proprietors of the Casino are constantly devising something new and attractive for the entertainment of their patrons. The last event was an apple race, which was participated in by eight skaters, in two heats of four each. Among those entered were some fine "dudey" young men of twenty-one and also some small youngsters of twelve and fourteen. The "small boy" was considerably the most agile, as the sequel proved, notwithstanding the numerous times he came in contact with the floor, each of which times the audience loudly applauded. The race consisted in picking up a number of apples placed at regular distances on the floor and putting them, one by one, in a basket. The first heat was won by Harry Drier, who also succeeded in the final heat in accomplishing the winner of the second trial heat, C. McLaine and thereby won the first prize, a pair of skates. The second prize, which was awarded to McLaine was a week's admission ticket.

The Fire on East Seventh Street.

An alarm of fire brought out the department about 4:30 o'clock yesterday afternoon. The cause was discovered to be a burning stack of corn fodder in a lot belonging to Mr. Evan Jones on East Seventh street. The fire was quickly extinguished.

The hose carriage of No. 2 Engine Co., which was fastened with a long rope to the end of their express wagon, when near the corner of Seventh street, struck a buggy in longing to a Mr. Stewart, who happened to occupy it at the time, throwing him out and under the horse's feet. Fortunately, the horse being gentle, Mr. Stewart was uninjured but the buggy was demolished.

It is supposed the fodder was fired by some boys who were seen playing around it shortly before the alarm.

Advertised Letters.

The following is a list of advertised letters remaining in the Plainfield post-office, Nov. 7, 1884. When called for say advertised:

Wall, Mr. and Mrs. E. Wilson, Miss Julia,
E. R. Force, P. M.

Lost His Tooth.

During the Democratic parade last Monday evening a Democrat among the club from Somerville, while shouting for "Pa" dropped his false teeth, and says that he was so excited that he never missed them until the train started for Somerville on his return homeward. He telegraphed back for them. They had been found by the telegraph operator, who forwarded them in a box to their toothless and forlorn owner.

Typographical Ink Used B.

Robert L. Livingston is a workingman. He is a journeyman printer. Yesterday he came to this office, took up a stick and set a part of our leading editorial.—Hinsdale Herald.

Honorable Bob did likewise in this office, and although we have some rather rapid compositors in this office Bob showed himself capable of picking up type as nimbly as the quickest of them.

Personal.

Mrs. Stephen Perrine of Plainfield is spending a few weeks with Mrs. Adam Schneider at Chimney Rock.

Mr. Charles Matthews, of North Plainfield has gone to Bangor on a business tour.

Improvement in Town.

In order to put an end to the nuisance, it is now reported that both parties have decided to Washington to—scratch Belva.

A Great Surprise.

Is in store for all who use Kemp's Balsam for the throat and lungs, the great guaranteed remedy. Would you believe that it is sold on this terms and that each druggist is authorized to refund your money if the proprietor of this wonderful remedy if it fails to cure you. R. J. Shaw, Front street opposite Park avenue, has secured the agency for it. Price 50 cents and $1. Trial size free.

Special Notices.

THE LADIES OF THE AUXILIARY BOARD of Muhlenberg Hospital, on Tuesday evening, Nov. 18th, and Wednesday afternoon and evening, Nov. 19th, hold a fair in Reform Hall for the benefit of Hospital. Admission 25 cents. Children 10 cents. Mrs. T. H. Tomlinson, Sec.

TO RENT.—An old-established lumber yard. Apply to Wood & Hull, 31 Front street. 13-3d

Business Cards.

PLAINFIELD SCHOOL OF ART.
No. 3 Dorr Street.

The undersigned is now prepared to open classes in drawing, painting in oil, crayon, pastel, monochromatic and water colors, at Room No. 2 East Front street (over Dr. Shaw's Drug Store.)

My method of teaching is considered much easier than the old as anyone with taste for art can learn to sketch and paint from nature in a very short time and with less expense and less study. Everything made plain and simple but directly to the point. Special inducements to teachers in the public schools. Private lessons when ordered. Pictures of all kinds painted to order. Very Respectfully,

A. H. JOHNSON.

Orders, or calls, at Park House will be received with pleasure.

OPERA GLASSES TO HIRE

NEW JERSEY CENTRAL DIVISION,

Station in New York, foot of Liberty Street.

Cleveland has the following pluralities in counties below:

Allegany, 1,200; Kings, 13,570; New York, 43,283; Niagara, 220; Oneida, 25; Otsego 435; Queens, 1,077; Richmond, 1,068; Rockland, 1,164; Schoharie, 1,750; Seneca, 2363; Suffolk, 600; Sullivan, 545; Westchester, 1,300.

The following counties give Blaine pluralities: Allegany, 2,982; Broome, 1,297; Cattaraugus, 1,400; Cayuga, 2,164; Chautauqua, 4,813; Chemung, 475; Chenango, 1,013; Clinton, 697; Columbia, 551; Cortland, 1,082; Delaware, 1,400; Dutchess, 1,457; Erie, 7,032; Franklin, 1,069; Fulton and Hamilton, 1,000; Genesee, 998; Greene, 15; Henry, 655; Jefferson, 1,946; Lewis, 78; Livingston, 1,300; Madison, 1,764; Monroe, 5,076; Montgomery, 99; Onondaga, 3,454; Ontario, 739; Orange, 141; Orleans, 1,000; Oswego, 2,545; Putnam, 566; Rensselaer, 2401; St. Lawrence, 2,400; Saratoga, 2,813; Schenectady, 283; Schuyler, 577; Steuben, 986; Tioga, 988; Tompkins, 423; Ulster, 57; Warren, 784; Washington, 3,115; Wayne, 3,118; Wyoming, 1,025, and Yates, 1,274. These figures give Blaine 68,281 and Cleveland 60,499; Cleveland's plurality, 1,418.

NEW YORK, Nov. 7.—The World editorially says: "Without a shadow of doubt about the result of last Tuesday's election, Cleveland and Hendricks have carried the states which insure them 219 votes in the electoral college. The solid south and New York have given Mr. Cleveland a plurality of not less than 2,500. This may be depended on. Indiana, New Jersey and Connecticut stand unshaken by the Democratic column. The 'solid south' presents its unbroken front of 158 votes. Mr. Cleveland has been fairly elected and he will be the next president of the United States."

NEW YORK, Nov. 7.—The Sun says: "The latest returns received by The Sun, up to the time when this edition goes to press, indicate that the electoral vote of this county has certainly narrowed down to the state of New York. West Virginia is no longer doubtful, having swung into the Democratic column. Michigan is now surely Republican. The closeness of the result in this state has caused unparalleled excitement throughout the state. In this city thousands crowded around the bulletin boards yesterday and last night eagerly reading and discussing the latest returns. Bundles of telegrams from all parts of the country asking how New York stood poured into this office last night. The Sun's special returns continue to show a small plurality for Cleveland, although the latest revisions of the returns have steadily cut down his majorities in the rural districts. The Associated Press returns, collected by election officials, from the state, and from The Sun by about 1,000, giving Cleveland a very small plurality. The figures on both sides are fast approaching a close union, and the final result must be very close indeed. Both Democrats and Republicans are still claiming the state, but the chances favor the Democrats."

NEW YORK, Nov. 7.—The Times says: "Fuller returns from all the doubtful states show that Gov. Cleveland will have a majority of 1,000 votes in the electoral college. Accurate returns show the plurality for Cleveland in New York state to be 1,276. In Indiana the Democratic majority is 7,000. Michigan is still in doubt. There is a chance in favor of the Republican Electoral ticket. Wisconsin is conceded to the Republicans by the Democratic state committee. No returns have been received from California, but there is no reasonable doubt that the Republicans have carried that state.

INDIANA.

CHICAGO, Nov. 7.—The following has just been received:

INDIANAPOLIS, Nov. 7.—To The United Press: All night hour by hour returns have been reported, and show a Republican gain of 4,500 on the vote of '82, when the Democrats carried the state by 10,000. If this ratio is maintained the state will be Democratic by 3,000. W. R. HOLLOWAY,

Publisher Times.

[Note: The Times is Republican in politics.]

INDIANAPOLIS, Nov. 7.—Gen. Hendricks telegraphs The New York World: The state committee has received returns from all but 6 counties, giving 8,000 Democratic majority. They say this will more than reduce it be low 7,000 [Gen. Hendricks' return], half of which are official, leaves the majority 8,912. It will not vary much from this figure.

WISCONSIN.

MILWAUKEE, Nov. 7.—The returns show that Wisconsin has had the closest election ever held in the state. The Republican plurality, which was over 30,000 four years ago, has been abolished. The Democrats claim the state and the Republicans do likewise. The net Democratic gains in the state over the vote of 1882 are 20,000. The entire national ticket runs ahead of the state ticket. Rusk's re-election is conceded by from 10,000 to 12,000, and the rest of the state ticket by about 30,000 four years ago, have been abolished. The Democrats claim the state and the Republicans do likewise. The net Democratic gains in the state over the vote of 1882 are 20,000. The entire national ticket runs ahead of the state ticket. Rusk's re-election is conceded by from 10,000 to 12,000, and the rest of the state ticket by about 30,000. Congressional Democratic gains are claimed in the state, and the chances are that the Democrats will have a majority of five. In this (the Fourth) district Deuster, dem., will contest the election of Van Schaick on the ground of fraud.

WEST VIRGINIA.

WHEELING, Nov. 7.—West Virginia is as sure for Cleveland as Texas. The latest and most reliable returns received at headquarters early this evening will not be behind a gain of 8,000 over Kendrick's majority in 1882. Cleveland has carried every district in the state by majorities ranging from 4,500 to 7,000. This cannot be controverted.

CONNECTICUT.

NEW HAVEN, Nov. 7.—The returns for Connecticut are now all in with the exception of one back county town. Cleveland has 68,282; Blaine, 66,757; John, 1,286; Scattering, 1,623. Cleveland's plurality is 1,525. The vote for governor and other state officers is practically the same, which leaves the state legislature largely Democratic, and which will be Republican by good majorities.

VERY SLOWLY LIFTING

The Clouds Hanging Over Election Returns Gradually Rising.

The Final Results Not Yet Determined. New York's Plurality Will Narrow Down to Very Close Figures Either Way.

NEW YORK.

NEW YORK, Nov. 7.—The New York Times has gone over the ground in New York state which the Associated Press have been spending the entire night since the close of the polls on Tuesday. The Times has full returns from all but two counties, and it is believed that these two will not affect the result one hundred votes one way or the other. The result of its canvass gives Cleveland a plurality of 1276.

NEW YORK, Nov. 7.—The following is the result by counties:

Cleveland has the following pluralities in counties below:

Allegany, 1,200; Kings, 13,570; New York, 43,283; Niagara, 220; Oneida, 25; Otsego 435; Queens, 1,077; Richmond, 1,068; Rockland, 1,164; Schoharie, 1,750; Seneca, 2363; Suffolk, 600; Sullivan, 545; Westchester, 1,300.

The following counties give Blaine pluralities: Allegany, 2,982; Broome, 1,297; Cattaraugus, 1,400; Cayuga, 2,164; Chautauqua, 4,813; Chemung, 475; Chenango, 1,013; Clinton, 697; Columbia, 551; Cortland, 1,082; Delaware, 1,400; Dutchess, 1,457; Erie, 7,032; Franklin, 1,069; Fulton and Hamilton, 1,000; Genesee, 998; Greene, 15; Henry, 655; Jefferson, 1,946; Lewis, 78; Livingston, 1,300; Madison, 1,764; Monroe, 5,076; Montgomery, 99; Onondaga, 3,454; Ontario, 739; Orange, 141; Orleans, 1,000; Oswego, 2,545; Putnam, 566; Rensselaer, 2401; St. Lawrence, 2,400; Saratoga, 2,813; Schenectady, 283; Schuyler, 577; Steuben, 986; Tioga, 988; Tompkins, 423; Ulster, 57; Warren, 784; Washington, 3,115; Wayne, 3,118; Wyoming, 1,025, and Yates, 1,274. These figures give Blaine 68,281 and Cleveland 60,499; Cleveland's plurality, 1,418.

NEW YORK, Nov. 7.—The World editorially says: "Without a shadow of doubt about the result of last Tuesday's election, Cleveland and Hendricks have carried the states which insure them 219 votes in the electoral college. Congressional Democratic gains are claimed in the state, and the chances are that the Democrats will have a majority of five. In this (the Fourth) district Deuster, dem., will contest the election of Van Schaick on the ground of fraud.

WEST VIRGINIA.

WHEELING, Nov. 7.—West Virginia is as sure for Cleveland as Texas. The latest and most reliable returns received at headquarters early this evening will not be behind a gain of 8,000 over Kendrick's majority in 1882. Cleveland has carried every district in the state by majorities ranging from 4,500 to 7,000. This cannot be controverted.

CONNECTICUT.

NEW HAVEN, Nov. 7.—The returns for Connecticut are now all in with the exception of one back country town. Cleveland has 68,282; Blaine, 66,757; John, 1,286; Scattering, 1,623. Cleveland's plurality is 1,525. The vote for governor and other state officers is practically the same, which leaves the state legislature largely Democratic, and which will be Republican by good majorities.

ILLINOIS.

CHICAGO, Nov. 7.—Blaine carries Cook county by about 6,000, and the state by about 23,000. Oglesby, rep., for governor, loses Cook county by about 2,000, but will carry the state by 15,000 or more. The Tribune still claims New York state also Michigan and Wisconsin. Indiana is conceded to the Democrats, as is Virginia and West Virginia.

FLORIDA.

JACKSONVILLE, Nov. 7.—Corrected returns from 39 counties in the state except three give Cleveland 4,600 majority. Two of the three counties to be heard from are strongly Democratic. Bisbee, rep., concedes the election of Mr. Dougherty, dem., to congress in the Second district by 1,000 majority. There is great rejoicing among the Democrats here over the reports of Cleveland's election.

MAINE.

LEWISTON, Nov. 7.—The Journal's figures for 256 cities and towns, or about seventeen-eighths of the whole state, are: Blaine, 64,840; Cleveland, 44,991; Butler, 3,607; St. John, 1,891; Blaine's plurality, 19,854.

MISSOURI.

ST. LOUIS, Nov. 3.—The official count in this state gives Marmaduke, Democratic candidate for governor, a majority of only 8,000. Cleveland's majority is nearly 40,000.

LOUISIANA.

NEW ORLEANS, Nov. 6.—The total vote of the state, so far as received, is 91,353, and Cleveland's majority 17,401.

Sterling In Season.

PORTLAND, Me., Nov. 6.—A Central Labor union is to be organized in this city, proposing to take part in the election of 1888. Its members have voted to keep their headquarters open and to hold meetings every week.

The Result Given in London.

LONDON, Nov. 7.—The Daily News officially declares that Mr. Cleveland is elected. It adds that it is impossible to overestimate the significance of the result. It inaugurates a new era in United States politics.

A Democratic Appeal for Funds.

NEW YORK, Nov. 7.—The following address has been issued: "The national Democratic committee has taken very active measures to insure a full and fair return in all states, giving 8,000 Democratic majority. They say this will more than reduce it below 7,000 [Gen. Hendricks' return], half of which are official, leaves the majority 8,912. It will not vary much from this figure.

WISCONSIN.

MILWAUKEE, Nov. 7.—The returns show that Wisconsin has had the closest election ever held in the state. The Republican plurality, which was over 30,000 four years ago, has been abolished. The Democrats claim the state and the Republicans do likewise. The net Democratic gains in the state over the vote of 1882 are 20,000. The entire national ticket runs ahead of the state ticket. Rusk's re-election is conceded by from 10,000 to 12,000, and the rest of the state ticket by about 30,000. Congressional Democratic gains are claimed in the state, and the chances are that the Democrats will have a majority of five. In this (the Fourth) district Deuster, dem., will contest the election of Van Schaick on the ground of fraud.

WEST VIRGINIA.

WHEELING, Nov. 7.—West Virginia is as sure for Cleveland as Texas. The latest and most reliable returns received at headquarters early this evening will not be behind a gain of 8,000 over Kendrick's majority in 1882. Cleveland has carried every district in the state by majorities ranging from 4,500 to 7,000. This cannot be controverted.

CONNECTICUT.

NEW HAVEN, Nov. 7.—The returns for Connecticut are now all in with the exception of one back country town. Cleveland has 68,282; Blaine, 66,757; John, 1,286; Scattering, 1,623. Cleveland's plurality is 1,525. The vote for governor and other state officers is practically the same, which leaves the state legislature largely Democratic, and which will be Republican by good majorities.

NEW JERSEY.

JERSEY CITY, Nov. 7.—Full returns from every county in the state give Cleveland a plurality of 2,513. The state senate is Republican by one majority, and the house is Republican by ten majority. The official returns will reach the secretary of state tomorrow.

ALABAMA.

MONTGOMERY, Nov. 7.—There is great rejoicing here, as the election of Cleveland's election seems to be confirmed. The vote in this state will not be full, on account of the lack of opposition. The majority for Cleveland will probably reach 80,000. The congressional returns indicate eight Democrats. As far as heard from there was not even a Democrat on election day. The legislature of Alabama meets next Tuesday.

THE PACIFIC SLOPE.

SAN FRANCISCO, Nov. 7.—California has gone Republican by from 13,000 to 15,000. The Republican congressmen-at-large are elected. Nevada is Republican. Dakota returned to the Republican column. Oregon Republican beyond any doubt. Cannot give exact majorities before Friday.

COLORADO.

DENVER, Nov. 7.—Incomplete returns indicate that Colorado has gone Republican by an unprecedentedly large majority. The Blaine electors will have a majority of between 6,000 and 7,000. Symes, rep., for congress by 4,000; Eaton, rep., for governor, by 5,000, and Asher Brown, rep., for lieut. governor, by about 1,000. The other officers on the state ticket are elected by majorities ranging from 3,000 to 5,000.

ILLINOIS.

CHICAGO, Nov. 7.—Blaine carries Cook county by about 6,000, and the state by about 23,000. Oglesby, rep., for governor, loses Cook county by about 2,000, but will carry the state by 15,000 or more. The Tribune still claims New York state also Michigan and Wisconsin. Indiana is conceded to the Democrats, as is Virginia and West Virginia.

FLORIDA.

JACKSONVILLE, Nov. 7.—Corrected returns from 39 counties in the state except three give Cleveland 4,600 majority. Two of the three counties to be heard from are strongly Democratic. Bisbee, rep., concedes the election of Dougherty, dem., to congress in the Second district by 1,000 majority. There is great rejoicing among the Democrats here over the reports of Cleveland's election.

Cleveland's plurality is 1,525. The vote for governor and other state officers is practically the same, which leaves the state legislature largely Democratic, and which will be Republican by good majorities.

AFTER THE BATTLE.

A Feeling of Excitement Throughout the Country Over the Elections.

Which Occasionally Finds Vent in Demonstrations and Collisions Between the Rival Parties. Scenes in Some Cities.

BALTIMORE, Nov. 7.—The excitement in this city grew to a high pitch. All day long the streets in the vicinity of the newspaper offices have been thronged with eager watchers for the latest from New York, making the police service and the presence of a cordon of police necessary to keep the street cars and vehicles moving. Business is greatly neglected, the people having apparently no desire to do anything but talk about the probabilities in New York and to scan the bulletin boards. The Democratic took to the Democratic papers for correct news from the Empire state, while the Republicans rivet their gaze upon the American (Rep.) building, and are buoyed up by the persistent claims of that paper that "New York has gone Republican." The Democrats are perfectly wild with enthusiasm and assert that the claims of the Republicans are ridiculous. The streets were paraded all day by companies of men and boys, some of them bearing with them effigies of Blaine, decorated with black eyes, and crape hanging from the arms. Last evening about 1,000 men and boys paraded through the streets. All bore brooms aloft, to which were attached pictures of Cleveland and Hendricks, and were followed by the custom home, where a crowd of Republicans were gathered. The paraders cheered lustily for Cleveland, while those around the home house were particularly enthusiastic for Blaine. One Republican lost his temper get the better of him, and struck Fritz Buchheimer, a prominent Fourth ward Democrat, a blow in the head with a billy, felling him to the ground. A policeman was also knocked down, but beyond these there were no collisions. During the afternoon, the Blaine flambeau and Logan banner at Baltimore and North streets was cut down by some unknown persons. The excitement is on the increase, and the temper of the people is such that a large force of police has ordered the newspapers to display no more bulletins. About twenty-five arrests have been made thus far for breaches of the peace.

In New York.

NEW YORK, Nov. 7.—The excitement in this city over the election remains unabated and thousands of persons visited the two national headquarters in hopes of ascertaining something definite as to the result. The hotels were also crowded with anxious throngs, and at the Hoffman house offers of three to one were made that Cleveland had carried the state. The Seventh Regiment band marched down Twenty-fourth street and serenaded the Democratic headquarters. The street was packed by at least 5,000 people who rent the air with cheers for Cleveland, followed by a cry of "No, no, no, '76," and "Gould, Gould, Blaine." The excitement is intense and seems to be increasing. The crowds are very enthusiastic, yet good natured and so far orderly, although all sorts of rumors are in circulation as to what is likely to occur should the returns be delayed much longer.

A large and excited crowd numbering several hundred persons assembled in front of the Western Union building, hooting, shouting, burning paper, etc. A large force of police was detailed from the lower precincts of the city, and at last they dispersed the throng. A large body of police, however, remain in charge of the building. Inspector Thorne, acting superintendent of police, ordered all the reserves at the Twenty-ninth Precinct Police station, and issued an order to all captains to keep their off-duty men in readiness to obey further orders. Capt. Williams stopped a Democratic procession on Broadway, composed of several thousand persons last night, and arrested the leader. In an hour there was no further sign of disturbance.

Boston Much Excited.

BOSTON, Nov. 7.—A crowd of 2,000 or 3,000 has surrounded the newspaper bulletins here. The demonstrations, as favorable or unfavorable bulletins appeared, were more pronounced than ever. Following the receipt of the manifesto of the Republican committee, the Journal issued an edition and bulletins declaring Blaine elected. Several thousand copies of the Democratic paper in the street in front of The Journal office and six of them were arrested for violating the city ordinance in peddling bonfires. One other was arrested for resisting the officers. The Cleveland men soon brought out a picture of their candidate. The Blaine men cheered for him and tore it to pieces. Soon after a rag baby appeared in front of The Journal office, suspended by a cord. The Cleveland men made a rush for this but were driven off by the police and the holder of the offensive article took refuge in The Journal office. The different crowds then contented themselves with jeering one another and cheering their candidates.

Fundamentalism in Augusta.

AUGUSTA, Nov. 6.—This city is wild. Both parties paraded the streets. There was much ill-feeling. A Hollowell man entered the Blaine headquarters and struck Lord in the head of a big base drum. He was arrested by the city marshal. The Democrats purchased a new drum and carried on the procession. When the result of the Republican committee's proclamation, the Republicans howled their defiance. Both parties then renewed their parading and began to discharge rockets. The scene was at last when the Democratic drum was struck on the head by a brick, receiving a severe wound, and hurting it badly. Matters grew dangerous until cooler heads persuaded both parties to return to their headquarters. To-day did, but the Republicans soon came out again, followed by a procession of the Democratic rejoicing. Only by strong efforts on the part of the police were the two parties kept from a collision.

In Washington.

WASHINGTON, Nov. 7.—The excitement here over the presidential election is unabated. The anxiety is greater than any person that attending the memorable Hayes-Tilden contest in 1876. All interest, of course, centres on the result in New York state, which is the pivotal state. Upon the pivotal state, whose thirty-six electoral votes will elect either Cleveland or Blaine. The chances of the vote in New York to-day is the greatest attraction. Many thousands of persons are constantly visiting the bulletin boards of Blaine and Cleveland partisans, and the crowds at the latter place are the largest. Democrats are confident, but there is an uneasy feeling among them. Many think complications may arise which will lead to trouble before the state canvassing board shall have made the official count of the state.

In Chicago.

CHICAGO, Nov. 7.—The political feeling here is greatly elevated. Business is practically suspended and thousands crowded the streets in front of the newspaper offices. A number of men carrying flags, canvas lithographs of Cleveland and Hendricks are reported to have arrested several and disarmed many. The greatest excitement prevails. Fights are just forming in the vicinity of the great throng of Republicans in front of The Tribune office. Stones are reported to have been thrown, and a general collision appeared imminent. Flags and pictures of Cleveland and Hendricks are going up in hundreds of windows.

In Pittsburg.

PITTSBURG, Nov. 7.—The excitement in this city is growing. Tuesday night there was the largest crowd in the streets the city had ever witnessed. Wednesday night it was a perfect jam, while it was a howling mob last night. Early good-sized crowds but the conflicting returns and claims of fraud from New York are having a bad effect. It would require but little to make serious trouble. Flaming and horrid pictures, greeted with jeers or laughter heretofore, are received with curses and loud threats when carried in processions.

Philadelphia Just as Bad.

PHILADELPHIA, Nov. 7.—The police sergeants who on Thursday make the district report to the police board agree that they have never witnessed such general excitement among the people. The delay in reaching a decisive result in New York has only added to the feeling. In many of the police districts the men are completely exhausted from over-work in their efforts to preserve order. Constant street, in front of the newspaper offices, is nearly impassable.

Election Excitement Abroad.

LONDON, Nov. 7.—The excitement in the United States presidential election in London continues at fever heat over the close presidential contest in America. The suspense resultant from the delay in arriving at a decision as to whether Mr. Blaine or Mr. Cleveland is to be the next occupant of the White House, has had the effect of rendering scenes of the most pronounced politicians on both sides almost ridiculous. Extravagant bets are offered and accepted by the adherents of both parties, and the odds change with every succeeding dispatch concerning the latest developments in America.

A REPUBLICAN ADDRESS.

The National Committee Declare Blaine and Logan Elected.

NEW YORK, Nov. 7.—The following address was issued during the afternoon:

HEADQUARTERS REPUBLICAN NATIONAL COMMITTEE, No. 240 FIFTH AVENUE, }

NEW YORK, Nov. 6, 1884. }

The Republican national committee rejoices that the returns now received warrant it in announcing the triumphant election of Blaine and Logan. The Republicans have carried every state except those of New Jersey and Connecticut. Virginia seems also to have given a majority for the Republican ticket, and Indiana is in strong probability that West Virginia has also. While other southern states are still in doubt, the northern states alone, however, give to Blaine and Logan 225 electoral votes, and insures their election.

In New York attempts to tamper with the returns have already been detected.

The actual vote cast in New York city, Kings county and 1,853 other electoral precincts gave at the utmost only 145 plurality to Grover Cleveland, while 183 precincts not heard from in this city gave 1,931 plurality to the Republican ticket. There is, therefore, no ground for doubt that the honest vote of the state has been given to the Republican candidate, and although the official canvass for the presidency is the head of the election machinery in this state, the Democratic party which has been the party of fraud in electoral frauds, will not be permitted to thwart the will of the people.

The National Republican committee calls on the chairmen of the state and county members of all county committees to take the promptest and strictest means to protect the sanctity of the ballot. The Republican committee has been informed that beyond a question. Any attempts to cheat the people and to defeat their will thus expressed at the polls must be sternly exposed and resisted by every law abiding citizen.

B. F. JONES, chairman.

SAMUEL FESSENDEN, secretary.

Senator Gorman Claims New York.

NEW YORK, Nov. 7.—Senator Gorman, of the national Democratic committee, sent the following dispatch to Indiana: "The vote in nearly every precinct in the state of New York, as announced in the polling places when counted, shows a small but safe majority for Cleveland. The exact figure will be given as soon as complete. There will be no counting out this time."

Blaine Not a Sick Man.

AUGUSTA, Me., Nov. 7.—The report that Mr. Blaine is, or has been sick since his return home is unfounded. While his wife was somewhat prostrated in his absence he said in reply to an inquiry as to his health: "I never felt better in my life. I remained in my room most of the time yesterday, because I was tired out, and on account of public speaking I was still quite hoarse, and I felt that I was entitled to one day's rest." The fact is that Mr. Blaine has stood the health and spirits, and as this dispatch is being written he is just preparing for a walk.

A Devoted Wife.

LONDON, Nov. 7.—The late postmaster general, Rt. Hon. Henry Fawcett, whose death was announced yesterday, was a gigantic figure with the leaders of both the Liberal and Tory parties. A great deal of his popularity may be accounted for, however, by the general sympathy which was always extended to his wife. Misfortune with which he was afflicted. Andeshadowed has always been expressed at the successful manner in which Mr. Fawcett conducted parliamentary duties, in spite of his infirmity and of the loss of sight, and in this connection a great deal of praise has been bestowed upon Mrs. Fawcett, who has for years been her husband's constant companion, secretary to her husband, often accompanying him to the house of commons when he expected to speak, and reading him matter all calculated to assist the performance of his duties as postmaster general.

England and Republican Customs.

LONDON, Nov. 7.—Very papers contain long articles descriptive of the violence and fraud which they assert universally prevailed throughout the United States during the elections of Tuesday. They call the attention of Englishmen to this phase of American republicanism, and insist that it should be a warning to them against the early evils of the growing democracy which has in the past few years, made such progress in Great Britain. On the other hand, Liberal journals point with self-satisfaction to the peace and order which has been maintained, and consider that under the excitement of an unusually close contest the people of the United States have given evidence of great moderation and good sense entirely unknown in like circumstances, either in England or on the Continent.

Concentrating Around Khartoum.

CAIRO, Nov. 7.—According to native reports, the rebels are concentrating forces on all the routes to Khartoum. Other advices from native spies allege that the Mahdi has sent large reinforcements to Osman Digna, to enable him to resume operations on the Red Sea Littoral.

CLEVER BRANSCOM.

Explaining as Best He Can the Alleged Forged Notes.

The Southern Colonel Denies the Transactions were Fraudulent and Claims he Only Conducted a Legitimate Business.

NEW YORK, Nov. 7.—At the Jefferson Market court Alexander G. Branscom, of No. 296 Broadway, was charged with passing forged notes to the amount of $2,000. One for $7,000 was found on him. Col. Branscom, from brothers, of No. 53 Bookman street. Col. Branscom spoke for himself. He denied the charge of fraud. As to the forgery he had nothing to say. He lost his right leg while with the Twenty-fourth infantry of Virginia at the battle of New Hope. The advertising book for "A Souvenir to the Exposition," would have brought him a profit of from 40,000 to $100,000. It was arranged that 100,000 copies be sold in the New York News company, the proceeds of which would have been $30,000. The estimated cost of getting up these was $20,000. The material was supplied by the Fair Association company, and the work was to be done by the American Bank Note company and the Century company. Part of the work is now in the printer's hands and the rest was being rapidly got ready. The colored claimants were arrested and are still interfered with the progress of his book, which had to be finished by the 15th of November. There was a meeting of the American Bank Note company in order for 150,000 colored posters with advertisements upon the margins, all of which were to be completed by the 15th. He paid $1,750, and there should have been issued on Saturday enough to bring in $2,500.

All the matter for the book, such as the "Resources and Attractions of the South," is in the hands of John G. Little & Co. It was expected that 10,000 books would be sold at $10 a copy. The publishing firm were to pay Col. Branscom $1,000 for the right to advertise. The books are to be sold by the Cotton Planters' association. When these are finished a copy will be sent any money and a good profit would remain in the hands of the colonel. All the expenses for Bibliography and literary work, he said, had been paid.

The accused added that he could have realized $50,000 by selling the paper at a discount. "I would rather be here, a prisoner than a fugitive from justice," he said. He said he paid the American Bank Note company $1,750 and Conran Bros. $1,500, and on the day he was arrested he paid Hastings & Co. $1,000. He had also paid Little & Co. and had made a contract with F. C. Moorehead, commissioner general of the World's exposition, duly signed by him on the part of the board of managers.

"On the strength of this contract authorizing me to sell the books on the grounds, I made arrangements which led me to become involved in this transaction." The concession was valued at $100,000. The board of managers repudiated this contract, and F. C. Moorehead made a personal appeal to me and I gave up the right to sell the books," said the colonel, "it would be hard for any intelligent man to see in my acts any intention to defraud. The paper cost under $10,000 half for trial. Bonds will be required.

The Railroad War.

NEW YORK, Nov. 7.—The New York Central ticket offices in this city, by order of E. J. Richards, the assistant general passenger agent, began selling first-class tickets to Chicago for $15 and second-class tickets for $11. The rates to other points are as follows: Cincinnati, $13 and St. Louis, $15 and $14. To Indianapolis $15 and Indianapolis $14. The announcement that the Central had made another cut was quickly circulated among the agents of rival lines and the rates broken. Mr. Stebbins, eastern passenger agent of the West Shore, immediately issued orders to his offices to meet the rates of the Central. The Erie railroad also, by order of Mr. Buckly, the eastern passenger agent, began selling tickets at the same rates as the New York Central.

Mysterious Drowning Case.

MONTREAL, Nov. 7.—A mysterious case of the drowning of an accountant in the Bank of British North America, named Andrew Marshall, came to the knowledge of the coroner by the body of the dead man being found floating on the St. Lawrence river, opposite the wharves. The deceased had been on the bank staff for eleven years, most of the time here, but was lately appointed to the branch in London, Ont. He came to this city some days ago, he said, on a visit, and was stopping at a leading hotel until he paid his bill and disappeared at a late hour. The coroner's jury found a verdict to give any information regarding the deceased, and the affair is involved in mystery. Marshall had not been indulging in liquor.

An Atrocious Murder.

LINCOLN, Neb., Nov. 7.—A special from Blue Hill, Webster county, tells of a terrible murder committed there. A man named Ward, was a German farmer named Leonard Ball, and the murderer a tramp known as Joseph Cook. Ward had been missing for Ball about a week. The murder was committed while the two men were on the way to Blue Hill. The weapon used was a heavy hoe handle with which Cook brutally cut and bruised. The motive was money. The murderer concealed the body in some weeds by the roadside and fled, driving Ball's team. The people are aroused, and the wretch will be speedily hunted down.

Slain While Beating his Wife.

SHELBYVILLE, Ind., Nov. 7.—George Alberts, a desperate criminal of this city, was shot dead at his home by Thomas Kenney, a constable. Kenney gore himself up and pleaded self-defense. Alberts was beating his wife and Kenney interfered. Alberts turned on him and Kenney shot him.

Jay Gould Not Dead.

NEW YORK, Nov. 7.—The report that Jay Gould was dead was circulated in the lower part of the city at 11 o'clock last night. The report was not true.

CONDENSED NEWS.

Great damage has been done to property by storms in Quebec.

Gen. Hancock declines to talk politics. He says, however, he is not a bit worried over the result.

A large number of Catholic prelates are already in Baltimore preparing for the Plenary council.

Jeremiah Murphy, of South Coventry, Conn., voted for Jefferson in 1804 and Cleveland in 1884.

Sullivan and Greenfield have signed articles for a match to be fought at Madison square garden on the 17th instant.

Snow-storms of unusual severity have been reaping a harvest in Cleveland for several days, and Mrs. Garfield was victimized on Tuesday.

Miss Mary, the eldest daughter of Senator Harrison, has been married to James S. McKee at Indianapolis. It was a notable society event.

OUR VALUABLE NAVY.

Items of the Cost of Keeping Our Old Tubs Afloat.

Washington, Nov. 1.—Commodore W. H. Bailey, chief of the bureau of equipment and recruiting, in his first annual report to the secretary of the navy, says sixty-six vessels have been either wholly or partially equipped during the past fiscal year, at a cost of $636,282. The sum of $500,000 is asked for the equipment of vessels as actually necessary for the fitting out and keeping in repair of the vessels contemplated to be kept in commission during the next fiscal year. An increase of $10,000 over the present appropriation is asked for "transportation and recruiting" and contingent expenses. To furnish complete equipment for prospective cruisers, as recommended by the advisory board, $700,000 is asked; for equipment of the steamer New York, $125,000; for equipment of two vessels for the training squadron, $75,000; and for improvement at the training station, Coasters' Harbor island, $50,000.

The training ships now in commission, Commodore Bailey says, are in bad condition, and the time is not far distant when they will be entirely unseaworthy. The bureau intends to substitute steel for iron chains, if the report of tests now being made on the Vandalia with Sample steel chain should warrant their adoption. It is suggested that the force of enlisted men for the coast survey, fish commission and Naval Academy be limited to 800 men, and be known as auxiliaries for special service. It is also urged that the revised statutes referring to enlistments in the army becoming citizens be amended to include the navy and marine corps. The bureau recommends that the number of apprentices enlisted be increased from 750 to 1,000 annually, and urges congress to appropriate money to provide every man, boy and apprentice on enlistment in the navy with an outfit of clothing not to exceed in cost $30, thereby placing a sailor on a similar footing with a soldier or a marine.

CHINA WILL FIGHT.

The Peace Party in the Minority and Active Measures to Prevent.

London, Nov. 7.—Advices from Shanghai are to the effect that the peace party in the Chinese empire cannot carry into operation the projected treaty with France. Even since the bombardment of the Min river forts representatives of this party have been active in an attempt to reconcile the hostile or war party in the empire. They urged that it was better to submit to the occupation of Kelung and also to grant the Tonquin demands of the French than to plunge the entire country into a demoralizing war. China and her commercial interests, they believed, would sustain far more loss in the end, even though the French were beaten, than a prompt payment of the indemnity demanded would amount to. They did not deny that China was in the right, but waived that point and diplomatically considered that the cheaper plan would be to submit to the demands made.

The war faction, however, ascertained the patriotic idea that the emperor had been insulted and took the stand that active hostilities should be inaugurated. For nearly a month the Chinese council of state have held daily sessions and awaited the result of pending negotiations with France on the basis of the May treaty.

The Times correspondent at Shanghai telegraphs as follows: "The Chinese council of state has failed to arrange for a settlement of the difficulty with France. The government insists upon the attendance of Li Hung-Chang, the viceroy of Pee-Chi-Li, at Pekin."

Double Murder and Suicide.

Chicago, Nov. 7.—About 9 o'clock Kyrus Sullivan Gardner, a magnetic physician, 35 Laflin street, was shot by his wife in a fit of jealousy and instantly killed. After killing her husband the woman placed the revolver to the head of her 15-months-old child and blew out its brains. The murderess then placed the weapon to her own temple and fired, the shot literally blowing her head to pieces. The tragedy was preceded by a bitter quarrel. The bodies presented a horrible appearance as they lay on the parlor floor.

Fire in a Oil Tower.

Buffalo, Nov. 7.—At 3 o'clock the Ocean Opera house at Corry, Pa., was burned. The loss is $15,000; insurance, $5,000. The Keystone Manufacturing company, the Enterprise Manufacturing company and The Weekly Telegraph occupied the premises and lost $2,000, $500 and $6,000 respectively, $4,000 covered by insurance.

The restoring department of the Ocean Chemical works, consisting of sixty-four stills and their contents, was burned this afternoon. The loss is about $7,000, is covered by insurance. The origin of the fire is unknown.

Sympathy with Oil-Well Laborers.

New Orleans, Nov. 7.—This is the fourth day since the street carworkers struck on account of the strike of the laborers who demand $60 a month and board. They receive $1 a day. The strikers say the companies that they must have running or the city attorney would be directed to begin suits for forfeiture of charter. The street railroad is the best paying stock on the market, declaring twelve to fifteen per cent. dividend. The sympathy of the people is all with the strikers.

Representative Arnot's Condition.

Elmira, N. Y., Nov. 7.—It is feared that Josh Arnot will not recover from the injuries received by him from an explosion of gas in the Arnot mine on the 29th of October. Blood poisoning is approaching, and his head is badly inflamed. Mr. Arnot was elected to congress, without opposition on Tuesday last. He is a brother of Stephen and Matthew Arnot, the millionaire bankers of Elmira. Several New York physicians have been called to his case, but there is little hope.

Bowler Man Killed.

Reading, Pa., Nov. 7.—The stack of Furman & White's furnaces, at Robesonia, fell, carrying down a scaffold on which a number of men were working in repair the stack. Seven men were killed and five injured. The killed are Fred Fareman, Monroe Fiedler, Henry Foote, Henry Spangler, David Bordy, Harry Bell and Robt. Odone of Reading. The latter received inside the debris several hours.

Dynamite in a Crowd.

Chattanooga, Nov. 7.—About 3 o'clock, while the streets were crowded with people leaving the shoe factory, some person threw a dynamite cartridge at the building at the corner of Ninth and Market streets. Striking the sidewalk it exploded, tearing up the sidewalk and breaking the windows in the building and those of the Alabama Great Southern railroad opposite. Fortunately no one was injured.

Consolidated Steel Wires Bridged.

Cincinnati, Nov. 7.—Three bridges on the Louisville branch of the Columbus, Hocking Valley and Toledo road have been burned on about $10,000. The wires were cut, and in connection with the general strike were the cause of. Before firing the bridges a party of strikers were separated in Morgan City and their hands from the vicinity of which were explosive.

The Sun.

THE SUN is, and will continue to be, a newspaper which tells the truth without fear of consequences, which goes at the facts, no matter how much the process costs, which presents them more for all the world without any of words and in the most readable shape, which is working with all its heart for the cause of honest government, and which therefore believes that the Republican party must go, and must go in time for election day, 1884.

About sixty million copies of THE SUN have gone out of our establishment during the passed twelve months.

If you were to paste end to end all the columns of THE SUN printed and sold last year you would get a continuous strip of interesting information, commonsense, wisdom, good doctrine, and sane wit long enough to reach from Printing House square to the top of Mount Copernicus in the moon, then back to Printing House square, and three quarters of the way back to the moon again.

But THE SUN is not for the inhabitants of the earth; this same strip of intelligence would girdle the globe twenty-seven or twenty-eight times.

If every buyer of THE SUN during the passed year had spent only one cent for printing, from square to the top of Mount Copernicus in the moon, then back to Printing House square, and three quarters of the way back to the moon again.

But THE SUN is not for the inhabitants of the earth; this same strip of intelligence would girdle the globe twenty-seven or twenty-eight times.

If every buyer of THE SUN during the passed year had spent only one cent for printing, from square to the top of Mount Copernicus in the moon, then back to Printing House square, and three quarters of the way back to the moon again.

It is easy to be a little facetious like these that you see from only idea of the circulation of the most popular of American newspapers, or of its influence on the opinions and actions of American men and women.

If you know THE SUN you like it already, and you will send it such accustomed diligence and profit during what is sure to be the most interesting year in its history. If you do not yet know THE SUN, it is high time to set into the number.

Terms by Mail Postpaid.

DAILY—50 cents a month, $6 a year; with Sunday $7.75.

ODONTOLOGY.

Some Sense and a Little Nonsense Concerning the Teeth.

The Philosophy of Tooth-Growing—Art vs. Nature—Customs of the Nations—Antiquity of the Dentist.

[Brooklyn Eagle.]

Every dentist insists upon it that he, above all others, is the one who has made the most beneficial discoveries in odontology. We have very little about dentists' failures, because those unhappy beings who require a new mouthful of teeth shrink from saying much about it. A good deal of ivories is a precious treasure when real, and a costly one when artificial. We ought to have our fair proportion of incisors to bite through the best and mightiest mass of other teeth to break and to crack harder substances, by means of sawlike serrations and file-like roughness. A Boston odontologist tells us that the teeth of the lower animals perform many more kinds of work than those of man—weapons of offense and defense, aids to locomotion, means of anchorage, instruments for uprooting or cutting down trees, and apparatus for the transport and working of building materials. As to our own species, he proceeds to say that the milk teeth, or children's teeth, ought to be twenty in number, comprising four front teeth, or incisors, two dog teeth, or canines, and four double teeth, or molars, in each jaw. It is rather mortifying to learn that a pig (who is his own dentist) heats us hollow in this respect, since he has no less than forty-four teeth.

Some old folks cut their teeth when far advanced toward centenarianism. An old woman living near New Haven cut an incisive tooth in the lower jaw when 75 years old; it confirmed a strange hallucination with which she had long been possessed—that she had been dead and was come to life again, with the most infantine career of teething. A woman living in Philadelphia about a dozen years ago cut an entirely new set of teeth when about 80 years old, after having been many years toothless. In 1833 a woman in Richmond cut eight new teeth in the 97th year of her age—thus winding up a toothless period of many years. A dame of Boston, after losing toothless from 70 to 90 years of age, cut new teeth. Sir Edward Progers, aged 96, died in 1712 of the anguish of cutting teeth, and had several ready to cut, which so inflamed his gums that he died therewith.

As if to take revenge for these duplications—and rather trig lications, of teething, nature sometimes requires us to dispense with dental apparatus altogether. In a London cemetery there is the following epitaph:

"Elizabeth Cock, a poor woman, aged 90, and who never had a tooth, was buried June 11, 1705." On the other hand, some folks greatly exceed the orthodox number of thirty-two. Dampier, in his account of the Philippine Islands, says: "The next day the sultan came on board again and presented our captain with a little boy; but he was too small to be serviceable on board, and so the captain returned him, and told him he was too little for him. Then the sultan sent for a bigger boy, whom the captain accepted. This boy was very pretty and tractable, but what was wonderful in him was he had two rows of teeth, one within the other, on each jaw. None of the other people were so, nor did I ever see the like."

The superfluity of the poet and novelist would not be valued by some of the eastern and Polynesian nations. The Chinese blacken their teeth by chewing the fruit of the areca, or betel, nut. The Japanese use iron filaments beaus and belles, in bringing about the same result by nearly the same means, almost starve themselves for three or four days, while the dyeing is going on, lest the food should disturb the dye. The Sunda islanders sometimes blacken all the teeth but two with lamp-black, covering the two so excepted teeth with thin plates of gold or silver. The Macassar people sometimes pull out two front teeth in order to supply their place with teeth of pure gold or silver. The Batta girls, twins, have been known to have natural teeth of a light red rose color—both the milk teeth and those which succeeded them.

The charms, omens, signs, panaceas relating to the teeth constitute quite a formidable item in folk lore. In some parts of the country there is a superstition that if you put on your right stocking, right shoe, and right trouser-leg before the left, you will never have a toothache. To drink out of a skull taken from a graveyard will be a cure for a tooth from such a skull and wear it around his neck; to apply the tooth to your own living but aching tooth; to put a double nut into your pocket; to tie your finger-nails and toe-nails and wrap up the parings in paper—all are charms against the toothache. If you catch a mole in a trap, cut off one of his paws and wear it as a charm, you will soon see the effect provided a right paw be used for a left tooth, and vice versa. When an aching tooth is extracted, melt it with salt and burn it. There is a certain custom of calling the toothache the "love pain," for which the sufferer is not entitled to any commiseration. Whether he (or she) fully assents to this, may perhaps be doubted. Many other items of tooth lore have no connection with toothache. For instance, if the teeth grow long apart, there will be good luck and plenty of traveling for the unfortunate possessor. When a tooth is drawn, if you refrain from thrusting your tongue into the cavity, the new tooth to grow in its place will be a lucky one. A letter written in 1713 by a lady to her son spoke of the efficacy of walrus' teeth set in gold to assist children in cutting teeth.

Why do some people's teeth come out more readily than others? The reason for this are probably various. Dr. Rush, writing of the last century Peter Kalm, a Swede, visited the United States and wrote sensibly about what he saw. He observed a frequent loss of teeth among children and among married women. After discussing and rejecting many modes of explanation, he attributed it to hot tea and coffee. Hot beverages, and warm to be general conclusion that "hot feeders lose their teeth more readily than cold feeders." He also noticed that "the American Indians have long sound teeth, and this circumstance for the difference in this strange way: that the reds keep the mouth first, whereas the whites keep it open. The teeth, he says, are preserved by keeping the mouth shut in good working order; when the mouth is open the warm air passing over it hardens it by drying up the teeth hastens the decay and eventual loss of teeth. He recites the Indian rule generally observed by the Indians, and very singular in this respect, and the white rule generally in comparison with the red. We keep our mouths open for two meals; the Indians never open theirs, but eat with the teeth shut and require through the asterisk. Among the virtues attributed by him to shut the one is excellent—when you are angry, keep your mouth shut.

There is reason to believe that the Greeks and Romans knew something about false teeth. Martial, in one of his epigrams, says that Niaus teeth were discovered, which Lucian's wife exhibits. Why? Because the former were her own teeth, whereas the latter were those of some other person. There was an old Roman law which allowed the gold setting of a corpse, or the gold with which they were bound, to be buried or burned with the deceased. There are also some indications that the Greeks, too, extracted teeth and filled up decayed teeth with gold. The Sunda islanders at the present day are in the habit of employing their old women to draw up the teeth of the youths and maidens at wedding times. The operator, by any thief or a fine, smooth edge, and the body of the tooth made concave, or they will notch the edge of the teeth into a fine saw, as an additional means of beautifying.

N. ARKWRIGHT STUBBS.

His Discoveries on Science to His Pa —How It Ended.

[Boston Globe.]

"Perhaps it might a been me, and then agin perhaps it might a been his self that made Mr. Arkwright Stubbs's hair all come out a-shun," said Farmer Stubbs, leaning over his hoe and expectorating a big cud of navy plug. "It came about mostly in this way: He got in one day here last summer and that night after sundown him an' me rode over to the station to get his trunk. Ez I went in to get him I saw a big pile o' Saratogas and on all on 'em was the new name of 'N. Arkwright Stubbs' in letters, and I says to Natt, says I, 'Natt, who's N. Arkwright Stubbs,' says I, an' he says, 'That's mine, an' we put in the duds and went home. An' somehow or ruther I didn't feel much like talkin' on the way. I sot an' thought how as one o' mine would figger again' the world with a name like that on the trunks. 'Cause that air Arkwright was just gin to him when he was in debt afore the farm was paid for, an' we thought we'd make old Arkwright fool sort o' tender to us if we'd name the boy fur him. He didn't, an' Natt knew it as well as I did, an' that set me to thinkin' how easy it was for a feller to be in naming his little ones. I was still at it when Natt spoke up an' sez:

"'I say, governor, how bright Orion is to-night?'

"Not having the knowledge of any O'Ryan I told him as much, an' then he broke out a-laffin' an' told me he was a-speakin' of the stars. His son was a-studyin' them, an' might be jist go an'. He said the stars an' planets were pretty much all that there was, an' that this earth of ours' that he'd been too big fur me to get all over as yet didn't amount to a row of pins alongside of O'Ryan, Sir Jim an' a lot more o' them furriners. 'Why, governor,' sed he, 'this earth is so small and specks is so big that of that air star up that should go out, now it is so far away that the light from it would shine on your grave 2,000 years after you were buried.'

"He made a lot more of such talk an' I sat an' took it in til we druv into the yard. As we were unloadin' Marier came out an' wanted me to get her some tea. I thought a minute and then I said:

"'So the world hain't big at all, be it Natt?'

"'No,' said he.

"I spose a colliege man wouldn't think the distance from here to Smith's store anything, would he?' sez I.

"'Not a flea-bite on Jumbo,' said he.

"'Well, then,' sez I, 'I want you to run down and get some tea for Marie.'

"'Do you believe me, that air boy, N. Arkwright Stubbs, got a thrower his head up an' sed he wouldn't go of I didn't let him bar the hoss? That settled it right off. Ef all a colliege larnin' did fur a boy was to teach him to stare up at the stars an' think things at home were nowhere unless you had a hoss, I didn't want none of it in mine. Natt is down in the back lot to-day pullin' stumps an' workin' like a beaver. He's got mighty over them starry notions o' his'n, an' I think I can save him if he's hep to work, but it was a tight squeeze, mister, a tight squeeze."

Actors and Their Wardrobes.

[New York World.]

It is nothing uncommon for an actress or actor to play in borrowed plumes—clothes borrowed for the occasion—modern dress that has been worn by the wardrobe, only square cuts or historical costumes—furnished by the manager, excepting, indeed, by special contract, as in the case of the leading lady in fashionable theatres, whose magnificent toilets advertised as made by Worth are furnished by the manager. It is seldom that professionals ever wear their clothes off the stage. An actor will go easily in the street in order to appear in good clothes on the stage. The strong illumination of the footlights immediately shows up the "shine" in a disguise that only the sun would reveal on the street. The most ingenious posing or attitudizing will not conceal the bagginess in trousers on the stage. Only a shiny new hat will serve on the stage.

Professionals, if they have any wardrobe at all, always have something that is worth something, and consequently as long as they have their trunks, which is the comprehensive term for wardrobe, they need not fear the landlord's wardrobe is a sine qua non, it is only in the direst extremity that the trunk is placed in the safe keeping of the landlord. It is often done, but generally at the close of the season, in a hasty, rapid scuttle on the roads, in order to get back to friends.

The Company of the Hogs.

[New York Tribune.]

A friend sends me this anecdote: "A friend told me a rich story of John I. Blair and his financial transactions with state legislative committees after his defeat for the gubernatorial honors of Jersey. It was at the Metropolitan hotel in this city. Newt. Conger, Bob Hartshorne, who was also a friend, a Red River steamer some years ago, and Col. John Cook, whose eccentric friendship with Lincoln would make an interesting half column, were among the parties present. After Mr. Blair had listened to the rumors why he was defeated, he arose and made a brief address to the gentlemen, thanking them for their labors in his behalf, and then added that he felt very much like the fellow out west who had driven a lot of hogs 200 miles in the dust and rain and was eventually compelled to sell them for less than he had paid for them. When he returned home his friends began to praise him for his labors in behalf of luck. 'Oh, well,' said he, 'I don't mind that much, for you know I had the company of the hogs anyway!'"

Short Yankee Shipping Notice.

[R. J. Burdette.]

First small boy—Hoy, Bill; where you been?

Second small boy—Fishin'.

First s. b.—What you ketch?

Second s. b.—Ketch a shad.

First s. b.—Ketch a shad? Gosh, whyn't you say so? Ketch a shad? Why, I ketched a dozen. Ketch a shad! Pshaw! Fish for beans. Gives it to him. Weeping and wailing and gnashing of dust.

A Sensible Arrangement.

[Paris (Ill.) Beacon.]

The doors in Japanese dwellings are made to roll easily from one room to another. This is a sensible arrangement. All the fat men are compelled to sleep in the garden where their whooping and groaning won't keep the rest awake.

The Way of the World.

[Danbiker.]

"From hand to mouth," he gaily said,
And pressed her lovely finger tips,
Which somewhat quickly left his lips
To wipe away the portion thus.
As fair as roses in the south,
"From hand to mouth."

So she was won, and so was he,
"From something like a year ago,"
And now they both are one, you see,
Although which one I hardly know.
They're living somewhere in the south
From hand to mouth.

A Peculiar Room.

[Texas Sittings.]

A Texas lady called at a drug store and said:

"I want a tooth brush, a real nice one. I want it for a spare room."

"That's the first time I ever heard of a spare room having teeth," responded the clerk. "If your spare room is just half headed, we can supply it with some good hair brushes, and if it is bald headed, we can sell you some hair restorer, that will make the hair sprout out like spring bolts."

There was no sale.

His Own Little Idea.

[Puck.]

Old Higbrother's friends never could understand why he always carried those pillows with him when he was out of an evening—

But if they could have seen him going upstairs after he got home, the mystery would have been solved.

Brudder Jones is Sat Upon.

[Detroit Free Press.]

At a recent meeting of the Blue Kiln club Gineadain Jones arose to make an inquiry, and when his presence had been officially recognized he asked if the club believed in the theory of the survival of the fittest. Brother Gardner scratched his head and seemed to be considerably perplexed.

"Brudder Jones, when you put you up to dis bizness I" asked the president in a voice full of solemn warning.

There was an interval of silence so deep and painful that Elder Toots could be heard breathing.

"I reckon I sort o' put myself up to it, sah," came the answer at last.

"Well, you got down to-stairs! On all proper occasshuns dis club stands ready to elucidate its doctrines an' give its reasons, but dis am not one of de occasshuns. While de fittest ober an' many survive, doas' flatter yo'self dat because yo hev outlived a heap of odder folks dat you am any better dan you ortter be, or dat your testimony in a case of vanlit an' battery would pass unquestioned eben by a one-hoss lawyer.

A Biographette.

[Life.]

MARK TWAIN.

The renowned author, jingler, poet and actor-manager, whose portrait appears above is a lineal descendant of the celebrated Twain, who were made one flesh. He was born on the banks of the Rhine, in 1776, on a remarkably cold morning, and the administratrix of the camphor and red flannel department afterward stated that he was the most remarkable baby she ever saw. At the tender early age of 7, Mark—for so he was usually called—was already addicted to solace, and his discovery, made one year later, that a spring clothes-pin artistically applied to the continuation of a cat would create in the consequent animal a desire for vigorous locomotion, still remains a delight to children of Connecticut and Massachusetts. When he was 19 Mark went through college. He entered the front door, carpetbag in the rear, left Yale with cap and gown, and came out the door over the fence. He then started for California, Milwaukee and other remote points in the north, and began to write remarkable series of brutal sketches for which he is now so justly famed. As an archæologist, however, he has won most renown. Among other curios in his museum, Nazareth, Egypt, and many Greek galleries are considered the most complete in the world.

Personally, Mr. Twain is a most delightful companion. He is short, florid and very corpulent, laughs incessantly, and to a rapid and brilliant speaker. His story of "Punch Brudder" is the funniest thing in connection with a marionette exhibition ever printed, while his poem entitled "The Frog Bowed Down by Weight of Shot" will hold its place as one of the most pathetic in literature.

Meteorological Record.

The following is the record for the thermometer for the day and for the corresponding date of last year, as kept at Seidle's drug store, corner of Front and Cherry streets:

1884.		1883.	
6 a. m.	42	6 a. m.	47
9 a. m.	49	9 a. m.	45
12 m.	49	12 m.	57
3 p. m.	49	3 p. m.	61

Signal Service Almanac.

To-day and the corresponding date last year.

1884.	1883.
Sun rises..... 6.31 a. m.	Sun rises..... 6.45 a. m.
Sun Sets..... 4.59 p. m.	Sun Sets..... 4.45 p. m.
Moon Rises..... p. m.	Moon Rises..... p. m.
Jan. 1st the Sun rose	Jan. 1st the Sun rose
at 7.35, sets at 4.35	at 7.35, sets at 4.35

Signal Office Prediction.

Slightly warmer, fair weather, southwest to northwest winds, generally higher barometer.

Chronological Events.

Milton died in 1674.

JOTTINGS.

—The "Beggar Student" to-night.

—God reigns and the Nation still lives.

—Some bugs are your grip sacks, the Democrats say you must go.

—"Beggar Student," a most comic opera, will be rendered at Stillman Music Hall, this evening.

—Plainfield is a city of the third class, under the construction put upon legislation now by Corporation Counsel Marvin.

—One of our most vivacious lady readers says she has found the best remedy for a man who has to ask if down is that it won't knock sale.

—Tuesday for the last game of foot ball in Park avenue course has been fixed for Thursday, Feb. 19. Read the announcement of tickets on sale at Reynold's drug store.

—There will not be any services at Reform Hall tomorrow evening, the Rutgers Club having accepted the invitation to attend the Bible meeting of the Y. M. C. A. at Stillman Music Hall to-morrow afternoon.

—Voters and unregistered will hear in mind the judgment of the law in this county. However the canvass eventuates, Americans will pay to the new Administration the respect and loyal adherence to law and order.

—To-morrow being the commencement of the week of prayer for young men throughout the world, the Y. M. C. A. of this city will observe the day as a prayer meeting day. Their hall at 9:30 a. m. and will hold a meeting at Stillman Music Hall in the evening at half past seven.

—Another fine painting from nature ornaments the window of Dr. Shaw's drug store. It is by Mrs. Charles Ch ton, now a student in the Plainfield School of Art. It is a East Front street. Those desiring to have some of the fine paints in dra ing and painting will find it to their advantage to call and see Mr. Johnson's new meth d.

—The total number of votes cast through the use of a lot on the corner of Grant avenue and Front street, Plainfield, for a station, if those interested in having a stopping place there will put up the building, the money, about $5,000, to defray the cost of building having been raised, and the work is to be pushed, plans having been already prepared and adopted.

—Both the workings claim victory. The Junior Democratic organ puts out no returns and touts Binine. The senior Democratic organ, Jerome touts Cleveland, a d also puts out nothing as to returns, but is silent with its rooster. THE NEWS gives the most reliable news obtainable regardless of which party is elevated thereby, and hopes the best man will win.

—The 200th anniversary of the organization of the Board of East Jersey Proprietors will be celebrated at Perth Amboy on Tuesday, November 25. The Board still exists and has maintained its organization and kept its papers since 1682, when the twenty-four men who had bought the northern portion of the State from Berkeley and Carteret two years before, formed the first meeting of this kind in America.

—The News printed more extra copies the day after election than the entire editions of both local weeklies. During the campaign, we circulated over 1500 copies in Westfield alone, and in all the villages in Union county, Cranford and Rahway with one dissent, and in Dunellen, New Market and Bound Brook in the other, the News was eagerly sought and a large quantity supplied. Besides this over 500 copies were carried by people in Rahway and 500 by people in Elizabeth.

A Boy Killed on the Railroad.

Willie S., the nine-year-old son of George and Emma Huggins, enticed, residing on Third street, near Liberty, was killed on the railroad track at the Liberty street crossing yesterday afternoon, about half-past three o'clock, by a freight train, by the locomotive on the train first striking the boy. The train stopped and the body of the boy taken from the baggage car to the depot, where it was identified by the Dugan house, and the county physician notified. Last evening about seven o'clock the remains were still at the depot, and had not been claimed by the relatives. The accident was caused by the boy attempting to cross the track directly in front of the train, which was coming at a rapid rate. An examination showed that the boy's skull had been fractured, but otherwise there were no external marks on the body. The train was in charge of Conductor Bonnell.

—The engagement of the Bijou Comic Opera Company, together with their fine scenery, costumes, etc., at Stillman Music Hall for one week, beginning on Monday next, is the event of the season. The company is composed of the following well known artists: Miss Lizzie Macnichol, Miss Lizzie Wilson, Miss Lizzie Mulvey, Miss Lizzie Mayo, Miss Lizzie Mason, Miss Lizzie Mason, Miss Lizzie Mason

SATURDAY, NOVEMBER 8, 1884.

A QUEER GENIUS.

A Few Reminiscences of Edison's Life in Cincinnati.

Receiving a Visitor Dressed Only in Shoes, a Shirt and Ping Hat—Bothered by Strangers.

(Cincinnati Times-Star.)

It is not generally known that Thomas Edison, the well-known inventor, was a Western Union telegraph operator in this city in 1867.

Ed Armstrong, the father of the patrol system, was also an operator in the same office, and from that time until the present has been his intimate friend and correspondent. In speaking of him Mr. Armstrong said: "He had a room at 37 West Third street, and was the quietest genius I ever met. He was not tall, but angular, with a slight stoop in his shoulders, while his clothes looked like they had been thrown on him and stuck, and he had walked off not knowing they were there. He was an investigator and, but held his cigar in a manner entirely peculiar to himself. Instead of sticking it between the forefinger and thumb, the most man do, he would grip it with his entire hand as if he was a crank and his mouth the keel to turn. He would would burn up to his little finger that finger would fly up, then the other, and so on, until the cigar was consumed up to his mouth. He would grind it with his teeth, and then put it into his lips with his thumb and forefinger and his other fingers scattered out in front of his nose.

For a long time he wore an old ragged suit around the office that was an abomination to decency. But one day he suddenly appeared dressed in a genuine new suit, with a fancy tie in his throat and a fine shirt. The boys would not believe it was him until they heard that peculiar funny voice of his, that sounded like a cross-cut saw running through a knot, or a log scratching himself on a splinter.

A few days later he showed up, but one leg of the breeches was completely soiled and ripped with dirt. He had been on experimenting, and stained them as yellow as a Chinaman's uniform. Yet he wore the suit around the office for five months after words.

Another peculiarity about the man was his handwriting. None of the letters were connected, yet it was as plain and legible as print. Though plainly slow and laborious for any one else to write in this way, he could receive from the fastest operators in the country.

While I lasted him in New York, I was shown into a private room, and after sending up my card, he immediately sent for me. When I entered his laboratory he were nothing but a pair of pants, a shirt and a plug hat. You can imagine how he appeared to me. After getting done laughing, I finally shook hands with him and said:

"Why, why don't you keep your clothes on?"

He twisted his face into that peculiar leer of his and answered:

"I can not get bothered by visitors. Of course they must all see me, but when they come in and see what condition I am in they immediately leave, thinking, doubtless, I am crazy."

That evening while talking to me he said dreamily turned around and said:

"Ed, I wish you knew some of that fellow we used to receive so many dispatches from while I was in Cincinnati? His name was——was, oh oh, pshaw! you know who I mean!"

"I know who he meant, but could not recall the fellow's name just then. An hour later I left him, and every down on Market street I would see that fellow. Finally I asked a newsboy to get rapped, which he did. I looked out and saw Edison walking along the street, plodding along as the figure of the people could be seen. I had been all day wanted to know what he was doing, when he answered: 'I am trying to find that dovilled fellow's name.' Today he is developing in a most wonderful system of duplex telegraphy, named as A and went to X trying to find the name, but still unsuccessful. He then took colors, and for the moment he came to pink the combination. Ah, I have it. The name was Frank Tarvis. Tarvis was a railroad telegraph operator in Cincinnati, and he found the name and got to bed. He was very fond of a joke, and nicely took in Arton. The Tribune correspondent learning that he was coming, telegraphed Edison to be on the lookout, him and told them that he wanted them to entertain that they were both trying themselves to death when Arton came. The great newspaper man was received by Edison with the greatest cordiality and good feeling. When Arton went into the room on the first floor of the laboratory, he saw about a hundred men pouring out and mixing liquids together, and Edison was nowhere to be seen. He looked around for a few minutes, and then walked out and asked the first man he met where Edison was. He was informed that he was in the basement. He went down and returned in 20 minutes. New York was such a most wonderful account of his visit to the laboratory of the 'great inventor.'

When Tom read the article he grinned like a monkey, but was as mum as an oyster."

THE CROPS REPORTED.

And the Election Figures Now Nearly Discussion.

A Phenomenally Close Vote in New York Indicates Plurality. Michigan Swung Into Returns Slowly—Could be Close.

NEW YORK, Nov. 8.—The World says: "The additional returns from Tuesday's elections in this state leave no chance for the Republicans to claim the state for Blaine. The plurality for Cleveland will be about 1,500. This is small, in so large a vote. It is sufficient to hold the state in the Democratic column.

"The claims of some of the Blaine organs that the Republicans have carried the state are based upon the statements of the Associated Press that their figures show better for Blaine than the official figures filed with the county clerks in the several counties.

"It must be borne in mind that the boards of county canvassers, which meet in every county of the state next week, make the official canvass on the certified copies of the returns filed with the county clerks by the inspectors of elections. Those boards do not see the Associated Press figures, and cannot consider them. By law they are restricted to the returns made and certified by the inspectors of election. It makes no difference to them what the Associated Press figures show.

"These returns were not originally added by counties, but each town as it came in, and there was no mode of determining how other towns had been counted in their original reports. Hence the state could be able to agree among themselves how their discoveries would affect their original computations.

"Those in charge of the Associated Press invited representatives of the papers to examine their figures as entered in their tables. In a short time many discrepancies were found as compared with their own dispatches on the night and the next day after the election. As an example, in one election district in Westchester county, where Mr. Cleveland had received 91 votes, it was entered as 9. This was only one in several instances, no doubt the result of haste in entering the figures. There were numerous election districts which had not been entered at all."

The Times' Review of the Situation

NEW YORK, Nov. 8.—The Times says: "At the election on Tuesday twenty states gave plurralities for Cleveland for president, and will cast 210 votes for him in the electoral college. Eighteen states, having 182 votes in the electoral college, gave plurralities for Blaine. The whole number of votes is 401. The number necessary to elect is 201, so that Cleveland will have 16 more than enough to elect, and 37 more than Blaine. Carefully revised returns received yesterday increase Cleveland's plurality in the state of New York. It is now 1,304. Michigan is no longer in doubt. The returns received show by a small plurality, probably not more than 1,000. The Democratic plurality in Indiana is about 6,500, the victory being sufficiently complete to elect all the Democratic officers and a majority of the congressional delegation. A few changes are reported in the membership of the Forty-ninth congress, which will be Democratic by about 40 majority."

A Question of Correct Figuring.

NEW YORK, Nov. 8.—An extra edition of the Mail and Express this morning announces Press has now the official returns in from each district of every county. As footed up, they show a small Republican plurality, but follow the figures made by the Democratic state committee on the returns from the county clerks of each county, but the figures received by the Associated Press from each district and by the same are received by the county clerks of the respective counties of the state. The result is now to be looked upon the accuracy of the footing up of the totals as found in the Associated Press and the Democratic state and national committees. The Associated Press will send in figures as received from the county clerks and varied, and will, at the same time, issue the totals as based on the figures of the county clerks. The public will then have to take its choice of the figures or wait until the official count settles the question. Present indications point to a plurality of 250 for Mr. Blaine.

The Associated Press Explains Some Figures.

NEW YORK, Nov. 8.—An extra edition of the Telegram gives an interview with agent French of the Associated Press, who says: "We will give our footings next to-morrow, when we have received them from the county clerk. The election is very close and a slight error in our footings or in the footings of the county clerks would throw the result either way. We have discovered errors in three counties, the names of which I do not care to give just yet. These are wrongly added in the returns which we have received, and no error or the footings of the Associated Press. That occurred in Westchester county, and it was caused by a hurried figure which looked like a '6.' It took 400 for Mr. Cleveland, 500 may votes. But aside from counting this Mr. Blaine will still have about but a very slight gain."

A Private Secretary's Official Statement.

NEW YORK, Nov. 8.—The following telegram has just been received, and is in reply to a dispatch sent:

ALBANY, Nov. 8.
D. Pratt, United Press: Of course we have the official returns from every county but. They give Cleveland about 1,200 plurality. The Evening Journal is Blaine organ gives Cleveland 1,063 and editorially concedes his election.

D. S. LAMONT.

At Fever Heat in Chicago.

CHICAGO, Nov. 8.—Political excitement was at fever heat throughout this city last night. About noon the throng around the newspaper bulletin boards on Madison and Market streets necessitated the police to disperse them. Gen. Logan personally visited each publisher and requested that the displaying of bulletins be discontinued. The request was universally complied with but did not have the effect of dispersing the crowds and thousands stood hour after hour awaiting the appearance of "extras" or final night returns. Dearborn street, congregating perhaps 25,000 people, went through the streets in the business center interrupting cars for fragmentary reports. Every Democratic headquarters in the city was thronged with Democrats and Republicans. Dispatches from the west report general Democratic jubilations. Returns from Illinois are coming in very slowly, and members of the Democratic state committee are without data upon which to give an estimate of the probable Republican plurality.

Brooklyn Paraders Stopped.

BROOKLYN, Nov. 8.—A number of the Cleveland organizations met in their headquarters in this city last night and made the most made arrangements to parade with torches all hours. Mayor Low, fearing trouble, requested Chief Kenny to issue an order to stop all parades on the streets, whether the organizations had permits or not. The Cleveland men, when informed of the mayor's request, declared that they would not parade, and accordingly no parades took place. Their campaign songs were sung in honor of their candidate.

Headquarters of the Republican campaign in Kings county, was at the headquarters, and said he still felt confident, from all he could learn, that Blaine was elected. The betting on the election is even.

Another Democratic Address.

NEW YORK, Nov. 8.—The following address has just been issued:

HEADQUARTERS NATIONAL DEMOCRATIC COMMITTEE,
NEW YORK, Nov. 7, 1884.

To the People of the United States:

There can no longer be any question concerning the actual result of the presidential election.

Grover Cleveland and Thomas A. Hendricks have a majority of eighteen in the electoral college.

It is not worth while for our adversaries to claim the electoral vote of the state of New York.

It is absolutely certain that the returns of the proper officers of the elections on the night of the 4th November showed a decisive majority in favor of the electors supporting Cleveland and Hendricks.

If any different or altered returns are now being prepared, or are promulgated, they are not the returns made by the boards of the state of New York, and the men aiding or abetting the making of such reports are criminals. It is not expected that you will tamely submit to the consummation of such men. Let them understand that you will not.

Recognize, at noon to-morrow, throughout the United States the actual election of Cleveland and Hendricks by firing a national salute.

Meet to-morrow night throughout the country and express you opinions in a manner that cannot be misunderstood.

The men of New York are resolved not to submit to the base fraud which is about to be perpetrated upon their rights, and will speak for themselves.

WILLIAM H. BARNUM,
Chairman National Democratic Committee.
A. P. GORMAN,
Chairman National Democratic Executive Committee.

Blaine Believes He Has Been Elected.

NEW YORK, Nov. 8.—The following telegram has been received:

AUGUSTA, Me., Nov. 8.
To H. P. Jones, Chairman Republican national committee:

I am advised that there have been frauds committed in New York state. I believe that the honest vote of the state gives a Republican majority, and I ask the committee to see that we have a fair and honest count.

J. G. BLAINE.

Joseph B. McCullough's Views.

ST. LOUIS, Nov. 7.—The Chronicle prints an interview with Joseph B. McCullough, of the Globe-Democrat, in which he says "Blaine's record had him with the majority singly large St. John vote in New York. Voters all over the country who thought as I did, fearful that Blaine's election was accomplished, either voted with the Democrats or refused to vote for him. In Illinois the effect of this defection is seen best. The Butler vote which was expected to be 30,000 in New York and to take most of its strength from the Democrats, fell far below their estimate, while the temperance vote drew from the Republican ticket. He thinks that Randall will be secretary of the treasury and Tamman attorney general.

New Hampshire's Legislature.

CONCORD, N. H., Nov. 8.—Complete returns show that 181 Republicans and 120 Democrats are elected to the next legislature. That leaves 149 on joint ballot, and give a majority of 1,130 in favor of holding a convention to amend the constitution.

The governor and council appointed Thursday, Nov. 27, for Thanksgiving.

The Democrats fired a national salute in honor of Cleveland's election, and paraded the streets with torches, drums and bands. A formal celebration of the Democratic victory has been arranged for next week by the city committee.

Enthusiasm in St. Louis.

ST. LOUIS, Nov. 8.—At 1 o'clock a procession of 600 members of the Missouri Democratic club formed and The Republican office serenaded. Cheers were given for The Republican, for Cleveland, for Beecher and John Kelly. They marched to the other newspaper offices, and made several speeches. John T. McKnaly, during a speech, said: "Cleveland has been elected, and by ——— Will be inaugurated. All men of honest sentiment of the secessders, who yelled themselves hoarse. Last night the Democrats gave Blaine a mock burial.

Blaine's Plurality in Illinois.

CHICAGO, Nov. 8.—Returns from Illinois on the vote for president have been received from all but one county in the state. Some slight errors have been made, but there has a plurality of 22,375. In 1880 Garfield had a plurality of 1,949 in the counties which have not yet reported. This would make that Blaine will have about 23,000 in the state. The returns on governor are by no means complete, but Oglesby will have about 5,000 plurality. Harrison's probable majority exceeds his estimate, but will give no figures.

Guarding a Newspaper Office.

TROY, N. Y., Nov. 8.—A captain of police and seven patrolmen are guarding The Telegram building, which is now surrounded by a mob of 5,000 excited and excited men. The Telegram's bulletin boards have been torn down and broken into splinters. By request of the police The Telegram office will not be looked at to-night. They say more bulletins will be looked at to-night. They say more violence will be looked at to-night. They say more violence will be looked at to-night. They say more violence

BLOOD IN THE VALLEY.

The Ohio Mining Regions Again a Scene of Turbulence.

The Governor Asked to Send Troops to Suppress the Riot—Strikers Meet the Police with Determined Resistance.

COLUMBUS, O., Nov. 8.—President Greene, of the Columbus, Hocking Valley and Toledo railroad, has requested Gov. Hoadly to order out the militia, on account of the burning of bridges in Hocking county. Sheriff McCarty of Hocking county, made payload to the governor asking him to order out the troops. He says Murray City was attacked by 500 or 600 miners, who used tins filled with giant powder, with fuses attached, and some dynamite.

The attack was made about one hour after the Pinkerton guards went off duty, giving place to the new company's police. The mob fired upon the town and mining company's store from the hills on all sides. The shots were promptly returned by the police, and became a regular fusillade on both sides. The guard was driven in from the hill above the hoppers, and had it not been for the prompt action of Pinkerton's men, who came out in time to reinforce the police, the hoppers would have been burned. Explosives were thrown from the hills, which burst in the town with a noise that shook the earth.

The strikers stood the terrible fire poured into them by the guards and returned it with a vigor that surprised every one. After about an hour's fight a squad of Pinkerton's men under Sergeant McCady flanked the attacking party and drove them off. The rocks in several places on the hill were found spattered with blood, showing that the strikers had not all escaped unhurt. None of the guards or employes of the company were hurt. The sides of the company's store bear the marks of over 100 bullets. Several of the company's houses were almost riddled, and the windows were broken out all over town.

All the bridges load between Chapmanville and Murray City were out. The Carbon hill and Sand run railroad bridges were burned, which stops all traffic over the Straitsville and Monday creek branches. The sheriff says he can manage Hocking county if Perry and Athens counties are looked after. Gov. Hoadly is in Cincinnati, and the call has not been answered.

Gov. Hendricks on Polygamy.

INDIANAPOLIS, Nov. 8.—Mr. Hendricks has received numerous callers, and the question of polygamy was discussed by some of the visitors. Mr. Hendricks declined to enter into the details of his opinions, but intimated that the Democracy had very pronounced views and would develop a strong policy in the treatment of this evil. "The system," he said, "has become so deeply rooted that trouble arises. I fear it will not be disposed of without resort to force." "If the presidential vote is very close will another electoral commission be tolerated?" was asked of Mr. Hendricks, who replied: "No, sir. And so long as I can control the matter this state will never again be disgraced by having one man in about control and deputy marshals acting as partisan police force. It was a disgrace. There was no disturbance, and no occasion for the second installment and threatening of the people's liberties."

Election Work for the Grand Jury.

NEW YORK, Nov. 8.—Matters concerning the election have been taken up by the grand jury. It is understood that they have already found indictments, which charge certain persons with fraud in the canvassing of the vote and poll clerks in the various election districts are required by law to furnish returns to the county clerk, the police districts bureau and the mayor, but returns from a number of election and assembly districts have not been received, and some of those received are incomplete. It is stated upon that any of these have improperly withheld the returns, they will be prosecuted. The assistant district attorney assigned to investigate the matter is diligent, however, to attribute their delinquency to connivance in the majority of cases.

Father Chiniquy Again Snubbed.

MONTREAL, Nov. 8.—The Rev. Father Chiniquy preached in the Canning street Presbyterian church, and was again interrupted by a band of young men, apparently students. The remarks of the night before were not repeated. The disturbance was ordered to stop by the police, and peace will likely surround the preacher. The students, after the noise resulted from the church, marched through the streets singing and indulging in hideous yells in passing any Protestant church. The rear of the leaders of the crowd were severely beaten by the police and taken to the hospital. One arrest was made.

A "Buzzard" Shot.

LANCASTER, Pa., Nov. 8.—The store of Isaac Robinson, in Salisbury township, burdened on the 1st, which was robbed several days ago, the suspected parties being a number of negroes connected with the Buzzard gang. Constable Bowerman got a clue to the robbers, and discovered them, four in number, in their hiding place. The robbers attempted to escape, when Bowman opened fire, killing Spencer, shooting the latter severely, causing a fatal wound. John Bush, another of the party, was captured and lodged in jail in this city.

A Collision on the West Shore.

HARRISBURG, Nov. 8.—Two West Shore passenger trains came in collision on the Buffalo, New York and Philadelphia railroad, on which the West Shore trains enter the city. Conductor Leary and Brakeman Hollingshead were badly bruised. Both engineers and firemen jumped into the Susquehanna river and saved their lives. Mrs. Schuyler, of Scottsville, had five ribs broken and her back sprained. Both locomotives and two cars were wrecked. The cause of the accident was the running of a freight train on a siding.

Shot by a Clergyman.

CHESTER, O., Nov. 8.—Rev. Walter Taylor, a rabid Prohibitionist, was arrested for shooting Edward Mitchell. After the funeral of the latter a procession of Mitchell's election day friends were surrounded by the Prohibitionists, and Taylor, who had a gun, fired into the crowd, and Mitchell fell dead in front of his own door.

Victims of the Fletcher Disaster.

READING, Pa., Nov. 8.—Up to noon the bodies of three of the seven men buried under the ruins of the disabled stack at the Reliance furnace were recovered. Two were buried beyond recognition. The other body is buried beneath uncovered pieces of debris.

Business Generally Improved.

NEW YORK, Nov. 8.—There were 289 failures in the United States during the week, as reported to R. G. Dun & Co., against 268 the previous week and 270, 249 and 230 in the corresponding weeks of 1877, 1876 and 1875 respectively.

The Sun.

THE SUN for 1878 will continue to be a newspaper which tells the truth without fear of consequences, which gets at the facts, no matter how much the progress costs, which prints the news of all the world without regard to the interests or the prejudices of any party, which is working with all its heart for the cause of honest government, and which therefore lives by the favor of those who believe that honesty must go, and must go in this year of our Lord, 1878.

About one million readers of THE SUN have grown out of our establishment during the passed twelve months.

If you were to pause and regard all the columns of THE SUN from printed and sold last year you would get a continuous strip of interesting information, common sense wisdom, sound doctrine, and sane wit long enough to reach from Printing House square to the top of Mount Copernicus in the moon, then back to Printing House square, and three quarters of the way back to the moon again.

But THE SUN is written for the inhabitants of the earth; this vast strip of intelligence would girdle the globe twenty-seven or twenty-eight times.

If every buyer of THE SUN during the passed year has spent only one hour over it, and if his wife or his grandfather has spent another hour, this newspaper in 1877 has afforded the human race thirteen thousand years of steady reading night and day.

It is only by little extravagances like these that you can form any idea of the circulation of the most popular of American newspapers, or of its influence on the opinions and actions of American men and women.

If you know THE SUN for you like it already, and you will need to add no additional assurance and profit during what is sure to be the most interesting year in its history. If you do not yet know THE SUN, it is high time to get into the swindler.

Arabian Medicines,

Celebrated throughout the World for their remarkable Cures.

Dr. Howe's Arabian Milk Cure.

Dr. Howe's Arabian Tonic,

Dr. Howe's Arabian Liver Pills.

The Only Medicines that have ever been shown to positively cure Consumption.

TESTIMONIAL

Of the Hon. Jos. E. Gary, Judge of the Superior Court, Chicago, Ill.

CHICAGO, Dec. 14th, 1878.

DR. S. D. HOWE,

DEAR SIR:—It gives me much pleasure to add my grateful testimony to the many of others to the virtues of your Arabian Consumption Cure. For a long time my wife was seriously afflicted with hacking cough, pain in the chest, and general debility. She was under the care of some of the most eminent physicians in the city, but grew gradually worse, until she was reduced to the verge of the grave. Her friends had given her up to die, and I was myself almost prostrated with grief and anxiety. At this juncture I was induced to try your Arabian Milk Cure, and before I had used one bottle I could see that she was better. She continued to improve from the first dose, and after using a few bottles was entirely restored to health. She has remained well ever since, and is now as hearty and robust as she was before her illness. I am satisfied that your Arabian Milk Cure saved her life, and I cheerfully recommend it to all who are afflicted with Consumption.

Very respectfully, JOSEPH E. GARY.

SUFFERING.

—Mark Twain and George W. Cable are the features announced to appear next at the Opera House.

—The funeral of Willis Ruggles, the little colored boy who was killed on the railroad on Friday last, took place yesterday afternoon.

—The Republicans did not parade as announced Saturday afternoon with grippsacks in their hands to vote on their tickets. They feared they might be a little too previous. The parade has been talked of for to-night, but it is not likely to take place as soon.

—There is to be a Democratic parade Wednesday evening at Somerville, for a long pay, following on headed without torches, a leading Republican to carry the banner.

—Mr. C. L. Skinner, the rink manager, is an exceedingly fine instructor of roller skating. The two children who were an expert at the evening entertainments, are his pupils. Any one desiring instruction to join the class, having very little time of devoting help to the practice, can call at the rink, where an association was conducted, and satisfactory arrangements made with you should you desire. Mr. Skinner will be pleased to take your engagements to attend the rink with your parties for evening diversions. He hopes to see the Arabian Mule-Cart and Arabian Band, which are to be a leading feature next week. The rink will be crowded with good company, regulations become easy, the sessions of the class were excellent for exercise, and those who go to the rink and improve in strength and appearance and ability will find that the physical exercise will have saved the life of my wife. She unites with me in this grateful testimony to the merits of your remedies.

Very respectfully, JOSEPH E. GARY.

Obituary.

Mrs. Sarah Ann Bonnell, wife of Mr. Thomas Bonnell, died at her residence on Somerset street, on Saturday morning, after a long illness, aged 58 years. Funeral services will be held at the house on Tuesday afternoon at 2 o'clock. Interment at Hillside Cemetery.

Observance of Young Men's Day at Stillman Music Hall.

The day of prayer for young men throughout Christendom was duly observed by the Young Men's Christian Association of this city on Sunday evening at Stillman Music Hall that evening. Long before the hour of commencing the services the premises hall was packed with a dense sea of humanity, the galleries being filled with young men, and for that matter, with young women too, who failing to procure seats in the body of the hall were forced to be satisfied with the gallery. The meeting was addressed with short addresses appropriate to the occasion, after which the several choirs, under the leadership of Mr. McCutcheon, sang the hymn—"Come, then almighty King," and after the reading of a part of certain qualifying played by the gentlemen sitting there. Several other hymns followed, and then the Rev. Mr. Richards arose, and in a clear and distinct voice read the eighth psalm, which was in a song with the day being observed.

The Rev. Mr. Richards then spoke of the divine blessing upon the young men present and the congregation at large in a fervent prayer, after which the choirs sang the Gloria Patri.

The sermon was preached by the Rev. A. H. Tuttle of the M. E. Church, who chose for his text the third and fourth verses of the eighth psalm: "When I consider thy heavens the work of thy fingers, the moon and the stars, which thou hast ordained."

"What is man, that thou art mindful of of him? and the son of man, that thou visitest him?"

The gist of the discourse was to show men —young men—the high position they hold in God's creation and the exalted ideas they should have of themselves as the noblest work of the beneficent creator, who ordained that they should be raised to the other portion of his handiwork in creation. Many of them start out with low ideas of what they are, when it has been placed on record in the divine word, that they are only "a little lower than the angels," and "a son of man," and have a union with the Deity. Their ideas of themselves should be high and noble as a part of the great plan of God. While the other portion of the Almighty's creations would pass away, the greatest and noblest of them all—man—was to live throughout eternity.

He closed with an appeal to the young men to assert their manhood and be living epistles of their high calling.

Rev. Mr. Goodrich led in prayer, a hymn was sung, and the benediction by Rev. Dr. Hurlbut dismissed the vast assemblage.

A Democratic Outrage.

Last Friday night the store of Fred Decker in Westfield was broken into, and a number of articles stolen. The store is used as the Westfield post office, Mr. Decker being the Postmaster. The same night one of the pole supporting the Republican banner was sawed down. The pole was found Saturday morning supporting on its supporting wires. In both cases the deeds are charged against Democrats, though the guilty parties have not been discovered. Democrats say that the pole was sawed by Republicans.

Later—Mr. Decker has since been in town yesterday and furnished further evidence of the outrage. He says that on the same night a mask over the store, and about one o'clock Saturday morning a crowd of ruffians gathered in front of it shouting for Cleveland, and hooting for the removal of the Postmaster. Mrs. Decker was greatly frightened, fearing that the house would be burned. She had the window awaken in and supposed it was flames started. As the noise soon after ceased, neither Mr. or Mrs. Decker felt safe to venture out. Next morning they found the show window smashed in and gutted of cups, gloves and handkerchiefs.

Mr. Decker offers $100 reward for information leading to the conviction of the guilty parties, and respectable Democrats should join with Republicans in helping to bring the villains to justice.

A Specimen Brick.

A sample of the terra cotta clay of the Plainfield Clay Mining Company worked into pressed brick has been received by Mr. Edward C. Mallory, the Secretary, and is on exhibition at his office. This is an auxiliary branch of the company's business not thought of at the time the company was formed, and Plainfield parties who have invested feel that they have struck a lucky vein. The brick is of a very fine quality, and Mr. Mallory said he only saw of the exact purpose for which the clay of this mine can be used.

Sheriff Sales.

To-morrow morning at ten o'clock, Mr. George M. Stiles will be sworn into office as Sheriff of Union county. As Sheriff Stiles, George will not become too prominent with all parties, who have so completely won their friend regardless of party, on a good way.

The Bogus Soldiers.

A gratifying and gratuitous advertisement Carl Hillocker's comic opera, "The 3 sugar Sisters" received by newspaper notices of its production at Hooley's Theatre, Saturday evening. The opera has had a run of 100 nights at the Casino, New York; so the advertisements state, and we doubt very much who witnessed it Saturday evening, could laugh as heartily at it a second time, as they did at the first production.

The opera opens with a prison scene in which occurs a sprightly chorus by female voices, introducing their "Colonel" and Guards, with the words of the libretto, the first verse of which is—

"Ha! ha! ha!
And they say that towards ladies we should be
Ever humble, ever kind and ever gay,
In their presence bow and curtsey, play their most devoted sister,
Walk a turn, have no fear,
Talk of love who is Poland and is passing it
Is Valdimir and Polish only with esteem
On the Vistula and Elbe enjoy signal victories
Who are Gerson, Bauman, Wertman, victors on the field renowned."

Mark this: These all victorious, whom Russia might not own.

Another chorus by a woman tempted to solicit us kiss a kiss.

Every time that the thought arises, pride
And fury shakes me
But soon I'll teach her that I can punish all
Who dare to resist me.

My dear, I scarcely—I really cannot see
Why you should
Ha! Ha! Ha! I'll teach you to print on her shoulder a kiss.

Here I was the step I take
Here I was the step I take
Here I was the step I take
Never have I ever heard
Never have that upon my word.

For this step the General proves by his Roman nose to be even with the stepper.

The action of the opera is laid in the city of Cracow, Poland, in the year 1794. In the first act, General Ollendorf, military governor of the city and in love with Laura, only daughter of the Polish Countess Palaski, intercepts a letter written by her mother, in which she reveals the idea of marrying her daughter to any Saxon—not more especially a liberating braggart like the General, adding that only a nobleman can be her son-in-law. The General is trouble these haughty ideas, takes from prince Symon Symonowitz, a handsome young Polish nobleman, and lover of Laura, his betrothed ring, pledging him in return for his liberty and a large sum of money, to impersonate a wealthy nobleman, make love and to marry the Countess Laura. Symon instead upon being with Laura for a private interview, faithfully who is held for political reasons, to act as his private secretary. The plot is successful, and the first act ends with the betrothal of the coming Prince and the Countess Laura. Countess Laura is the one who had stopped the General's note, on whom he is now seeking revenge.

In the second act, Symon, finding that Laura is really in love with him, reciprocates her passion, and decides, as the money supplied by the General is all spent, to inform Laura of the deception practiced upon her. Not having courage to tell her of his love now, he writes a letter disclosing all and entrusts it to Laura's mother. The General discovering that the Countess has this letter, tells her that the latter refers only to marriage settlements, and persuades her to withhold it until the opera is ended. The ceremony over, the General reveals the plot to the assembled guests, showing the Prince to be merely a beggar student, and has him driven from the palace.

At the beginning of the third act, Symon's friend, Jasitsky, reveals himself as a Polish officer interested in a plot for the capture of the citadel and reinstatement of King Stanislaus upon the throne of Poland. The success of the scheme depends upon the payment of 200,000 thalers to the Austrian commandant, for which sum he agrees to surrender to the Poles. The Governor General has discovered that Jasitsky knows the secret hiding place of the Polish Grand Duke, and bribes him (Jasitsky) with 200,000 thalers to betray that officer to the Austrians. Jasitsky tells the Grand Duke nothing of the bribe until the money received for his capture can be paid to the commandant. Symon consents and holds the General in ignorance of the truth until the Poles are in possession and all the Austrian prisoners. In return for this he is knighted by King Stanislaus and forgiven by his wife and mother-in-law. The opera throughout is very laughable.

Sunday School Convention.

The annual convention of the Union County Sabbath School Association will be held in the Congregational Church, Westfield on Wednesday afternoon and evening, November 19th.

The Executive Committee earnestly request the hearty co-operation of all interested in Sabbath Schools, and ask them to arrange to have their schools represented there by as many of the teachers and workers as can make it convenient to attend the Convention.

A full programme is in preparation and an occasion of interest and profit to all the schools of the country is anticipated.

Mr. Russell W. Woodward, of Elizabeth, is President, James R. Durand, of Rahway, Secretary, and Rev. James P. Riggs, Chairman of the Executive Committee.

St. Mary's Fair.

The Fair for the benefit of St. Mary's church ended Saturday evening. The following Colonies were holded: The gold watch was awarded to Miss Annie McFadden, and again drawn by Mr. John Sheehan. A beautiful gas portiere was won by Miss Jennie Collins, a silk quilt by Miss Mary Gallavitch, a wax doll by Mr. John McCarthy and a box of tobacco by Mr. T. Carey. The Fair was a success in every way.

A Sensible Man.

Would not Kemp's Balsam for the throat and lungs do it? It would, positively, for scrofula, white swellings, chronic sores and ulcers, bronchitis, coughs, colds, asthma and all throat and lung troubles. Sold on a guarantee by druggists everywhere. Large bottles only 50 cents and $1. Trial size free. Ask for Kemp's Balsam. Sold by C. A. Butler, Druggist, Plainfield, N. J.

Special Notices.

PLAINFIELD SCHOOL OF ART.

No. 21 Park place. Classes now prepared to enter classes in drawing, painting in oil, crayon, water colors, and pastel. Rooms open daily, 9 to 4. 1 East Front street (over Dr. Stone's Drug Store.) Terms satisfactory.

Wood and etching is considered much easier than the old as pupils with basis for art can learn to sketch and paint from nature in a very short time, and with less expense and less study. Everything made plain and simple, so that the most backward beginners in exercises in the public schools, can learn to draw. Prospectus of all sent on send to order. Very Respectfully,

M. W. JOHNSON.

Orders, or calls, at Park House will be received with pleasure.

OPERA GLASSES TO HIRE

At C. A. Butler's drug store, and the looks of the Music Hall, to come for an evening closing.

OVER A VOLCANO!

A Town in Mexico Completely Wiped Out by Earthquake.

PHILADELPHIA, Nov. 10.—A dispatch from Harrisburg, Pa., says: "Considerable excitement prevails here, owing to the fear that the men who were killed by the explosion of the powder mill away in the country in this place a number of cartridges filled with slightly defective primers, the very strongest kind that can be made. The cartridges that shook the town last week had been loaded down until it was as hard as a rock.

"The cartridges were composed of nitrate and nitric acid, mixed with seven glycerine and several other chemicals and ingredients. The cartridges were made of paper and in shooting the cartridges. The cartridges were seven-eighths two inches in diameter and six twelve inches long. Some officials talk about being asked to vacate town out and searching a number of buildings in this place with a view of finding the explosives and are supposed to have been concealed by the dead men, but it is thought, expected to explode them after the excitement of the present attack ceases.

"Henry W. Oliver said that he had not decided whether to re-engage in the dynamite manufacturing business or not. If he should build new works they would be placed in the mountains, a considerable distance away from any habitation. He added that he has orders for 60,000 pounds of volcanite powder cartridges."

THE ENGLISH NAVY.

Efforts Made to Reduce the Government Estimate 3s.

LONDON, Nov. 10.—Lord Northbrook, the first Lord of the admiralty, has earnestly urged upon the government the necessity for an addition to the English navy of 100 first class and 150 second class torpedo boats. In connection with Lord Northbrook's urgent representations the admiralty board has ordered the construction of four torpedo cruisers and a number of torpedo boats for service at all important ports at home and in the British colonies.

In the house of commons Mr. Macnagh (Liberal), member for Longford, addressed questions, with the approval of the conservative leaders, which were laid upon the table, requesting for the appointment of the sinking fund, which is devoted to paying the national debt, for two years, and pleading the sum ($60,000,000) as the disposal of the admiralty board for the increase of the navy. The government has resisted the request of many Liberals upon the ground that there is an immediate necessity for strengthening the English fleet and that the reduction of the debt sanctioned would render additional taxation necessary.

The Most the Could Have Made.

CHICAGO, Nov. 10.—In better of trade circles and in fact all about town, there was great excitement over the report that Riley, the pool seller, had decamped with $1,000,000 left in his hands by people betting on election results. Before the hour of opening the pool room had filled with a crowd of excited persons gathered in front of the place and with anxiety depicted on their faces, waited to learn the truth of the rumor. At 10:30 o'clock the assembly was surprised to see Mr. Riley's smiling face behind the counter of the pool room, and vent was given to their feelings of joy in three rousing cheers. Mr. Riley announced business with the remark that he did not contemplate a European trip just yet, but what he did want to say he would give them due notice. Many people made small money to Riley to be glazed, and may have heard this groundless rumor.

A Skeleton Brought to Light.

NEW HAVEN, Nov. 10.—The little town of Seymour, in this county, was stirred to its depths by the unearthing of a human skeleton as the bottom of a six foot excavation for a dwelling house on Seymour and Oak Walkate. The bones were of ivory whiteness, and showed that the person was buried doubled up and evidently in a hurry. Several smooth stones and bottoms were found about them. All the bones are intact. They are believed to be those of a wealthy traveling Frenchman who died suddenly and was buried from the place some nine years ago, and who at the time was thought to have been murdered. An investigation is in progress.

Postmaster General Newcott's Death.

LONDON, Nov. 10.—Postmaster General Fawcett's death was due to overwork, he having no recovery from his illness of two years ago, to his unconsciousness of the weather, and finally to the treacherous atmosphere of this city of contrasts, which alternates between Arctic cold and torrid heat. Muscularly, he was the strongest man in the ministry, among the people, and he was the only member of the government who was loved and respected by all parties alike. Though a giant in stature he had childlike simplicity and tenderness of manner.

The Hartford Racing Match.

NEW YORK, Nov. 10.—The four-round glove contest which is to come off to-night at Madison Square Garden between John L. Sullivan and Prof. Laflin seems to gain in interest as the time draws nigh. Both men seem confident of winning the stakes. Billy Hyan, who has known Sullivan a long time since he went into training, weighs to-day 195 pounds, while his opponent, who is ten years older and about four inches higher, weighs 200 pounds. The betting is ground is in favor of Sullivan, at small odds.

Six Years at Hard Labor.

LOCKPORT, N. Y., Nov. 10.—The well known case of Dr. Ira Butler, alias Richmond, convicted of manslaughter in causing the death of Lizzie Cook, of this city, by criminal malpractice, was ended in the county court, where a new trial was denied. Judge Potter then sentenced the prisoner to Auburn prison for six years at hard labor. Butler, who is an old man, was completely broken down by the sentence.

Murdered by His Son-in-Law.

MINNEAPOLIS, Minn., Nov. 10.—Thomas Hastings, a farmer, living near Excelsior, was shot and fatally wounded yesterday by his son-in-law, Andrew Campbell, aged 30 years. Campbell had abused his wife, and her father had taken her home. Campbell went to the house while the family were at breakfast, and demanded his wife. The result was that the men quarrelled, and Campbell shot Hastings, inflicting a fatal wound. The murderer was arrested.

The Cooley-Tennent Match.

PHILADELPHIA, Nov. 10.—The scull race for $500 a side between Peter F. Conley, of Boston, and John Tennent, which was to have been rowed at McKeesport yesterday afternoon, has been declared off. Tennent's backers claim he is not in condition, and have forfeited $100 stake money, besides the $150 given to Conley for his expenses. Conley's backers left for Boston this morning.

A Remarkable Feat on the Ice.

CANTON, Nov. 10.—While a boat manned by Canadians was ascending one of the Ice rapids a heavy broke, allowing it to be swept down the powerful current. By the most skilful steering and manœuvring the boat was brought safely through. The feat is regarded with general admiration by the officers in command of the expedition.

A NEW PAVEMENT.

The undersigned has secured the exclusive agency for the sale of the

Diebold Patent Iron Stone,

whichfor elegance and durability, is unsurpassed, and in price will compare favorably with any other pavement now in use. It is the most beautiful pavement known for walks and yards, presenting a fine tiling and street blocks. Also used to build fire and burglar proof vaults and for building purposes generally. Two pavement blocks have many exciting peculiarities—They show no perceptible wear; are impervious to rain, snow, ice and water, as well as all kinds of moisture. We have specimen samples at the grocery store, Somerset corner, for public inspection. The Diebold Stone can be seen in use on the Stone walk in front of residence of Dr. Clark on Somerset street, and in front of residence of Mr. Stillman on Somerset street, and in front of residence of Mr. Stillman on Somerset street, and in front of residence of Mr. Stillman

MODERN HIGHWAYMEN

Some Incidental Remarks About Sleeping-Car Porters.

"Change Sleeper, Sir!" The Ruthless Mastery and Consummate Dexterity of the Porter—The Magnificent Mystery.

(Detroit Free Press.)

The railroads are the great highways of the day. The highwayman, now and then, stops the train, but usually he appears as the porter of palace cars. As you pass the ticket gate and come alongside the long line of cars standing expectant, waiting for passengers, you will notice the porter standing at the steps of the Pullman or Wagner, and as the crowd passes him he reiterates the words:

"Change sleeper, sir!"

These words are varied according to the train. It may be Rochester sleeper or Buffalo sleeper or Limited sleeper. The porter says "sleeping car." If you are tired and want to get to bed soon, you say to the high wayman:

"I wish you would make up my berth as soon as possible."

"Which is your berth, sir?"

"Lower three on the Vermont side."

"Very sorry, sir, but a lady, a sick gentleman and a child or two young men are ahead of you."

As you were going to say:

"Tell me where I can get a drink. I'll do my best, sir."

Later he comes to you and says in a confidential manner and a cringing, fawning voice:

"I've managed to get you a berth, sir, made up second, sir. Lower three, I think you said, sir. I always like to please my patrons, sir. Hope you'll remember me, sir."

The latter phrase is a delicate bit of flattery. He wants you to think that he recognizes you as an old hand. When the train starts he is busy for an hour or two. He works in rather straitened quarters very deftly. People pass and repass him in the narrow isle, but he pokes on, never stirring. A dozen of him to get their berths made up, and with great tact he satisfies them all. His method of working is worth attention. He places the lower cushion on the floor and draws the seats over it, making a bed of it of great depth. Then he lets down the upper shelf and fishes out the end boards to fit them into place, fastening down the upper shelf so that by no possibility can the lower tenant push it up if he is the only occupant of the section. If you never go to bed, you never can have so much space for his $2. He takes out a mattress and spreads it over the lower seat. He goes to the cupboard with a mirror for its door and takes some clean white pillow-slips and a couple of sheets therefrom, and holding the slip in his teeth slips the pillow inside. He repeats the process for good sheets and quilts on the bed is made, admirably. The space is very limited and he, with a peculiar and indescribable jerk, lands the sheet just where it belongs. He then turns down the sheet and coverlet in a kind of triangular manner, pulls down the window blinds, flings the heads of the long curtains over the brass rod at the top, tucks the corners in and then: "Lower three is ready, sir."

The quickness with which a car full of berths is made up by a porter who understands his business is something marvelous. In the dim watches of the night as you sleepily turn from side to side, while the snore of the fat man rises unctuously from lower four, while the jerk of the train's stoppage at some midnight station wakens you from the half reminiscent, half dreamy state into which you have fallen you hear at the end of the car a steady "swish swish." This is the lonely porter's unlimited hours of leisure, when the one insoluble knot on which he bases his claim for robbing you in the morning.

To try to escape the porter's levy of 25 cents is a practical impossibility. Man has boasted that they had the courage to do so, but no properly authenticated case has ever come to light. It requires no amount of bravery that the average American is not possessed of, let him boast as he may. The highwayman's weapon is not a sword or a pistol, but a little apparently innocent broom—a clothes broom. He calls you up to the captain's office to settle in the following manner:

"Brush you off, sir?"

"Thank you, I brushed myself off a moment ago.

"There's a bit of dust on the back of your coat, sir."

If you still demur he takes your hat and gives it a most vigorous dusting of, gradually leading you into the dressing room chamber. Then he lays on Macduff. He busts you off with energy and precision. He pats and pauls over it and exerts himself very lightly. T. does not escape and draws his head across his heated brow as if he rarely encountered so rough a job. He's seldom called on to do so harmless an operation that stage without his hand automatically seeking the quarter that lies dormant in his pants pocket; but grant for the sake of argument that there is a man who can "calmly say "Thank you," and take his crimson coat in the car again. The next stage is after the fashion of the porter pulling up and down the aisle and stops before you, saying:

"Did I brush you off, sir?"

"You did."

"Asked I hope you're satisfied, sir."

"Perfectly satisfied."

A pause.

"I'm glad you're satisfied, sir."

Another pause, during which you feel that the eyes of all the passengers are on you and that you are becoming unpleasantly conspicuous.

"Were your boots blacked to suit you, sir?"

"They were well blacked."

"You see, some time ago I was out of blacking and could not get any, and I thought, sir, just, I never see no gentleman complain."

If you shake no more at this, the final catechism is begun. The porter's object is all politeness to throw away no such a chance. He hints his hand towards you while he holds the whisky bottle low down and demurely:

"Porter, sir, I'm a poor man and desirous. Then he gets his quarter.

Women in Politics.

(Boston Post.)

Miss Kate Field came in last evening from Lundy riding the horse that was stolen at the time the Chicago women were attempting to secure their full rights to vote. She received the aid of a couple of policemen and a patrol and $20 for their services. The Indians held in vault as the rubber's cheek, and at the first opportunity they will be sent to Canada. The next day the soldier liberated his captives, and stealing another horse from George shipped the country. King now says he is going to vote for Tucker to fill the office from constable up.

Changes of Pressure.

During sudden changes of temperature siphons containing mineral water become dangerous. A rapid rise of the thermometer will cause the pressure of the gas to rise 50 per cent., and produce violent explosion.

The baker's assistant—disgusted.

Man, as a social being, at a tender age begins to be the victim of the thoughtlessness, curiosity and cruelty of his fellow beings. Ill-natured as I am, I cannot but pity the tender flesh of a "crying boy" for he is subjected to such unwholesome and unchristian like conduct of calling names, making sport of the veil of a child and other various cruelties.

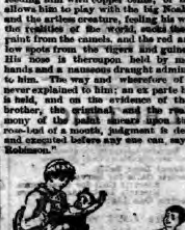
His fresh young palate is contaminated with sour milk; he is swathed in uncomfortable, ill-fitting garments made by unskilled hands, and (if he be the first born) is the victim of well-intentioned needle-women, and each succeeding scion of society has a distinct type of baby in her eye. Pause for a moment, pray, and imagine the discomfort of wearing garments, made at different periods for two, three or four previous babies, when you are "it" yourself.

Reason out the consideration of how much the child is clad with "misfits," how his sensitive feelings must be harrowed when his grandmother and other female relatives surround him, trying to please woman, "Kotcher, Kotcher, kotcher!"

"Kotcher, Kotcher, Kotcher!"

"Now, who does he look like?" When his bachelor uncle presents his watch to him he has been known to say, "Here, and his father, proud of his offspring, makes hideous faces at him. Think of the misery of the little being freed from the bandages! he is hot known, under the blankets, left to the tender mercy of a most unskilled nurse, hardened by contact with a constant succession of such little cusses.

Then trials through our manikin is put into short clothes, these a legacy from his elder brother. Now, his serious torture begins. His wicked brother taunts him with wearing coat-of clothing, and feeding him with copper cents; or mayhap allows him to play with his big Uncle's watch and the artless creature, feeling his way into the realities of the world, sucks the graphic paint from the camels, and the red and yellow spots from the tigers and lurches pigs. His nose is thereupon held by merciless hands and a nauseous draught administered to him. The way and wherefore of this is never explained to him; no ex parte hearing is held, and on the evidence of the elder brother, the criminal and the real instigator of the foul deed, upon him is he condemned of a month, judgment is delivered and executed before any one can say "Jack Robinson."



A nauseous draught is administered.

And now he has begun to talk; and therefore his female relatives above-mentioned, instead of giving him the example of words he and pours "Bogtin and Bosh" down his throat on behalf of baby talk. He is encouraged in lisping himself talk, ridiculous by calling a horse a "hoss," his father "da-da," and a locomotive "chew-chew."

Every new-comer asks him to say who she may be, as if the little chap cared a button, and when baby-talk has been forgotten the ill-bred grown up people rear with laughter at the mistake.

Can we wonder that the mortality among infants is so great—that as soon as they get hold of the use of their hands and lungs, they do their best to express their disgust with the world in which they find themselves?

Brother Gardner's Political Advice.

"I done made up my mind," he went on to tell Uncle Eliphus Smith, "dat de next time I'm called on to make a speech I'm gwine to confine myself to any political party. You fo' 'members has seen fit to disregard my advice. I admonished dat you sat on de whole.

"Now, den, I'm gwine to repeat de 'vice. De committeemen am a very record document, but you kin buy my groceries wid a $2 bill.

"De Magna am de white chery candidate for constable to-day, but he's de same Magna am of you will remember, but less reverence for de Magna an' mo' shoes for de chillun will increase your standin' among yer neighbors.

"De bulwarks of liberty, about which we hear so much, must be defended often wid more lives, but de Magna am gwine to stampeded out on de sidewalks kase he can't pay his rent de bulwarks of liberty am pretty thin.

"Fifteen-cent coffee gits up and crows dair arms around an' talk to you of de principles of Monroe, an' Jefferson, an' Adams, an' Lincoln. Principles, gentlem, am all right in dair way, but a principle kin no more swallow I will week codfish an' cold 'taters by dem' yer no fer on yer pill.

"De grand old principles of ground coffee can be tasted at 25 cents a pound, or two for a dollar, but dey won't pay rent nor buy soap

Consumption can be Cured!

This fact has been demonstrated in more than

TEN THOUSAND CASES by

DR. S. D. HOWE,

The Great Consumption Doctor of New York, PROPRIETOR OF THE

Arabian Medicines,

Celebrated throughout the World for their remarkable Cures.

Dr. Howe's Arabian Milk Cure.
Dr. Howe's Arabian Tonic.
Dr. Howe's Arabian Liver Pills.

The Only Medicines that have ever been known to positively cure Consumption.

TESTIMONY

Of the Hon. Jos. E. Gary, Judge of the Superior Court, Chicago, Ill.

CHICAGO, Dec. 14th, 1876.

DR. S. D. HOWE,

DEAR SIR:—Permit me to add my grateful testimony to the army of witnesses to the virtues of your justly celebrated Arabian remedies. For a long time my wife was seriously afflicted with hacking cough, oppressed breathing, soreness of the chest, and constant sweats, and for the last portion of the night lung and soother the shoulder blades. Her suffering were intense, and she became extremely nervous and prostrated. Her disease was pronounced consumption by the physicians of Chicago and other cities, whose prescriptions had been taken without benefit. When you visited Chicago in June, 1876, we called on you, having very little hope of deriving help from your treatment. We were inspired with hope by the skillful manner in which your thorough examination was conducted, and the satisfactory explanation with which you closed your diagnosis. My wife determined to take your medicines in accordance with your plain and practical directions. She began to use the Arabian Milk-Cure and Arabian Tonic. Their beneficial effect at once became manifest. Her cough lessened and soon ceased, respiration became easy, the soreness of the chest was relieved and all pain removed, she began to gain in flesh and improve in strength and appearance. I feel safe in saying that your medicines and skillful advice have saved the life of my wife. She unites with me in this grateful tribute to the merits of your remedies.

Respectfully yours, JOSEPH E. GARY.

The above letter is only one among thousands received from all parts of the United States.

Price of Milk Cure & Tonic, each $1 per Bottle.

PILLS, 25 Cents per Box.

JOTTINGS.

—The Board of Managers of the Fire Department meet this evening.

—Tickets for the Y. M. C. A. course are ready for delivery at Reynold's.

—Dunellen Engine Co., No. 1 took their apparatus out for a wash last evening.

—With but one exception Mark Twain's readings are from selections unpublished, and are said to be exceedingly funny.

—Mr. Joseph Blatz of Somerset street has disposed of his business to Mr. Bilsum, son of Jacob Bilsum, proprietor of the Farmers' Hotel.

—A military company has been organized in the public school of this city, numbering about fifty recruits, who drill in the school building after school hours.

—The Monday evening prayer meeting for young men held in the hall of the Y. M. C. A., last evening was well attended, and led by Mr. E. L. Bonny.

—The Vosseller Guards and delegations from other Democratic Companies will go to Bound Brook this evening to participate in the parade that is to take place there.

—City Judge Good has gone West. He is making a trip through the Western states. During his absence, cases which are usually taken before him will be tried before Mayor Maxson.

—At the conclusion of the evening session at the Casino Roller Rink last evening Messrs. Pound and Marsh of the Plainfield Bicycle Club gave an impromptu exhibition of fancy riding.

—Harry W. Tufts, who has the reputation of being among the very best bicycle riders in the country, and who can ride on one wheel, or upstairs, is to be at the rink to-morrow evening.

—An illustrated lecture by Mr. W. J. Marshall, in the Congregational chapel last evening, was well attended and highly appreciated. The views presented were of some of the grandest scenery in America.

—There will be a clay pigeon match on Saturday next between two of Plainfield's local sportsmen for ten dollars a side. The match is to take place at Campbell's Club House. There will be plenty of live birds on hand for general sweepstakes.

—The choicest seats for the Park avenue course of entertainments are being rapidly taken at Reynold's pharmacy. This course promises to be one of the most popular ever given in Plainfield. It is considered well with the one dollar charged for the three entertainments to hear Miss Nelle Brown or the Valencia Orchestra. Secure seats now.

The Saintly Johnnies.

The Republicans are very unloving just about this time toward the Saintly Johnnies' This is the sort of mild-mannered epitaph that one intemperate Temperance man furnishes the Prohibition candidate for President in the Albany Journal:

Here Lies
J. P. St. John.

He deserted the wife and unborn babe in early manhood. She died broken hearted. In middle life he betrayed his country and the cause that had called him to the rebellion and rum party. He finally died, loaded more heavily than was Benedict Arnold, with the contempt of the American people.

The Newark Daily Advertiser speaks of St John as follows: "His treachery, aided and abetted by thousands of brainless cranks has set back the cause of temperance ten years. The Prohibitionists have virtually gone over to the Democratic party."

The St. John vote in this vicinity is not as large as many supposed before election, but decidedly pugnacious.

Thanksgiving Proclamation.

WASHINGTON, D. C., Nov. 7.—President Arthur to-day issued the following Thanksgiving-day proclamation:—

A PROCLAMATION.

The season is nigh when it is the yearly wont of the people to observe a day appointed for that purpose by the President, as an especial occasion for thanksgiving unto God. Now, in recognition of this hallowed custom, I, Chester A. Arthur, president of the United States, do hereby designate as a day of general thanksgiving, Thursday, the 27th day of this present November. And I do recommend that throughout the land the people desist from their accustomed occupation do then keep holiday at their several homes and in their several places of worship, and with heart and voice pay reverent acknowledgment to the giver of all good for the many and great blessings wherewith he hath visited this nation. In witness whereof I have hereunto set my hand and cause the seal of the United States to be affixed.

Done at the city of Washington this seventh day of November, in the year of our Lord one thousand eight hundred and eighty-four and of the Independence of the United States, the one hundred and ninth.

CHESTER A. ARTHUR.

The corner stone of the new M. E. church at South Bayville, Cape May county, will be laid on Wednesday. It will be thirty feet and surrounded with a spire 60 feet high.

An Indian Story.

Mr. A. H. Johnson, the artist, of this city, and brother of the popular Park House proprietor, is full of interesting reminiscences of his life in New Mexico. He was located, during the years 1864-5-6, with the Navajo Indians, near the Rio Grande, or, as it is known among the Spaniards and Mexicans—the Rio Grande del Norte—the great river of the North.

Mr. Johnson is a physician and had a government appointment among those Indians, also numbered about seven thousand. He was revered as the great medicine man, all pharaohs being thus reverenced. Mr. Johnson relates an anecdote illustrating this, which occurred in his own experience.

It was his custom with a companion to go hunting bear, deer and antelope. One evening after dark, while returning successful in a catch, he heard a mournful, plaintive, suddenly plunging and acting strangely. Mr. Johnson could not account for this, until happening to reach forward to pat his horse on the neck, he found an arrow embedded in it, which he removed and hurried the animal forward to the reservation.

Next day an Indian called at the hospital of which Mr. Johnson was in charge, and indicated by signs that he wished a tooth extracted. Mr. Johnson offered medicine to cure the supposed pain, but the Indian refused any remedy except the removal of the tooth. When his wishes were complied with he took the tooth, and pounded it with an axe into a powder which he buried.

After this work was completed the Indian returned to have another tooth removed the same manner. Mr. Johnson refused, and upon the Indian insisting, called an interpreter, who explained that nothing else would satisfy the Indian. There were peculiar reasons why it was necessary. Mr. Johnson thereupon reluctantly removed a second tooth, when the arrow wound was pursued by the Indian as with the first tooth.

As the Indian returned a third time, Mr. Johnson demanded to know of the interpreter the reason for it. Then it was explained, that the Indian was the one who the evening before had shot an arrow at Mr. Johnson in the darkness, mistaking him for some one else, and the Indian, according to the religion of the Navajo tribe, was punishing himself in atonement for his supposed offense against the Great Spirit, as is considered men an not as that related, against a medicine man. The Indian stated that Mr. Johnson stepped unhearded, only intensified the Indian's fear, and he intended to have had every one of his teeth in like manner removed as an atonement, bearing the torture with stoical fortitude. Mr. Johnson told the Indian, through the interpreter, that the Great Spirit had not given him, and the Indian departed as if a great load had been lifted from him. This self-imposed penance follows any act regarded by the Navajos as wrong in the sight of the Great Spirit, hair raising and similar pastime not however being so regarded.

An Echo.

The entrance to Stillman Music Hall renders a remarkable echo, heard only in front of the hall. A person walking along the sidewalk has the sound of each foot step echoed back very distinctly and there is quite a lapse of time between the echo and the original sound the one being so distinct as to be easily mistaken for the other. There is a story told that a couple of years since a citizen somewhat howsomeever over the election was staggering past the entrance before daylight in the morning.

Hearing the footsteps he in a loud, tone yelled, "rah for Cleveland." Echo answered "rah for Cleveland." Thinking somebody had Republican was filling the disciple of Grover, the D. G. replied "soap, soap." Echo "ope, ope." "No hope" said the D. G. "Oh, hope" said the echo. Going to see the "Sugar Scudder to-night" said the D. G. "Aint to-night" said the echo. "Did you vote for Cleveland or Blaine?" was the next question. "Blaine" was the answer. "Ho, you wouldn't catch me voting for Blaine." "Plain" said the echo. "Cleveland," said the D. G., is the next President. "Alex" replied the echo. "What will you bet?" said the D. G. "Hat" he understood the reply to be, and responded all right, who are you." "You," was the answer. "Me" said the astonished D. G. "Me" answered the echo. At this juncture the puzzled D. G. caught on the point, and putting his tail, that is, his coat tail, between his legs, slunked off into the outer darkness and disappeared as the approaching policeman's tread made suggestive sounds.

The New Library.

The Job Male Library and Art Museum is rapidly progressing toward completion. It is expected to be opened by New Year's. Now that we have the foundation of a library, it is certainly the duty as well as for the interest of each one to help at the superstructure. All have an equal interest in a work of this kind, whether they themselves are to derive any use of it or their fellow creatures.

Everybody has some time to read; five minutes a day amounts to something in a number of years. In these days there is no excuse for not doing so, except on the score of want of interest—if that is an excuse. Think of Robert Collyer, who left school at the age of eight, and then worked at the iron business from day to day, until he became what he is—and without access to a public library until later in life. And yet he says himself that the people among us from their accustomed occupation do their loop holding at their several homes and offices, several places of worship, and with heart and voice pay reverent acknowledgment to the giver of all good for the many and great blessings wherewith he hath visited this nation. In witness whereof I have hereunto set my hand and cause the seal of the United States to be affixed.

Done at the city of Washington this seventh day of November, in the year of our Lord one thousand eight hundred and eighty-four and of the Independence of the United States, the one hundred and ninth.

CHESTER A. ARTHUR.

The Postmastership.

Already Democratic headlights are casting searchers to the printwork for the Post Office. There are said to be about forty aspirants for the position. Billy is credited with a determination to secure it for himself at all hazards. The esteemed Judge Harper, whose writings have for years appeared as Billy's editorials would seem to be justly entitled to Billy's powerful influence, as a means of paying for the writings, if the Judge would care to surrender his Judgeship and assume the cares of the office, should he secure it. It is believed, however, that he is personally not inclined to take any steps for the position. He would of course have to surrender his position as tax Judge. Col. Scott has declined to be considered in the matter at all, preferring to devote himself to his studio, considering art more profitable than would be such an office to him. Next, to case Judge Harper would not accept the position, Judge Wadsworth is considered as the most deserving of it for his services to the Democracy, and the chances are as much in his favor as in favor of any other candidate. The name of Gen. Sterling and P. Runyon are among the others most prominently mentioned.

Whether Billy and these gentlemen have estimated such use of their names depoteth saith not. But their friends should know a thing or two, whereby they might save a struggle, until some more unpleasing occasion.

These friends suppose that the term of the present incumbent, Postmaster E. R. Pope, expires next March. As a fact it does not expire until March, 1885. That would be a rather lengthy period to wait. Billy has hankered after it these many years, and, if he could, would move heaven and earth to get it. He will wait "till the clouds roll by," said perhaps for some time subsequently.

The United States Senate is Republican, and the Senate must confirm any nominations of Presidents Democratic.

A bond to the amount of $27,000 must be furnished also.

Whetherthe principles of civil service reform are to apply or otherwise is a matter of no consequence at present, since nothing but death or removal for cause, will leave a vacancy to be filled, and neither is probable.

Judge Cruser.

At Rocky hill, Somerset county, there resides Mr. Van Dyke Cruser, a regular old time Democrat, who has served as Presidential Elector three times and was a judge of Somerset county courts. Mr. Cruser is 91 years old and has been married 66 years. His wife some weeks ago fell down and broke her hip, but has so far recovered as to be able to get around livelier than some young people.

About two months ago Mr. Cruser's son, Van Dyke, came up from New York to see his aged parents, and his father said to him, "Dyke, I will kill a chicken and have it for dinner." Accordingly he took his pole and line and started off. Dinner time came, but Mr. Cruser came not. At supper time he had not arrived home yet, and his wife getting worried had some of the neighbors out searching for him. His son was told that he had been accompanied by some were, when in search of the finny tribe, and he procured a boat and started off. when he arrived near the place, around the bend of the river, he discovered his father sitting in his boat fishing away as though he had just arrived instead of having been there all day. "Father, where have you been, and why don't you come home?" asked the son. "What, come home when the fish are biting good; why, I would stay here all night if they bit good." Whereupon his son rowed up and landed in the boat and there lay 82 handsome pike.—New Brunswick Times.

The Municipal Election.

EASTON EVENING NEWS.—Our city has now grown to such dimensions that in the selection of candidates for its offices, the convenience and necessities of the public require that as many as possible be in the city during the day time. This is especially true of the Mayor.

He is charged by the charter with the duties and other responsibility of the City Judge when the latter is absent or unable to act, and at one time during Mayor Maxson's administration the City Judge was absent from the city six weeks. He should be accessible to the office by all citizens, and strangers having business with the Mayor, and visiting the city for that purpose, should find him in Plainfield.

He has by the ordinances of our city control of the police force and is charged with discretionary power of granting licenses to shows and exhibitions. He should be in Plainfield during business hours and people having business with him should not be subjected to the necessity of going out into the night to find him.

The office is one of personal trust and cannot be delegated to a deputy.

Give us a Mayor who performs his duty in no partizan spirit and who can be seen in business hours and the people will be satisfied.

AN OLD RESIDENT.

State Items.

The annual inspection of the road bed of the New York Division of the Pennsylvania railroad was made on Saturday.

A grand mission of the Lazarist Fathers began at St. Mary Magdalen church, Millville, yesterday, and will continue throughout the week.

A Bewildered Pleasure.

Hand, powder and pencil drawing. Kemp's Gallery for the above and lessons in connection. All who would learn to draw or paint in oil or who desire to be enrolled as members of the class in the morning as a regular thing, and long terms. All persons attending with their children will be admitted free. We will find specially suited and to a majority of cases a permanent home. The proprietor has not been idle during the summer months, but has been at work preparing for the winter season. Park avenue is rapidly becoming the favorite part of the city to live in, and the location of Kemp's Gallery could not be more favorably situated. Price 50 cents and $1. Artist on duty.

Personal.

Mrs. J. M. Schoch, Jr., of East Front street, is visiting at the residence of her mother, Mrs. Marsh, in Rahway.

Mr. J. H. Jackson, and bride returned on Monday from their wedding trip, during which they visited Niagara Falls, Chicago, Milwaukee, and points in the State of Mississippi. Mr. Jackson is of the firm of Jackson & Coddington.

Special Notices.

TUESDAY, NOVEMBER 11, 1884.

THE NEW SHERIFF.

In no election in this State was there ever a more remarkable personal tribute to any man's worth, than that paid to Mr. Stiles on Tuesday. This, too, was not owing to any bad repute of his opponent, and was received in the face of every effort on the part of the friends of Mr. Keasbey to make him suffer the expense of his associates on the Democratic ticket. The Democratic electors received a plurality of 697, and yet Mr. Stiles was elected with 1,475 to spare, getting no less than 475 votes more than the head of his ticket. His gains were as follows:

Rahway,	107 ahead of Rep. electors.
Elizabeth,	153 " " "
Plainfield,	117 " " "
Other towns,	98 " " "

His remarkable personal popularity was of course a great factor in his victory, and the result has not belied our assertion that he was "the most popular man in the county." But there were other and stronger causes which swelled his vote to such remarkable proportions. The abuses which have existed in the Sheriff's office under the present administration have been a crying evil. Not the least has been the bad judgment, to use the mildest term, that has been evinced in the drawing of both the grand and petit juries. The character of the selection of the grand juries in many cases have given much ground for criticism and complaint, and that too, not unjust nor undeserved. That there are abuses there can be no denying. These abuses must have been most flagrant, else the sanctity of the grand jury room would not have been violated and such stories of omissions allowed to leak out. The temperance men are highly indignant at the contempt awarded their presentments of violations of the liquor and Sunday laws. One case is given where those who made the presentment stated that there were witnesses, giving their names, who would swear, that they had bought liquor on Sunday, and still the grand jury failed even to summon one of them. The temperance men, no doubt, formed a majority of those who constituted Mr. Stiles' margin over the Republican electoral vote. They were resolved to use every effort to put in a man who would fearlessly strive to wipe out the present abuses, and on whom they could rely to draw a panel of men to be depended on to execute justice without fear and without favor. They succeeded and they have elected the right man for the purpose. He will have the hearty support of all honest citizens in the trying reformatory duties of his administration.—Rahway Advocate.

Among all nations, but especially among the Americans, we find self-made men. Yes, go back as far as David's time; he was a noble specimen and so was Solomon, of a rich man's son. Even in our own city there are many, sometimes lovely, often unlovely pictures of men, who have become rich by their own labor, and who but imperfectly speak their language. Their sons who have done nothing to give them a right to their wealth, but by allowing themselves to be called sons, often despise the business which has brought them their money. How seldom do they give the tenth of their income, which was asked of the Jew, and certainly is required a thousand times more of the Christian. Do they on their death bed, give David's dying injunction to Solomon "to serve his God with a perfect heart," to their sons? If it is true that there is no heaven anywhere for those who cannot enjoy and appreciate it, what will their hereafter be?

THE NEXT PRESIDENT.

TO-DAY IT WILL PROBABLY BE DECIDED WHO IT WILL BE.

The Latest Western Returns—Uneasiness in Washington Felt by Government Clerks—House Counting Retained by the Democrats.

NEW YORK, Nov. 11.—The Republican national headquarters are practically closed, but the committee has leased the building until the 15th prox., and will confer until that date. John Trousdale, of the Republican national committee, said that the Democratic claim only 861 in the state, and that the Democratic investigation of returns in the city had thus far cut down that number by scores in Mr. Cleveland's favor, leaving only 638. At the Democratic state committee, however, the statement was made, "We are all right and are struggling now to save what is already ours."

The Democrats claim to have received a letter from Indiana alleging that Knox, Lake, New and others had matured a plan to raise the returns in certain counties, and that "in Brown's district in one county the returns had been raised 1,000 Democratic."

It is also stated that in one precinct in Troy, N. Y., twenty affidavits have been secured tending to prove that more Butler votes were cast than were counted.

The New Jersey Legislature.

JERSEY CITY, Nov. 11.—The Democrats of Salem county are about to take steps to have a re-count made of the votes cast for state senator in that county. Wyatt Miller, Republican, was declared elected by the twenty-two majority, and the Democrats say that a recount may result in the discovery of errors which will change the result. Such a recount may be made, under the laws of the state, on an order by the supreme court. If Miller's majority should be destroyed by the recount the Republican majority in the state senate will be turned into a Democratic majority. The Republican majority on joint ballot will still remain, though there will be a deadlock between the two branches (as there has been for two years) that will prevent the election of state officers. Secretary of State Person or State Treasurer Wright, Republican, will surpire next spring. The term of Comptroller Anderson expired two years ago, but the senate, which met in January last winter and the winter before, refused to go into joint meeting with the Democratic house to elect his successor, and Mr. Anderson has held over. A part of state district of railroads is also to be chosen. Among the nominations to be made by Gov. Abbott to the senate are a judge of the court of errors in place of Judge Cole, whose term of office expires in place of Judge McCarter and in Monmouth and Middlesex counties, and prosecutors in Bergen, Burlington, Gloucester, Mercer and Salem counties. If the senate should be Republican Senator Schenck, of Middlesex, will probable be president, though Senator Griggs, of Passaic, is a candidate. The only assemblyman mentioned for the place of speaker of the house is Mr. Jenkins, of Morris.

Some Western Returns.

CHICAGO, Nov. 11.—The Illinois legislature is still in doubt. The Republicans admit this and the Democrats claim a three majority on a joint ballot, and the latest reports are favorable for two. The congressmen stand ten to ten, a Democratic gain of one. If Blaine carried Illinois every fraud in the Fifteenth district they will gain two.

The Iowa Democrats gain three, standing five Republicans and six Democrats.

Mr. Horr's defeat in Michigan makes the Democrats gain one. Both parties still claim the Michigan legislature, with the best prospect for the Pustnicks.

The Chicago Tribune continues to claim Blaine's election, and to prove its statement claims 1,988 plurality for Blaine in Genesee county, N. Y. This, too, after admitting the official fact that the county chose Cleveland only 988. The Tribune's course in laboring to keep up the excitement is severely denounced by many leading republicans, and who are disposed to accept the result and be glad to work.

The Delay Stopping Government Business.

WASHINGTON, Nov. 11.—The delay in finally settling the presidential contest is having a very bad effect upon the government business, and is wearing heavily upon clerks in the departments. Of the thousands employed in the various bureaus nearly all are kept in such a constant state of uncertainty as to their tenure of office that they are almost wholly unfit for work. Many steady, hard-working clerks dislike even to attempt to be accurate and quick at figures, find it utterly impossible to obtain the same results in adding a column of column two or three times, while the draughtsmen report since great difficulty in keeping their nerves sufficiently steady to make the drawings required of them. One of the chief clerks of the officers in the treasury says that since Tuesday his clerks have been utterly worthless. The excitement will probably subside this week, and the civil service together with the faithful performance of their duties will, it is thought, convince the best of the civil servants of the country that his is merit rather than in political accidents.

Election Inspectors Locked Up.

NEW YORK, Nov. 11.—The four inspectors of the Twenty-fourth election district of the First assembly district who were arrested on Saturday charged with tampering with the election returns were arraigned before Justice Duffy at the Tombs police court. During the examination of the prisoners it was shown that the canvass had been taken two or three times, while the draughtsmen reported

THE FRANCHISE BILL PASSED.

Why Parnell and His Followers Supported Mr. Gladstone.

LONDON, Nov. 11.—The franchise bill has passed its crucial and final stage in the house of commons. The house was in committee of the whole, and the question was upon the third reading, and passage of the bill. On this question a division was ordered. It was known that the government would in any event have a sufficient majority to carry the bill, but great interest attached to the vote of the Parnellites. They had voted with the Liberals on the second reading of the bill, and had thereby given the government a respectable majority. But the Conservatives had supported the Parnellites in the debate, in which they sought to over-throw Lord Spencer and the Dublin Castle government. All these were strong hops that the Irishmen would now revenge themselves by voting against Mr. Gladstone. They did nothing of the kind. When the division occurred every man of them walked into the Liberal lobby, and the government repeated its triumph of last week.

The Tories are wild. They insist that there is a secret compact between Mr. Gladstone and Mr. Parnell, and accuse both leaders of all kinds of treachery.

Just after the vote was announced, your correspondent encountered Mr. Parnell in the lobby of the house, and asked him as to the truth of the persistent rumors of a bargain. Mr. Parnell replied: "There is absolutely no truth in any statement to the effect that I or my colleagues have entered into a compact with Mr. Gladstone. Moreover, I can also state that the Irish members of the house never will enter into any secret agreement with the present government of England. What we have to say to the treasury benches will be said on the floor of the house. We will vote for whatever, in our belief, is best calculated to benefit Ireland. Whether it benefits or injures England is a secondary and insignificant consideration. The franchise bill, as now passed by the house, will undoubtedly increase the power of the Irish people. Therefore, it was our plain duty to support the government until the bill was passed, and we have done so."

A NOTED CLERGYMAN.

A Man Who Did Much for the Church and Humanity.

BOSTON, Nov. 11.—Rev. Charles F. Barnard is dead at Somerville, aged 76. He was a member of the famous 1829 class in Harvard, having for classmates Robert C. Winthrop, George H. Hillard, Oliver Wendell Holmes, Thomas S. Fox, Henry I. Bowditch, James Freeman Clarke, and others. He was a life-long pastor in Boston. He started the first chapel for the children of his neighborhood, and in a month he joined his school to that of Rev. John Pierpont in the Hollis street church, he officiating. He forecast the social element in churches of the present time in a day when no other church or Sunday school in Boston, perhaps in the United States, included in its plan a parlor and playroom, with walls covered with classic engravings and medallions. He opened a large free public library in the chapel which, until the opening of the city public library was widely useful. His early efforts in these directions made it easy many years later for the Young Men's Christian Association and Union to succeed. He was also the originator of the Boston public garden and founder of the first public bathhouse. He originated the American Social Science association, and was instrumental in forming many other philanthropic societies.

Palatka Again Fired.

JACKSONVILLE, Nov. 11.—The determination of the negro population to burn that part of Palatka which escaped the conflagration of Saturday morning was again exemplified at 2 o'clock. While passing over his beat, one of the citizen vigilance committee surprised a negro in an attempt to set fire to the only large block which now remains in the place. Shavings, saturated with kerosene, had been placed beneath an interior stairway, and the negro was just applying a match when the blaze betrayed him. Several shots were fired at him as he fled down the street, but none took effect and he escaped. This act has, of course, increased the anxiety of the white population, and the citizens' guard will be maintained indefinitely. This is the second attempt at incendiarism since the conflagration. It is understood that the incendiary arrested on Saturday has been removed to the jail of a neighboring county to frustrate a lynching which had been planned. In one of the bank safes, which it has not been possible to open yet, was $25,000 in specie. The heat was terrific, and empty as to the fate of the money it felt.

The B. and O. Again Cut Off.

ROCHESTER, Nov. 11.—The Baltimore and Ohio Express company has been again denied means of exit from New York city by a notification from the Erie and American Express companies, which by virtue of previous contracts with the Rochester and Pittsburg company control the traffic on the latter road. The Baltimore and Ohio has commenced running a fast freight from New York to this city over the West Shore, thence over the Rochester and Pittsburg and the Pittsburg and Western to New Castle, where it reaches the Baltimore and Ohio, but this leaves the Baltimore and Ohio without facilities of getting freight out of New York westward.

The Use of Our Army.

WASHINGTON, Nov. 11.—Lieut. Gen. Sheridan has made his annual report to the secretary of war, covering the period of his assignment to the command of the army—Nov. 1, 1883, to Nov. 7, 1884. He says that the army has enjoyed almost complete rest from active field operations, except in maintaining peace in Arizona and the northwest against roving bands of Indians. Gen. Sheridan gives the Indian question some attention, and says that the services of the military in the west cannot be safely dispensed with for many years to come.

Is Col. Burnside Insane?

WASHINGTON, Nov. 11.—Friends of Col. J. O. P. Burnside, now under arrest for embezzlement while acting as disbursing officer of the post office department, have made application to have him transferred to the insane asylum. They allege that Burnside is hopelessly insane. The application is being considered by the court authorities.

Frank Hatton's Successor.

WASHINGTON, Nov. 11.—The president has appointed Gov. John Crosby, of Montana, to be first assistant postmaster general, which office was made vacant by the promotion of Mr. Frank Hatton to the postmaster generalship.

Tom Thumb's Will.

PLYMOUTH, Mass., Nov. 11.—The executor of the will of Gen. C. S. Stevens (Tom Thumb) rendered his first account in the probate court here, showing a balance of $16,449.92.

Gov. Pattison's Turkey Proclamation.

HARRISBURG, Nov. 11.—Gov. Pattison has issued a proclamation appointing Thursday, the 27th inst., as a day of general thanksgiving, praise and prayer.

A NEW PAVEMENT.

The undersigned has secured the exclusive agency for the sale of the

Diebold Patent Iron Stone,

which for elegance and durability, is unsurpassed, and in price will compare favorably with any other pavement now in use. It is the most beautiful pavement known for walks and yards, gutter stones, floor tiling and street blocks. Also used to build fire and burglar proof vaults; also building purposes generally. These stones and blocks have most striking peculiarities—They show no perceptible wear; are non-absorbent, non-corrosive, and as well as all kinds of moisture. When dampness accumulates on the surface they become slippery, but are readily free from it. These Blocks are cast 1-12 the section from the original and the invention of Professor Speidman, exhibited at Werner's Fancy Store, opposite Stillman Music Hall. For further particulars call on or address

The Sun.

THE SUN is, and will continue to be, a newspaper which tells the truth without fear of consequence, which gets at the facts, no matter how much the process costs, which presents the news of all the world without waste of words and in the most readable shape, which is working with all its heart for the cause of honest government, and which therefore believes that the Republican party must go, and must go in this year of our Lord, 1884.

About sixty million copies of THE SUN have been sent out of our establishment during the passed twelve months.

If you were to paste end to end all the columns of THE SUN printed and sold last year you would get a continuous strip of interesting information, common sense, wisdom, sound doctrine, and sane wit—long enough to reach from Printing House square to the top of Mount Copernicus in the moon, then back to Printing House square, and three quarters of the way back to the moon again.

But THE SUN is written for the inhabitants of the earth; this same strip of intelligence would girdle the globe twenty-seven or twenty-eight times.

If every buyer of THE SUN during the passed year has spent only one hour over it, and if his wife or his grandfather has spent another hour, this newspaper in 1884 has afforded the human race fifteen thousand years of steady reading night and day.

It is only by little calculations like these that you can form any idea of the circulation of the most popular of American newspapers, or of its influence on the opinions and actions of American men and women.

If you know THE SUN you like it already, and you will read it with an increased diligence and profit during what is sure to be the most interesting year in its history. If you do not yet know THE SUN, it is high time to get into the sunshine.

FUN AT A FETE.

French Adults Amusing Themselves Like Children.

A "Merry-Go-Round" — "Sea on Land" and "The Waltzer"— Laughable Performances —The Athletes.

[Paris Cor. Inter Ocean.]

A portion of the Alley of the Orange trees along the Rue de Rivoli was given up to the well known paraphernalia of a French fete champetre, such as are often witnessed at St. Cloud, Neuilly, and in other towns of the environs of Paris. But to those who have never had this opportunity let me try and describe some of the more characteristic features of one of these festivities.

Most Americans have seen merry-go-round, or wooden horses as they are called in French, but few, after passing their 21st year, have ever gotten astride of one of these diminutive Trojan animals. But such is not the case with adults in this country, and it is just here that the fun comes in. To look at little boys and girls sitting on hobby-horses and moving about in a never-ending circle to the deafening notes of a big hand-organ may amuse the children in question and their grandmammas and grandpapas among the lookers-on. But when sleeping lads and lasses, gentlemen with gray beards and high hats, matrons and cavalrymen in uniform, with their big spurs jingling among the wooden legs and hoofs, spring to the saddle and go round and round with the joy of the little ones in their midst—why then even phlegmatic John Bull must laugh.

The new amusement of "Sea on Land" is a source of great fun and great noise—probably more of the latter than the former. Imagine a half dozen sailboats capable of holding ten or fifteen people placed in a circle and supported by a mechanism of such sort that they move around on one another the other they imitated all the ups and downs of a bark in rough sea. And, furthermore, let your ears figure to themselves the rackets produced by a big brass organ, the shouts of the voyagers, and the puffing and shrill whistling of the stationary engine which makes the organ and the boats go, and you will have some idea of what "Sea on Land" is.

Hard by is a tamer but, to the spectator, a not less amusing affair. It is called "The Waltzer," and consists of a large platform, having the shape and size of a small circus ring, which turns on a central pivot. Near the circumference, at a distance of five or six feet apart, this platform is cut into circles about as large as a barrel head which also turn on a central pivot. In the middle of each of these circles is an upright bar, with a short cross-piece at the top. This is for the support of the dancers. The floor manager shouts: "Take partners for the waltz!" and soon each circle is filled. The steam whistle blows, the inevitable organ begins its metallic grind, and while all the waltzers turn about the great center, each couple, at the same time, turns about its own center, like the rotation and revolution of the solar system, although quite unlike the music of the spheres.

But the laughable part of the performance to the on-looker is to watch the expression of the faces of the dancers. Some seem to appreciate their ridiculous position, and appear as if they would like to hide their heads. others are as solemn as neophytes in the hall room, and gaze at each other in blank surprise as they still others are almost deafened by this double turning-round, and all seem glad when the machine comes to a stop.

The other half of the Alley was given up to the gymnasts. The most popular sport of athletic exercise among the French youth is the gymnastic club. The late ball organizations in America, the clubs of the students in England, have in France as their counterparts gymnastic associations. They appear on all public occasions. At a state funeral, at the inauguration of a monument, at the ceremonies of the national holiday, the young man, attired in their different colored flannel suits, play a prominent part. What matters it whether they look pale and weak, and often dissipated, they are in uniform and in line, and are thus sure of an ovation from the crowd, for everybody knows that the least semblance to soldiery delights this martial people.

So these amateur athletes were the spectators of all eyes. There were 200 or 300 of them scattered over an acre of ground. One group performed on parallel bars, another went through the inclined bench exercises, while others were leaping over the wooden horse, or bounding from the spring-board, or climbing the double ladders, or "skinning the cat" in the trapeze, swinging on the single bar, or turning handsprings, "cart-wheels," somersaults, and the like on the ground. A platform had been erected on one side of the enclosure, and on it the jury of professors, and lovers of gymnastics. Each club in turn came up before them and went through gymnastics of feats of skill or strength. It was highly interesting to see with what earnestness the young men threw themselves into the work, what patience the jury displayed, and what hearty applause the crowd gave to every well-executed movement. All were proud of this new generation on whom depends, as never before, the glory or decline of France. I am sure that more that one Frenchman, as he stood last Sunday encouraging these youths, was thinking of the "Lost Provinces," and the great effort of body and mind which French youth made during the coming years if she is to regain her old place at the head of continental Europe.

An Objectionable Form of Suicide.

[St. Louis Globe-Democrat.]

When a man has determined to cut himself loose into aerial flight, the least that can be asked of him is that he shall do it with some regard for style and the family convenience. No man with an atom of pride will try to blow out his brains. In the first place the report of the pistol will disturb the neighborhood, and bring too many persons to the family residence before the other occupants of the house are prepared to receive callers. Secondly, nervousness may result in somebody's getting shot in the head and cause only a household excitement and a doctor's bill, without taking fatal effect. Thirdly, under the most favorable circumstances, the shooter's face is disfigured, and the shooter's features are spoiled for a deathbed photograph or a coffin exhibition, and the bed-clothes and carpet will be damaged by the splashing of crimson blood, making too much extra work where no servants are employed. Suicide by shooting has not a single feature to recommend it, and the frowning benevolently of the profession has already caused it to be tabooed in the most select circles.

Making Large Lenses.

[Chicago Herald.]

As an illustration of the numerous difficulties attending the making of large lenses it is stated that there have thus far been nineteen failures to cast the thirty-six inch glass for the great Lick telescope to be mounted in California.

Many were not in the slightest degree to blame, as it is very not too much to say in

Life and Pay of a Jockey.

A Good Jockey Earns More Than a Sea Captain.

[New York Commercial Advertiser.]

"Who are those jockeys?" asked the reporter of an old turfman at Jerome park.

"They are stable boys who show some aptitude for riding, and have good nerve. Of course, when they ride they are not exactly cast in pleasant places. There can be no more disagreeable life than that of a low-class jockey, hanging around the blind and leaping tracks. But as a rule there is everybody's sympathy, everybody's butt. But for a steady boy in a good stable, who really rides well, obeys orders and is honest, the life is not a bad one. Take Tom Hayes, Mr. Pierre Lorillard's Olney, for instance, who is a quiet, respectful, reliable young fellow, gets to be a favorite with his employer, and is very well treated indeed. For a boy of that sort, the pecuniary rewards are considerable. A salary of $60 or $100 per month, supplemented by $500 for riding or for winning a race, with occasional extra tips for pulling off a big event, easily runs up to $3,000 or $4,000 a year, or twice as much as hundreds of the average lawyer, doctor or engineer; and fully up to the income of the captain of an ocean steamer, with his great responsibility. Of course, a jockey, of course, do much better than this. They are paid like prima donnas or famous pugilists, but the army of the inferior jockeys get much less than the figures I have named. Then every employer is not as good as the Lorillard's, and in some of the purely commercial stables the boys have a hard time. But, after all, as ordinary jockey earns better wages than a boy of his class and age could earn in any other avocation, and is regarded as a hero and a swell by his own set.

"But the jockey's life, of course, along with the emoluments and honors, has liabilities to sacrifices. His nerve may fail; when his constitution is gone. He is not always often vicious brutes and very quick to detect a lack of courage and decision on the part of their riders. Even the best jockey may begin to take on flesh when he either becomes too heavy to ride or is condemned to pass a life of martyrdom in the way of dieting and physic, to keep down the ever growing corpulency. To this forced wasting may be attributed many shortened lives and broken constitutions.

"Then, to a moral point of view, the surroundings of a racing stable are not especially delectable. There are temptations to drink and excess, destructive to nerve and brain, and there is a total absence of restraint in the honesty. When the unscrupulousness of many betting men is taken into consideration, it is a wonder to the jockeys that so few succumb. Lastly, there is an overpowering dread from falls and collisions. The danger is not very serious in ordinary fast-racing, and even in handling, for but few deaths have occurred in the past twenty years. Neither sort of racing is so dangerous as polo. But accidents do occur, and, if they do not prove fatal, often have lasting effects in fracture and strain.

"However, there are many jockeys, both in this country and in England, who survive all the dangers and temptations of a jockey's career, and live very respectably to good old age. A man's fitness or unfitness is soon ascertained, and the money and fame, if they come at all, come early in life, when the capacity for enjoying them is at its height.

Topsy and Jack.

[Mary A. Denison's Florida Letter.]

We have here a veritable Topsy in our neighborhood. A little Jack enormously, with a repulsive woman's face and shoulders and figure, a dwarf at that, and claiming to be only 9 years old. Like Topsy, she knows no mother, no relations, and says she was "growed." The other day I was wending my way towards my good neighbors, who have given a home to this pitiable object, when, nearing the house, I met the most woe-begone sobs and groans, and language after this fashion:

"Now Lord 'se rise fo' yo' go take ole Jack away fo'. Oh my Lord he lay down dar in de sand, an' dar ain't no tomb stun ober him. Lord did yo' save Jack's soul? Oh, Lord, did sent yo' Jack to de debbil. Jack's I ollus wor good friends—'n oh my Lord Jack's gone dead! Dis under de piazza 'n nobody know it till he smell so; 'n dey bury him "bout as poor as Lazarus. Oh, Lord, I makes a prar—save po' ole Jack's soul, cos Jack 'n me's friends." Then followed sobs and groans. Poor Topsy, partaking the last and rises over a noble old hound, who had, it seemed, breathed his last ingloriously under the house.

Jack had been a great dog in his day. He was noted for his adherence to strangers. As soon as a family took up its abode in this place, Jack would take up his with them, for five or six weeks, would either eat with dog or hunter. Finally his day came to an end, and poor Jack lived round on the community, a shadow of his former self. When Topsy came in Peace, and the last third day came Jack, cadaverous and hollow-eyed, yet still capable of a midnight growl. We fed him on doctored food to him, all to no purpose, but it is not every dog that is honored with a grave and the tears and prayers of even a poor black wretch like Topsy.

Topsy came to the door a minute after, a most hideous smile on her strange face.

"Why, what have you been doing?" I asked, for I was curious.

"Was that you we heard praying out there?" I asked.

"No, miss, I's playing circus," was the response.

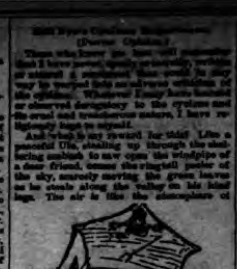
So much for Topsy's reliability.

Edward Everette Oratory.

[Hon: Parley Poore.]

Edward Everett was not a magnetic orator, who could sway masses with his impassioned words and stirring gestures. His sentences, always carefully considered and committed to memory, were uttered with precision, clearness and force. His gestures, though sometimes too heavy for impassioned words, were yet expressive and graceful. His tones were rich and varied, and his language was chaste, elegant, and, at times, poetical. His manner was that of a gentleman, his temperament too cold. His sensitiveness to reproach too keen, his constitutional reserve too bashful and repelling, to succeed in those arenas of public debate where heavy blows are given and taken, and where the loud voice, the rustic manner, the hale-fellow sociality and reckless dashing had often more to do with results than the most cultivated judgment, phrases and a charming voice in congress, he failed.

He failed, not only to acquire the influence due to his superiority as a scholar and speaker, but he failed also in the simplest perceptions of ordinary events. He stared from astonishment at the most ludicrous incidents; he would almost obsequiously bow to the most common acquaintance he encountered like one ignorant and unpracticed in the forms of life. His look seemed rather of his apprehensions than of his conscience.



It sought out the young and the fair.

death. No sound is heard except the dull thud of the woodman's axe as it buries itself in the heart of a pine tree that belongs to some one else. The sun has already hidden his dull gray cloud that is faced with pale green. Still lower down the steel gray and purple clouds come boiling over the tree tops. The tree bird makes a few desultory remarks, Katy-did says "good evening," and the premature twilight has come. Up from the south west comes a low, distant roar, a crash, a roar, like twenty comets in joint concert, the rush of falling trees, the crash of giant-leafless, the terrific clang of falling voices, and like the deadly chirps of heaven's artillery, it is over. That is a cyclone—one of the adult variety when it is feeling well. When you see one of that kind sliding up into the sky, do not try to twist its tail as it goes by. It takes a strong, quick man to reach out over the dashboard and twist the tail of a cyclone. He might be strong in his wrists, coal-headed and soon in movement.

The cyclone which visited Northern Wisconsin on the 8th inst. was about a mile and a half wide, and lasted through a period of time, I would say, such as would be measured in pronouncing the word "Stent" in an ordinary tone of voice. It blew down three churches, sparing all the saloons, jerked the school buildings crooked, knocked the postoffice silly, and demolished four stores and places of business. It killed two of the most promising young men and purest Christian women in the village. Then it went out into the forest where I was riding along, tipped me over and broke my leg. Everywhere it sought out the young and

It knocked me galley west.

fair. It spared the old, the sinful and the tough, but spent its fury on the tender, the good, the true and the beautiful. Is it surprising that the people are galley west? No, indeed! I am only surprised that I am alive.

A Familiar Name.

[Detroit Traveller's Magazine.]

"Yes, gentlemen," he said, "I'm a well known man. I'm a New Yorker, and my name is familiar to the American people."

"Were you a passenger on the river steamer?"

"No, sir, I left in the war, but not as a general."

"Congressman, perhaps, or governor of some state?"

"No, sir, I'm not a politician or a statesman; I am a private citizen and proud to say it."

"Well, if you are not a great soldier or statesman, what is it that has made your name a familiar one throughout the country. What is you?"

"I'm John Smith."

Barred Out.

[Puck.]

The commercial fate of ex-Consul American products is unappreciative Germany.

Bloomington Eye: "Have you," asked the judge of a recently convicted man, "anything to say why sentence of death should not be passed?" "No, your honor," replied the prisoner. "My lawyer took my last case."

"What is more acted to accomplish," said a lecturer, glaring about him, "than the relentless power of the Mastodon?" A bespectacled looking man in the rear of the building softly replied, "Its foundations."

Signal Office Prediction.

Fair weather, north to west winds, slight fall in temperature, higher barometer.

Chronological Events.

Panic in England in 1697.

JOTTINGS.

—Drill nights, No. 20 has been returned to this city repainted and repaired.

—There will be a meeting of the Y. M. C. A. Literary and Debating Society in the parlor of the Association on Saturday evening next.

—James Murphy, a tramp, was brought before the Mayor this morning on a charge of being drunk and disorderly on Second street. He pleaded guilty and was sentenced to thirty days in the county jail.

—The Democratic and Republican clubs are arranging for a joint parade as soon as the result of the Presidential election is definitely announced, the clubs representing the winning party to take the head of the procession.—Elizabeth Herald.

—Plainfield Engine Co.'s ball to-morrow evening at the rink, promises to be the greatest success of this kind which has ever occured in this city. The Committee is sparing no expense to the end. The $500 organ and the $15 castor on exhibition at Butler's Drug Store are among the features as explained in the advertisement.

—Messrs. Maybee and English paid a flying visit to Plainfield to-day, remaining but a few hours, and going away on the 12:30 train. They were shown around town, visiting Reform Hall and Sullivan Hall. Mr. Maybee said that Plainfield is the banner town of the United States, in the Temperance work, the center, and that he would like to permanently reside here, so pleased was he with the place.

—In the case of the Demarest executors against Henry S. Little, Receiver of the Central Railroad of New Jersey, a motion for a new trial was argued before the Supreme Court Tuesday. Applications was made for a new trial on the ground of excessive damages awarded by the juries in the two trials held. The first jury awarded $50,000 and the second jury $30,000 damages. Decision was reserved.

Sheriff Stiles Swears.

At 10 o'clock yesterday morning there was a gathering of prominent men of the county in the clerks office, Elizabeth. They were present to witness the administration of the oath to Sheriff-elect George M. Stiles. There were men of both parties, and all were very cordial in their congratulations of Mr. Stiles.

Hon. George T. Parrot, as counsel for Mr. Stiles, prepared the bonds and other papers, and Judge McCormack administered the the oath. Judge Harper and Hyer were present as the law requires, and subscribed to the papers.

The amount of the bond is $20,000, and the bondsmen are Elias W. Stiles, Nathan M. Winans, Dennis Long, James C. Baker, Job M. Winans, Melius W. Halsey, and William A. Clark.

The new Sheriff will not make any sudden change in his office. He commenced active work in his new office to-day.

Second Payment by Receivers.

Air Inspector for Assessors, G. W. F. Smith, Cranburg; locomotives, H. A. Lourgan, Paterson; bicycle inspector, J. R. Wilkins, Newark, assignor to himself and C. W. A. Romer, same place; vehicle, T. Hill, Jersey City; corer for jars, N. A. Kline, North Plainfield; bonnet board, L. Jaeel and M. E. Hamburger, Paterson; car starter, J. F. Morrell, Camden, and D. Hoff, Millville; clamp for frames, C. C. Shepherd, Passaic; pencil sharpener, J. Williamson, Camden; hat box, J. Gauch, Newark; art of manufacturing cloth from fibres, F. Fennessey, Newark.

The small steamer John Taylor, owned by the Cape May Ferry Steaming Company, ran ashore during a terrible gale off Cape May Point, and will prove a total wreck.

FIRE BOARD MEETING.

A Number of Bills Ordered Paid.

The Fire Board met in regular session in Council Chamber at eight o'clock last evening.

Present—President VanWickle and Messrs Morris, Livingston, Jones and Depew.

Absent—Mr. Cutter.

The minutes of the previous meeting were read and adopted.

The Committee on Wells reported progress.

The following persons were elected members of the different companies:

Gazelle Engine No. 1—E. Roxbury and W. E. Chase.

Engine Co., No. 2—Dennis J. Daly, Edward VanWinkle, Alonzo Ayers, Horace VanNess, Chas. W. Tallman, Chas. Krowson Louis Laing and Wm. Goeller.

Zephyr Hook and Ladder Co—Patrick Lynch.

BILLS.

The following bills were audited and ordered paid:

Gutta Percha Rubber Manufacturing Co., $40; E. I. Pratt, $67 50; Zephyr Hook and Ladder Co., $18 50; G. W. Grant, $8; W. T. Hewman, $1; Nicholas Kelly, $2; Wm. Hickey $8; M. J. McCarthy, $3; Wm. Ross, $2 10, Alonzo Wallace, $5 50; Plainfield Engine Co. No. 2, $4 75; J. P. Homan, $33 40; Berry and Thorp $10 90; J. P. Homan, $17 50; C. R. Hope, $4 29; Adams Express Co., 25 cents; Philadelphia and Reading Railroad Co., $3.35; D. S. Roberts, $66 75.

COMMUNICATIONS.

A communication from Zephyr Hook and Ladder Co., and also one from Alert Hose Co., asking the Board to procure a stove for each of them. Referred to the Committee on Repairs and Supplies, with power.

From Gazelle Engine Co., No. 1, informing the Board that they had elected Jas. G. Connolly, Second Assistant Foreman to fill the vacancy caused by the resignation of Charles Ward. The Board confirmed the action of the company.

From Gazelle Engine Co., applying for a certificate of exemption for Chas. P. Sebring, he having served seven years as a member of the Department. The President instructed the Secretary to look over the books and if found to be correct, the certificate to be granted.

From the citizens of Amsterdam, N. Y., offering to sell a 4,700 pound steamer for $1,600. Received and placed on file.

Messrs. Morris and Van Winkle were appointed a special committee to go to Newark to look on a jumper for Engine Co., No. 2.

The committee on by-laws reported progress.

Messrs. Jones, Livingston and Morris were appointed as a committee to confer with Warren Engine Co., No. 3, in regard to the steamer.

Committee on Repairs and Supplies were authorized to purchase a new king bolt for Gazelle Engine Co., No. 1.

The meeting then adjourned.

The Two Mile Race at the Casino.

The announcement of a race for a silver medal drew a large number to the Casino Roller Rink last evening. The event took place at nine o'clock, and was participated in by the following gentlemen: F. W. Cooper, W. Hickling, F. VanBuren, J. Williams and F. Warren.

Mr. Wilkins took the lead at the start, closely followed by Warren. At one time he lapped Hickling, Cooper and VanBuren, and finished with a lead of a lap ahead of the latter gentlemen, who was considerably in advance of Cooper. Hickling dropped out before the finish, and Warren, though having a good position, just considerably by a bad fall, and left the track before the finish. Wilkins and VanBuren were awarded a tie by the judges for premium, and the race was awarded to Cooper. VanBuren was the most graceful skater on the track, and considerable sympathy was expressed for him when he became entangled in the rope at the finish. Several hundred friends of the contestants watched the proceedings while it was progressing.

The judges were Messrs. Ross, Moore and Reeder; Score, Mr. W. L. Purgeon.

The Democratic Part of It.

Harry W. Tufts, who is to give an exhibition this evening on the unicycle and bicycle, is the same individual who eloped with the Madison Avenue belle a few months ago, which at the time made quite a sensation, as detailed in the New York papers. His wife accompanies him about the country at all his exhibitions, and the rink managers have to provide for her in the bill of expenses.

Colorado.

(Contributed.)

It is indeed a wonderful thing when the beauties of a far distant land are so exactly reproduced before one, that he feels that he is actually in the country itself looking upon the real scenes. Those who assembled in the Congregational church Monday evening for the first of the course of illustrated lectures, by Mr. Wm. I. Marshall, felt as if they were actually in Colorado, looking for themselves upon the wonders of that country, which is unsurpassed in magnificence of scenery in any State in the Union.

Mr. Marshall's lecture was delivered in an easy and pleasing manner, was full of interest and information, and interspersed with anecdotes of Western life, both instructive and exceedingly amusing.

As the lecture proceeded, photographic views of some of the more striking portions of Colorado scenery were thrown upon the wall by a powerful oxy-hydrogen light. As one picture after another appeared, exclamations of delight were scarcely repressed by the people present. The scenes presented were grand, picturesque and beautiful in the extreme. When it was thought that surely this must be the most beautiful scene of all, another followed which was still more beautiful, or strange, or impressive.

A gentleman present, who had been throughout the whole region, declared that the views were exact, and spoke in the most complimentary terms of the pictures and the lecture, and pronounced it a first class entertainment.

Some New Paintings.

A number of paintings are on exhibition at Waldron's, Front street, which are intended for the Main art gallery and museum. Visitors are welcomed to see them.

Among the grandest is one 3x5 feet, "The Descent from the Cross," copied from Rubens. The original is in one of the famous art galleries of Europe, and is valued at $100,000. The copy referred to is valued at $15,000, and is donated by Mr. Jos. W. Yates, of this city, whose esteemed wife is the President of the W. C. T. U.

Another picture notable also because by an art representative of the colored race, Mr. E. W. Bannister, of Providence, R. I., is a landscape 6 by 8 feet. Mr. Bannister had paintings on exhibition at the Centennial and received a medal therefor. He has also made several paintings of great value.

"A Fishing Smack" by Otis S. Weber, Paris. "A Landscape," by G. A. Bonnor. "Shepherdess Tending Sheep," by F. Von Lehne, and "Cattle Drinking," by R. Shuhmuller, are among others.

Broke His Nose.

Charles Howard, in charge of the mason work on the new building being erected at 21 East Front street, overbalanced and fell off the scaffolding at the front southwesterly corner, Tuesday morning, and sustained, besides bruises about the body, a broken nose. His two sons, who are employed as assists on the building, assisted him to his home at 45 Peace street, Dr. Long attending him. He will be laid up some days. The distance of the fall was about twenty-feet.

Dead at Seventy-Six.

The death on the 8th inst. is announced in the *Newark* papers of Mrs. Mary S. Peck, wife of Darius Peck, in her seventy-sixth year.

Mrs. Peck was the mother of Mrs. Freeman, wife of Robert Freeman, an old resident on Broadway in this city. She had a large circle of friends in this city and Newark.

The funeral took place this morning from the late residence of the deceased, No. 70 Orleans street, Newark, interment at Mountainview.

About Twain and Cable.

The following letter received a day or two ago by Mr. Frank W. Runyon explains itself:

Mr. Dean Plainfield: I am pleased to know that the reputation of Messrs. Twain and Cable is such as to draw your inquiries. My opinion is fully endorsed by Redpath. My opinion is one of the most excellent ever given. Please to hand this letter to the gentlemen asking people or to place them after assembly.

Sincerely yours,
FRANK W. RUNYON,
Editor Orange (N. J.) Chronicle.

Endorsed.

Miss Allen S. Merrill, of East Orange, is visiting Miss Paulsen of La Grande avenue.

The season for woodcock ends December 15.

It is a hundred years ago this month since the Congress of the United States was in session in Trenton. That high body which had been meeting at Philadelphia, removed to Trenton owing to the prevalence of yellow fever at the time in Philadelphia. They came to Trenton on November 1st, and remained only a short time, as the yellow fever scare was of short duration.

The greatest Lady in Plainfield.

Remarked to a friend the other day that she knew Kemp's Balsam for the throat and lungs was a superior remedy, as it stopped her terrible cough in one night. It is of fer-fect whatever. WEDNESDAY, NOVEMBER 12, 1884.

HERE AND THERE.

They are shooting pelicans at Dubuque.

A new imitation of Astrakan is called frieze trimming.

Paraffine is driving out spermaceti for many purposes.

Lace over dresses are all the go for full dress affairs.

Wood county, Ohio, takes the cookie for social blowouts.

The crown of a new velvet bonnet is richly embroidered.

Alabama has 3,500 square miles of coal almost untouched.

Plain tailor stitched wool costumes still have much prestige.

The fur stores are fixing up, and the fur will soon begin to fly.

Five years hence people will sit at home and shop by telephone.

C. Talmage, of Savannah, has invented an air ship something like a bird.

One bird's head is tucked to another bird's breast, in some new millinery.

A Philadelphian has bought 10,000 feet of Connaicant Island, Newport.

California's wheat crop has for several years been largely in excess of the value of her gold yield, and this is likely in time to be exceeded by her fruit crop.

The soap industry in California is falling off at a frightful rate. In 1876 the annual product was estimated at $1,000,000, while last year it barely amounted to $750,000.

Copley Square in Boston, was allowed to pass into private ownership, and now an outcry is raised because the private owner is about to erect a small hotel on the ground.

There are now 816 Young Men's Christain Associations in this country, with a total membership of 108,337. There are eighty buildings and real estate in all worth $3,-956,000.

Vienna has become so fashionable as a medical centre that even the Scotch students do not consider themselves perfect until they have passed a season there. The attractions consist in the large amount of material for study and the great teachers.

The Paris Exhibition of Infants will be held next month. Two thousand applications for entry have been received. The best physical conformation of bone and muscle will take the prize. Fat alone will not be the test of merit this time.

The twenty-fifth annual report of the London Drinking Fountain and Cattle-Trough Association is able to announce the erection of fifty-two new fountains for human beings. Most of the structures of the society are examined and cleaned by its servants three times a week.

A VERY QUIET DAY.

THE BANKERS OF NEW YORK HOLD THEIR PROCEEDS PEACEFULLY.

Up to This Hour Gov. Cleveland's Majority Very Nearly Unchanged—The Figures given by The World and Associated Press.

NEW YORK, Nov. 12.—At high noon the board of aldermen resolved themselves into a board of county canvassers. Shiels is the work they will compare the returns now in the hands of the clerks of the board of aldermen and those on file in the county clerk's office. The law provides that the aldermen shall select one of their number and the county clerk shall be clerk of the board. Alderman Waite (Rep.) was elected chairman. A large corps of politicians and the years of various degrees of prominence had already gathered in the aldermanic chamber. The more prominent of the lawyers were William M. Evarts, Col. George Bliss and Robert Sewall, who were in close consultation when the aldermen entered. They proposed to take advantage of every opportunity of increasing Mr. Blaine's vote. Others present were ex-Senator George H. Forster, representing Tammany hall; Gen. Francis C. Barlow; Charles Tuller and Nelson J. Waterbury. After appointing committees and receiving a protest against the election of Wm. R. Grace, for mayor, on the ground of his being an alien, the board took a recess.

An Opinion from the National Democratic Committee.

NEW YORK, Nov. 12.—At Democratic national committee headquarters it was said that the action of Aldermen Waite and Jourdan of the board of canvassers of the county vote was made on account of Mr. Waite being a man of independent action on political questions generally, and also a retiring member of the board of aldermen. Both Tammany and the County Democracy thus placed implicit faith in his impartiality in regard to contests between those factions for the county offices. As far as the presidential count is concerned, all factions agree in supporting Mr. Cleveland, and to all the canvass will proceed in his interest with equal vigilance. After a thorough examination of the vote of this city, the Republican counsel have agreed with the returns as they stand as already accepted and announced by the Democrats, so that there will be no contest on the presidential count.

Mr. John Kelly said that Tammany's having voted for Mr. Waite as chairman of the canvassers was without political significance. Mr. Waite was an independent member and had voted with Tammany as often as with his Republican colleagues. The chairmanship was a compliment to a retiring member and it carried with it no power over the returns.

Returns by Counties.

LIVINGSTONE—The chairman of the board authorized the statement that Blaine's plurality in the county is 1,192. This is within one of the result already announced.

CHEMUNG—Blaine, 10,500; Cleveland, 12,166. The two additional votes for Blaine and one for Cleveland are contested.

MADISON—Blaine, 6,676; Cleveland, 4,564.

ONEIDA—Complete, Cleveland, 13,820; Blaine, 13,780; St. John, 894; Butler, 193.

JEFFERSON—Blaine, 9,029; Cleveland, 7,075; St. John, 686; Butler, 81. Gain of 8 for Blaine.

CATTARAUGUS—Cleveland, 6,085; Blaine, 7,483; St. John, 807; Butler, 272. Exchange.

FULTON AND HAMILTON—Blaine, 3,138; Cleveland, 4,091; St. John, 248; Butler, 41.

RENSSELAER—Blaine, 13,760; Cleveland, 13,414; St. John, 1,010; Butler, 265.

MONTGOMERY—Majority for Blaine, 92.

WASHINGTON—Blaine's majority is 3,115.

WARREN—Blaine, 784. No change.

The Associated Press Figures.

NEW YORK, Nov. 12.—The Associated press sends the following announcement:

"Up to this hour the count of the ballot for presidential electors has been declared in thirty-three of the sixty counties of this state. Taking the last previous reports of the county clerks it is found that the Democratic plurality, according to them, was 1,296. The canvass has made changes in eleven of these counties, but only trifling ones. The result of the canvass shows a net loss to Blaine of four votes. The remaining twenty-seven counties have, with two exceptions, reported that progress was being made. Reports speak of several irregularities in forms, which have compelled the return of the ballots to the supervisors for corrected lists in legal form, but none manifest any serious discrepancy in the count. In New York and Kings counties the indications point to a long and tedious count."

No Trouble Feared.

NEW YORK, Nov. 12.—In twelve counties, including New York and Kings, the canvassers were adjourned. There are no reports of serious protests or trouble in the count.

What Forty Counties Give.

NEW YORK, Nov. 12.—In 40 counties heard from, Cleveland gains 39 over the United Press figures of 1,918, making his apparent plurality 1,951.

The World on the Canvass.

NEW YORK, Nov. 12.—The World says: The official canvass is not completed in all the counties. Out of the sixty in the state The World has obtained the official figures, as posted by the county canvassers, from forty-two of which returns will be found below. Some of the large counties like Monroe, St. Lawrence, Albany, Dutchess, New York and Kings have not completed the canvass, but all the counties heard from Republicans claimed that they would show great gains outside of New York and Kings. These gains were looked for principally in Albany, Ulster and St. Lawrence. None of their hopefulness have been found by the official canvassers. The changes that are made, retaining the pluralities in the counties not officially heard from, give Mr. Cleveland an apparent plurality of 1,817.

A Policeman Violated the Election Law.

NEW YORK, Nov. 12.—Officer John W. Blondt, of Capt. Williams' precinct, has been arrested and held in $2,000 bail for the violation of the election law. On election day one Harry Stetson was arrested for intoxication and drunk as alleged, and asked to vote again, taking the place of a man named Abraham Levy who had registered and voted in the morning. Stetson says he refused to vote. Blondt arrested him. When taken before Commissioner Linde, Stetson told his story with so much directness that it was deemed necessary to arrest Blondt. Stetson was held as a witness.

Composition of the Next House.

WASHINGTON, Nov. 12.—Secretary McPherson, of the Republican congressional committee, in response to inquiries

YOUNG, BUT VERY BAD.

A Colored Boy Attempts Wholesale Poisoning because he is Discharged.

PHILADELPHIA, Nov. 12.—Middleton C. Morris, colored, the worst of the large number of bad boys in the city, has been sent to jail this year, was convicted in the court of quarter sessions of an attempt to poison the family of James H. Buckingham, the judge by whom he was employed. He was sent to Mr. Buckingham's residence about a month ago by his employer to get a pitcher of ice water for dinner. Mrs. Buckingham went up stairs to get the change and told the boy to clean out the basket in the cellar. He longed for the ice water, but when he went below the cellar, returning in a moment, however, with the statement that Mr. Buckingham wanted the change as quickly as possible. He was given the change and went away. Shortly afterward the nurse employed by Mrs. Buckingham used water from a tea kettle on the kitchen stove in preparing food for Mrs. Buckingham's child. She tasted the food before giving it to the infant and observed that it had a disagreeable flavor. She called the attention of her employer to the matter. Mrs. Buckingham touched her lips to a spoonful of the food and at once experienced a burning sensation in the throat. At the same instant the nurse began to vomit violently, and she remained sick for two weeks. The boy Morris was arrested. He at first denied that he had put anything except water in the kettle—had put tobacco, or sulphate of copper, in the bottle. An analysis made by Prof. Leffman, however, showed that the water in the kettle contained about 200 grains of corrosive sublimate, four grains of which are sufficient to destroy life. Mr. Buckingham testified in a short time after the arrest of poisoning he had threatened to discharge the boy for trying to steal a copper nosegay. Judge Allison sentenced the boy to imprisonment for seven years in the penitentiary, the maximum punishment permitted by law.

A MODERN PORTIA.

A Bolton Girl's Legal Triumphs on the Pacific Coast.

SEATTLE, W. T., Nov. 12.—Miss Lelia J. Robinson, of Boston, a lawyer and journalist, has made a decided "hit" on the Pacific coast. She has been consulted by some of the best known lawyers of this territory on intricate law points, and, according to the present outlook, has an excellent chance of one day becoming a leading practitioner before the supreme bar she has become. The trial of a late case which decided in her favor has excited a great deal of interest. The case was that of the Territory vs. Ah Moo, charged with assaulting Chinese laborers into the United States, and the prisoner was defended by Miss Robinson. The case has been tried by a female lawyer in the Territory. Assistant United States Attorney Hubbard conducted a vigorous prosecution, but he was overcome by the fair young lawyer, made by Miss Robinson, and the jury, after being out a short time, returned a verdict of not guilty. Miss Robinson's friends and the community generally congratulate her on the successful issue of her first case in the Territory. Miss Robinson passed the Massachusetts bar last year.

Uncle Sam's Immense Mail.

WASHINGTON, Nov. 12.—The postoffice department will shortly issue its annual report, and 1886 have been submitted to the secretary of the treasury. They place the total cost of the service at $48,000,000. It is estimated that the ordinary postal revenues will be $31,272,680, leaving a deficiency of $4,825,320. The total appropriation for the present fiscal year is $46,097,769, making the increase in the estimates over the appropriation of last year $7,027,769. The principal items of increased expense asked for are appropriation of postmasters, inland transportation, railroad clerks in postoffices and expense of the delivery system.

The superintendent of the free delivery system, post office department, in his annual report states that the number of free delivery offices at the close of the fiscal year in the United States was 449, an increase over last year of five. The number of carriers employed was 2,980, an increase of 210. The whole number of pieces handled was 1,541,-000,000, an increase of 213,916,416. The total cost of the service was $2,304,206, an increase of $230,870. The amount of postage collected was $2,771,484, or $1,272,-378 more than the cost of the service. The cost of the service in New York city was $643,787; the number of pieces handled, 295,-228,913; postage on local matter, $1,823,402.

Lost His Fortune and His Reason.

CLEVELAND, Nov. 12.—This city was startled this morning by the announcement by the report that on Monday evening Horace P. Waddell had attempted to shoot Sylvester T. Everett at the latter's residence on Prospect street. Waddell had been successfully hushed for twenty-four hours. It appears that the bank failure, by which he lost three-quarter his fortune of $1,000,000, coupled with domestic difficulties, have affected Waddell's mind. Since the attempt on Everett's life he has been in a wild delirium. He was taken home and placed in a stark madness, and was attended all day Tuesday at his residence, 698 Euclid avenue, by five physicians. The story of the shooting is that Waddell had been secretly purchasing a revolver in hand, and attempted to shoot his son, who, with his two sisters, had recently returned home from school. The son struggled with his father, but the latter succeeded in the weapon, and, rushing from the house, went to Everett's house. Calling Everett out, he fired one shot at him, killing him instantly, without saying a word. He was disarmed and taken home.

Gov. Waller's Thanksgiving Proclamation.

NEW LONDON, Ct., Nov. 12.—Gov. Waller has issued his Thanksgiving day proclamation as follows: "In furtherance of the custom of the New England forefathers, the people of this commonwealth are invited on Thursday, the 27th day of the month of November, to meet in their usual places of assemblage and in deeds of charity, and religious devotion, in social enjoyment, in songs of praise and in deeds of charity, and they are invited to meet in their usual places of worship and there refrain from their ordinary occupations and devote this day of holiness and thanksgiving to the worship of God and to the happiness of each other."

"Grandma" Garfield Not Sick.

CLEVELAND, Nov. 12.—Reports have recently been sent out regarding the serious illness of "Grandma" Garfield. These have been made at the home of Mrs. James A. Garfield, regarding the truth of the statements. They flatly declare that "grandma" is in no immediate danger and that her sickness is simply a slight indisposition.

YOUNG, BUT VERY BAD.

A Colored Boy Attempts Wholesale Poisoning because he is Discharged.

PHILADELPHIA, Nov. 12.—Middleton C. Morris, colored, the worst of the large number of bad boys in the city, has been sent to jail this year, was convicted in the court of quarter sessions of an attempt to poison the family of James H. Buckingham, the judge by whom he was employed. He was sent by to Mr. Buckingham's residence about a month ago by his employer to get a pitcher of ice water for dinner. BANKER'S DAUGHTER.

TIME TO PREVENT HER FATHER'S ARREST AT NIGHT.

A Former Trusted Employe Gives Over $. to Masterton's Agent—Depositors Paid in Big Angry Creditors When He is Brought Into Court.

MOUNT VERNON, N. Y., Nov. 12.—Charles Hankinbrix, who deposited a check of $1,400 with J. E. Masterton & Co., a few hours before the failure of the bankers, was arrested last Saturday, went directly from the police office to the depositors' committee and made a payment to Masterton's agent. He is a boss stone mason, and has been in the employ and confidential service of the Mastertons for years. Mr. Chester Thomas Wood drove to the house in Fulton avenue which stands in the name of Masterton's wife, and, running to the side steps, there met Miss Masterton, who on hall of the depositors was trying the best way to get at her father. She called Mr. Wood to come to the door and said that Mr. Masterton was not at home, and that Judge Gifford, his assignee, was not in. The confidential clerk said he would go on a charge of embezzlement, and so asked to see Mrs. Masterton, at the same time slipping by the servant into the hall.

Mrs. Masterton, who had effectually routed a committee of depositors on Sunday evening, appeared at the head of the stairs and asked what her daughter. She said that Mr. Masterton was not at home. Wood said he knew better, for he had heard Masterton's voice. Mrs. Masterton had left a message with the servant girl on a charge of embezzlement, and so asked to see Mrs. Masterton, at the same time slipping by the servant into the hall.

Mrs. Masterton, who had effectually routed a committee of depositors on Sunday evening, appeared at the head of the stairs and asked what her daughter. She said that Mr. Masterton was not at home. Wood said he knew better, for he had heard Masterton's voice. Mrs. Masterton had left a message with the servant girl on a charge of embezzlement, and so asked to see Mrs. Masterton, at the same time slipping by the servant into the hall.

Mrs. Masterton, who had effectually routed a committee of depositors on Sunday evening, appeared at the head of the stairs and asked what her daughter. She said that Mr. Masterton was not at home. Wood said he knew better, for he had heard Masterton's voice. Mrs. Masterton had left a message with the servant girl on a charge of embezzlement, and so asked to see Mrs. Masterton, at the same time slipping by the servant into the hall.

Mrs. Masterton was surprised when told that he was to be arrested at that hour of night. He said he was sick, and couldn't get up. Judge Gifford, the assignee, was ill. Mrs. Masterton was not to be denied. Mr. Masterton was ill, legal, but after a parley the whole party drove to 32 Vernon in the constable's hack. The little court room was crowded when they arrived, shortly after 10 o'clock. Mr. Masterton was pale and nervous. He waived examination, and asked to be released on bail. Judge Gifford fixed it at $1,000 sufficient enough. Norman A. Lawlor, who represented the depositors, asked that it be fixed at the highest point, $5,000, and mentioned some of the losses that had been caused by the bankruptcy of the firm. At this the crowd in the court room applauded, evoking cheers in the lower and outer section. Mr. Masterton's counsel asked them to be still. Bail was fixed at $5,000. Alexander Masterton and Mr. Hall gave it, and Mr. Masterton and his friends went home rejoicing. Their case will come up at the next term of the oyer and terminer court, at White Plains, in December.

It is consistently asserted in Mt. Vernon that the friends of the bankers had been notified of the approaching complaint, and had drawn out their money. The liabilities of the firm are put at $250,000, and the depositors can reckon up only about $60,000 available assets.

A. R. Vernon man who came up on an afternoon train from the city said he had seen Mr. Masterton in New York, and is locked as though he had started for a long trip. He was going home to Canada.

A reporter inquired at the Bronxville house, and was told through a slide in the front door that Mr. Masterton was in the city, had no intention of going to Canada, and had nothing to say. He had failed, and that was all.

The run on the savings bank practically came to an end yesterday, after payments of about $60,000, making in all $60,000 since the run began. The depositors who drew their money have lost, in most cases, interest since July 1.

Mr. Masterton's and Mr. Lucas' friends say that they believe Mr. Masterton to be honest. He speculated with the money of his depositors, they say, but it was in evidence of his integrity that he did not steal the money from the savings bank. Mr. Lucas thinks that if the assets are not eaten up by suits the depositors will be paid dollar for dollar. A schedule of assets will be filed some time this week.

Depositors Are Not Getting Well.

ELMIRA, N. Y., Nov. 12.—The alarming reports of Congressman Hendee's condition are incorrect. His wounds, caused by a gas explosion in the Chemung Canal bank, are nearly healed. He was troubled with extreme nervousness, occasioned by the shock, but that is now passing away and he is doing as well as can be expected.

Huguenot as a Postmaster Thus.

LYNN, Mass., Nov. 12.—Fire was discovered in the Ingersoll school house in the several departments of which 800 pupils attend. It providentially happened that the fire occurred during recess when most of the pupils were outside. The entrance to the remaining children was marshalled by teachers through the blinding smoke down the stairway and all were saved.

The Cabinet Resume Work.

WASHINGTON, Nov. 12.—The first regular cabinet meeting for three months was held yesterday. All the members except Secretary Chandler were present. The appointment of a commissioner of pensions, to succeed Dudley, resigned, was among the subjects discussed.

A Dangerous Spot of Fat.

AKRON, O., Nov. 12.—A black bear, kept at John Crist' saloon, sprang upon a man named James Cumming while he was coming through the back yard and mangled him horribly. Many bones are broken and the tendons are torn out. Cumming cannot recover.

The Princeton Review Suspended.

NEW YORK, Nov. 12.—It is now definitely announced that the Princeton Review has suspended publication with the issue of the current number.

CONDENSED NEWS.

Utah and Idaho have been visited by a slight shock of earthquake.

Daniel Manning, the well known politician, is to be married on the 19th inst.

Butler and Tarvey, the Chicago faith cure evangelists, have healed 814 persons without the aid of medicine.

A peculiar case is reported in Warsaw, N. Y. Adam Pfaff three years ago wore a pair of shoes, and from that day to this has suffered the most intense agony in consequence.

A committee has been created in Quebec for the purpose of devising a project to refund the municipal debt which will put several millions into the pockets of the refunders. It is claimed that several aldermen have been bought.

Consumption can be Cured!

This fact has been demonstrated in more than

TEN THOUSAND CASES by

DR. S. D. HOWE,

The Great Consumption Doctor of New York, Inventor of the

Arabian Medicines,

Celebrated throughout the World for their remarkable Cures.

Dr. Howe's Arabian Milk Cure.
Dr. Howe's Arabian Tonic.
Dr. Howe's Arabian Liver Pills.

The Only Medicines that have ever been known to positively cure Consumption.

TESTIMONY

Of the Hon. Jos. E. Gary, Judge of the Superior Court, Chicago, Ill.

CHICAGO, Dec. 24th, 1876.

DR. S. D. HOWE,

DEAR SIR:—Permit me to add my grateful testimony to the army of witnesses to the virtues of your justly celebrated Arabian remedies. For a long time my wife was severely afflicted with bronchial cough, oppressed breathing, night sweats, and continuous acute pains in the lower portion of the right lung and under the shoulder blade. Her suffering were intense, and she was extremely nervous and prostrated. Her disease was pronounced by consumption by the physicians of Chicago and other cities, whose professional services we had employed. Finally, by the skilful manner in which your thorough examination was conducted, and the satisfactory explanation you gave of her symptoms, we were induced to put her case under your management in hopes that your Arabian remedies would relieve her. She began to use the Arabian Milk-Cure and Arabian Tonic. Their beneficial effect in every system manifested—the cough lessened and soon ceased, respiration became easy, the soreness of the chest was removed, and she improved, she began to gain in flesh and increase in strength and appearance. I believe that your medicines and skilful advice have saved the life of my wife. She unites with me in the grateful tribute to the merits of your remedies.

Very respectfully yours,

JOSEPH E. GARY.

A REIGN OF TERROR.

Lawlessness and Crime Rampant in the Hocking Valley.

COLUMBUS, Nov. 12.—Gov. Hoadly at noon issued a proclamation declaring Athens, Perry and Hocking counties in insurrection, and ordering the civil authorities in suppressing the disorder and enforcing the laws of the State, and for bringing the criminals, who have destroyed life and property, to punishment. The government says if they do this there will be no necessity to send troops into the valley, but that order must prevail in those counties if it takes the entire military force of the state to accomplish it.

The fact is, a reign of terror exists in the valley. People are afraid to do anything against the murderous and incendiary element among the strikers, and the sheriffs of Athens and Perry counties are candidates for re-election, and will do nothing to punish the foul crimes committed in their counties. Business men of this city are beginning to agitate the question whether it is not time for the authorities to put a stop to the reckless condition of things, which is injuring the business interests of the city and state to an alarming extent.

McCullough Escapes from his Friends Again.

CHICAGO, Nov. 12.—John McCullough arrived in this city on the 7:40 train and went directly to the Grand Pacific Hotel, of which he is a member. He was alone and had very little to say, except that he was on his way to St. Louis to play in that city. He remained at the club only long enough to take breakfast, then left saying that he must go to the depot and see that his baggage was properly checked. Very few members of the club were about the rooms at the time of Mr. McCullough's appearance there. A gentleman was found, however, who said the tragedian was looking very well and appeared abundantly able to take care of himself. The servants, however, all of whom knew the actor by sight, were doubtful of his continued sobriety. One of two of them expressed it as their opinion that McCullough was a little off.

Concerning Naval Cadets.

WASHINGTON, Nov. 12.—Captain F. M. Ramsay, superintendent of the Annapolis naval academy, has made his annual report to the secretary of the navy. It having been demonstrated that cadets entering the academy in May gain a great advantage over those entering in September, Capt. Ramsay recommends that no cadets be admitted later than June. He again urges the selection of cadets who are to fill various posts in the lower grades of the line and engineer corps of the navy and of the marine corps be made upon the completion of the fourth instead of the first years' course.

Quarterly Outrage on an Editor.

CLEVELAND, Nov. 12.—A special to The Press, from Warren, O., says there is a wild with excitement over a dastardly outrage perpetrated upon Editor Lane, of The Warren Democrat. Three masked men broke into his house, bound and gagged him and stole a large amount of money, tore his clothes into shreds and otherwise maltreated him. Twelve hours of it were passed and things generally smashed up. Lane can give no clue to the villains and the affair remains in mystery.

Col. Burnside Declared Insane.

WASHINGTON, Nov. 12.—Secretary Teller, upon the order of the supreme court of the district, directed Col. Burnside, late chief clerk of the pension office department, now under indictment for embezzling government funds, to be placed in the government insane asylum here.

William H. Vanderbilt's Fast Run.

NIAGARA FALLS, Nov. 12.—Wm. H. Vanderbilt and party left here this morning at eleven o'clock, over the Canada Southern branch of the Michigan Central railroad. Mr. Vanderbilt expects to make the run of about 280 miles in 4 hours and a half, speed, including stoppages, of 57½ miles an hour.

Will the President Marry?

BOSTON, Nov. 12.—A Washington special says: "The president attended the opening of the new opera house with Miss Tillie Pomeroy Shepherd, her sister, Mrs. John Davis, and the latter's husband. This has set the gossips again to speculating whether Miss Tillie is to marry the president."

Two Engineers and a Fireman Killed.

ST. LOUIS, Nov. 12.—A special from Pana, Ill., says: "In a dense fog a wild engine, running on one track of the Missouri Pacific freight train on the Ohio and Mississippi railway ran into that train. Both engineers and the fireman of the freight train were killed."

Money for the Nile Expedition.

LONDON, Nov. 12.—It is understood that the government will ask for a vote of credit for the Nile expedition of $5,000,000 for the expenses of the army and $1,125,000 for those of the navy.

Gen. Hunter's Pedagogue Dead.

SALEM, Mass., Nov. 12.—David Mosley died yesterday, aged 94 years. In his younger days he was a school teacher and had Gen. Hunter for a pupil.

The Sun.

THE SUN is, and will continue to be, a newspaper which tells the truth without fear of consequences, which puts at the front, no matter how odd its appearance may be, whatever interests the people most, which presents the news of all the world without waste of words and in the most readable shape, which is nothing with all its heart for the cause of free government, and which therefore believes that the Republican party must go, and must go in this year of our Lord, 1877.

About sixty million copies of THE SUN have been sent out of our establishment during the passed twelve months.

If you were to paste end to end all the columns of THE SUN printed and sold last year you would get a continuous strip of interesting information, of humorous wisdom, of sound doctrine, and sense wide long enough to reach from Printing House square to the top of Mount Copernicus in the moon, then back to Printing House square, and three quarters of the way back to the moon again.

But THE SUN is written for the inhabitants of the earth; this same strip of intelligence would girdle the globe twenty-seven or twenty-eight times.

If every matter of THE SUN during the passed year has spent only one hour over it, and if his wife or his grandfather has spent another hour, this newspaper is the work of fifteen men and women thirteen thousand years of steady reading night and day.

It is only by little calculations like these that you can form any idea of the circulation of the most popular of American newspapers, or of its influence on the opinions and actions of American men and women.

If you know THE SUN you like it already, and you will read it with accustomed diligence and pride during either is sure to be the most interesting year in its history. If you do not yet know THE SUN, it is high time to get into the sunshine.

Reprieving a Man Whose Mouth Was Seared for the Knife.

How the Empress Eugenie Saved One of the Orsini Conspirators—Capt. De Rudio Trying Experiences.

[St. Louis Post-Dispatch.]

Few men have stood on the scaffold and heard the French guillotine's sardonic order of exit, with ocean seared for the cruel knife and have lived to describe their sensations under the terrible ordeal. Capt. Carlo de Rudio, one of the companions of Orsini in conspiracy against the life of Napoleon III. and one of the men who threw a hand grenade at the emperor, all of which is a matter of history, has passed through this experience. Capt. de Rudio is now an officer in the Seventh cavalry, U. S. A., and has been spending several days at the Planters' awaiting an assignment to duty. He is unwilling, as a rule, to talk about this part of his life, but in a friendly conversation with a reporter he gave a vivid and graphic picture of the scenes on the scaffold, and of the incidents connected with this fateful period of his life.

The attempt on the emperor's life, the arrest of the conspirators, and all of the events connected with the trial and condemnation are matters of history. Napoleon was urged to clemency by his consort, Empress Eugenie, as it was thought an act of magnanimity such as that would have a good effect on the revolutionary party. He was urged to pardon all of the condemned men. He, however, was bent on the execution of the prisoners and the execution of three patriots who had been condemned to death. He therefore referred the whole matter to his senate. De Rudio was the youngest of the three condemned men, and had a wife just 16 years old, with an infant in her arms. Mrs. De Rudio was an English girl, and in the hope of saving her husband through English influence, the excited the pity of Queen Victoria, who contrasted with the Empress Eugenie and obtained her promise that she would do all in her power to save his life. The emperor would do nothing himself, and insisted on leaving the whole question of pardon with the senate. The senate voted against interfering with the sentence of the court.

It was half-past 3 o'clock in the morning when the senate adjourned, and the sentences were to be executed at 7 o'clock. As yet nothing had been done to save De Rudio. The empress, when she heard what had been done by the senate, found it was impossible to influence Napoleon. It seemed inevitable that De Rudio should die and that the prayer of his young wife should be in vain. The second place in the trio had fallen to the lot of Capt. de Rudio, and he was to die immediately after the first victim, Jacob Bedory Orsini, who was last. In accordance with the rule in France the prisoners were notified of the fact that their last hour had arrived one hour before the time of execution. Priests were admitted to their presence, and all preparations made for death. De Rudio had completed the arrangements for his expected dissolution, had bidden farewell to his wife and child, and a few minutes before 7 o'clock was led by his guard to the scaffold.

It was the 13th of March, a cold, blustering day, with an unpleasant mixture of snow, rain and sleet falling. A most disagreeable, gloomy day, the more dismal for the scene that was to take place could not well be imagined. Capt. de Rudio had his arms bound behind him, and his clothing had been stripped from his neck and shoulders almost to his waist to give the glittering curved blade which he could see suspended before him a free and unobstructed course through his neck. The black cap had been adjusted on his head preparatory to being drawn over his face. He was permitted a last smoking, and had requested the privilege of emptying a final pipe, which had been granted by the guard, and he was puffing away in a dripping rain calmly awaiting the stroke of the bell which should announce the time for his death. The hand of the clock pointed to just five minutes before, when a man was seen to pass through the prison gate and hurriedly make his way to the scaffold, which he mounted, and through the way made for him by the guard he walked to where De Rudio was standing, scarcely noticing surrounding objects, so intent was he upon his own thoughts.

"This is a cold, unpleasant day to be out in such costume, my friend," he remarked to De Rudio.

"Yes," was the nonchalant reply, "but I don't care a d—, I haven't time to catch cold."

De Rudio did not know the person who had spoken to him, but he noticed that he was covered with decorations, and in deference to his supposed rank he apologized for keeping the pipe in his mouth, and said:

"Excuse me for continuing to smoke, but I cannot take this pipe out of my mouth, and besides, I am a great smoker, and, as this is the last pipe I expect to smoke, I want to get the full benefit of it."

"Oh, go ahead and smoke," was the smiling rejoinder, "but I am happy to say that you will probably smoke many more."

"I hardly think so; I will be dead in a few minutes," said De Rudio.

"No, you won't; because I have a reprieve for you."

"But if I am not executed at 7 o'clock, according to the law, I cannot be executed at all under this sentence."

"Never mind about that. That is my business. Go to your cell, and I will call and explain all at 8 o'clock."

The gentleman then gave hurried orders to the guards and the procession slowly conducted De Rudio to the death cell. As he was passing through the open space from the scaffold Orsini entered the gate going toward the scaffold, and as they met, impulse they stopped and kissed each other.

"What is the matter?" asked Orsini.

"I don't know. I only know that I am not to die yet," relieved De Rudio.

"Bother two than three," replied Orsini, as the soldiers hurried him on. Just as De Rudio reached the gate he turned his head for a moment. Orsini had mounted the scaffold and at the same moment he turned his head; their eyes met and both bowed. That was the last they ever saw of each other. At 8 o'clock the private secretary of the empress flew in to that had interrupted at the critical moment in his behalf, called the empress aside and explained the affair to him. When the empress found that nothing could be done through the senate or with the emperor, she sent at the last moment to the president of police and ordered that one of the youngest of the trio, and he should be the order.

Napoleon was very angry at the interference, but it was impossible to execute De Rudio under the sentence, and he went through the form of another trial and was again condemned to death, but the sentence was commuted to life exile. He escaped from prison, and, joining the Italian army in the Federal service in time, serving through the latter part of the civil war.

By the order of Messrs. Conway, Horace Greeley, Dr. Bellow and others, Capt. de Rudio was given a place in the Union army, where he has remained since.

Her lord listen to histened and disordered plight, and being greeted with some asperity, explained: "Hein on, Minny; I'm going to explain. You see, I was at de club, and dere was a spill—"

She. "Ze judgin' from yo' looks yo' master ben right in de spill. Come in yar, sah."

American Home-Made Biscuits.

[Detroit Free Press.]

"I see, dear, that you are getting along well with your household duties," said a young husband to his wife, holding up a piece of biscuit and looking at it critically. "Oh, goody," she exclaimed. "I am so glad you like the biscuit, George."

"Yes," he replied, you are getting along well; but," he continued, "allow me to offer a suggestion. Put some lar iron into your next batch of biscuits. I have a theoretical idea that that you need iron in your blood, because you see I can break this biscuit easily over my knee."

She called him a horrid thing, and they never speak now unless there is company present.

Whose 'ittle embezzler is oo? I 'se coss 'ittle embezzler.

Ampelitous.

[Louisville Courier-Journal.]

They were discussing their natatorial capacity.

"Swim! Dive! Why, I can remain under water twenty minutes at a time."

"Only twenty minutes. Why, the other day I staid under water a whole hour. To be sure, it was because I fell into a dose and overslept myself, but still——" (The other lar falsta.)

Getting a Tooth Pulled.

[New York Mercury.]

"What do you charge for pullin' teeth?" asked a countryman of a dentist.

"Fifty cents, without pain."

"An' how much when it hurts?"

"Twenty-five cents."

"All right, mister. My old woman'll be up here some time d'arin' the 'fernoon with a jumpin' tooth, and you just yank it out an' tell her the charges is all paid. There's a quarter."

When the Leaves Begin to Turn.

This is the time of the year when the young lady goes hunting for autumn leaves and finds more lay fever and rheumatism and influenza and wood-ticks than she knows what to do with.

Cloves Paried Them.

"I just went out for some cloves," said he, in answer to her question, as he tried to lean his cane on the back of an orchestra chair.

"Yes," said she, picking up a bit of the plant, "you've been to see the evil one."

"Why," said he, laughing, "do you see the cloven foot?" "No," was the reply, "but I see all the cloves he's got for his feet."

Of the evening not even the bellowing of the big trombone was able to smother the silence that settled over these two young hearts."

Grief and Genealogy.

[Paris Paper.]

"Yes, brethren," says the clergyman who is preaching the funeral sermon, "our dearbeloved brother was cut down in a single night—torn from the arms of his loving wife, who is thus left a disconsolate widow at the early age of 84 years."

"Twenty-two, if you please," says the widow in the front row, emerging from her handkerchief for an instant.

They Were Twins.

[Texas Siftings.]

"What two beautiful children! Are they twins?" said an old bachelor to an Austin lady with two children.

"Oh, yes, they are twins," replied the lady.

"Excuse my curiosity, madame, but are you the mother of both of them."

Punch's Dem: It is stated that the fortune of Philip Armour, the Chicago pork king, is $25,000,000. "The Greeks, but living Greeks no more."

"Tim."

[Detroit Free Journal.]

A little rain,
The cool shade,
A Sunday day,
Some new-mown hay,
A meadow.

A girlish face,
An inviting grass,
And beauty's grace
In taking pose,
Sweet days.

Some fading flowers,
Some happy hours,
But fading,
A touch of rain,
And then again,
A meeting.

One quick shy look,
A rippling brook,
Some clovers,

A shy if said,
The story told,
A lover.

A fair sweet smile,
A down cast smile,
What is it?
I try my fate,
And wait, wait, wait
To make it.

The years have flown,
And still lives on
That lover;
He loves and woos
As days and days
Pass over.

A loving wife,
A long, long life,
Together.
Have made him bless
The day they swore "For
Forever.

THE ELOPEMENT EPIDEMIC.

A Statistician Gives Some Figures on the Subject.

[Philadelphia Record.]

He was a seedy looking man, ready from the wear of his unpolished boots to the top of his shabby old beaver, and even his hair, which came down on his coat collar behind, looked as if it had run to seed also. He was in the newspaper room of the Mercantile library and was reading a copy of The Denver Tribune. When he had finished he pulled out a note-book and jotted something down. "Do you take any interest in statistics?" he asked, turning to a man in the next chair.

"Not much. Why?"

"Well, I'm devoted to 'em, especially to female statistics; that is, of course, to statistics concerning the gentler sex, and I've been a good deal interested in figures on the elopement epidemic that seems to have taken the the country by storm. Would you like to hear some of 'em?"

"Yes."

"I started with the 1st of September, and since then the papers have had accounts of 311 runaway matches, 201 of the women being under 20 years of age. Most of that 201 were blondes, so you see that light-haired girls are good runaways; my figures say so, and figures never lie. Of the other 30 who slipped off 23 were under 25 years old, 14 between 25 and 30, and the other 7 ranged from 31 to 55, the last being an old hen who eloped with a young man who ought to be in long clothes. One old girl started and changed her mind and went home again for fear the papers would print her age. Only 19 did the thing in real runaway style, ladder, midnight, moonlight, and carriage waiting-at-the-garden-gate business, and the rest just went out to the parson's as if they'd been going to the butcher's or the grocer's, or stepped off by train after telling some fib or other about going to pay a visit to their aunt or their cousins or a friend's. Ten of the 19 came back with their husbands, and were forgiven; 6 stern parents have played the heart-hearted Montagues, and there are no relatives as far from the rest of the list. Boston seems to have had the fever worse than anywhere else, and there have been seventy odd—let's see—here it is, seventy-three from that place; but girls'll do almost anything to get away from there; then comes Chicago, then——"

"How many of the women ran off with coachmen?"

"Oh! I'm not sure; about 275 or 280, I think; but that's not in my line; female statistics are very well in my hobby, but the coachmen don't come in under the rules."

And, pocketing his precious note-book, the seedy statistician went away.

JOTTINGS.

—Reform Club meeting to-night.

—Plainfield Engine Co.'s ball to-night, at the rink.

—Mark Twain is by all odds the funniest writer alive to-day. Go hear him next Monday night and laugh.

—Go to see the first writer to choose Creole life as a field for the novelist's pen. His readings are equally novel and interesting.

—Harry W. Tufts, an expert bicycle rider, gave an exhibition of his skill last evening at the rink on a bicycle. He performed remarkable feats to demonstrate his claim of being the champion bicycle rider of the world, and won much applause from the spectators. He rides on his machine one half a dozen medals won in contests. One of his feats was riding on one wheel, on which he balanced himself with ease and went around the rink at a rapid pace.

—In the Democratic parade at Westfield last evening there was a large pilot boat, attached to which was a life boat in the former of which were two Republicans vigorously rowing. The Republicans generally did not turn out with the Democrats as was announced by the latter, excepting a few who had agreed to do so in case of Cleveland's election. Several Republicans have likewise signified in this city and are separated in the Democratic parade Monday evening. The Democrats have also sent an invitation to Lincoln Club to join in the parade.

Somerset Freeholders.

The regular monthly meeting of the Somerset board was held Tuesday, in the Grand Jury room of the Court House, and was called to order by the Director. All the members answered to their names. The minutes of the last regular meeting were approved.

Mr. Wyckoff stated that John Clark desired to have the costs in his case remitted. The matter was laid over until the afternoon, when, on motion, a committee consisting of Messrs. Wyckoff, Sandts and Hoagland was appointed, with power, to consult with counsel in relation thereto.

Mr. Jones reported that an atrocious assault had been committed in North Plainfield township, upon Mrs. Mary Gould, as already reported in The News, and moved that a reward be offered for the apprehension and conviction of the perpetrator or perpetrators. At the afternoon session the sum of the reward was fixed at $150. The commons on account of prisoners reported that their cannot legally release three of the prisoners now in jail.

The Collector was authorized to borrow $4,500, and the board approved the loan negotiated by the Collector for the sum of $3,000, since the last meeting.

A number of bills including some for election expenses, were passed before the adjournment.

The City Election.

The annual charter election is to take place Tuesday, Dec. 2. Pursuant thereto the Boards of Registry are to meet at their respective polling places to revise and correct a certified copy of the original register, and make proper additions thereto.

The polling places designated are

First ward, Vail's Real Estate Office, North avenue.

Second ward, Nash's Cigar Store, Park avenue.

Third ward, McDonnell's Livery Stable, Sixth street.

Fourth ward, Laing's Hall, Front street.

Polls open at seven o'clock a. m. and close at seven o'clock p. m.

A proposed assessment of $5,000 in addition to the $40,000 previously made, is to be submitted to the voters for their approval, the object to be used for the repair and improvement of streets.

Flanders—Rockes.

A large number of relatives and friends assembled at the First Baptist Church at half-past ten this morning to witness the marriage of Mr. William Flanders, one of Plainfield's popular young men, to Miss Hannah, daughter of the Rev. Dr. Yerkes. The bride was attired in blue velvet, and carried a bunch of roses in her hand. She entered upon the arm of her father, who performed the ceremony. She was met by Mr. Harry Flanders, and the ushers were Messrs. James H. Hallock, Thomas E. Aldrich, William Craig, Joseph R. Terbell, George Mariner and Lemuel Sorrell. The happy couple left immediately on a wedding trip to Washington.

Grace Church Social.

The regular monthly social of young people of Grace Episcopal church, was held last evening at the residence of Miss Hardenbergh, Leffingwell avenue. After the exercises of reference for the evening were had, an admirably arranged play followed, entitled "Sunny Side." The evening closed very pleasantly with dancing.

UNION COUNTY SUNDAY SCHOOL CONVENTION.

A Large Gathering at Westfield Yesterday—Stateburg for the Future—C. C. Rooney of this City Elected President.

The pretty little Congregational Church at Westfield was well filled yesterday afternoon on the occasion of the annual convention of the Union county Sunday School Association. The attendance of delegates and with substantial favors.

The convention was called to order at half-past two o'clock by President Stateburg, of Rahway. Worshipful, of Elizabeth. After prayer and reading of the Scriptures, the Rev. Mr. H. S. Brown, of Englewood, N. J., made an address on the "Direct agents for the conversion of the Scholar," stating the teachers to appreciate responsibility, to be of the same methods and to consecrate themselves to the work.

The hours for next Sunday was then taught in an able and interesting manner by the Rev. W. H. Scudder, of Newark.

The following committees were appointed by the President: Enrollment—E. R. Pearsall, E. L. Beaton; Nominations—Rev. Mr. Reed, Mr. P. P. VanArsdale, Samuel Clark; Resolutions—Augustus B. Cregier, J. E. Brogrand; Auditing—Jonathan Woodruff, Isaac Faulks Jr., Denah Cregier.

The exercises on "The Attendance of the Sunday School on Public Worship" was led by the Rev. Dr. Harlbut, the President of the New Jersey Sunday School Association.

The question box was opened by the Rev. Dr. Harlbut of this city, and afforded much interest and profit.

At close of the afternoon session the delegates and visitors were entertained with a bountiful collation, provided by the ladies of the village at the hall of the W. C. T. U. The tables were tastefully laid and were loaded with Raspberries and fruits.

The convention was again called to order at 7.30, and a praise service led by Rev. Dr. Lewis, of this city, occupied the first fifteen minutes.

The report of the Secretary and Treasurer was next in order, reading the reports of the various township secretaries. The report from Plainfield contained the following statistics:

Number of schools	10
Schools reporting	8
Open all the year	7
Officers	72
Teachers	340
Scholars	2300
Scholars over 15	500
Scholars under 5	105
Number in infant classes	200
Total average attendance	1966
Joined the Church	74
Teachers, church members	247
Scholars " "	660
Money raised for home-extent purpose	$644.08.
For State and county work, $17.	

The report showed an increase of nearly a thousand scholars in the county during the year, the number now accounting to nearly twelve thousand. Ten enrollment committees reported one hundred and eighty-six delegates present and the denominations and schools they represented.

The following officers were elected for the ensuing year: President, C. C. Rooney, of Plainfield; Vice President, J. H. Durand, of Rahway; Recording Secretary, J. J. Cross, of Elizabeth; Corresponding Secretary and Treasurer, Augustus Cregier, of Elizabeth; Executive Committee, Rev. Dr. Harlbut, of Plainfield; R. W. Woodward, of Elizabeth, W. E. Wells, of Rahway, Rev. Dr. A. H. Lewis, of Plainfield; and Rev. Henry Wells, of Westfield. Member of State Executive Committee, R. W. Woodward, of Elizabeth. Township Secretaries, Chas. E. C. Potter; Cranford, J. W. Wilcox; Elizabeth, W. B. Tuttle; Union, Mr. Simonis; Fanwood, R. C. Treadwell; Linden, D. C. Crane; New Providence, Amos Potter; Plainfield, R. O. Newman; Rahway, S. M. Oliver, Springfield, Dr. J. D. Fuhrman; Scotch Plains, Mr. Brotman; Westfield, Dr. P. A. Kinch.

The convention closed with a very interesting address by Mr. R. R. Holmes of Plainfield, on the "Sunday School Teacher's Aim."

Plainfield was represented by Rev. Dr. Harlbut and Lewis, the Rev. Mr. Goodrich, Mr. J. D. Spicer, Mr. S. C. Rooney, Mr. George W. Rockefellow, Mr. Leonard S. Mulford and others.

Injured by a Fall.

Yesterday morning a nephew of Mr. Samuel Neal, who was engaged in tearing down an old house on West Front street, near Evans, the property of Mr. Neal, had one of the rafters fall upon him, inflicting a very serious scalp wound. The young man was taken to Dr. Parkhurst's on West Second street, where he received attention for injuries, and he was then removed to his home.

Publicity.

J. O. Rodgers, Overseer of the Poor, has been confined to his residence during the past week by a severe illness.

First National Bank of Somerville to Samuel J. Mosher, property in Bridgewater, $900.

A Wholesome Purpose.

EDITOR EVENING NEWS:—Amid the excitement of the present campaign it is a comfort that because the Republican party has been the means of securing success for so long a period to the prudence and labor county of our principles, prominent members of the Reform Club will never their connection with that noble band of men. Can it be that those who have, for eight months so bravely and successfully fought against the Rum Curse in themselves will desert the cause which has done so much for them because some of its leaders may perhaps have been guilty, or even if any of them have intentionally done wrong. Can it be true that the party which owes its existence to the rum traffic has assumed control all the more need for every soldier in the temperance army to be at his post, and "Hold the Fort" against the combined assaults of the enemy. The large temperance vote of the county is a surprise to most people and aside from party considerations we ought to be encouraged, even though clouds may for a time obscure the bright future we hope to see. God reigns and our cause is just, why need we fear. The innocent victims of the "Rum Curse" of Plainfield are looking to the Reform Club to vote it out of our fair city next month. For the sake of suffering women and innocent children will they not forego every other consideration and every man of them vote for Dalzy. God grant it is the earnest prayer of

A WOMAN.

The Democratic Parade.

The gloriferation parade by the Democrats of this city and visiting clubs, in honor of Cleveland's election to the Presidency, will take place Monday, as advertised in another column. The line of march will be as follows: The line will form on Somerset, right resting on Craig Place, to Manning avenue, to Watchung avenue, to Madison avenue, to Somerset street, to Scully, to Grove, to Front, to Richmond, to Second, to Park, to Fifth, to Sycamore, to Sixth, to Franklin, to La Grande, to Seventh, to Liberty, to Fourth, to Madison, to Second, to Park, to Front, to Somerset and disolve.

Fell from a Tree.

John Butler, colored, while picking apples, about two o'clock this afternoon on Mr. Alex. Thorne's, in Craig Place, fell from the tree, and sustained a fracture on the forehead, and fractures at the wrist of each hand, on which he struck in his fall. Dr. Parkhurst was promptly summoned and had the man removed to his home in Warren street, near Greenway, and gave him medical attendance.

Grace Church.

The new Baptist church at Port Norris was dedicated Sunday with interesting services. The edifice is one of the most attractive in that section of the country.

An exchange says a pan of sliced raw onions placed in a room where there is diphtheria absorbs all the poison in the air and the disease stops spreading. The onions should be buried every morning and fresh ones put on.

There is every hope of overturning the election of Wyatt Miller, Republican, who was defeated by a majority of 1 vote in the Fifth district of Camden. The Democrats will contest the election on the ground that a number of legal voters were prevented from voting by the refusal of the Judges of Election to receive their votes. The Democrats will also contest the election of Senator Sharp, Republican, from the Second district, on the ground that illegal votes were received.

Soaps Foolish People.

Allow a cough to run a while it gets beyond the reach of medicine. They often say, Oh, it will wear away, but in most cases it wears them away. Could they be induced to try the successful medicine call d K-ny's Bellsan, which we will give positive guarantee to cure, they would immediately see the signal be relieved after taking the first dose. Price 50 cents and $1. Trial size free. R. J. Stelle, Front street, opposite Park avenue.

THE COTTON CROP.

The Long Continued Drouth Has Cut Short Efforts on Yields.

WASHINGTON, Nov. 13.—The November returns of cotton to the department of agriculture relate to the yield per acre and show the effects of the long continued drouth in reducing productions. The lateness of killing frosts has less effect than usual in enlarging the yield, as the vitality of the plants was too nearly exhausted to produce a top crop. The drouth had not been broken at some points on the Gulf coast at the date of returns. The indicated yield per acre is lower in nearly every state than in the census year, which was one of an average production. The lowest yields are now, as then, in Florida, Georgia, Alabama and Texas. The reduction in this year very marked in Louisiana and Arkansas, the region of most productive cotton lands. The returns by states indicate the yield per acre as follows, the figures being subject to modification by later returns: Virginia, 190 pounds; North Carolina, 175; South Carolina, 153; Georgia, 105; Florida, 105; Alabama, 130; Louisiana, 185; Texas, 145; Arkansas, 200; Tennessee, 180.

The indications point to a crop somewhat larger than that of 1883, gathered in unusually fine condition, of good color, unstained by storms and free from trash and dirt. The returns of the rate of yield of corn indicate a product somewhat in excess of 1,600,000,000 bushels, or an average rate a small fraction above twenty-six bushels per acre. The best yields are, as in 1883, in what has been designated the great American desert. The "arid regions" in the vicinity of the hundredth meridian have produced heavy crops of maize of high quality. That line of longitude has come to be an absolute barrier to corn production or general farming. The quality of corn is better than in 1882, and very much above that in the northern belt it is worth twenty-five to seventy-five per cent. more. The potato crop is nearly a average yield, or ninety bushels per acre, and exceeds 180,000,000 bushels.

Trouble Among Miners.

PHILADELPHIA, Nov. 12.—Most of the [illegible] on account of a ten per cent. reduction, attended at meeting at Front and Harrison streets. The situation was this: eighty dollars and it was resolved to stay away from the mill until not to return to work at the old hands finding employment there. The resident agents of James Dock & Co., was trying to enlist a full complement of men. [illegible] the rooms a new price list, a reduction of from 10 to 25 per cent, was posted up and the hands invited to study the same. [illegible] agents stated that they would [illegible] to their looms when the mills shut down have finished them that some of the men quit to take the new price list. The [illegible] every mills will go out when his [illegible] is finished, and they seem severe in determining the firm of James Dock & Co.

Shot for a Burglar.

LACROSSE, Wis., Nov. 13.—Margaret Ecker, a 15 year girl, was shot and instantly killed at 7 o'clock this morning by one of United States Senator Angus Cameron. The girl and with two others gone to the residence of Mr. Ecker to call on a servant employed there. They went to the front entrance, but no one coming, they went around to the front entrance and rang the bell, at the same time handling the door in front of the door. Miss Dahl awoke from a nap and supposed he was being visited by burglar. He took down his shotgun and loaded it with ball. Becoming convinced that there was outside, he fired through the window. The shot took effect in Margaret's heart.

Seventy-Three Million Cattle.

CHICAGO, CITY, Nov. 13.—A convention called by the national bureau of animal industry to gather statistics relating to the cattle business in the west has nearly concluded its work. Its returns will show that there are 23,000,000 head of cattle in the states west of the Mississippi river, being an average decline of thirty per cent. since 1880. Texas leads, with a gain of seventy per cent; next Kansas is second, Nebraska; an increase of fifty-seven per cent.

Probate Convention of Connecticut.

BRIDGEPORT, Nov. 13.—The Connecticut probate convention, composed of all probate judges in Connecticut, met at 10 o'clock to-day. There was an address by Judge [illegible] Hartford, on "Widow Rights; what they are and what they should be." This was followed by a general discussion. The meeting was held with particular reference to the [illegible] probate laws, now [illegible] special consideration.

Ladies who Work Rewarded.

WEST RUTHERFORD, N. J., Nov. 13.—An election last last week two [illegible] ladies was paid here by the [illegible] during the winter twenty-six [illegible] borrow. A procession [illegible] the [illegible] the ladies, firing salutes and cheering. A meeting was organized and speeches made, after which the ladies were escorted to their homes amid great enthusiasm.

Difficult Work to Obtain a Jury.

BUFFALO, Nov. 13.—The work of obtaining a jury in the case of Albert Macheuver, indicted for the murder of an old woman in the village of West Falls on the 23rd of last April, progresses slowly. After fifty-eight men had been examined a jury of twelve was finally secured. Henry C. Hooker made the opening address on behalf of the people, and at noon took a recess until 2 o'clock.

Death of a Prominent Newspaper Man.

PITTSBURG, Nov. 13.—Crosby Phillips, [illegible] of the proprietors of THE DISPATCH and its business manager, died in the 55th year of his age. Mr. Phillips was [illegible] mayor of Allegheny City and has held many offices of honor and trust. At the time of his death he was president of the board of inspectors of the western penitentiary.

Contagious Disease Among Animals.

WASHINGTON, Nov. 13.—Dr. D. E. Salmon, chief of the bureau of animal industry, in a report to the commissioner of agriculture upon contagious diseases of animals, announces the conclusion that the disease which recently made such ravages among the cattle in Kansas was ergotism, caused by the eating of the fungus known as the ergot.

Mrs. Boutale Must Hang.

OTTAWA, Nov. 13.—The governor general has refused to commute the sentence of Mrs. Boutale, who is to be hanged at Quebec on the 30th inst. for poisoning a married woman named Lewis, with whose husband Mrs. Boutale was criminally intimate.

Pinkerton's Mystery Caught.

PHŒNIXILLE, N. Y., Nov. 13.—The mysterious man who has been terrorizing the inhabitants of this place for some time past has been arrested. He refuses to give his name or address or to say a word in regard to himself.

The Cholera in Paris.

PARIS, Nov. 13.—Forty-seven new cases of cholera were reported in this city from noon yesterday until midnight.

Consumption can be Cured!

TESTIMONY

Of the Hon. Jos. E. Cary, Judge of the Superior Court, Chicago, Ill.

CHICAGO, Dec. 14th, 1876.

DR. S. D. HOWE,

DEAR SIR:—I feel it my duty as well as my grateful testimony to the [illegible] of your wife, to express my gratitude for the [illegible] I have used your remedies. For a long time my wife was seriously afflicted with bronchial trouble, constant [illegible], soreness of the chest, and constant [illegible] in the lungs, so that at night [illegible] lying and under the slightest [illegible]. Her sufferings were intense, and she was extremely nervous and prostrated. Her disease was pronouncing consumption, and [illegible] that she could not live. When you [illegible] your remedies, 1876, we did not [illegible] from your treatment. We were inspired with hope [illegible] and [illegible] to [illegible] [illegible] [illegible]

THE NUT HARVEST.

A Large Industry with Brazil, Italy and Other Countries.

Some Facts About the Aristocratic Walnut, the Indigestible Almond, and the Plebeian Peanut —Other Nuts.

[Brooklyn Eagle.]

The most important center of the trade is now in New York, and to that city most of the consignments are made. Boston is also doing a good business in this line, and now has a regular line of steamers for ports on the Mediterranean. The English walnut is probably the first in importance, which, by the way, is not English at all. The greater part of these nuts come from Naples and certain French ports. The best walnuts are received from Naples and Grenoble, and about all that are retailed in these places find a ready sale in the Empire city. They are in favor and quality the finest which come into the market, and are carefully husbanded and sent for sale from the nut-producing nations of Italy, Spain and France. All the nuts that can be raised on the little islands which are part of Great Britain are used in England, and there are very few which find a market elsewhere. Hence the so-called English walnut in our markets would be more properly called Italian, French or Spanish walnut. Lately in the state of Massachusetts the people have commenced the cultivation of the walnut, and now many trees are to be seen in various parts of that state.

Brazil nuts are another delicacy, are from Brazil. There is no record of their being found in any other country. It is said by persons who have visited that land that the trees are beautiful to behold. They are often 100 feet in height, and their foliage is magnificent. They produce a round or woody pericarp, often five or six inches in diameter, and filled with seeds, arranging as many as twenty-five of the triangular, prism-shaped nuts. The trees bear abundantly, and large quantities are shipped to the trade in New York. Due to the lands of the Orinoco and in northern Brazil the trees are the most abundant. From the port of Para a great quantities are shipped to Europe, and also to the United States. The nuts are cheap and worth in the market in New York from 3 to 8 cents a pound, while English walnuts are worth 10 to 15 cents, and pounds 12 cents. The Brazil nuts are very oily and rich, and it is said that they defeat their own market simply because they are too rich for a small amount of money. As it is very hard to get them thoroughly dry, it is difficult to ship them, and consequently a loss of time and money sometimes accompanied by the destruction of the cargo. Another great drawback is that, when put into bags, the heat is so intense that the bags are burned before the cargo is half over. There is one reason why the wholesale dealers in this section of the country keep from the nuts as much as possible.

The next nut in importance in the foreign trade is the almond. This is the kernel or seed of the sweet almond. These nuts formerly came from Barbary, but they are now produced in the warm climates of Europe and Asia. In California this nut has been carefully cultivated, and it is expected that in time our full supply will come from that state. It flourishes in the valleys, and the height of 200 feet, and the leaves, with those of the cherry and peach tree, contain prussic acid. The nuts are very fine and of excellent quality, but, even if they were never eaten raw, the sale would be large, as they are much used in fancy cooking and confectionery.

Next in line are the bitter almonds, which are stated by authorities to be the cousins of our English friends. They are also said to be evidently belong to the same family and are extensively raised on the island of Sicily, and formerly large quantities were brought from Spanish ports. They are a great favorite, and in England parties are said to be in the habit to enjoy an evening in an oily shower. They are wholesome, but very oily; the oil is drawn as a quick dryer, and is much used by artists and the manufacturer of fancy preparations. The English blanches are, as a crop, insignificant, and are entirely consumed at home; but in California and the southern states the finest kinds of the almond and others apply is being cultivated by degrees. Filberts, like hazelnuts, are the seed of a shrub or bush generally growing in clusters from five to fifteen feet in height.

The cocoanut is the fruit of the cocoa palm tree, a native of tropical climates only, and flourishing best on the sandy shores. The great supply to this part of the country comes from the East and West Indies and a few ports in South America.

As much has been said in reference to the foreign nuts, it is proper that our own cultivation should be spoken of. The great American nut is the finest time, as it has been in the past, is the peanut. Although it is a great thing to young America, and though no circus tent or cheap variety show would be complete without it, it is only the common ground nut. Great quantities of peanuts are shipped from Norfolk, Va., in the vicinity of the country and in the Carolinas, Georgia and Tennessee. They are raised almost exclusively.

Then there are pecan nuts, hickory nuts, butternuts, chestnuts and a variety of others which are all ranked for in the fall, and the demand is so great that the wholesale dealers find a ready market for their wares. Already this year the crop of chestnuts is a poor shame, and the warehouses are laden with nuts from all parts of the country.

Where the Road Forks.

[The Current.]

The mind should separate the true aim of the bill-register from the aim of the "spotter" or detective. There the road forks. The "spotter" is after a criminal; and not only is he after one criminal, but after any criminal; and to him, therefore, every man is to be suspected, watched, followed, cross-questioned, and in some instances, the regular pursuits suspected. An employer should desire all people in his employ to be honest, and should check evidently his money may be embezzled.

"Housewarming" Indian Fashion.

[Boz on Budget.]

The rage for Indian relics connected with the western crusade is not confined to those now in possession of the land originally by white people, and not less than three years have been spent in ransacking about the country for "curiosities" which would be "interesting" and then sold at fashionable auctions.

Strange Letter Trick.

[The Current.]

The mills at Minneapolis are now grinding nearly 24,000 barrels of flour each day. Each flour barrel contains four bushels of wheat, and one million million times would be built a pyramid the size of Cheops. A day's work would make a row of barrels that would nearly bend four bushels of land.

Why Men Wear Mustaches.

[Boston Post.] Some people think that men never did cut to wear pins each and if they would, young men will begin to wear them in the future of the pin-less trade.

AT THE ENGINE-HOUSE.

John Brownell's Experience—Under Sentence Deliberately.

[Cath'n' Interview with Mr. Donovan.]

"I saw John Brown taken out of the engine-house. You must remember that during the night, or rather before the dawn, Col. Lee had the gates of the armory opened, and he took the marines in and had sentries placed. In the morning, before it was bright day, the marine made the attack. Failing to beat the doors in with sledge-hammers, Col. Lee let the gate, who was standing behind one of the gate-posts, made a signal with his finger. Immediately two lines of marines ran to the flag-staff in the middle of the yard, where there was a ladder lying. Before it was reached this and ran against the door, and at the second blow it gave way. Then Brown's men fired and wounded one marine in the face and killed another that he died. The first persons to appear were the hostages, Lewis Washington, who came out bowing in the most polite manner, and Mayor Gantt, who came into the yard. I got up very close, and my attention was attracted in the first place to old Brown. We had not been sure who he was, but Mr. Russell, one of the storming party, said to me: 'I know that man; he is Osawatomie Brown, from Kansas, and this is an abolition raid.'

"Russell," continued Mr. Donovan, "was a gallant fellow, and I never knew what became of him. The other officers there, after the engine-house was cleared, struck old Brown with their swords and behaved badly. John Brown received a very bad injury to his right shoulder, which was probably caused by a sword-cut. He was also stabbed in the side. The dying marine with the privates attending him was on the other side, heard a shout raised of 'Hang him!' He looked up at Russell and said: 'I bid you good-bye, my life, sir, and could have killed you, but I spared your life, and I expect you as a United States officer to protect me.' With that the officer replied: 'I will protect you.' With that he held out his hand, and Brown, and said: 'I am obliged to you, sir, for saving my life. As long as I have a gun you shall be protected with it.' Then he said: 'Captain, I am dying.' Then he said: 'Captain, I am dying.' Then he said: 'Captain, I am dying

THE REFORM CLUB PREPARING FOR FIGHT.

The Club to Take United Action.

Last evening a business meeting of the Reform Club was held at Reform Hall, President French presiding. After attending to some routine business the Club granted the request of the ladies of Muhlenberg Hospital to hold a fair in the Hall, as announced in our special notices.

Noah Pike who had been expelled from the club had the vote by which such action was taken reconsidered, on motion of Judge Wadsworth.

The meeting was then resolved into a committee of the whole to debate on the position to be taken by the club in the forthcoming city election. Mr. McGee occupied the chair, at the request of Mr. French.

Mayor Maxson introduced the subject by remarks intended to promote harmony among the members, and among other things stated that the constitution of the club explicitly declared that the religious and political views of members shall not be interfered with by any action of the club, and then proceeded to explain that this was in no *wise intended to prevent free speech and* discussion as to the best means to advance the temperance cause regardless of party affiliations.

It had been rumored that there was to be a general breaking-up of the club, to be begun with the resignations of the President and other leading Republicans on account of the course taken by the Prohibitionists in the National campaign, by which the Republicans party had been defeated, and there was on the part of those who had the temperance cause at heart, much anxiety, when President French arose to speak. His remarks, however, surprised everybody and were received with most vigorous applause. He declared that he felt sore to see his party slaughtered in the house of its friends, alluding to the Prohibitionists, but had resolved to stand firm by the principles of the club. After a number of gentlemen, including Rev. Dr. Lewis, Rev. Mr. Honeyman, Rev. Dr. Gunthel, Judge Wadsworth, Mr. Bayres, and the Secretary of the State League, Mr. Manning, and Messrs. Pike and Price, had spoken expressing their delight at the evidences of harmony and the determination of the members to be united in the work, *Judge Harper offered the following* Resolution, which on motion of Mayor Maxson, which after debate was adopted unanimously.

Resolved, That the Reform Club of Plainfield hereby reaffirm its principles as an organization with partisan politics, but declares that the cause of morality may be advanced within this city, if deems it appropriate and expedient to earnest[ly] recommend to each member of the club, when exercising the voting privilege and a citizen the municipal election, to support only such candidates, *irrespective of their political name*, or fear to be temperance men, and in favor of the prohibition of the sale within the city of Intoxicating liquors.

During the debate on the resolution, Mr. McGee, with Judge Wadsworth in the chair, and Mr. Reynell, expressed themselves as among those who had felt sore over the results of the campaign, but were determined to stand by the work of the Club, Mr. McGee saying that he would stand by it while there was one other man in it.

The Committee then on motion, arose as a Committee of the whole and upon Mr. French resuming the chair, the resolution was read to the meeting by the clerk.

During the further discussion, which followed, Mr. Angleman stated that there were but four Aldermen to be elected, and that these would continue in office two years.

City Clerk Leonard arose and stated that while there was no much expected to be accomplished it might be well to remember that there was already six of the eleven members in Council who were favorable to license, and that these were the six who held over. That the runs element was already at work securing signatures to their applications for licenses, and that these licenses were *likely to be granted, whether legal or* not, and that Council had already granted licenses which were known to be illegal in form. The club, he said, could not prevent further licenses being granted, but they could see that the law was strictly complied with, in the matter of signatures to applications for licenses. They could also do much by securing a mayor who would see that the law was enforced.

Mr. Maxson followed and said that the time was not for speeches as Mr. Leonard pictured, for one of the Councilmen who had hitherto voted for license had assured him that he would no longer do so, and had joined the club. A member shouted, "who is it?" and the Mayor answered Councilman Cook, which announcement brought forth the clapping of hands and stamping of feet.

Mayor Maxson then continued, saying, "and Frank Marsh, another member who if he sticks to the sentiments he has repeatedly expressed in public, will not vote for license. Those makes two, so that if we elect temperance men, as the four new members, we will have seven of the eleven members."

Some one in the audience said that they could also count on Councilman Dumont, which evoked further applause. At this juncture another person in the audience arose and said that they could not count on Mr. Dumont, unless the citizens voted for the $5,000 to repair and improve the streets, as, if the money could not be obtained in this way, it would have to be obtained by the granting of licenses. "That is" said Mayor Maxson, "the reason why we want trade votes for money." At which there was laughter.

The resolution was finally adopted unanimously and ordered printed in the city papers for two weeks.

Mrs. George B. Updyke, of the Finance Committee of the W. C. T. U., on behalf of the ladies of that organization, expressed their pleasure at witnessing such harmony and consecration of purpose in behalf of temperance, as manifested by the resolution, and although not directly appointed by authority, she assured the club of the hearty co-operation of the Women's Christian Temperance Union for the success of temperance candidates at the forthcoming city election.

Mrs. Updyke was complimented during the evening, and the ladies generally, for their clear-headed, business-like course, with reference to the financial matters of the W. C. T. U., and the council meets appeared certainly well deserved.

Rev. Mr. Honeyman, Chairman of Committee on Speakers, reported as the speakers for next Sunday evening Rev. D. J. York on Messrs. James McGee, Judge Wadsworth, John Cuthbert, Cuyden Tyler and Mayor Maxson.

It was then stated by Mayor Maxson, the chairman of the committee appointed for the purpose, that for the building would cost $500, and he asked for the sense of the club in the matter.

Remarks by Messrs. McGee and Leuphear elicited the fact that the proposed improvements to the basement, the heater and mason work, would cost about $1600, to pay which there is at present in the hands of the Treasurer or promised about $621, that the running expenses of the club are about $1200 per annum and the estimated receipts from dues about $1500.

Mr. McGee deprecated any course which would run the club in debt, and favored the raising of the amount to pay the heater before giving the order for it. He offered $100 provided the $1000 to complete the improvements was raised.

It was finally decided to suspend further improvements in the basement and use the $621 appropriated for that purchase of the heater, after which the meeting was adjourned to meet next Thursday evening in the basement of the Methodist church.

A MINISTER'S SUICIDE.

The Rev. Williamson Kills Himself Near His Home at Trenton.

Trenton was startled yesterday morning by a report that the Rev. Henry E. Williamson, rector of St. Paul's church, had committed suicide. The suicide was found at ten o'clock in a sitting position under a tree in O'Brien's lane. His brains were oozing *from his right temple, in which was a large* wound. By the side of the body lay a Smith and Wesson five-chamber revolver, one chamber of which was empty. The dead minister wore black kid gloves. His overcoat was buttoned all the way down. There seems to be only one theory as to the cause of the suicide, and that is he was out of his mind.

Mr. Williamson is the youngest son of ex-Chancellor Benjamin Williamson and a nephew of Chief Justice Beasley. He was educated at Alexandria (Va.) Theological Seminary and was ordained Presbyter at Elizabeth, St. John's church, June 30, 1883. He came to Trenton soon thereafter, and was made assistant to Rev. Dr. Nelson, rector of St. Michael's church. He was connected thus until September 1, 1883, and last spring was made rector of St. Paul's, a large church in the lower part of the city. He was the only salaried rector over 30 years of age, but was considered a talented preacher and one of the hardest workers among the clergy. Inquiries among his friends elicited the information that he was an almost constant sufferer from depression, but nothing in his conduct ever led any one to believe *that he would seek death by his own hands.*

Union County Freeholders.

At the last regular meeting of the Union County Freeholders, held Nov. 6, it was, on motion of Director Martine,

Resolved, That the county collector be authorized to pay to the Board of Education of the city of Plainfield the sum of $8,322.29 in full for arrears of school moneys for the years 1877 and 1878 as per decision of Supreme court, being for principal, $2,745.90, and interest from April 20, 1878, $1,076.39. Total, $3,822.29. (This amount will be paid back to the county by the city of Plainfield).

By Freeholder Hubbard:

Resolved, That twenty dollars be paid to J. G. Todd for extra masonry work on Fairmount avenue bridge, Plainfield, upon presentation of bill approved by the committee. Adopted.

By the director:

Resolved, That five hundred dollars be transferred from court account to bridge account. Adopted.

Bills aggregating $6,372.07 were presented and ordered paid, after which the meeting adjourned to Thursday, Nov. 20, at two p. m.

Y. M. C. A. Concert.

A large and appreciative audience attended the opening Concert of the Y. M. C. A. course of entertainments which was held at Stillman Music Hall last evening.

Mr. and Mrs. Carl Feininger on violin and piano, and Miss Helen Potter, elocutionist, were the only attractions, but they were a host in themselves, and they satisfied the audience, whose applause was of the most hearty character, once recalling the artists.

Burnett—Force.

Yesterday afternoon at half-past five o'clock at the residence of the bride's parents on West Second street, Miss Carrie Force was united in marriage to Mr. John Burnett, of New York. The ceremony was performed by the Rev. T. Logan Murphy, pastor of the Holy Cross Church of North Plainfield. The couple left on the 5:30 p. m. *train for Niagara.* They will reside in this city during the winter.

—A man in North Plainfield recently claims to have received for a ton of coal of 2,000 pounds, only 1,500 pounds, 25 per cent. less than he had ordered. There should be a sealer of weights and measures to protect the public against such frauds as this. The News advertisers in this line can be relied on for just weight and good quality, as a matter of course.

The Mountain Man in Plainfield.

As well as the handsomest and others are invited to call on E. J. Howe, Front opposite Park avenue, where he will handle Cook & Lamb's Saloon for the Purest and Largest, & Lamb's saloon for the Purest and Largest, & Lamb's saloon for the Purest and Largest, & Lamb's

H. P. BALDWIN, Gen'l Eastern Passenger Agent.

FRIDAY, NOVEMBER 14, 1884.

FASHION NOTES.

Some of the new aprons of overskirts are plaited.

The newest gray is formed by a mixture of black and white, and but a tinge of blue in it.

Skirt braids are put on straight to hang below the hem this season, and are never used as binding.

There is no padding at the tops of the sleeves or below the waist in the Worth costumes of this season.

Scarfs of white China crape embroidered in gold have been imported to trim velvet hats. They are the richest of all the new decorations.

A new way of stitching cloth suits is to arrange the rows in groups of three. This is used on the collar and also on the overskirt and jacket.

Mrs. John Wood recently appeared on the stage of a London theatre wearing a gown in which every plait of the skirt was of a different color.

A pretty substitute for a waistcoat is gathered ruffles of satin, set in groups of three, facing each other between velvet facings, all of them coming to a point at the waist.

Among the prettiest of the velvet brocades is one in which the black ground is strewn with very small uncut velvet roses of many colors set close together. The colors are very rich and the effect very brilliant.

Evening wraps are as elegant and expensive as ever this season. A long dolman of cream colored plush, for instance, is bordered with chenille fringe eighteen inches deep, headed by arabesques of gold braid.

TAM O'SHANTERS are still worn in England by children, and some which have appeared this year are of bright red velvet with a small tuft in the centre. Others are of gray, blue or brown, embroidered in gilt or with silks of the same color.

THERE seems to be quite a similarity between 1860 and 1884 with respect to the pertinacity with which the apparently defeated party clings to hope. The Democrats in 1860 were unwilling to concede Lincoln's election for some days. When they did give it up it was like the pulling of a tough old tooth. The Republicans appear to be undergoing the same process just now.

CLEVELAND should send Dr. Burchard a medal in return for his services as the rescue of the New York Governor when the waves were pretty high and the sky was very black.

MOTTO for the managers of both parties: "Commit no outrage; submit to none."

THE country is safe at any rate. The politicians must take care of themselves.

ALMOST AN OLD STORY.

THE DAILY CANVASS OF VOTES IN NEW YORK CITY PROCEEDS.

No Changes of Importance so far Discovered—Some Conkling's Assistance.

Cleveland's Theory Path—Butler's, Blaine's, Independents in Session.

NEW YORK, Nov. 14.—There is little to report concerning the canvass of the vote of this state. Cleveland's plurality will remain in the neighborhood of 1,000. All but a few counties above the Harlem bridge have been heard from, and no change is reported. The canvass in Long Island is ended. The returns are unimportant. In the canvass of the Fourth Assembly district of this city Cleveland gained ten votes over the Democratic national committee's estimate, and Blaine lost two.

No Alteration in Former Figures.

NEW YORK, Nov. 14.—The World says: "The World has received the vote in each of the counties of the state, cast at the late election for Cleveland, Blaine, Butler and St. John, outside of the city and county of New York, as found by the board of county canvassers. In four or five counties, such as Monroe, Erie and St. Lawrence, the official declaration of the vote has not been made by the boards, owing to the delay in making the corrections of clerical errors and omissions in returns. The vote as given for some counties is that shown by the official tally sheets and admitted by both Democrats and Republicans in the boards of canvassers. It is certain

"The footings are those officially made with the exception of Kings county. The presidential vote in the latter county has been all canvassed, but the official footings have not been announced. The total vote on the candidates has made a few changes in our previous table, but the same plurality obtains of the city and county of New York is 41,969. Mr. Cleveland's reported plurality in this city is 48,390, which makes his plurality over Blaine in the entire state 1,397.

Latest New York Returns.

NEW YORK, Nov. 14.—The Star says: "In forty-three counties in the state the canvass is now complete. The figures do not change the unofficial totals materially, except in the instance of Kings, in which Cleveland gains 104 votes in the official canvass. The late counties reported are Delaware, giving Blaine a plurality of 976; Columbia, Blaine 570; Rockland, Blaine 1,104; Schoharie, Cleveland plurality 1, 987; Kings, Cleveland, 15,755; Queens, Blaine 1,020; Suffolk, Blaine 577. In Schuyler county Beach, Republican, and Mercer, Democrat, receive one electoral vote each less in the official count than Franklin Blaine's plurality is 1,690, and in Oneida Cleveland's plurality is 30. This last is the county the Republicans claim to have made such gains in. There are seventeen counties yet incomplete."

Cleveland's Thorny Path.

BOSTON, Nov. 14.—A Washington special to the Transcript says: "A leading politician from New England, who stopped in New York on his way here to confer with the Stalwarts and Independents in that state as to his probable course, will take no inaugurating Cleveland's administration, reports that, if the programme is carried out that has been partly agreed on among those who contributed to the Democratic success, there will be many surprises as well as bitter disappointments. He stated with considerable assurance that no sort of influence will be likely to change Cleveland's purpose to recognize that class of Republicans who made his election a certainty.

To such men as Senator Conkling and Cleveland will do precisely what Mr. Lincoln did in 1860, go beyond party lines for some of his official advisers, so as to give emphasis and a feeling of non-partisan movement to which he will owe his election. In proof of this, he said he would not be surprised if Conkling were offered the secretaryship of portfolio, and that, too, with the full approval of the representative Independents. Some of the more sagacious of this class say it would be the only way of fixing the future political status of that state.

Whether Conkling would accept is another question, but the mere tender of such recognition would, it is claimed, go far to solidify the opposition vote to Blaine for future Republican purposes. He added that this programme of the reinstated Cleveland's purpose to reorganize the Democratic party on a broader and more liberal basis, with the view of breaking up not only sectionalism, but also of encouraging such national policies as would restore confidence and fellowship between all sections.

This line of policy would no doubt excite many antagonisms among the extreme bourbon element, whose relations to Cleveland will in many respects be as embarrassing as his relations to them. Cleveland is a Democrat by conviction and not by birth, and will be always at the asylum. The case will be further investigated by Harrison Becker's relatives, and the body will be brought to this city.

Killed at Sea.

PORTLAND, Me., Nov. 14.—News has been received here of the murder of Henry Shaw, stabbed to death at sea while in the performance of his official duties. He was the United States inspector of hulls. Capt. Turner, and the mate was on the passage from Rangoon to Chittagong. On the day when the fatal deed occurred Shaw had checked off the cargo. The crew, according to the report, was a big burly fellow, who was inclined to be quarrelsome when under the influence of rum. Shaw ordered him to perform some duty, when the man gave him an impudent reply. The officer repeated the order and turned to resume his work. The sailor quickly, and before any one was aware what was going on that when all came it was too late for the unfortunate officer. When the ship arrived in port the murderer was handed over to the authorities. Shaw was a young man of much promise, and a native of Durham, and had lived in Portland. His family has has many relatives and friends in Portland, which is also his shipping port.

Escaping to Save Fortune.

PHILADELPHIA, Nov. 14.—Annie Floyd, alias Van Rand, the girl who threw vitriol on the head and shoulders of Harry Meyers, a liquor dealer, on the night of Sept. 24, in court for trial. She claimed that she thought the bottle contained a "love potion," which she threw over Meyer as a charm to win his affections. She was held to bail in the sum of $1,000 for her appearance for trial. The judge said he had no doubt, from the evidence, that she threw the vitriol out of revenge and imposed a sentence of three years imprisonment.

WILL LOWELL ANSWER?

AN AMERICAN ACCUSES THE MINISTER TO ENGLAND OF DUPLICITY.

Confined to an Insane Asylum, Although He Declares Himself Sane. His Appeals to Mr. Lowell for Assistance—Indorsed by Leave Here.

LONDON, Nov. 14.—An American named Bruce, who was formerly a political character in New York city and previously a schoolmaster in Illinois, has been for the past six years confined in the Broadmoor asylum for the insane. On several occasions he has protested in various ways against his detention there, and at times his conduct and appearance have been such as to justify the authorities in keeping him under restraint.

Once he succeeded in sending a telegram to the queen complaining of the injustice of his confinement, but the message was stopped by the officials. Then he twisted up and deprived of many of the privileges of the institution for several months. Bruce recently read a speech of Minister Lowell, delivered at Birmingham, and at once determined that Mr. Lowell was the only man who could secure his release.

Owing to Bruce's exemplary conduct during the past year, and as he displayed traces of sanity rather than insanity, the asylum officials allowed him to dress in such clothing as he desired and permitted him to grow his hair and beard, both of which were quite gray. Bruce with his long curly locks hanging about his shoulders, and dressed as Bruce figure about the asylum as he performed the duties of assistant warder. He was allowed to visit town, pay bills, make purchases, etc.

On Monday last he paid his accustomed visit to the town, but instead of returning escaped to the woods, where he hid himself in the bushes, and then made his way to the Crystal Palace, in the vicinity of which he sought out a Baptist minister, who was acquainted with his previous history, and, telling him the story of his confinement asked him for food and shelter. The minister took him in, and after keeping him over night sent with him to the American legation where he introduced Bruce to Minister Lowell. Mr. Lowell promised to demand an inquiry into the case, but told Bruce that as he was subject himself to prosecution for stealing the clothes he was wearing he had better return to the asylum and await the result. Bruce, after a short interview, refused additional proof of his sanity. Bruce returned and surrendered himself to the asylum authorities, but has since heard from Mr. Lowell would indicate that Mr. Lowell has asked for an investigation in his behalf. Bruce complains bitterly that Mr. Lowell decoyed him back to the asylum and was not content to let him remain in the legation where he introduced Bruce to Minister Lowell. Mr. Lowell promised to demand an inquiry into the case, but told Bruce that as he was subject himself to prosecution for stealing the clothes he was wearing he had better return to the asylum and await the result. Bruce, after a short interview, refused additional proof of his sanity. Bruce returned and surrendered himself to the asylum authorities, but has since heard from Mr. Lowell would indicate that Mr. Lowell has asked for an investigation in his behalf. Bruce complains bitterly that Mr. Lowell decoyed him back to the asylum and was not content to let him remain in the legation where he introduced Bruce to Minister Lowell. His memory is excellent, and he details his interview with Mr. Lowell and the incidents of his escape with minute accuracy. The case has excited much interest in the case, and many believe that Bruce has been unjustly confined.

On the Friday previous to his escape Bruce appealed to the United States Minister to issue him, but finding them obdurate to them resolved to avail himself of the first opportunity to escape.

Kind Words from Henry Irving.

NEW YORK, Nov. 14.—A meeting of the Actors' Fund of America was held in the Theatre Comique building. There were present President Harry Miner, A. M. Palmer, Samuel Colville, W. A. Tillotson, Col. Sinn and H. G. Pike. The secretary's report showed that from October 6 to November 1 the sum of $680.10 had been disbursed. Applications from a number of professionals in various cities were received upon, relief being granted in worthy cases. A meeting of the benefit committee was unanimously called for Monday, the chairman of the committee, reported that for the first series of four performances which are to be given at the Academy of Music on December 1, 2, 3 and 4 Henry Irving, Ellen Terry, Joseph Jefferson, Lester Wallack, Fanny Davenport, Mr. and Mrs. J. W. Florence, McKee Rankin and Fred Robinson had been secured.

In volunteering to appear Mr. Irving wrote: "I have the most sincere pleasure in assuring you not only for myself but for Miss Terry and the Lyceum company that we will be delighted to take part in the entertainment on December 4. For such an institution as the Actors' Fund it is a pleasure all of us to do our utmost, and it is especially gratifying to think that we shall cooperate in such good work with so many admirable artists of your own nation."

Cholera Through Hops.

WASHINGTON, Nov. 14.—Secretary McCulloch has received the following letter urging immediate action to prevent the introduction of cholera into the country:

"Dr. Hamilton, of Hamburg, reporting the fact that there is great danger of the introduction of Asiatic cholera into the United States through hops, which are largely imported into the country, and coming from European ports, do hereby respectfully suggest and urge upon you the necessity for immediate and decisive action in reference thereto.

"We are prompted thus to appeal to you because of the recent removal of restriction on the importation of rags, and the fact of common belief that this threatened danger can only be averted by the most thorough and systematic disinfection of all old rags coming from any and all European ports."

The letter bears the indorsement of about twenty prominent physicians of New York.

President Tyler's Daughter Married.

RICHMOND, Nov. 14.—Hon. Wm. M. Ellis and Miss Pearl Tyler, daughter of the late President Tyler, were married in St. Peter's cathedral at 5 o'clock by the Rt. Rev. Bishop John J. Keane, of the Catholic diocese of Virginia and North Carolina. The ceremony is become necessary to secure a dispensation from the pope in order to have the ceremony performed in the cathedral. This was accordingly done. As is usual in England a Protestant was married within the sanctuary of the Catholic church. A reception was held early in the evening, and later the couple left Richmond for a northern tour.

Patti's Husband Gets the Divorce.

PARIS, Nov. 14.—The Patti divorce case, a decision which will cause considerable excited quech remark. Miss Patti first presented a petition for divorce from her husband, the Marquis de Caux. The marquis thereupon presented a cross petition. The Tribunal took cognizance only of the husband's petition and pronounced a divorce for the fault of the wife. Lawyer Allou, counsel for Mme. Patti's petition, announced as the scandal which caused the separation between husband and wife was still maintained by the latter.

The National Banking System.

WASHINGTON, Nov. 14.—The comptroller of the currency has issued a statement of the greater number of national banks, and with greater aggregate capital than at any previous time in the history of the government. The corporations authorized to commence banks, representing $180,000,000 capital, will expire during next year, but from present indications all will continue, either by extension of charter or reorganization.

THE MOROSINI AFFAIR

REVEALED BY THE LATEST MOVE MADE BY THE ITALIAN BANKER.

He is Alleged to Have Offered His Daughter $250,000 to Meet Of the Stage, and $250,000 to Her Husband to Leave Her.

NEW YORK, Nov. 14.—The Star says: "It is beginning to look as though Mrs. Sidney Dillon Ripley will be allowed to carry out her intention of appearing in comedy under the management of Mr. Gustav Amberg, of the Thalia theatre, without opposition. The first move in the interesting drama was made yesterday when the manager received a letter from an anonymous source informing him that Victorie would be enjoined from appearing in the role of Marcelle on the bills announcing her appearance.

"During the day a lady friend of Mrs. Hinkemann called on them at their residence, and they had a long interview behind closed doors. On the afternoon before she had been visited by a tall, good looking man. He had a handsome mustache and goatee, a dark complexion and a profusion of curly hair. A German he inquired of her if she wished to secure secrecy.

"Yes, indeed was the answer. 'I wouldn't like anything better than to make a few thousands.'

"You shall be well paid if you will act with me,' replied the man. 'I have $25,000 from a friend of Mr. Morosini's, and if you will only try to have Victorie go home—'

"Why don't you come to the point?' asked the lady.

"Well, I will. If you can get her to break this contract with the manager of the Thalia to go west with her husband and promise not to step on the stage for two years. Or, if you can't arrange that, try what you can do with Hinkemann. You shall have an offer of $250,000 each. He can have that if necessary if he leaves his wife and allows her to go back to her home. Will you try what you can do? I shall call for an answer to-morrow afternoon at about 4 o'clock.' If you act right it will be worth $10,000 to you.'

"When young Hinkemann heard these propositions he grew almost purple with rage. On recovering himself he said:

"You can say to that man that neither Mr. Morosini nor Jay Gould have money enough to buy me from my wife or to make me alter our intentions toward earning an honest living.'

"A Star reporter called on the couple last evening for the purpose of learning the result of the answer. Both appeared to be in the highest spirits, for with them was their lawyer, Mr. Burke, who had just informed them that he had secured a position for his wife which Mrs. Hinkamann could be restrained from singing in concert or be enjoined from putting her name on the bills as Miss Schoolcraft-Hinkemann, nee Morosini.

'Has your lady friend informed you of today's interview with the dark stranger?' inquired the reporter.

'Yes,' answered Mr. Hinkamann. 'She visited us this evening and informed us that she gave him our answer word for word in the presence of her husband. She said that they would stop my wife from singing anywhow, and that she positively shouldn't sing.'

'Have you tried to find out who this man is?'

'Yes. I have employed one of our smartest detectives to hunt him up, and I am confident that it won't be very long before we compel these people to stop their persecutions. The detective, from the information I have received so far, is on the man's track now.'"

J. M. Masterton Still Missing.

MOUNT VERNON, N. Y., Nov. 14.—A meeting of the depositors of the defunct banking firm of J. M. Masterton & Co. was held in the Mt. Vernon hotel last evening. The only business of importance transacted was the adoption of the report of the law committee and the indorsement of the course pursued by them. The committee adjourned to meet again next Tuesday evening. The counsel for the firm of Masterton is still a question, and the second warrant for his arrest is still in the hands of Constable Ward. The general impression is that he is far out of the reach of the law.

Reducing Mill Wages.

MANCHESTER, N. H., Nov. 14.—The mill agents in this city held a meeting and voted a general reduction of wages paid to operatives, to go into effect December 1. This will amount to 8 per cent on the Amoskeag corporation, and to a reduction ranging from 8 per cent on Amory nor 10 per cent. on Langdon. No announcement has yet been made by the Manchester corporations, but a reduction is expected in the same ratio as the others.

Peculiar Solace for a Defeated Candidate.

NEWARK, Nov. 14.—A Democratic sheriff was recently elected in Camden county, N. J., and the Republicans in the legislature, acting under an old statute created the office of prison warden, and elected Jacob Daubman the defeated candidate. When Daubman came to take the office he was not permitted to enter the county house as Sheriff Smith's deputy threatened to shoot him. A law suit will be the result of the matter.

A Congressional Contest in Indiana.

WABASH, Ind., Nov. 14.—Hon. M. H. Kidd, late Democratic member of congress from this district, has announced his intention of contesting the election of Gen. W. T. Stuck, his Republican opponent, on the ground that fraudulent votes were polled at the polls in Grant County. Stuck's majority is 54, and the impression prevails here that the house will give Kidd the seat.

Probably Garden is Still Alive.

LONDON, Nov. 14.—The government has not as yet received any information of Gen. Gordon's capture or death. The reports are generally discredited by the officials.

CONDENSED NEWS.

Some parts of New Hampshire have been visited by a severe shock of earthquake.

The Washington monument is now 520 feet high—the highest structure in the world.

Every president is determined that Guiteau shall stand trial and not escape by a technicality.

There is great distress among Philadelphia operatives. Thousands of men, women and children have been out of work for months owing to the dullness of trade.

Representative Kelly thinks there will be no tariff legislation this winter. The appropriation bills and the electoral count bill will consume all the time of the house.

The Boston police are very much exercised over the discovery of a second story thief who have been successfully committing depredations for the last two months.

A movement to commemorate the battle of Monmouth was started at Freehold, N. J., yesterday in the presence of several thousand people. Gov. Abbett made an address.

In his annual report Gen. Hazen deems unfavorable the choice by Lieut. Garlington and his failure to relieve Lieut. Greely. He says the former officer should be officially investigated.

Mount St. in Winter Quarters.

CINCINNATI, Nov. 14.—Mount St., the trotting queen, arrived at Chester park at 12:30 from Lexington, Ky. The Bonner party went down from Lexington. The mare will remain at her present quarters during the winter.

The Cholera.

PARIS, Nov. 14.—From midnight Wednesday up to 9 o'clock Thursday afternoon, 88 new cases of cholera were reported.

AN EVENTFUL CAREER.

Wrecked by a Woman, Shipwrecked in a Boat and Murdered by a Sailor.

AUGUSTA, Ga., Nov. 14.—The death of Thomas Stewart, in Barnes county, ends a most eventful career. Stewart was a native of Ireland, when he had resided not far from the Abraham's ford. One day he and another boy were sent to the swamp to find a cow. When within a short distance of it a large tiger sprang out of a bush and brought the cow to the ground. The tiger then took Stewart's head in his mouth and carried it, but he soon slipped over instead of passing the skull. It was then the boy's skull several times with the same result, and he, with a process of mind worthy of a man or young, did not once drop while the beast was tearing huge furrows through his scalp. The tiger, after lolling its face near the boy's face an instant, as if to make sure that he was dead, and hastily covering him up with pine straw, left and Stewart sprang to his feet and ran home, and finally recovered from his wounds. The tiger was killed by a party who went hunting for it.

A few years afterwards Stewart, while feeding a cane mill, had one of his hands caught and crushed to a pulp. Amputation was necessary, so he started for his future wife, succeeded in getting her from the house and the happy pair were on their way to Barnes county, when a storm struck the boat by a moccasin, a dangerous reptile. Even that did not stop him. They proceeded to the parson's and were married. Stewart did not fear the devil.

Next we hear of Stewart, he was being tried for his life for the murder of a man named Palmer. The evidence was strong against Stewart, and everybody thought he would hang. He was defended by the now venerable Judge Hansell, of Thomasville, and a young lawyer just commencing out, and was sent to the penitentiary for six years.

WORSE THAN AN EARTHQUAKE.

An Explosion of Nitro-Glycerine Plays Havoc in Ohio.

TOLEDO, O., Nov. 14.—At 10:30 Toledo was startled by a terrific shock which shook buildings, shattered glass and created a panic in the public schools. It was caused by the explosion of the nitro-glycerine factory and storehouse of A. J. Hammond & Co., of this city, located about four miles up the river within the city limits. Five men were at work in the establishment at the time, and singular to say none of them were killed, but are all more or less injured.

The result of the explosion in the vicinity is simply terrible. Large trees were twisted out at the roots, fences ground up and everything presents a deplorable sight. Windows were shattered in the house of refuge near by, and in Perrysburg, five miles distant. The brick wall of the high school house wall was cracked, blackboards were thrown to the floor and everybody rushed out of the building. The shock was felt at Defiance and various Canadian points across the lake and even as far east as Cleveland. In each of these distant places it was supposed to be an adequate shock.

There were 30,000 pounds of dynamite and 2,000 pounds of gunpowder stored in the magazine. Hammel & Co. lose about $10,000 by the explosion. Windows throughout the city will foot up many hundreds of dollars, though it is impossible at this time to estimate it.

How London was Fooled.

LONDON, Nov. 14.—The London newspapers to-day received through Reuter's agency the following dispatch from Khartoum, reported that Gen. Gordon had been winning a series of important victories over the rebels, and that the latter's power was practically ended. The news was hailed with delight, for sports of reverses at Khartoum have been persistent of late, and there have been many premonitions of an overwhelming disaster. The newspapers published special editions, bulletined the news in their office windows and displayed it in their columns with the most conspicuous type. Their enthusiasm was terribly dampened a few hours later when a correction was received from the news agency. Also explaining that the occurrence mentioned in the dispatch were nine months old and had been reported to-day by mistake.

Rich Harvest for Burglars.

MONTREAL, Nov. 14.—Three masked men entered the store of J. O. Villeneuve early this morning, overpowered the night watchman, who was in bed, and who they first gagged, and then bound hand and foot and securing him to a couch; they then blew open the safe with gunpowder, securing $8,000 in bills and a number of stocks and bonds, after which they removed silks and velvets to the value of several thousand more. Having ransacked the store and carried off everything of value, they decamped without releasing the watchman, who after two hours' struggle got free, and will probably succumb to the injuries received.

A Difficult Boy to Kill.

MOUNTAINVILLE, N. Y., Nov. 14.—A miraculous escape from death occurred at Hunter's Falls, on the Ontario & Western railroad, a day or two ago. Willie Wright, the 11-year-old son of Benjamin Wright, was crossing the track with a load of lumber when he was struck by the New Berg express. The wagon was wrecked, one of the horses was hurt and the boy was thrown to the ground. The only slight injury he received was a slight scratch on the leg, which was immediately bandaged. He remained unconscious twenty-four hours and then revived and may recover. When the boy was struck he had a little dog in his lap, which was instantly killed.

An Ohio Railroad Smash Up.

MANSFIELD, O., Nov. 14.—A most disastrous wreck occurred on the New York, Pennsylvania and Ohio railroad, in which two lives were lost and several persons injured. The accident occurred at Ashland, a few miles east of Ashland, when a freight train, from some unknown cause, was thrown from the track. Christian Orr and Thomas Vankuel, engineer and fireman, Vankuel, the fireman, jumped into a creek, when he saw the danger, and was seriously injured. His wounds are not fatal. Assistance has been sent to the scene. The cause of the accident is wrapped in mystery.

Mount St. in Winter Quarters.

CINCINNATI, Nov. 14.—Maid S., the trotting queen, arrived at Chester park at 12:30 from Lexington, Ky. The Bonner party went down from Lexington. The mare will remain at her present quarters during the winter.

The Cholera.

PARIS, Nov. 14.—From midnight Wednesday up to 9 o'clock Thursday afternoon, 88 new cases of cholera were reported.

THE LAST STONE.

How It Will Be Placed in Position in Washington's Monument.

WASHINGTON, Nov. 14.—Much curiosity has been expressed as to how the capstone of the great Washington monument will be placed in position. The plan is as follows: When only nine more stones are wanted to reach the summit, a little platform will be built around the roof, which will be finished up to that point. The platform will be bracketed to large timbers extending along the outside surfaces of the roof and resting upon the large platform, which can be seen at the top of the shaft, forming part of the derrick. The nine stones needed to complete the work will be hoisted by the big boom, which is now at work, and placed on the platform. The masts and booms and the whole hoisting apparatus will then be taken down and entirely removed. In its place will be erected a pyramidal frame, the base resting upon the little platform referred to. At the apex of this frame, which will be directly above the location of the capstone, will be a block and tackle by which the remaining stones will be raised and put in place. After the stones are all up the frame will be removed, then the bracketed platform, and lastly the heavy timbers which support it. The men will reach the large platform by means of the ladder. The work will then be completed, with the exception of removing the large platform. These timbers will be taken in at the windows, the last man on the outside entering the permanent windows on the east side, and the iron beams which supported the platform will be drawn in, and the holes which were left for them to pass through will be replaced by marble blocks and everything will be finished.

A BLACKMAILING RING.

In Which a Constable Plays a Leading Role.

NEW YORK, Nov. 14.—Edmund Jeans, of Jeans & Taylor, carpenters, No. 102 South Fifth avenue, with a few friends a week ago went up to Haverstraw, Rockland county, to shoot. They hired men to show them around. One of the men was George A. Babcock and another was Constable Augustus Hack, of Haverstraw. Each received $5, and as Jeans was feeling generous in the evening he made the same present of $25 to Babcock, who thought, it seems, that the man who so readily parts with $25 can be easily made to part with more. Babcock went before Squire Hendricks A. Bachelder and made a complaint of larceny against Jeans. He said that while he was drunk in the hotel at Haverstraw Jeans had stolen some money from him. A warrant was issued for the arrest of Jeans. Constable Hack came down here on Monday and had it countersigned at 3 Jefferson Market court by Justice Patterson.

Constable Hack went to Jeans on Monday afternoon and showed him the warrant, but said he could have the thing settled by paying $25. To avoid the inconvenience of being arrested and taken to Haverstraw, Jeans paid the $25 under protest. He then took out a warrant for the arrest of Constable Hack on a charge of extortion. Court Officer Curry and Lawyer Findeal went to Rockland county to execute the warrant. They went to George W. Wint, the judge of Rockland county, to have it countersigned. The judge said he had heard that the game was being played by a Haverstraw ring, and he was glad that some one had taken the matter in hand. Constable Hack was arraigned at Jefferson Market. When he was asked to acknowledge the receipt which he had given for the $25, he denied it and said he could neither read nor write. He was held in $500 for examination on Saturday.

International Inventions Exhibition.

NEW YORK, Nov. 14.—It is officially announced through the British consulate that an international inventions exhibition will be held in London in 1885. It will be under the patronage of the queen, the presidency of the Prince of Wales and the management of an executive council composed of eminent Englishmen. It will be opened in May at the Royal Horticultural gardens, South Kensington, and will remain open until the end of October. It is expected that American inventions may occupy a prominent place in the universal exhibition, the latest date for receiving applications for space has been extended to the 31st of December, 1884.

The British consul, J. Pierrepont Edwards, desires that all desiring space will immediately make application and secure blanks, together with detailed information for their guidance.

Robbed by Masked Men.

PITTSBURG, Nov. 14.—A daring robbery was perpetrated at the residence of Capt. John Morrow, one of the oldest and best known citizens of Mansfield, Pa., by three masked men. Capt. Morrow, who is 86 years of age, had been an invalid for over a year. His wife and a Mrs. McCoy were sitting up with him, and at 10 o'clock the robbers entered and commanded Mrs. Morrow to hand over the money there was in the house. Both ladies were frightened and began to scream, whereupon the ruffians securely bound and gagged them, after which they ransacked the house, securing about $50 in money and other valuables. During the night Mrs. McCoy managed to loosen the ropes that bound her, and she freed Mrs. Morrow.

The Railroad War to the Knife.

NEW YORK, Nov. 14.—One of Commissioner Fink's assistants states that the passenger rate war between the companies is so bitter that the trouble would probably extend to the freight business. Among the gentlemen present at the Trunk line meeting were Presidents Roberts, Ramsey, King and Bickmore. Their deliberations were secret, but outsiders were given to understand that the pool roads would stick together in order to circumvent the plans of the opposition companies. The conference will be continued. It was reported late in the afternoon that Mr. George W. Carhart, the general agent of the Erie foreign freight offices, had been dismissed by order of the president.

The "Cape Cod Folks" Case.

PLYMOUTH, Mass., Nov. 14.—Judge Aldrich overruled a motion of the defendants in the suit of Nightingale against A. Williams & Co., known as the "Cape Cod Folks" case, to dismiss the case on the ground that the plaintiff's counsel had taken the case with the agreement that he was to pay all expenses and share in the profits if Nightingale won the suit. The judge decided that no such agreement had been proved.

Striking Miners Again Defeated.

ELIZABETH, Pa., Nov. 14.—O'Neil & Co.'s miners, in a meeting held here, decided to accept the reduction and go to work Monday at 25½ cents. Other mines of the vicinity have a few men at work at the rate, and it is thought it will be general by Monday. This ends the great strike in the lower pools, as it did some weeks ago in the upper ones, with defeat for the miners.

A Murderer Betrays Himself.

NEWARK, Nov. 14.—Advices were received at police headquarters from Patrick Dalton, who murdered Mrs. Morrihan here three weeks ago, had been apprehended at Yonkers, N. Y. While drunk he betrayed his identity to a police officer and was taken in charge.

Consumption can be Cured!

This fact has been demonstrated in more than

TEN THOUSAND CASES by

DR. S. D. HOWE,

The Great Consumption Doctor of New York, PROPRIETOR OF THE

Arabian Medicines,

Celebrated throughout the World for their remarkable Cures.

Dr. Howe's Arabian Milk Cure,
Dr. Howe's Arabian Tonic,
Dr. Howe's Arabian Liver Pills.

The Only Medicines that have ever been known to positively cure Consumption.

TESTIMONY

Of the Hon. Jos. E. Gary, Judge of the Superior Court, Chicago, Ill.

CHICAGO, Dec. 14th, 1876.

Dr. S. D. HOWE,

DEAR SIR:—Permit me to add my grateful testimony to the army of witnesses to the virtues of your justly celebrated Arabian Cure. For long years my wife was seriously afflicted with hacking cough, oppressed breathing, soreness of the chest, and constant acute pains in the lower portion of the right lung and under the shoulder blade. Her suffering was intense, and she became extremely nervous and prostrated. Her disease was pronounced consumption by the physicians of Chicago and other cities, whom consultation had been taken without benefit. Your pamphlet fell into her hands, and after careful examination was conducted, and the satisfactory investigation with which you stand prompted her husband to take your medicines in accordance with your plain and practical directions. She began to use the Arabian Milk-Cure and Arabian Tonic. Their immediate effect at once was manifest—the cough loosened, the soreness of the chest was relieved and all pain ceased. She began to gain in flesh and improve in strength and appetite, and finally declared herself entirely well. Candid advice have saved the life of my wife. She unites with me in this grateful tribute to the merits of your remedies.

Very respectfully yours,
JOSEPH E. GARY.

The above letter is only one among thousands received from all parts of the United States.

Price of Milk Cure & Tonic, each $1 per Bottle,
PILLS, 25 Cents per Box.

Sold by C. A. BUTLER, Bernardsville.
Sole Agent for Plainfield.
Dr. S. D. HOWE, Proprietor, New York.

A NEW PAVEMENT.
The undersigned has secured the exclusive agency for the sale of the
Diebold Patent Iron Stone,
whichfor elegance and durability, is unsurpassed, and in price will compare favorably with any other pavement now in use. It is the most beautiful pavement known for walks and yards, never fades, never wears, clings to and will not injure the finest dress or Surgical wood vaniter, and for building purposes possesses many advantages over other stone. Its peculiarities. They show no dust, are water and atmospherically tight, are not sour, as the air will all kinds of moisture. Then dampness accumulates in the cellar, which makes the rooms damp and unhealthy. Iron Stone is free from it. These Blocks are cast from the molten Iron Slag and are the hardest of substances. Specimen can be seen at Weber's Marble Yard, opposite Stillman Music Hall. For further particulars call on or address

The Sun.
THE SUN is, and will continue to be, a newspaper which tells the truth without fear of consequences, which gets at the facts, no matter how great the genuine news, which presents the news of all the world without waste of words and in the most readable shape, which is working with all its heart for the cause of honest government, and which therefore believes that the Republican party must go, and must go in this year of our Lord, 1884.

About sixty million copies of THE SUN have gone out of our establishment during the passed twelve months.

If you were to paste end to end all the columns of THE SUN printed and sold last year you would get a continuous strip of interesting information, common sense, sound doctrine, and sure wit long enough to reach from Printing House square to the top of Mount Copernicus in the moon, then back to Printing House square and three quarters of the way back to the moon again.

But THE SUN is written for the inhabitants of the earth; this mere strip of intelligence would girdle the globe twenty-seven times, or more.

If every buyer of THE SUN during the passed year has spent only one hour over it, and if his wife or his grandfather has spent another hour, this newspaper is fifty thousand years old and has fifty-two thousand years of steady reading night and day.

It is only by little calculations like these that you can form any idea of the circulation of the most popular of American newspapers, or of its influence on the opinions and actions of American men and women.

If you know THE SUN you like it already, and you will read it with renewed diligence and profit during what is sure to be the most interesting year in its history. If you do not yet know THE SUN, it is high time to get into the swaddling.

Wood for Open Grates a Specialty
Guaranteed to have been used in the city. M. PUTNAM, 30 Manning avenue, P. O. Box 1296.

A TRUE LOVER.

[J. F. Burton.]

When violets then begin to blow
Among the mossy fruit and grass,
That grow the woodbine round between,
I take my violet out, and oh!
Those eyes no woman can know
A sweeter than themselves might;
They need but look upon the sky,
And brighten where her footsteps go.

When summer glories light the glade
With glints of green and gleams of gold,
And reeds come to woo and wed with
Blue Jerve to Roger, to the shade;
And such sweet light surrounds the maid,
That coneboy, it is fairer far
Than where the sunte ims are displayed.

When every tree relinquisheth
Its garb of green for somber brown,
And all the leaves are falling down,
While breezes blow with angry breath;
With gentle pitying voice she saith,
"Poor leaves! I wish you would not die."
And at the sound they peaceful lie,
And wear a pleasant calm in death.

When winter frosts hold land and sea,
And lawyer wait and banker wait
Leave every thought of good behind,
I look upon my love, and she
From thrall of winter sets me free;
And with a sense of perfect rest
I lay my head upon her breast,
And freely summers sleep for me.

CAPT. ISAIAH RYNDERS.

Reminiscences of His Past Life—Writing a Diary.

[W. A. Croffut.]

Yesterday I dropped in and called on Capt. Isaiah Rynders in his library. Black hair, a ruff of brown whiskers, an elastic step and a firm-knit frame make him look 65 instead of the 80 that he is. He chided a book as I went in. "That's done!" he exclaimed; "one more day." In answer to a question he said: "I have written up my diary for yesterday. You see all those black-covered books on that shelf? There is the written record of my life, experiences and observations since 1848—jotted down every morning." I asked him why he did such a work. "Yes," he said, "I shall put my recollections and my journal in shape and bring out a volume next year, I remember the year of 1824."

As I made other inquiries, he said: "I first saw Jackson when he was president in 1829. Martin Van Buren told me that I could have a good place in the custom house, and that Jackson would like to see me. I told him I would go to Washington if he would give me a letter of introduction to Jackson, explicitly stating that I didn't want any office. He gave me just such a letter, and I went. Old Hickory was a splendid-looking man, with a high, straight head and a heart as tender as a woman's. He and Clay were exactly alike—bold and gentle. He seemed to know something of me, but asked me what my business was. I told him I was owner of my own sloop on the Hudson and wanted to stick to it. I was then 24.

"He praised my decision, but said I could have anything to be had in the New York custom-house. I thanked him and came away. I declined office under Jackson, Van Buren, Pierce and Lincoln (who offered to keep me at Washington during the war), but I was weak enough to accept under Polk and Buchanan, and have always regretted it. Hardly any young man who has anything in him can afford to take office." He told much of Jackson's campaigns, of Webster's speech in reply to Hayne, which he heard, and of the history of the Empire club. Rynders is an admirable raconteur, speaking finently and at times vehemently and rising upon his feet occasionally to illustrate his narrative with gestures. He remembers Aaron Burr, Edgar A. Poe and all of our presidents but one.

Strange Change of the Wear.

[Cor. New York Tribune.]

The following story was told a short time ago by F. H. Pierpont, the loyal war governor of Virginia:

There was an amusing encounter between Governor Wise and myself in the summer of 1865, after I went to Richmond as governor of the restored government of Virginia. Meeting him one morning, we shook hands very cordially, and I remarked: "Governor, I suppose you have been hunting, as I have, have missed you from the city for some weeks."

"Yes," was the reply. "I've been down to my farm in Princess Anne county, and what do you suppose I found there?"

I answered: "I don't know. When I was there in 1853 I saw a large number of forest men cutting your timber. What did you find, general?"

"Why, sir, I found John Brown's daughter, teaching a negro school in my Mansion house; and they would not permit me to go into my house."

At this I laughed heartily. Gen. Wise looked me straight in the eye and demanded: "What are you laughing at?"

I said, "General, you must excuse me; a half-crazed fanatic told me that he was there seven years after you hung John Brown for his supposed attempt to steal the negroes from Virginia, his daughter was teaching a negro school in your Mansion, and you were a fugitive not permitted to enter it."

"John Brown," exclaimed Gen. Wise, "was a great man, sir; he was a great patriot." Yes," he said, raising his hand and assuming his most majestic attitude, "John Brown was a hero; John Brown was a hero, sir!" Then striding suddenly he stood off, seemingly in solemn meditation. That was the only time John Brown was alluded to in our conversation.

Patti and Nicolini.

[South Wales Letter.]

Miss. Patti and Signor Nicolini live close by; so that the young people's gossip has more than a local interest, you know.

"Miss. Patti is very good to the poor," says one, "but she got rather a shock the other day. Going through the village to the station, she noticed a poorly little child and brought it a present from Swansea. She did this two or three times, bringing it toys and always bought a penny lollypop for the child up to the chance of making a good thing out of Patti's kindness. What shall I bring you from Swansea? Patti asked. 'A gold watch and chain,' was the little one's prompt reply. Patti immediately got into her carriage and drove away, and she takes no more notice of the precocious young one."

Signor Nicolini, she is awfully jolly. Patti, and everybody likes her. She has furnished one of the rooms at the village inn and goes there sometimes, and has tea with Nicolini and also has packed a hamper and given it to the landlord of the inn. And one day when some of the villagers went up and ordered a lot for the feast, all into the cellar and sang to them. But it is grand fun to see Nicolini go out to shoot the pheasants. You know the pictures of the Prince of Wales going out shooting? Well, spats, all in grass, and with legging and pouches, and a feather in their hats. Off out go you know, as they say for the closes in the Illustrated News. Well, then to Nicolini: Mind. Patti watches him from the castle window and thinks him no end of a card! It is a great lark, though nobody pretends it is, of course; and it is the scene when he goes out fishing."

There are 139,053 Masonic lodges in the world, with a membership of 14,100,248.

THE BUSY BEE.

A Statistician on the Habits of the Industrious Hummer.

Development of Bee Culture in North America—In Switzerland—Curious Ways of Life in the Hive.

[Chicago Times.]

Mr. T. G. Newman, statistician of the Northwestern Society of Beekeepers, said recently to the members of that organization:

"Since the introduction of the movable comb hive, twenty years ago, bee culture in North America has been developed more than it had been in the century previous. To-day the United States and Canada produce the bulk of the honey consumed in the world, and our apiaries are the most skilled and successful. According to conservative estimates we have a total of 3,000,000 colonies, which annually yield 120,000,000 pounds of honey. The value of the colonies at an average of $11 each, would be $33,000,000, and of the annual product, at an average of 15 cents per pound, $18,000,000, making the total amount of money involved, approximately, $51,000,000. The comparative showing of all Europe is less than one-tenth of this amount. From California we supply Australia, and Europe imports largely from our eastern states. At the London agricultural fair we recently displayed 180 tons of honey in the comb, which was awarded the prize over all the European exhibits. In Germany honey is plentiful and cheap; in Europe it is scarce and precious. While it sells for about 17 cents a pound in Chicago, it brings a half-crown, or 61¼ cents, in London.

"There are very few localities in Europe where the honey-bee prospers, there being no staple honey plants which yield any surplus for honey. The most progressive people in agriculture are the Swiss, who successfully maintain extensive apiaries at a great altitude in the Alps. France is deposited on Switzerland for her honey supply. The time is not far distant when America will be exporting largely of the Hymenopter nectar.

"As to the skill of our apiarists," pursued Mr. Newman, "it amounts almost to a science. Twenty years ago the bee was an insect whose industry was the appreciation and whose conditions and methods of life, as well as progeneration, were only meagerly comprehended. Now, with the help of the microscope, and after years of study and conferences, such as the one just ended, the daintest minutiæ of the bee's life is understood. With a couple more years' experience in ventilation, transportation and the treatment of the delicate diseases to which bees are subjected in the winter months, the industry will have been developed almost to a perfect state. The success of the American apiarists, as I tell you, is to be attributed as much to their research as to the naturally favorable conditions of our honey-flowing vegetation. I have given the matter constant study for years, and have familiarized myself with all the characteristics of them which will enable me to handle the queenbee, is, perhaps, one of the most delicate, and at the same time the best regulated, operations in nature. Although each perpetuates the species a single female in a colony, it is rarely that the line of progeniture is broken, and then it is by accident.

"In a colony there are two distinct sets of occupants: the male drones and undeveloped females, who are known as 'the workers.' The drones have no stings. They are shiftless fellows, who do not help anybody in the hive. They lay around in groups, fattening off the honey which the workers store up, until within six weeks after having come into existence they die off. Not infrequently the workers get incensed at their lazy, eating conduct, and slaughter them by wholesale, stinging them to death. The queen is another affair. She is a royal lady whose every heads are invariably pointed toward her, as if in obeisance. Of the female eggs which the queen deposits she selects anywhere from ten to twenty, and building larger cells, place one in each, inclosed in what is called the royal jelly, a salvia of their own production. This is supposed to nourish the female the propagable fluid. The female larva develops into animated life, and a young queen bee breaks forth from the cell.

"As her rivals appear subsequently, she slaughters them, one after the other. She is nimble and vigorous at the expiration of two or three days, and the old queen, assuming' believers in the survival of the fittest, stand in a body, wills the old queen and her adolescent rival engage in a royal combat to the death. At the end of a few minutes which the drones are excluded, the spectators maintain the strictest decorum, and preserve fair play between the contestants. The queen, you know, never has any use for anything except royalty, and when assailed by the plebeian workers will not even defend herself. The young one is usually victorious. After having disposed of her presumptuous aunt attended the solemn funeral obsequies when the body is carried from the hive, she circulates among the workers, and since the whole swarm of them into the outer air.

"The queen then returns to the hive and arranges the matrimonial appointments of her household. Her fertility is purported with her, and she is empowered by nature to lay anywhere from 2,000 to 3,000 eggs in a day. These are hatched out in from seventeen to twenty-one days, and from

Fort St Elio was to-ben in the y-ar 1771.

JOTTINGS.

—Temperance meetings will be held every Thursday evening in Reform Hall.

—W. C. T. U. prayer meeting at Methodist church, Monday, at 3 p. m. Mrs. W. B. Maxson, Sec.

—Mr. D. J. Marshall recently erected a pole on which to swing a flag in honor of the election of Cleveland and Hendrick. Thursday evening some one cut one of the ropes.

—The New York Mirror says of the recent entertainment given by Mark Twain and George W. Cable at Orange, that it was enjoyed by all. These gentlemen will appear at the Stillman Music Hall in this city on Monday evening.

—Crowds continue to be attracted to the rink nightly. Last evening Miss Blanche Hayden of Boston, a pretty blonde of about fifteen years, appeared in costume, and displayed her skill at skating, drawing forth hearty applause. She appears again this evening.

—Thirty-seven employees last evening received their weekly wages of checks of from the Potter Press Works. It is rumored that since the election of Cleveland $50,000 worth of orders for presses had been cancelled, but such rumors are likely at such a time as this.

—Miss Edna McKibbin and Master Willie Hydespeak nightly on the title among the Reformers. They expect to leave town Monday. Mr. Skinner, their manager, leaves about Dec. 1, to take charge of a rink at Elmira, N. Y. He has made many friends during his stay here.

—A party of fifteen Plainfielders visited Bayonne last evening to attend the Baker and Reid Club meeting. A number of speeches were made by the visitors. From Bayonne stables and E gglish to Passaic, where they will begin a series of meetings to-morrow evening.

—The winter time schedule of the Philadelphia and Reading Railroad will go into operation to-morrow. Although no changes will be made on the New Line, a number of important alterations will take place on the New Jersey Central Division. Parlor cars will be run on Easton trains.

—Miss Helen Potter took occasion Thursday evening to advise all who attended her entertainment to hear Mr. Geo. W. Cable next Monday evening. She pronounced his readings as a treat indeed and said that Plainfield people should congratulate themselves upon the chance to hear him. This kind word came from her entirely unsolicited.

—Hotel keepers who are apprehensive that the result of the forthcoming city election will be against granting them further licenses, view the matter philosophically, and say that if they can not receive Romans, they can remove to some other locality, where they can, and prognosticate business prostration generally. The temperance people take a different view of the matter.

—The fall session of the Convocation of New Brunswick, comprising that part of the Diocese of New Jersey bounded by Elizabeth, Long Branch, Trenton and Clinton, will be held in St. John's church, Somerville, on Tuesday next, November 18. There will be three sessions. At 10:30 a. m. there will be a solemn celebration of the Holy Eucharist, and sermon. At 1 p. m. the ladies of the Guild of St. John will serve a collation to the Bishop, his clergy and the lay delegates of Convocation. The business session will be held from 2 till 5 o'clock, in the parish church. At 7:30 p. m., after choral Even Song, short, stirring missionary addresses will be given by the Rt. Rev. the Bishop (Scarborough,) Dean Rodman, rector of Grace church, Plainfield, and others.

Personal.

Mr. John Walker of Park avenue returned last evening from Europe greatly improved in health, after an absence of several months.

Mr. Frank K. Hazle of East Front street, who has been visiting his father Bret Hazle, the U. S. Consul, at Glasgow, sailed for home Thursday and will arrive in about ten days.

The wife of Samuel Neal of West Front street, broke her right arm while in bed Thursday evening, as reported in The News, died in the State Insane Asylum at Morris Plains last Thursday morning.

Sunday Services.

The last of a series of temperance meeting of the Women's Christian Temperance Union will be held in Reform Hall as usual. Both the moral and religious aspects of the temperance question will be considered. Christian workers of all denominations and respectable members of the Reform Club will be cordially welcome. If you are not a member or Christian you have an open invitation to be present and help the meeting.

The Reform Club Sunday evening services continue as usual to-morrow evening, with appropriate music as usual yesterday.

Rev. S. D. Bogue of Kingston, N. Y., will preach in the Trinity Reformed church to-morrow morning and evening.

Methodist Temperance Meetings at Warren Minston Chapel.

The gospel temperance meeting held in the Warren Minston Chapel last evening was one of the most enthusiastic that ever gathered within its walls. The pulpit and audience having all looked, prayed and labored able to give more attention to the temperance question.

President John H. French presided, and opened the meeting by apologizing for his absence during the past few weeks, which he said was owing to engagements in the campaign and not to any disheartening cause, for his heart was in the work, which was very dear to him. To-day the cause was higher than ever before, the atmosphere was clearer and the skies brighter.

A few remarks were made by Messrs. Thomas Price, John Bayres, George Anderson, Robinson, Councilman Frank Marsh, Reynell, Ayres, Rankin and Allen.

Mr. Marsh said he thought that the Reform Club stood firmer to-day than ever, and were better equipped to fight the evil. They differed honestly in many things, but all admitted that rum was a curse—the great ar curse the world ever saw. He was ready to renew his oil alliance to the good cause both by his voice and vote.

The closing remarks were made by the President, who continued his heaven and the people at large to be very cautious how they accept reports about members of the Club. He was sown broadcast that he himself during the campaign had lost his property, went to New York and violated his pledge by drinking, drinking and a host of other things, circulated by the enemies of the cause for purposes of destruction. He became a member of the club on February 22, 1884, and to defied man, woman, or child to say that he ever was inside of a saloon during that time. These charges were put forth by the enemies of the cause for purposes of deception, and the community at large should cease to believe them.

The meeting dispersed with the singing of "Hold the Fort."

The Secretary Resigns.

EVENING NEWS—It has been stated by some of the members of temperance that the Reform Club was in the last stage of disintegration, and it was only a matter of time when it would be utterly disbanded. But I can only say that I am in a position to know that these remarks emanate from those from whom Rum has obliterated all traces of humanity and manhood, and the desire in their hearts that all reform based on virtue, honor and integrity should be displaced, and that Rum once more should reign supreme and again desolate the homes of those who for the first time in years have known the happiness of pure sentiment, prejudged by strict adherence to the principles of temperance. The Reform Club was never in a more flourishing condition than it is to-day, as those who witnessed the demonstration taken by the club on Thursday evening can testify. The feeling that prevailed the club on that occasion justifi a the belief that the temperance cause has taken a new lease of life, and secured its perfect success for the future. There is perfect harmony in all the executive departments and the officers have proved to possess the work with more zeal and fervor than ever before, and will not rest satisfied until rum and its concomitants are purged from this common ity, and the ban of the law shall be hurled against the liquor traffic, and no drop of the accursed stuff shall be sold in Plainfield under the sanction of law. And for the information of those who pay for the success of the reform movement, I will say that there are not over ten resignations received, and as a general thing those are from parties who had joined their ranks to accumulate wealth they believed it was to their interest financially to resign. But every one who has resigned we have ten new members coming in. A ll before Spring our Reform Club will be numbered in the thousands. FRANK W. DONGE, Sec.

Robbery at Westfield.

Thursday afternoon about four o'clock, as A. E. Wilcox, banker of Westfield, was driving past the residence of W. J. Wiseman, on South avenue, between Faxwood and Westfield, he discovered a window of Mr. Wiseman's residence open, and, knowing that Mr. Wiseman and family were absent in New York, he supposed that there were burglars within the house. His suspicions proved correct, for on approaching he saw some goods outside of the window. The burglars, three men, got out of a back window and fled towards Railway. They were supposed to be tramps. Mr. Wilcox immediately turned back to Westfield and notified Constables Marsh and Kaser, who started in pursuit in a wagon, and captured the trio about two miles outside of Westfield. They gave their names as Jack Sharp, George Coleman and Alexander Corrigan. They were taken before Justice Jaquett and committed to the jail at Elizabeth last evening to await the action of the Grand Jury.

The Boys Thought It Fun.

A fire occurred at Grasshook, about four miles from this city, yesterday afternoon about four o'cl ck, on the property of Tunis Suydam, which was owned by children. As soon as about five years old, in taking it would be fun started a bonfire with some corn stalks, which were near the barn. The flames reached the barn and consumed it. A freighter house and pig pen, and the dwelling near by was only diligently saved from destruction. A wagon and load of straw was all that was saved from the building.

—On Tuesday, Mayor Morrison granted a permit for the burial of a pauper child from the poor farm, and on Thursday granted a permit for the burial of the child's mother, also a pauper. There is another child at the poor farm which is not expected to live. These cases are attended to by the Mayor in absence of the Elder of the Overseer of the Poor.

New Buildings.

Among some of the new buildings shortly to be completed are four that will be used for business purposes. One of these, the new "Stillman block" in front of the Music Hall is partially finished, the store and passage way leading to the hall having been in use for some time. The upper part of the building, the entrance to which is through the old Stillman block adjoining, will be used as offices and lodge rooms. The building is of mod ied brick with compressed terra cotta brick and stone trimmings. Mr. Chas. E. Jacques of North Plainfield is the architect. Mr. I. S. McCorrie of this city has the contract for the mason work with the exception of the front of the building which was done by a Newark firm. Mr. Jeremiah Manning also of this city has the contract for the carpentry. The building will be entirely completed and fitted up by the 1st, 1885. The upper floor will be used as offices, which have been already rented.

Messrs. Day Bros., the livery stable proprietors, are building a large stable on North avenue, which they expect will be ready for occupation on or about the 20th of December. The building is of brick and very simple; no attempts being made toward architectural adornment. Mr. Chas. E. Jacques is the architect, Mr. I. S. Mulhourn has contracted for the mason work and Mr. J. C. Johnson is the carpenter. Adjoining the new stables Messrs. Woolston and Buckle are building a brick structure which they intend getting up for stores. One they will occupy themselves and the others they propose to rent. The building will be finished about January 1st.

Railroad Smash-up.

Last night while some coal cars were being drilled on the P. & R. Railroad, near the Elm Park Hotel, Bound Brook, two or three cars jumped the rails, blocking the west bound track. Just then Conductor Rand's train came up, and the locomotive ran into the cars, breaking off the pilot, and smashing in the sides of two or three cars.

Fortunately no one was injured by the collision but the engineer, who was on board, an hour. Some Bound Brook commuters, who had come up from New York as far as the scene of the accident, were anxious to get home, and left their trains.

They walked all night until reaching the bridge over the Green Brook, where George Thurston and Charles Libbey stumbled through the opening. Mr. Davies fell to the ground below, a distance of fifteen feet, and was considerably bruised. Mr. Libbey caught on the timbers and escaped with torn clothing and a bare leg.

Revolutionary Matter.

The Somerville Messenger this week publishes some interesting extracts from an old diary, in the possession of Jacob Ten Eyck, of North Branch. Among the extracts we notice the following probably relating to this vicinity.

JAN. 31, 1777.

This day about 10 or 11 O'Clock a Small Engagement Began at or near Baum Brook with Cannon & Small arms which Lasted for the Space of 1-2 an hour, When american Army made Britians Glad for to retreat.

FEBRUARY the 1st, 1777

This day about 2 O'Clock Began a hot Engagement at or Near a place called Baumbrook which consisted of Field Pieces & Small arms which Continued for the Space of 35 Minute Very Smart. Our Men was Wonderfull Bold in Every for to Incourage. Our army killed 8 or 1 but Was Obliged for to retreat. Because our enemies was Reinforced.

A Polo Club at the Casino.

A number of young men of this city have organized a club to play rink polo at the Casino Roller Rink. Other cities in this part of the State have the clubs which have proved successful. It is the intention to play series of games with these clubs. The gentlemen forming the club, which is to be known as the Casino Polo Club, are Messrs. Milliken, Parkhurst, Hallock, Ecbert, Demarest, Wilkinson and Murray.

Advertised Letters.

The following is a list of advertised letters remaining in the Plainfield post-office, Nov. 14, 1884:

Brignall Wesley, Chalmers, Mrs. Jos. Gilbert, Mrs. Jas. Gill, Mrs. Geo. Gurney, Mrs. Elias Hall, Mrs. Wm. Hall, Mrs. Mollie Hall, Mrs. Thomas Johnson, Mrs. Alice C. Jones, Mr. F. Kiles, Chas. Lefour, Chas. H. Mac, Mrs. Lenora Mead, Mr. John P. Mc Nair, Mrs. Annie Mc Nair, Mrs. Agnes Palmer, C. W. Simmons, Norbert H. Rumsey, Mrs. Sarah Sharp, Mrs. Emily J. Stevens, Mrs. Della Taylor, Richard Weaver, Miss Lida Watson, Miss Maggie White, Mrs. Emily E. E. B. Fort, P. M.

—Garrett's last evening was the scene of some extraordinary fine brilliant and pool playing, in which players so advertised yesterday participated, exciting wonder, admiration, and applause from the numerous spectators present. It would seem incredible to count the balls on the table as on Mr. Hebert, a professional, counted them.

Notes About Town.

It is the current report about town that Joseph Hoagland has purchased the property of Mrs. Ann Eliza Hoagland, on Somerset street, and Dr. Hoagland will erect a fine residence on the property. Mrs. Hoagland will occupy the house now occupied by Mr. Hoagland, on Front street, which will be remodeled and refitted.

Deaths.

NEAL.—At North Plains of congestion of the right lung, Nov 13, Kate, wife of Samuel J. Neal in her 32d year.

Funeral services from her late residence, East Front street, this place, to-morrow (Sunday) afternoon at one o'clock.

THE P. R. C.

At their meeting Thursday evening unanimously adopted the following:

Resolved, That the Reform Club of Plainfield hereby reaffirms its non-connection as an organization with partisan politics, but declaring that the cause of temperance is above party, that it deems it appropriate and expedient to earnestly recommend that each member of the club, when exercising the voting privileges of a citizen at the municipal election to be held on Tuesday next, November 18th, irrespective of their political name, so vote as to be recognized and to insure the speedy prohibition of the sale of liquor in the city of Plainfield.

SATURDAY, NOVEMBER 15, 1884.

ACCIDENT AT THE SKATING RINK

"Adolphus wore his breeches tight:
Of this he did not think;
When he put on his roller skates
To show off in the rink.
His first adventure was his last—
He'll put on skates no more;
He tried to kick the roof all in,
And sat down on the floor.
When Dolphy dropped the girls all laughed,
It was an awful fall;
And when they had their backs all turned,
He backed up to the wall.
He called a friend, took off his skates,
And giving him the wink,
Said, 'Jim, lend me that long-tailed coat—
I want to leave the rink.'"

ITEMS OF INTEREST.

Thirty-six men and nine women committed suicide for love in Italy in 1883.

A French almanac predicts that Emperor William and Gen. Moltke will die before Dec. 31, 1884.

A Pittsburgh man has gone to an insane asylum because both of his babies were girls. He wanted a boy.

"Hundred-leaved" roses, some as large as a dessert plate, are said to be very common in Santa Barbara, Cal.

Recently discovered gold mines at Boemmice, in Norway, are said to promise rich rewards to the gold diggers.

No woman without a male escort ventures out after dark in Naples or Rome, such has been the increased license given to crime of late.

A newspaper of Rome says that the United States numbers one hundred brigands in modern attire to every single one in the traditional costume plying trade in Italy.

Gambling is now the absorbing pastime among a large proportion of the students of the Quartier Latin, Paris, which, once a great boulevard was pushed through it, has lost most of its distinctive features.

Nine-tenths of the European counterfeiters are from Italy. They are more skilful in making and passing false money than critics, look at any other nationality, their artistic perception quite predominating over love of hard work.

Here is the last remedy for sea sickness, taken from one of the French papers: "Take no food during at least four hours previous to embarking. An hour before stepping on board, drink one or two cups of very strong coffee (without cherry.)

A very interesting curiosity is shown in a show window in Pittsburgh. It is a miniature working model of the largest steam hammer in the world—the Creuot hammer in France. The model is simply a clock, and the great hammer which in one case weighs a hundred tons, is the pilot in a pendulum that moves noiselessly up and down. Not a single detail in the great hammer is considered in the smaller.

DRAWING TO A CLOSE.

THE WORK OF THE CANVASSERS AS PROACHING COMPLETION.

It Goes on Monotonously Without Startling Changes—Independents in the Next Administration—They Want and Expect Six Peters.

BOSTON, Nov. 15.—A Washington special, discussing the chances of Cleveland calling an Independent to his cabinet, says:

News has reached here that the leading Independents—Curtis, Schurz, Godkin, Atkinson, Bowles, Dorman B. Eaton, and in the Republican party in New England—are beginning to protest against being placed in the position of expectants of favors from the incoming Democratic administration. One of the most prominent of these gentlemen has written to an official here that the only warfare on Blaine would be one in which the Independent party not to nominate objectionable candidates in future. It was not to destroy, but to save the Republican party. Besides, it is argued that the Independent Republicans to merge themselves into the Democratic party would be to utterly destroy their usefulness in the future. Therefore, to take office from Cleveland would give plausibility to the charge of having entered into a bargain with him. It is claimed that Schurz and Curtis are fully as emphatic in maintaining this position, and that while they hope Cleveland's administration will be fully up to his promises they prefer that he should rely upon his own party advisers for success.

Republicans here claim that if Schurz and Curtis are in earnest in this position Cleveland will have a hard time to get any of what are known as the pure and simple Democrats of the north—such as Thurman, McDonald, Bayard, Pendleton, Hewitt, Abbett and Eaton—can never harmonize with the extreme Bourbons of the south, who, it is feared, will make demands that the consciences of all of the sections cannot sanction. Of course these are the speculations of the hour, and are likely to change between now and the 4th of March.

Vanderbilt's $150,000 Contribution Denied.

NEW YORK, Nov. 15.—Senator Gorman, chairman of the national Democratic executive committee said to a reporter: "I notice in the press various statements about alleged contributions by William H. Vanderbilt to the national Democratic committee. Mr. Vanderbilt never contributed $15,000 or any other sum to aid Cleveland. Not a single dollar was received from him. The campaign of Cleveland and Hendricks was dependent upon popular support, given for the most part in small sums. Some wealthy Democrats did their share and also some Independent Republicans of large means, but there was no money from such institutions that was sent from the national government nor its agents in the future, or the continuance of valuable privileges already enjoyed by them. Any such statement as that of Vanderbilt's bodies was entirely on the side of Blaine and Logan."

An Independent Organ on Conkling.

BOSTON, Nov. 15.—The Transcript, one of the organs of the Independents here, speaks as follows of the action of Democratic Independents looking to the selection of Conkling or a seat in the cabinet or senate: "It might be well for Democratic Independents to disclaim any interest or sympathy with any movement for reviving Mr. Conkling's political fortunes. Roscoe Conkling is only a year and complement to James G. Blaine, and the elements that oppose the one must oppose the other on the same grounds. He has been a leader in political affairs in public importance, neither having in their long public service contributed anything to the legislation of the great of whom we have spoken, or to the problems of the present and future, but having merely engineered their own interests."

The World Puts it at 1,289.

NEW YORK, Nov. 15.—The World says: "The board of aldermen completed the canvass of the returns of the election held in this city without finding any material change in the footings as already announced. A few errors were discovered and corrected, and upon the whole Gen. Cleveland has not a gain of about thirty votes. Cleveland's plurality in the city will not vary much from 62,250. All the other counties in the state have now been officially canvassed and the ten remaining districts in this city will be finished to-day, the intention being to canvass only those districts where errors have been found. As has already been observed, the canvassing in this city is purely a clerical work performed. Nothing can come of it except to confirm the verdict already recorded. Mr. Cleveland's plurality in the state will be 1,289.

The Times Says 1,267.

NEW YORK, Nov. 15.—The Times says: "The official canvass of Gen. Franklin Edson has been declared by the republican boards of canvassers, leaving only New York county to announce its plurality for Gen. Cleveland. The official count, as published reported was there any change from the result as announced by The Times, but in Kings county the revised official footings give no more votes to Cleveland, whose plurality in that state is thus made 1,267."

The Work of Fiends.

HOUSTON, TEX., Nov. 15.—A passenger train on the Houston and Texas Central went down an embankment at 5 o'clock, thirty-five miles north of Houston. The accident was caused by fiends removing rails. Eight persons were killed outright and fifteen injured. Mail Agent Calhoun, passenger agent Hall, Fort Worth and Denver agent Stark, all among the killed.

FULLER PARTICULARS.

GALVESTON, TEX., Nov. 15.—At 1:30 o'clock the Northbound passenger train on the Houston and Texas Central railway, was thrown from the track by obstructions placed on the track, about three miles south of Hempstead. Fatal reports from the scene describe the wreck as being of a most appalling nature. Engineer Hall and the whole mail and express car and the baggage car, were piled up in a wreck at the bridge. Fireman Stark was caught in the debris and burned to death. Mail Agent Calhoun, Express Agent Hall, and Express Agent Stark, all among the killed.

FULLER PARTICULARS.

GALVESTON, Tex., Nov. 15.—At 1:30 o'clock the Northbound passenger train on the Houston and Texas Central railway, was thrown from the track by obstructions placed on the track, about three miles south of Hempstead. Fatal reports from the scene describe the wreck as being of a most appalling nature. Engineer Hall and the whole mail and express car and the baggage car, were piled up in a wreck at the bridge. Fireman Stark was caught in the debris and burned to death. Mail Agent Calhoun, Express Agent Hall, and Express Agent Stark, all among the killed.

Still Working on the Last Count.

WASHINGTON, Nov. 15.—Mr. Stocum, superintendent of the census, in his annual report states that in closing the year nine volumes of the census reports will be published, making in all seven volumes. The superintendent says that the time for the completion of all bulletins to embrace the census of 1880 will be extended to June 30, 1885. The work of the census division, during the census, he expects to finish in June, 1885. He asks for $50,000 to meet a deficiency in the appropriation for the year ending June 30, 1885, and $50,000 for the fiscal year ending June 30, 1886.

THE FAMOUS CROLY CASE.

A Series of Startling Developments Expected.

JACKSON, MICH., Nov. 15.—After ten days work a jury has been obtained in the noted Croly case at Ann Arbor. About a year ago Jacob H. Croly, a tinner, living between Jackson and Ann Arbor, married his daughter, Miss Catherine Foy, against the wishes of a great many. Mose Foley, hailing from Pennsylvania, and Jacob Croly, of Ann Arbor, boarded. After a long liquidation Henry Holcomb, a son-in-law of Croly, and Jacob Croly, a son, were held for trial charged with the charge of murdering Mr. Foley. To this Holcomb, the defendants being granted separate trials.

Some time after the latest began one Foy, a brother friend of Jacob's, who served him also as a blind man, armed himself with a revolver and went to Union City for the purpose of shooting Mr. Hoover, dead or was shot by the others. The inquest said he shot himself, but many do not believe it. Later a detective named Brown was shot in the back and killed. Some of the people, and he charged Judd with doing it, but the charge has not been sustained. Still later Mose Foley was killed while under circumstances that have given rise to much suspicion. The case against Dan Holcomb and Judd Croach is mostly based on circumstantial evidence, and the theory of the prosecution is that the murders were committed in order to get hold of certain valuable papers, which have never been found since the first murder. Foley was a man of fine social standing, the peculiarly atrocious circumstances and the awful train of events which followed the tragedy combine to make it the most sensational case in the criminal records of Michigan, and the criminal jurisprudence of the entire civilized world. The interest is unparalleled. It is believed the trial will occupy two months or more.

SOME VERY TART STRICTURES.

The Horrors of Animal Industry Sharply Criticised for Mismanagement.

CHICAGO, Nov. 15.—Severe strictures on the conduct of the new bureau of animal industry were published in a letter by Dr. James Law, of Cornell university, read to the national convention of stockmen. In it he criticised the work of the bureau and handling of the subject without grace. He said that it employed unprofessional assistants, and that to secure its establishment the appropriation was obtained through Ex-Senator Storrs, and has been employed to misrepresent facts in Europe before congress. The bureau had conducted its experiments in a stupid manner, misrepresented the facts of the existence of contagious diseases in New York and Brooklyn, and though professing to protect quarantine against foreign animals, by its methods only aided contagion. He also reflected on the skill of Commissioner Loring, and said a number of the bureau officials had the delusion of the reading Dr. Gadsden, of Philadelphia, moved a vote of thanks to Prof. Law.

Commissioner Loring rose to object and denied the charges. He said the vote of thanks should be tendered to the bureau instead of Prof. Law. During the latter's remarks Dr. Gadsden was in a high state of excitement, fitting here and there, giving vent to such exclamations as: "That is untrue," "That is false," "That is a lie." Editors of The Breeders' Gazette, moved the motion be tabled and this was put to a vote and carried. Dr. Gadsden being denied the floor. Resolutions were offered by the committee on resolutions fulsomely indorsed the bureau of animal industry and Prof. Salmon. Dr. Gadsden moved himself by forcibly waving the cane he had said he would resume the fight on them. The committee suggested that another committee be sent to Washington this winter to agitate the bill for the establishment and quarantine laws, and also endeavor to procure a law regulating the rental of cattle ranches between the Missouri river and the Rocky mountains. The silver branch of pleuro was extended to the St. Louis meeting and deep interest in it expressed.

Betting Men Cheerfully Victimized.

BALTIMORE, Nov. 15.—There are a number of persons who have been victimized by means in a very unhappy frame of mind. They made divers and heavy bets on the election and put their money in the hands of a stakeholder, who, it appears, is now still "holds." It and is likely to. Some of these called on him a few days ago for their money and were informed that they had left the money put in his hands and lost it. The men who are out of pocket have no redress, as there is no way in law by which the stakeholder can be held, but they threaten vengeance. The bettors say that he had employed one or two well-known men about town to go around and collect bets, he further says that the money, the sum total of the wagers is to be placed at wages in his hands. He would use the same money over and over, and would be ready to pay it back in the way the other party might win, knowing it was a sure thing whoever the election might go. It is estimated that the aforesaid stakeholder has paid "rakes" in a very large sum.

The Negroes Leaving the South.

CINCINNATI, Nov. 15.—The Times-Star says: "There have been many signs of an exodus of the colored people from the south the last few weeks. It has been noticed since the RECORD. The hotels are besieged daily for positions by waiters, and colored laborers are flocking to the cities in search. This is due to emigration from the south. The negroes there have a fear that the Democratic success means a restoration of slavery. So strong has the belief been "down south" in them that they are leaving for the north every day. It is thought they will leave in large numbers after the 4th of March, the north until they will attest the vote. In other northern states this colored exodus will cause a solid north."

From a Belle to a Drunkard.

BOSTON, Nov. 15.—At 10 o'clock Thursday night a woman, accompanied by a child, badly ragged and bagrimmed, died in rags, yet wearing the remains of a costly bonnet, staggered into the rain station 15, and in slipy accents said: "Allen Jones is dead." She was once a belle of Charlestown with admirers by the score. From a moderate income she came to the means of a millionaire by marriage. Liquor and a new husband drunkard and has been sent to the island several times. Her friends have striven to help her, but in vain. She shows that as she has lived so she will die.

Still Working on the Last Count.

WASHINGTON, Nov. 15.—Mr. Stocum, superintendent of the census, in his annual report states that in closing the year nine volumes of the census reports will be published, making in all seven volumes. The superintendent says that the time for the completion of all bulletins to embrace the census of 1880 will be extended to June 30, 1885. The work of the census division, during the census, he expects to finish in June, 1885. He asks for $50,000 to meet a deficiency in the appropriation for the year ending June 30, 1885, and $50,000 for the fiscal year ending June 30, 1886.

A FIGHT OF TERROR.

Ground by a Tomb for Twenty-four Hours.

Irish Rally Bradley and Sheridan at Open Air Meeting—Sheridan Brought to Bricks.

A Person Creepy and Which Nearly Led to Murder.

BOSTON, Nov. 15.—At the extreme end of the Roxbury district, a mile from any human habitation, there is on Walnut street a tomb which for twenty years or more has been closed up. Most of the people buried there were interred during the latter part of the last century, and since up to four years ago the rank growth of vegetation over the whole place, so that it is difficult for a stranger in the neighborhood to find the ancient city of the dead even with the aid of a guide. The shrubs and trees hide from view the few old headstones that are left there, and a person might even wander about in the cemetery quite without knowing that it was a cemetery.

There are two large vaults made of brick, the walls being three bricks deep and covered over with earth. Some of the people about them that will show who was laid at rest there or when, but probably the doors have not been opened at any time since 1800. Some of the people living in the neighborhood have been accustomed to see boys who are believed to be residents of the north end of the city appear to have pretty well explored it, and to have made it more than a favorite resort. An officer of the Jamaica Plains station, in following up a lot of juvenile law breakers, came upon them in the tomb, and found that the earth and shrubs had been torn away and the old masonry had been pulled out so that a hole about three feet across had been made in the wall about a foot up from the bottom. It was so well concealed by the brush that it would not have been noticed had the officer not observed a trail which led him to the place. Examining the vault more closely, for as soon as he put his head in the hole he kept out so much light that examination was impossible, the matter was reported to the board of health, and inspector Hicks went out to investigate. He had a good deal of trouble in finding the place, and when he got there he could not see much of the interior. He could only smell a most fearful odor that seemed to come from the ground about two hundred yards off. He traced these, and as he came nearer the crier were stronger and more sickening. When he reached the vault he had been in search of, and in it was a boy about 10 years of age. As he climbed up to the opening the brute fellow turned his cries and overawed down into a corner of the tomb in abject terror. The officer called to him in a reassuring tone, but the boy only crept closer to the door of the vault until he got directly under that opening. His condition was pitiful indeed to behold, and the officer hardly knew whether to regard him as insane or as some kind of a wild animal. He would not speak an intelligent sentence, but let forth the most dreadful howls, now and then stamping his feet in the manner of a maniac. Hicks was afraid to go down into the tomb for fear he could not get out again, but after talking to the youngster through the hole for a while he succeeded in pacifying him until he got a broken limb of a tree, and then he put in for the last to climb up on. He was taken to the station house, and in emergency, but at length he summoned up all his strength and made a successful effort. After resting and talking about him for a while he talked a little, and finally told his rescuer his remarkable story.

He said he had no home and lived mostly about the cemetery. On the previous afternoon he met a lot of Forth End street Arabs like himself, and they told him they were going to give up blacking boots and become highwaymen. They then formulated to him some blood and thunder stories and told him they had a cave of their own and would soon terrorize the whole country. They asked him to join them, but he came famous. He agreed to do so and they led him to the vault described. One went off and left the rest in the tomb, and they descended into the tomb by it. When the victim got down and was place of coffin on the shelves and about the floor with skeletons and bones he was so frightened to death. His companions humored him for awhile and offered him drink out of a flask. He refused it and they forced it down his throat, then they knocked him from one end of the vault to the other. In spite of this treatment he soon began to feel sleepy and crept around in the dark. He said he remembered nothing more till he heard, or thought he heard a voice saying:

"Let him starve. It's kids like him that's ruining us."

A voice outside said "Cheese it!" and then all was quiet.

He realized his eyes and listened, but only the cracking of bush some distance off could be heard. It was dusk and he made his way to the opening, but there was no light and no sound. He was afraid to leave the air with agonizing cries for help. He thought the skeletons were clustered around him and grasping for his hair with their bony fingers. He was afraid to sleep, but every horrible thing he saw when he entered was more plainly visible to him in the dark. He remained in this condition all night and made a noise and he would scream. "Murder!" till his voice gave out. He rolled on the floor in his agony and the perspiration poured from his body. He kept on till he was dying, but he was not which good luck. He would have attempted to kill himself, but the skeletons made him afraid to try it. The next morning he continued till his cries brought the inspector to his rescue.

The officer believed that he was crazy at first, but he soon recovered. After getting out he remembered that he had been in the tomb when the lad saw it he bounded off like a deer in the direction of the city, and never turned to look back till the whole was in view. The inspector found the children in some torn cards and pages of dime novel literature among the bones and broken coffins that littered the floor of the vault, and it looked as though the newest occupant had been on a grand spree. He at once employed a means to block the vault up securely, so that it will be impossible for boys or vandals. The gang of young desperadoes was destitute enough of the first officer's discovery, and but for it the lad would most likely have starved to death.

A Bad Business to be Engaged In.

CAMDEN, N. J., Nov. 15.—For the past two weeks counterfeit $10 notes on the National Bank of Camden have been quietly circulated. Many storekeepers were victimized. The police have been on the alert, and yesterday a young man named William L. Thompson was arrested charged as the one who had passed one or two in burrows. He was committed by United States Commissioner Newell in default of $5,000 bail for further hearing. It is reported he belongs to an organized band of counterfeiters. The notes are of series of 1875. Thompson is of a very respectable family. It is expected that other arrests will follow.

Failed for $20,000,000.

LONDON, Nov. 15.—Spartalis & Co., merchants, at No. 35 Old Broad street, London, E. C., have failed. Their liabilities amount to $20,000,000.

THE CHOLERA IN PARIS.

As Bravely Fighting Among the People as Among Soldiers—Over 1,000 Deaths in Twenty-four Hours.

LONDON, Nov. 15.—The discussion in the cholera death rate in Paris has no effect in staying the progress of the epidemic, which is composed of all nationalities. The principal sufferers from this cause are the people of the poorer districts, who are the most vulnerable to attack. As a rule apartments are not to be had at reasonable rentals at this time of the year without ample notification. Now so many guests have left and so many suppers must have been cancelled by telegraph that many of the best houses are entirely empty. Tourists of the middle class view the matter more philosophically, and are able to obtain better accommodations at a given price than in any previous season of the change. The proprietors of the theatres and other places of amusements have combined patriotism with business, and have lowered their rates of admission. In this way they still attract large audiences, and the crowds seen at the theatres tend to disprove the existence of the cholera to foreigners. At the same time there is an uneasy feeling that the authorities are suppressing some significant facts regarding the spread of the disease. Deaths are not proving to be limited to the department of public health, and are not included in the totals published from day to day. A soldier, whatever his complaint, is treated in the military hospitals, and in the military authorities, and returns of deaths are not required by the civil authorities of those than once in three months.

AN ECCENTRIC'S WILL.

All His Wealth For the Descendants of They are in Power.

PITTSBURG, Nov. 15.—A very singular bequest was unearthed in this city by Deputy Register Gray, of the will of a man, now dead, who has been a prominent character of his existence, but who had but little hopes that the last will and testament of an eccentric but patriotic Democrat could ever be executed. The testator was Daniel McGill, a well-known citizen, who had accumulated a large fortune, became fearful that he might die and that his real and personal estate would pass into the hands of some of his numerous heirs of a divorced wife. That this might not result he made his will, giving to his former wife a nominal sum, and bequeathing the bulk of his estate during her lifetime. At her death the fortune was to be divided between three children of his former wife, who are supposed to live in County Tyrone, Ireland. Should they die in the meantime, their children, should they have any, were to inherit the portions assigned to their mothers. Should the children, if any, be dead, the whole estate was to be escheated to the president of the United States, providing he be a Democrat, in trust for and for the use of the party and for the success of the Democratic party.

The will was proved before County Register Gray Oct. 18, 1878, and the inventory of the estate, the executors, Messrs. Hunt & Hastings, have just filed, shows that the personal effects amounted to $21,924, and it is said the really amounts to considerably more than that sum. The executors, Messrs. Hunt & Hastings, executed the records, and forwarded to Gov. Cleveland the substantial features of the will.

Mrs. Storey Loses Her Case.

CHICAGO, Nov. 15.—In the probate court Judge Gardenier rendered a decision refusing to probate the last will dated Feb. 1, 1881, of the late W. F. Storey. A. L. Patten, a testified his belief that Mr. Storey was of unsound mind at the time the will was drawn up and did not know what he was doing when he signed it. A. L. Trude, attorney, was asked to draw up the will and he will and replied that ever since Mr. Storey's return from Europe he had been constantly drawing up wills for him. He was asked what Mr. Storey replied to that answer, all these various wills, the one of 1878 and that of 1881, were the work of Mrs. Eureka Storey.

"You never had any understanding about this will with Mr. Storey alone?"

"No."

After other testimony by witnesses to the signing of the will, the judge turned and said, "Mr. Clerk, probate refused for the reason that the testimony of the signing witnesses proves that Mr. Storey was not of sound mind at the time of executing the said will." Mrs. Storey will appeal from the decision of the court.

More Blood Shed than in War.

NEW YORK, Nov. 15.—One of the passengers arriving from Aspinwall by the steamship Alps was Col. Gaillard, of Brooklyn, the machinist, who has been working on the Panama canal. His health has been broken down by the charges fever. In describing the terrible casualties and laborers so frightful. Nine-tenths of those attacked by the fever die in the hospitals. Unless the victims die in the pits and covered with quicklime. There is a saying that every six of the Panama railroad represents a human life. Thousands of men are now engaged in its construction, and it may almost as truly be said that for every yard of earth turned up on the canal there is a death to be recorded. Interments in trenches are constantly crowded. It rains a great deal, and the soft banks of the ditch are constantly being undermined, making rotten bodies constantly emerge. Several farewell messages from dying men to their friends in this country. He says skilled laborers receive per day such laborers from $3 to $4. The board which is very poor, costs from $12 to $15 per week.

The National Board of Health on Cholera.

WASHINGTON, Nov. 15.—The national board of health has addressed a circular to governors of the several states, advising them that the appearance of Asiatic cholera in epidemic form in Europe is a constant menace to the people of this country, and urging them in view of the imminent danger which threatens the public health, to take steps to call the attention of their respective legislatures to the subject, and recommend appropriate legislation for providing means to keep the cholera from entering their respective state and local, may be immediately organized. The circular concludes as follows: "If the proper selection of such measures we may hope to be able to control the invasion of the dread disease, to be able at least to limit the ravages to the places where it first gains its appearance."

Under the Shadow of a Noose.

BUFFALO, Nov. 15.—The West Falls murder case, which has been on trial in Erie county for the past two weeks, and which has been being mostly circumstantial, has the chain in fastening about the prisoner. Randall Phillips, the principal witness for the defense, on his way to the hotel from the court house drank all the way from Main Abbott's house, and knew nothing of what transpired after leaving the court room. He was intoxicated every day and evening. The evidence given for makes a very strong case against Manchester.

THE CASE OF BRUCE.

IT LEADS TO AN INQUIRY IN THE HOUSE OF COMMONS.

What the Asylum Authorities Say—the Man's Sentence and Filled with Strange Statements.

Bruce Very Indignant at his Detention.

LONDON, Nov. 15.—In the house of commons Mr. Corbet, member for County Wicklow, Ireland, interrogated the chief secretary as to the case of Mr. Bruce, Bruce was confined in the Brookwood lunatic asylum, who claims to be sane, and entitled to his liberty. Mr. Trevelyan, chief secretary, in reply, that the government was not publicly advised as to the Bruce case. He would make a complete investigation. A number of questions were raised in the ordinary course of such transfers. The record of his case showed that he had been an inmate of an asylum in 1873, from which he escaped, and of his subsequently spent seven months in the Washington, D. C., asylum, from which he was taken by friends after a short time to prevent his being sent to the same asylum. He was harmless, but full of delusions, especially on religious subjects. He was admitted to the institution on Oct. 11, and the usual inquiry was ordered, and the fact of his insanity was established. During his confinement Bruce has written a number of letters upon the cases and abuses of humanity. He has never received any visits, except one from an old negress in 1876. The correspondent was permitted to speak to Bruce who conversed in a manner which did not indicate an unbalanced mind, except that his statements were hardly credible. He was born, he says, in Ireland, of wealthy parents, in 1817. His gray hair falls in ringlets about a well shaped head, and his face is intelligent. He states that he has no relative in England. A brother-in-law in Australia wanted him to sign a quit claim deed giving his property to his sister, and that upon refusing to do so he was driven out of America by his brother-in-law. He has since had two brothers and the brother-in-law. Bruce bitterly denounces the asylum officials for their conduct in detaining him. He says he intends to appeal to the home secretary for relief, from his present flight and visit to Minister Lowell. He feels confident that the latter will secure his release.

Bruce Unknown in New York.

NEW YORK, Nov. 15.—Inquiries made among a number of Baptist clergymen in this city concerning the case of Bruce, who by a cable dispatch received here was reported to be confined in an English lunatic asylum although doubts exist as to his identity, developed the fact that relatives to his having once belonged to this city, as was stated by the dispatch. Rev. Dr. Thomas Armitage, pastor of the Fifth Avenue Baptist church, was seen at his residence at No. 7 *West Forty-sixth street.*

"I cannot remember ever having seen the head of Bruce," he said, "although I have been a clergyman in this city for thirty-six years. If he had been attached to any church here within that period I should most likely to recollect it. It is possible that he may have lived for a time here but he was not the pastor of any of our churches during that time. Many of the men who are ordained ministers but have no congregation. Although I do not exactly say that the story of his incarceration in the asylum is untrue, I am inclined to think that the dispatch is untrue, still I do say that it is most improbable."

Rev. Dr. Barnes, secretary of the Baptist City mission and Rev. Dr. Schofield, who is also connected with it, failed to remember any clergymen of the name of Bruce for many years. Dr. Barnes supposed the latter had he may have lived here for some time, but that he was not a pastor of any of the Baptist churches.

A Horrible Accident.

DETROIT, Nov. 15.—A horrible accident happened about 12 o'clock at the Eagle Steam forge, Sycamore street, in the city of Detroit. A young man named Benjamin Davies, employed at the forge, accidentally fell into a tub of two cog wheels, which stripped the flesh from the left leg in a terrible manner. He was taken to St. Mary's hospital, and is now in a very critical condition.

A Suicide Out of the Common.

DETROIT, Nov. 15.—Several weeks ago Mrs. Catherine Sullivan, of Windsor, Ont., being desirous of mutually agreed to drown themselves in the river. The wife did so, but the husband's courage failed him. He was arrested and taken from the river by force. Yesterday they succeeded, upon the true facts coming out. Yesterday Downey fulfilled his long cherished purpose by hanging himself.

Rent Raised Freight Rates Restored.

NEW YORK, Nov. 15.—An important meeting was held at Vice Commissioner Fink's office of representatives of the various trunk lines and their western connections. It was the unanimous opinion of those present to restore the schedule rates on east bound freight to twenty-five cents per 100 pounds from Chicago to this city.

Will Interest Old Soldiers.

WASHINGTON, Nov. 15.—The president has decided to appoint Deputy Commissioner of Pensions (J. H. G. Clarke to succeed Commissioner Dudley.

CONDENSED NEWS.

Lewis Otto, while drunk, fatally shot his wife at Buffalo.

Gen. Sheridan has returned to Mount Vernon, N. Y., and again been arrested by his creditors.

Bagnios are reported as Chinatowns in a large extent in California. It is claimed that they are cheaper and better than the Oriental.

The report comes from Washington that Frank Hatton is to enter the lecture field and has already secured by being the Republican defeat.

At the request of Mayor Edson, of New York, the police commissioners say that prize fights and glove fights illegal, and will stop all such exhibitions in future.

Russell Sage says legal action will be taken to compel the Wall Street brook to remove the dam. The company's policy is detrimental to the interests of the city, and attempts to prevent the flooding of their property by the dam have been offered but failed. Judgments for damages to have been obtained.

ANOTHER PECULIAR MARRIAGE.

A Cleveland Millionaire, After Divorce, Marries His Housekeeper.

CLEVELAND, Nov. 13.—A few days ago Samuel P. Weddell, whom old bank of Everett, Weddell & Co. had failed through the speculation of S. T. Everett, tried to shoot his father, whose life was saved by the failure of the cartridges to explode. It now transpires that the trouble between the two arose over Weddell's fondness, and that he had tried to shoot one of his sons. Years ago Weddell left his wife, who filed a bill for divorce on the ground of desertion. She was visiting her father, Judge Hay, when the suit was filed. Because he refused to return to live with a fashionable home wrecker, and sued only after an angry dispute they separated, the wife going to Europe. She rejected overtures for a reconciliation, and her husband honored her wishes for over half a million. She lived in style until last summer, when she died, and her remains now rest in Greenwood cemetery, Brooklyn.

The scene visited their father, who has grown gray with grief, and found that he had sought solace in the domestic society of Mary Shimmerwas, their former nurse and housekeeper, by whom he had had children. Last October he went to Pennsylvania with Judge Ramsey, his lawyer, and Mary Shimmerwas, whom he wedded. The marriage notice was published yesterday for the first time.

Talmage to Preach on the Drama.

BROOKLYN, Nov. 15.—Frank C. Mason, superintendent of police telegraph, is arranging with the trustees of the Brooklyn Tabernacle to set up a telephone on the keyboard case in front of the pulpit. The instrument to be used differs somewhat from the ordinary telephone and is called a microphone. The transmitter is very delicate. A person speaking in ordinary tone can be heard a mile away from the instrument and heard over its wires. Members of Dr. Talmage's church who are desirous of hearing the Sunday sermons without leaving their homes, will be accommodated as soon as wires can be laid from the church to their residence. Gentlemen who have been in the habit of requesting the learned divine's sermons will not be allowed to "take Talmage" over the 'phone.

Bold Escape of Prisoners.

BUFFALO, Nov. 15.—Sheriff Bull has had great excitement in the jail here. About 8 o'clock three prisoners cut several small ropes from windows, tied them to the corners and got out on the roof. Two of them succeeded in getting to the wall of the jail yard, jumped off and escaped. The third, named Rogers, was almost fully free from the ground when the rope broke. He was found lying on his face, and unconscious. One of his legs was broken, and the doctors say he has sustained other serious injuries. A general alarm has been sent out for the two who escaped, and they have not yet been recaptured.

An Interesting Marriage.

SCOTCH, Nov. 15.—A novel marriage took place at Temple's hotel in this city, Wednesday, between G. W. Fiddle, of Ostomatic college, and Miss Ida Scott, of New York, both mutes. The rite as it was delivered by Rev. Mr. Scott was very beautifully translated by Rev. Mr. Packard into the sign language. Immediately after the marriage a reception was held in the parlors of the hotel.

A New Egg Importation Order.

WASHINGTON, Nov. 15.—Secretary McCulloch has been considering for some days a new order on the subject of the importation of rags from Europe on account of the outbreak of cholera in Paris. He has not yet decided what the order will be, but will act in a day or two. He has heard statements from the paper manufacturers and dealers and is anxious to obstruct trade as little as possible.

The Philadelphia Striking Weavers.

PHILADELPHIA, Nov. 15.—The weavers who left Clark & Keen's looms by reason of the reduction of their wages met again and agreed to stand out for their claims until the first week in March, when they will submit to the temporary reduction. After the weavers on James Dunk & Co.'s looms have finished their work now in hand they will also strike, it is reported.

Immigration for October.

WASHINGTON, Nov. 15.—During the month of October 68,441 immigrants arrived in this country, and 7,669 citizens of the United States returned from abroad. For ten months ending October, 1884, the total number of immigrants coming to this country was 414,521 against 501,037 during the same period of last year.

A Boy's Horrible Death.

TROY, N. Y., Nov. 15.—A boy named Benjamin Danks, about 15 years old, while passing under the belts of the rolls in Burden's Merchant mill, about 7 o'clock this morning, was caught by one of the bands that fasten the boxes to the necks of the rolls and was whirled around. He was literally torn to pieces.

Visitors on a Bed in England.

LONDON, Nov. 15.—A severe shock of earthquake was felt at Chilmarsh, near Manchester, at 5 o'clock yesterday afternoon. It was accompanied by terrific crashing noises, and for a brief space in the city. Buildings were shaken and movable objects thrown about, but no one was injured.

A Very Wealthy Young Man Missing.

NEWPORT, R. I., Nov. 15.—Edward J. Carr, a very wealthy young man, left Newport for New York on Sept. 29 for a few days' visit. Since that time nothing has been heard from him. He had $300 with him. It is feared he has met with foul play or committed suicide.

Seven Persons Drowned in a Collision.

LONDON, Nov. 15.—The American ship Henry Villard has arrived at Plymouth in a disabling condition, having come into collision off Portland light with the English ship Lizzie Troop, bound for Antwerp. The latter sank and four crew of seven were drowned.

Knights of Labor Order Men Out.

HAVERHILL, Mass., Nov. 15.—The workmen employed in the St. Regis shoe manufactory, Bradford, struck yesterday because of the discharge of Lodge 6 of the Knights of Labor. The total out is 300. Hoyt & Co. state a discharged hand was the cause.

The Week's Failures.

NEW YORK, Nov. 15.—There were 188 failures in the United States reported to Bradstreet's during the week, against 166 in the preceding week, and 205, 206 and 224 in the corresponding weeks of 1884, 1883 and 1882, respectively.

Railroad Property Destroyed by Fire.

DETROIT, Nov. 15.—Fire at the Grand Trunk depot in Montreal, Sunday night, destroyed five cars and property aggregating $50,000, most of it belonging to Grand Trunk shippers.

Gen. Logan's Son Resigns.

WASHINGTON, Nov. 15.—John A. Logan, Jr., son of the late Republican candidate, has resigned his fourth class cadetship in the West Point Military academy.

Consumption can be Cured!

This has been demonstrated in more than

TEN THOUSAND CASES by

DR. S. D. HOWE,

The Great Consumption Doctor of New York, PROPRIETOR OF THE

Arabian Medicines,

Celebrated throughout the World for their remarkable Cures.

Dr. Howe's Arabian Milk Cure,
Dr. Howe's Arabian Tonic,
Dr. Howe's Arabian Liver Pills.

The Only Medicines that have ever been known to positively cure Consumption.

TESTIMONY

Of the Hon. Jos. E. Gary, Judge of the Superior Court, Chicago, Ill.

CHICAGO, Dec. 19th, 1876.

DR. S. D. HOWE,

DEAR SIR:—Permit me to add my grateful testimony to the many of witnesses to the virtues of your justly celebrated Arabian remedies. For a long time my wife was seriously afflicted with bronchial cough, oppressed breathing, soreness of the chest, and consequent nervousness. She was under the care of eight long and eminent physicians of Chicago, but grew worse and worse, and the disease extremely nervous assumed the form of Consumption, as pronounced by the physicians of Chicago and other cities, without exception, and hence without hope of recovery. When you visited Chicago in June, 1875, we called to see you, having very little hope of deriving help from your treatment. We were inspired with hope by your confidence in your remedies, and after a short examination was conducted, and the satisfactory explanation with which you closed your diagnosis. My wife commenced your treatment, and in a few days began to see with your able practical directions. She began to use the Arabian Milk Cure and Arabian Tonic. Their wonderful effect in most marvelous manner, and in a few weeks the cough was gone, the expectoration became easy, the soreness of the chest was relieved and the pain expressed itself in words of joy and gratitude at the strength and restoration. I fully believe that your medicines and skilled advice have saved the life of my wife. The above with me in this grateful tribute to the merits of your remedies.

Very respectfully yours,

JOSEPH E. GARY.

The above letter is only one among thousands received from all parts of the United States.

Price of Milk Cure & Tonic, each $1 per Bottle.

PILLS, 25 Cents per Box.

A NEW PAVEMENT.

The undersigned has secured the exclusive agency for the sale of the

Diebold Patent Iron Stone,

whichfor elegance and durability, is unsurpassed, and in price will compare favorably with any other pavement now in use. It is the most beautiful pavement known for walks and yards, gutter stones, floor tiling and street blocks. Also used to build fire and Burglar proof vaults; and for building purposes generally. These pavement blocks have many advantages over brick. They are uniform in size; are non-absorbents; repel ice and snow, as well as all kinds of moisture. Will dampness accumulate on the ordinary brick, the material decays perfectly from the top. These blocks cost for the walnut iron ring and are the hardest of substances. Specimen on exhibition at Warner's Fancy Store, opposite Baltimore Music Hall. For further particulars call on or address

The Sun.

THE SUN is, and will continue to be, a newspaper which tells the truth without fear of consequences, which gets at the facts, no matter how much the process costs, which presents the news of all the world without waste of words and in the most readable shape, which is working with all its heart for the cause of honest government, and which therefore believes that the Republican party must go, and must go in this year of 1885, if not in 1884.

About sixty million copies of THE SUN have gone out of our establishment during the passed twelve months.

If you were to pause and to read all the columns of THE SUN printed and sold last year you would get a continuous strip of interesting information, sometimes wisdom, sometimes nonsense, and since we long enough to reach from Printing House square to the top of Mount Superstition in the moon, then back to Printing House square, and three quarters of the way back to the starting point.

But THE SUN is essential for the inhabitants of the earth; this same strip of intelligence would girdle the globe twenty-seven or forty-eight times.

If every buyer of THE SUN during the passed year has copies of THE SUN, and if his estate or his grandfather has spent another hour, this newspaper in 1885, has afforded the human race thirteen thousand years of steady reading night and day.

It is only by little calculations like these that you can form any idea of the circulation of the most popular of American newspapers, or of its influence on the opinions and actions of American men and women.

If you know THE SUN you like it already, and you will rest it with unreserved diligence and profit during what is sure to be the most interesting year in its history. If you do not yet know THE SUN, it is high time to get into the swim.

Terms to Mail Subscribers:

DAILY—By mail, 55 cents a month, $6.50 a year, with Sunday edition.

SUNDAY—Eight pages. This edition includes all the current news of the week, special articles of unusual interest, literature, science, agriculture, and miscellaneous matters of curious interest. Price, 5 cents a copy, or $1.20 a year. Address I. W. ENGLAND, Publisher, The Sun, New York City.

WEEKLY—ONE DOLLAR a year. Eight pages of the best matter printed in the other editions of THE SUN. Literature, science, politics, and home interests are treated in its columns with the fullness that the best writers and the latest information permit. To clubs of ten at $10 per, an extra copy free.

Address I. W. ENGLAND, Publisher,

RECENTLY ELECTED GOVERNORS.

Portraits of the Governors Elect in the Most Prominent Hands.

ISAAC P. GRAY.

Indiana's governor-elect is a native of Pennsylvania, 56 years of age, and has spent one-half his life in the state that now honors him. He began life as a dry goods clerk and succeeded in working his way to the proprietorship of a large mercantile business. All the spare time he could command was devoted to the study of law. In 1856 he was admitted to the bar; was colonel of the fourth Indiana cavalry during the war, but resigned on account of ill health. He afterwards recruited the 147th Indiana infantry and remained in the army until the close of the war. In 1866 he was a Republican candidate for congress. In 1876 was in the Indiana senate; became a Democrat in 1878 when Horace Greely was nominated, and in 1888 was elected on the ticket with "Blue Jeans" Williams. On the death of the latter Mr. Gray became the executive. In 1890 he was again the Democratic candidate for Governor; governor.

Governor of Kansas.

JOHN A. MARTIN.

Mr. John A. Martin, who was recently elected, governor of Kansas, has been a life-long worker for the success of the Republican party in his state. As editor and proprietor of The Daily Champion he has long been a moulder of public opinion in the west. He was secretary of the national Republican committee, and attended to the arduous duties of that position acceptably.

Governor of Illinois for the Third Time.

RICHARD J. OGLESBY.

Richard J. Oglesby is a native of Kentucky and 60 years of age, forty-eight of which he has been spent in the state in which he has been so prominently identified and which has chosen him as its governor now for the third time. Gov. Oglesby served in the Mexican war, and entered the rebellion as a major general of volunteers, distinguished himself at Fort Henry, Fort Donelson and Corinth; at the latter place was wounded and compelled to return to his home in Decatur, Ill., where he has since lived. He has also served his state with ability in the United States senate.

Re-elected Governor of Nebraska.

JAMES E. BOYD.

Gov. James E. Boyd has been again chosen to the executive in the prosperous state of which he was so warmly welcomed in the beginning of his career. He is governor by his made himself exceedingly popular, and will enter on his second term Jan. 5, 1891.

The Preacher Mastered.
(Detroit Free Press.)

"My dear," said a wife to her husband, "I have a feeling that I shall create pain you at times, that I am not perfect as I should be, and I think the best way to overcome it is to be perfectly frank and honorable." "Yes," said the husband, "that is the best way, I think," went on the lady, "that we ought to cultivate a mutual telepathism of each other's motives," and she held out her hand kindly toward him. "You are my darling wife to-night, my dear," he said, stroking her hair, "but I am afraid you feel just a little dreadful." "That's because you wear those ties that are small for you." Then the trouble began once more.

The Astronomer Flabbergasted.
(Harper's Weekly.)

It is said that more Government cranks are sent to Washington than by any other city in the city of equal size. The Commissioner of the secretary, it is explained, must not the rules.

Don't Worry.
(Indianapolis Journal.)

Great excitement rang through the assembroom at the Hamilton murder trial, when the clerk, during the selection of a jury, called out "Mr. Furnas." In response Mr. Furnas stepped up, and was duly sworn. He was subsequently learned that he was opposed to capital punishment, and he was excused. The rebuke that some of his neighbors drew was not at all severe, and the joke that went around among the lawyers to the effect that it was too near Thanksgiving day for him to approve of capital punishment.

Lieutenant-Governor of New York State.

DAVID B. HILL.

In the event of Gov. Cleveland's elevation to the presidency, Lieut.-Gov. David B. Hill will become governor of New York state. Since his election to his present position Mr. Hill has seriously applied himself to his duties, and is in every way capable of filling the executive chair in the great Empire state.

A Minnesota Wish.
(St. Paul Day.)

A man went fishing in the Minnesota river last week, and hooked a large sturgeon pike. He began to play him the fish, running up on the boat squinted it, got in himself, and putting on the man's overcoat, started for New Orleans.

Governor of Wisconsin.

J. M. RUSK.

Gov. Jeremiah M. Rusk has been elected to succeed himself in the gubernatorial chair of Wisconsin. His administration has been extremely popular. He enters on his new term Jan. 1, 1891.

The Boy and the Wolf.
(Somerville Journal.)

An anecdote. Years ago a Vermont farmer lost many sheep through the depredations of wolves. He journeyed to Boston and returned with a watch dog which cost him many dollars. He started out the next day and soon his dog was following up a scent rapidly and disappeared in the woods. The farmer on horseback followed and met a chopper. "Well, stranger, did you see a dog and a wolf go by?" "Yaas." "Well, how was it?" "The derg was a leetle ahead."

New Hampshire's Governor.

MOODY CURRIER.

In New Hampshire there will be no election of governor by the people, owing to the fact that Moody Currier, the candidate receiving the highest number of votes, has not a plurality. The legislature in both branches being Republican, it is expected that Moody Currier will be chosen governor.

Re-elected Governor of Massachusetts.

GEORGE D. ROBINSON.

The present governor of Massachusetts, the Hon. George D. Robinson, has been chosen by the people to succeed himself for a second term of executive service. Governor Robinson has been a prominent figure in the Republican party of his native state. After an apprenticeship as law student in the law school of Lexington, where he was born in 1834, George Robinson plodded through the village public school, entered Harvard university, graduated in 1855, and then studied law in the office of the bar. He settled in Chicopee as an attorney, and his practice soon grew to such proportions that he found it necessary to call to his aid Charles Devens, who afterwards became attorney general of the United States. Two years later found him a member.

Philadelphia Record: All flesh is grass and the short variety of it is a game widow.

RUSSELL A. ALGER.

Gen. Russell A. Alger is one of the most successful of lumber merchants. He was driven into that business through ill health, caused by over-study during his preparation for admission to the bar. Left an orphan at the age of 11 years his early life was a struggle against the most adverse of circumstances, all of which he overcame besides winning political prominence and extraordinary business success by integrity, zeal and application to duty.

Governor Hogg of Texas.

JOHN IRELAND.

The present governor of the Lone Star state, Hon. John Ireland, was re-elected. His administration has been so popular that at the Democratic convention called to nominate his successor his was the only name presented, and he was of course nominated by acclamation. Gov. Ireland is an enthusiast on the resources and possibilities of the great state over which he presides.

Probably Governor of Connecticut.

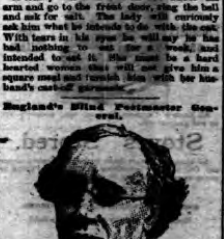
HENRY B. HARRISON.

The next governor of the state of Connecticut will undoubtedly be Henry B. Harrison, the Republican candidate, as the choice for that position will be decided by the state legislature, both branches of which are Republican. Mr. Harrison is one of the foremost lawyers of the state, and a gentleman of exalted character. He has already made himself popular by his record in the legislature.

What a Tramp Will Do.
(Vallejo (Cal.) Times.)

A tramp will take a dead cat under his arm and go to the front door, ring the bell and ask for cats. The lady will seriously ask him what he intends to do with them. With tears in his eyes he will say he has had nothing to eat for a week, and intended to sell the cat for a meal. A hard hearted woman does will not give him a square meal and furnish him with her husband's cast-off garments.

England's Blind Postmaster General.



THE LATE HENRY FAWCETT.

In the death of Postmaster General Fawcett the postal head is a remarkable character. He was 61 years of age at the time of his death, and was rendered totally blind at the age of 25 by an accident while hunting. This did not deter him from pursuing the study of law which he had already begun. He became an ardent student of political economy and an influential disciple of Bentham and John Stuart Mill. In 1865 he was elected professor of political economy at Cambridge, and about the time the numerous works on this subject have given him the highest reputation. In 1867 he was first elected a member of parliament, and always took an important part in the deliberations of that body. In 1880, on the formation of Mr. Gladstone's ministry, he was appointed postmaster general. His wife was also a student of political economy, and published jointly with him a work on that subject.

Oil Needed for the Great Moral Engine
(Vienna, Ga., Vindicator.)

Any one having a first-rate overcoat they would like to exchange for a Sunday coat will please call on the editor. This chilly weather you may lose the opportunity.

(Chicago Tribune, Telephone.)

The editor has been carrying brick and "mortar" up a tenement house for the past week.

(Lockville, Tex., Sunday Herald.)

We have all our meals at Mike Hay's restaurant, and every time we call for a beefsteak, and say we will have it well done, he says he will do his best. If any one wants to go there starving.

Chronological Events.

Boston Riot 1747.

JOTTINGS.

—Democratic glorification to-night.

—The Democrats will roost their ox on Thursday next.

—Some of our exchanges haven't yet got over election.

—A temperance advertisement appears in our special notices.

—A large number of people visited the mines at the Notch yesterday.

—A number of bicyclers on bi's were in town yesterday from New Brunswick.

—A skater overbalanced and fell breaking a window at the Casino Saturday, but escaped injury.

—The rumor afloat Saturday evening, that the oil cloth factory had shut down, is without foundation.

—Mayor Mazson and Mr. John Cuthbert have sworn off with each other, not to chew tobacco henceforth and forever.

—Three trucks have been laid on the new railroad bridges in this city and work has been commenced on the fourth.

—The Reform Club building was poorly lighted last evening, one of the gas mains had been cut off by mistake during the repairs in the basement.

—Mr. James Hotchkiss who resides on the corner of Madison avenue and Fourth street, has placed a transparency of Washington and Cleveland shaking hands in front of his residence.

—500 men were discharged from the Singer works at Elizabeth last week, and 500 more are to be discharged during the present week. Of course this is charged by partisans to Democratic success.

—A woman was chased from Stelle's woods down Central avenue to near the Landgraver residence one evening last week about dusk, by a colored man, so she said, to the first person she met in seeking protection, as her pursuer disappeared.

—A crowd of half-grown boys gather in front of the Reform Club building Sunday evenings and disturb the meetings by their loud talk and disorderly conduct. Some action should be taken by the club to prevent a repetition of this in the future.

—Saturday afternoon, about four o'clock, a young man named Charles Stewart, residing on West Fifth street, was seized with fits and fell on the sidewalk on Front street opposite the First National Bank, where he lay for some time. He was finally taken to his home in a carriage and attended to.

—Sunday Day of New Market, sends us a communication too long for us literatim respecting the discharge of employes at the Foster Prize works, which he attributes to *causes other than political.* As we stated the removal cause was such as was probably to be removed at this time.

—The customary injunction to "Rejoice with those that rejoice, and weep with those that weep." The Republicans can rejoice with the Democrats to-night-like good Christians, and the Democrats can weep with the Republicans, and they will of course. It should be understood, however, that the weeping shall be only on National issues. Locally "the shoe is on the other foot."

—If the next Legislature should go into joint meeting, a State Comptroller and Treasurer will be elected. Among other appointments to be made by Governor Abbett are the Chief Justice, a Judge of the Court of Errors and Appeals, three Prize Commissioners and a Law Judge of Middlesex to succeed Judge Cogswell, Mercer and Monmouth counties.

—We published Saturday portraits of the Gov rnors elected in the various States. The portrait of Moody Currier of New Hampshire, was followed by an amusing meeting this week, and received a ghastly welcome at its majority. A reader sends us a clipping from the Concord Daily Monitor, which says that Moody has a plurality, and is therefore elected Governor by the people.

—The attendance at the rink Saturday evening is estimated to have numbered about 1,800 persons. This does not represent the attendance during the day, which was large. The week's receipts amounted to from $7,500 to $8,000. The fun is comic, but the visitors appear to enjoy it immensely. Miss Blanche Hayden gave an interesting exhibition. By request, Master Willie Hyde and Miss Edna McKibbin give another song and dance Monday evening.

—A fantastic Democratic knight of the forest was soliciting contributions during the passed week from Democrats and Republicans alike, for the feast for the visiting clubs in the parade this evening. To the Republicans he said "You had better contribute and keep on the right side of us for we have power now." Thus readily got the contribution. To the Democrats he detailed the glorious principles of Democracy from the time of Jefferson, and if the listener survived, the tribute was paid to get rid of the talker and to avoid from being talked to death."

In It on Elopement.

The vicinity of Crescent avenue has had a sensation during the past week, the cause being an alleged elopement in high life, but which may prove nothing more than gossip, founded on a strange circumstance.

The tale is told in the circle of a New York family resident residing in one of the cross streets, disappeared a week ago last Wednesday from her home, taking with her her two children, a boy and girl, aged respectively three and five years, and also the nurse maid. The wife referred to is said to be a very handsome Spanish lady, and has been an object of much admiration from would-be gallants, whenever she appeared on the streets. Indeed, her refined manner indicated that she had had advantages in life more than usually falls to the lot of a nurse maid, so say those who knew her, who believe her position as maid was merely a role to enable her and her supposed mistress to be together, as they appeared very fond of each other. On the morning of the day referred to a person supposed from the description given to have been the broker's wife was seen in company with a fine looking and finely dressed young man in quest of a truck at the various stores in that line. At one place he was asked what priced trunk he desired, and he replied "the price is no object, I want the best you have got." No selection was ever paid for it, and when asked where he would have it sent, said "oh never mind, I will send for it." He was then asked for his name so that the trunk could be marked and delivered when the proper person called. He gave the name of Mason and intimated that he was the lady's father, but his manner gave a different impression.

The wife, children and nurse maid left town on the 2:30 p. m. train for New York unaccompanied with any male escort so far as is positively known, although the handsome stranger has not been seen since.

When the husband returned home he found his home dark and deserted. He made inquiries of neighbors and grocery stores, and on the arrival of the down train he stood look on evening train to New York in search of the absent ones, but returned without them, continuing, however his investigations, living alone meanwhile at his residence, which has a very prepossessing exterior, but is mostly furnished.

The family came to this city to reside last Spring, coming from New York. The disappearance is commented on very freely and rumors of all kinds are current concerning the affair.

One story is that the handsome stranger was really the wife's brother, and had been sent for so as to help her escape on account of cruel treatment. The failure to call for the truck referred to, is explained that it was feared the bringing it to and from the residence might excite suspicion, hence the stranger's request to send it. They proving a master hand in the affair, they took no baggage except necessary wearing apparel, such as could be removed in satchels.

The husband is reported to have said that his wife has often gone off on visits without informing him beforehand but that he usually knew where she went, though in the present instance her whereabouts are not known.

If there is anything in the affair this is probably nearest the truth in view of all the circumstances, although gossip has made a highly sensational elopement case out of it, with the handsome lover and all the other accessories of romance, he, personating the hot blooded Spanish beauty and her gallant lover coming to rescue her from the cruel tyrant, and fleeing with his consort to the sunny shores of Spain and all that sort of thing. As the lady is accomplished by her two children, and the husband's position of it, if such it may be called, don't pan out. We only give such facts as can be gleaned.

Reform Club Meeting.

Last evening Reform Hall was filled to its utmost capacity to hear the addresses of the newly-elected heads of the nation. Seated on the platform were Mr. Frank Marsh, Rev. W. E. Honeyman, Mayor Maxson, Mr. James Mojee, Mr. Bagwell, Mr. C. Tyler, Judge Wadsworth, Mr. Dawson, Mr. M. Thorn, Rev. Dr. Vars and Mr. Cuthbert.

Mr. Frank Taylor presided at the organ, the choristers being Messrs. A. Vanderbeek, Dr. Utter and Frank Runyon.

The meeting was under the direction of Mr. John H. French, the President of the Club, and was opened by the reading of a portion of Scripture and prayer by Rev. Dr. Vars. Honeyman, after which patriotic addresses were delivered by Messrs. Tyler, Cuthbert, McGee, Wadsworth, Yerkes, Maxson and French. The meeting was dismissed with the benediction by Rev. Dr. Vars.

The Democratic Parade.

The glorification parade by the Democrats of this city and visiting clubs, in honor of Cleveland's election to the Presidency, will take place to-night, as advertised in another column. The line of march will be as follows: The line will form on Somerset, right resting on Craig Place; to Madison avenue, to Westervelt avenue, to Jackson avenue, to Somerset street, to Emley, to Grove, to Front, to Richmond, to Second, to Park, to Fifth, to Spooner, to Watson, to Second, to Le Grand, to Seventh, to Liberty, to Fourth, to Madison, to Second, to Park, to Front, to Somerset and dismiss.

Gospel Temperance Meetings.

The usual Sunday afternoon Gospel temperance meeting, under the auspices of the W. C. T. U., was held in Reform Hall on Sunday last, Mrs. Dr. Bailey presiding. Mr. Gosling Elliott conducted the meeting, which was preceded with a spirit of earnestness. Stirring addresses were made by Rev. Mr. Cleaver and others. Next Sunday some of the members of the Reform Club are expected to be present and make addresses.

A Pigeon Match.

A match for $25 a side, shooting at 25 pigeons, took place Saturday afternoon, at Campbell's Club House, near the fair grounds between Harry Campbell of this city and Edward Delaney of Bonnell before a large assemblage of spectators, and was won by Mr. Campbell. The contestants tied on the first fifteen birds, and on shooting off the tie Mr. Campbell killed two straight, winning the match, his adversary missing on the seventeenth bird.

A sweepstakes was afterwards indulged in between Dr. Chas. Thiers, Jos. Purga, Daniel Terry, Wm. Terry, G. Ayres, Isaac Squires, and S. G. Smith, each contributing to a pool $5. The money was divided into three stakes, 1st—$7, 2d—$4, 3d—$3. The first stake was won by Dr. Thiers, who shot three birds.

For second money there were five ties. In shooting off the tie, Mr. James Force won, taking the $6, Wm. Terry, winning the $3. Darkness interfered with further shooting.

Difference of Opinion.

The following conversation took place in this neighborhood of the post-office last Saturday between a member of the Caucasian race and his Ethiopian brother:

CAUCASIAN: "How do you do, Sam?,

ETHIOPIAN: "Oh, only middlin'."

CAUCASIAN: "Are you doing anything now?"

ETHIOPIAN: "Well, not very much."

CAUCASIAN: "Oh, you'll get along better now that there's a change."

ETHIOPIAN: "Guess I dough'll be worse."

CAUCASIAN—"How do you make that out?"

ETHIOPIAN: "Well, you see, Free Trade I"

And he rolled up his eyes in holy horror, while ye white man smiled.

Personal.

Mr. John Laing, formerly in business on Park avenue in this city for many years, was visiting friends in town yesterday.

Mr. F. O. Chamberlain, of the Philadelphia Times, was in town yesterday.

The silver-tongued Judge Peter S. Bergen of Somerville, was in town yesterday.

Judge R. W. Runyon of this city, an able orator, and a staunch Republican, is a candidate for the office of Engrossing Clerk in the House of Assembly. He has many friends who would like to see him get the office.

Mr. Enoch Poller, formerly of Eighth street, this city, but now a resident of Bergen Point, is in town to-day visiting friends.

—Mark Levin and George W. Cable to-night.

—The total weight of New Brunswick's 19 police officers is 2666 lbs.

—Governor Abbett has summoned the *State Board of Canvassers to meet on the* 25th inst., to determine the official vote.

—The Plainfield Corset band issue highly prosperous, having made about $1,200 during the last three days' festival. It furnishes the Casino music every evening.

—We have received from headquarters a copy of the time-table changes. These will appear in the table to-morrow. The changes went into effect to-day.

—Ex-Judge Terhune of New Brunswick is a living monument to the truth of the axiom that temperance is a virtue. Though over 85 years old he attends his business daily with the regularity of clockwork.

—Rev. Ralph Wells has been Middlesex County Superintendent for 17 years. Only two county superintendents in the State have held their positions for so long a time.

—Over 60,000,000 brick are shipped annually on the South River, besides 50,000 hundred peaches, 25,000 tons of fertilizers, 30,000 chestnut poles, and much other merchandise.

—A fifty dollar diamond breast pin was lost at the rink Saturday evening by a real estate broker from Newark, while skating. He offers a liberal reward for its return, and is confident in the recovery of both the diamond and the setting, which had become separated.

Rosa Sonne.

As the fur on animals is growing unusually thick and long, indicating a disagreeably cold winter, and the beavers are but building dams twice as strong as usual, foretelling a severe winter, the ladies of Plainfield are beginning to think of fashionable garments for the coming season. Rosa Sonne, the popular modiste, has already received the latest styles from Paris, and is now prepared to build their cages, which is a sign of approaching winter. Rosa Sonne, 20 Park avenue, Plainfield, Middlesex N. J. Cards as if we might have a spell of weather of some kind before the Fourth of July for we cannot tell what to expect.

John York, a farmer living on the Brunswick Pike, eight miles from Trenton, has had a painful experience of seven on a big scale. Seven of his cows were poisoned by eating their weed the dance of Saint Vitus'-dance, to the number of seven, as they appeared to be dancing a jig. Seven of his hogs died at this, and, as an unpleasant consequence, seven of his children were taken down with the disease. To give the seven full measure of misfortune, seven of his neighbors called on him. After a few days who was returned to the old farm with the full number of seven, and he proceeded to try an heirloom. Forthwith Mr. York set a trap to watch the cows. The supposed thief came quickly enough. The trap caught him by the hand, and he has ever since been a cripple for life. The cows did not seem to mind the operation. The facts are vouched for by Mr. York, who is a member of the Legislature, and who is a gentleman of truth and veracity. Mr. York has also been troubled with a mysterious disease among his chickens, which has carried off a large number. He has tried many remedies, but without success. He has now a sick chicken which he is trying a new remedy on.—Trenton Journal.

Some Scottish Songs.

Allow a couple of two spell to pass beyond the reach of tradition. They come up, Oh, with a will, and they come up, Oh, with a will, these songs. Could they be induced to sit down and write out their own history, the world would be well on a par with Shakespeare for knowledge. Some of them are as old as the hills, and as fresh as the morning dew. Some of them are as old as the hills, and as fresh as the morning dew. Some of them are as old as the hills, and as fresh as the morning dew.—Boston Journal.

Deaths.

MAYNES—Sunday, Nov. 16th, at the residence of her brother-in-law, Charles A. Maynes, Alice E. Haynes, widow of the late Edward F. Haynes, and daughter of the late James B. Francis of Petersburg, Va.

Notice of funeral hereafter.

Special Notices.

MONDAY, NOVEMBER 17, 1884.

In Alabama is a China tree ten feet in circumference. Its top was torn away by a storm; but six feet up the trunk two more trees have taken root and grown as high as the old tree is. Half way up the trunk of the original tree a peach tree stands out, and is now filled with fruit.

These died recently in Savoy a knife grinder who for years had followed his trade in Geneva, and who left a fortune of 100,000f., all of which he bequeathed for division between three poor parishes, which should use it to buy clothing for children in need.

An old British coin, dated 1792, was found by a boy, or rather a bird, recently, at Crawford, Ga. The boy noticed that the bird, as it flew from stump to stump, held something in its bill, which it would drop and pick up again. He frightened the bird away, and made the discovery noted.

Petroleum has been found in the Province of Palermo of such excellent quality that it can be used in lamps without having been previously refined. The first experiments in collecting it resulted in 40 litres being secured in 24 hours. This sign of employment supply has led to the undertaking of works on a large scale.

If the Los Angles Herald is to be credited, a vast deposit of crystal or "pebblestone" has been discovered in the interior of California, the mineral being of the purest form of crystallized quartz, in which diamond drill lessees for opera glasses, microscopes and telescopes are made. A specimen brought in is equal to the best Brazilian pebble, and cuts even glass like a diamond.

For nine seasons a little sparrow with a coloured—foot returned with each summer to the window of a house in Lincoln, and tapped at the pane. If the sparrow had been kindly and finally fed into the habit of making him a regular visit. This season, however, he did not call he alighted on her hand, showing plainly that he was ill. She carried him out into the fresh air, but he would not fly, and died while she still held him.

The postal authorities of France announce that they are about to introduce a simple and useful innovation on the method of stamping letters. In future this will be done by machinery, which has already been tested, it is said, with the most satisfactory results. By this means it is hoped that time will be saved, and that the imprint on the stamping office may be made clearer than by the present plan of stamping by hand.

A Savannah genius has just given an [illegible] manufacturer for 125 pieces [illegible]

The Kingdom of Florida [illegible] to be [illegible] Oct. 1. All the old trees are heavily laden, but the [illegible] grown [illegible] second crop.

JAMES G. BLAINE TALKS.

HE TELLS OF SOME OF THE CAUSES WHICH LED TO HIS DEFEAT.

Mr. Beecher's Affirmative "Issue, Redemption and Rebellion" had a Great Deal to do with It—The New York Tribune Acknowledges Cleveland's Election.

BOSTON, Nov. 17.—The Journal prints an interview by a staff correspondent with Mr. Blaine upon the causes of his defeat. Mr. Blaine prefaced his analysis of the campaign by describing that his regard came from the following extract from a speech for his party and his conduct, not for himself. "I lived too near the presidency in 1881," he said, 'and have too keen a sense of its burdens, its responsibilities, and its perils to be unduly anxious for the office."

"How do you account for the closeness of the result?" was asked.

"Well, considering the loss by the bolt of the Independent Republicans, and the far larger loss from the action of the Republican Prohibitionists, the wonder to me is that the Democrats did not carry the state by a large majority, as they confidently expected they would. The result was generated by the great accession to the Republican ranks of Irish and Irish American voters, and working men of all classes who sustained the tariff and the advocacy of protective tariff. They believe, and believe wisely, that free trade would reduce their wages."

"You really think, then, that you received a considerable Irish vote in New York."

"Oh, I had thousands upon thousands," responded Mr. Blaine, "and should have had many more but for the intolerant and utterly improper remark of Burchard, which was quoted everywhere to my prejudice and in many places distributed in type. That was in the highest degree distasteful and offensive to me. But a fe, you know, travels very fast in this country, and in this connection to overtake and correct that one, and so I suffered for it."

"Was it not you and the Irish-American vote was organized at all or had competent leaders?"

"Yes," said Mr. Blaine, "I was deeply impressed by the ability, the earnestness, and sincerity of those who led it. Mr. Thom, for instance, is Patrick Ford, of The Irish World. He is a man of the most manifold devotion and unwearying energy, possessing a great faculty for organization, with marked ability and untiring energy. Gen. Corwin, of The Tablet, has in large degree the same characteristics, and is a favorite with all his race. Mr. Quinn, who is also a soldier and a Union soldier. Alexander Sullivan and John Finnerty were very powerful on the stump and did much good there. Both are natural orators of the fervid Irish type. Sullivan's late speech in Toledo contributed very largely to the defeat of Foster there. These men, with others whom I did not personally meet, have made a break in the Irish Democratic vote, one that I believe will be permanent, and it is difficult to over-estimate the significance of the attitude of the Democratic party on the tariff question become understood and appreciated. Our Irish and Irish-American citizens will in time get tired of voting in accordance with the wishes of the English free traders."

"Is your view of the campaign," said Mr. Blaine, "reflected upon the motives of any man, and I shall not do so. I content myself with saying that I think the Prohibitionists were wrong in their action. They did not correctly measure the possible result of their course. I received from many of them the assurance that my candidacy made their action difficult, because they actually wanted to vote for me, but they seemed to be under the strange delusion that the temperance cause would be helped by actually supporting their own presidential ticket, and by their course they influenced prejudicially the national issues which were really at stake."

"You attribute the close vote in New York, then, Mr. Blaine, solely to the action of the Independents and the Prohibitionists?"

"No, not solely," replied Mr. Blaine. "According to numerous letters I have received from Central and Western New York it would seem that the rainy day lessened the Republican vote. The Democratic majorities are in the cities, where by a new minister rain is a good pavement, a man reaches his polling place. The Republican majorities are in the country, where large numbers live three, four and even five miles from the polling places, which on election day had to be reached over muddy roads and in a rain storm. Had the day been fair, the Republican majorities in the rural counties could have been increased, one good judge writes me, by probably 10,000, but all agree that even then the result would be close. The difference between the two parties is the final count will perhaps not exceed a thousand, about one-twelfth of one per cent. of the total vote, or one voter in every twelve hundred for the entire state. So if the Democrats have really carried New York by the small margin, as the latest news indicates, you can see how easily a fair day might have reversed the result. But great political battles, like military battles, are rarely lost or won by an apparently trivial incident or accident, which no human foresight can guard against."

The Tribune Blows Cleveland.

NEW YORK, Nov. 17.—The Tribune says: "The vote of New York city was completed Saturday, and the official count of Tammany's ballot-box stuffing was announced by the Board of Canvassers. Every vote cast for Cleveland was counted, and every vote cast for Blaine was thrown out. The legal vote cast for Governor was: Cleveland, 192,854; Folger, 179,160; Cleveland's plurality, 13,694. Blaine's vote was taken from him, and Cleveland's increased by 1,047. The vote for Mayor was: Grace, 90,552; Edson, 90,552; Grace's plurality, 1,047

AN EMBEZZLER'S ADVENTURES.

Twenty Thousand Dollars Rapidly Manipulated—Ending in a Lunatic Asylum.

LONDON, Nov. 17.—A Belgian, named Bisch, has just been arrested at Dover, after a remarkable series of adventures, and sent to Belgium to answer a charge of embezzling about $20,000. Bisch is quite a young man, and was a commercial traveler and collector for a wholesale wine house at Brussels. Last March he found himself in possession of more than $20,000 francs of his employer's, and started off for Paris. He remained there a few days, and then went to Dover, where he arrived on the 15th of April. He visited Calais and Boulogne, and then returned to Dover, living extravagantly all the way. He never made any attempt to conceal his movements, and kept a watch which would be kept upon railway and other passengers, and it is said that he knows the way from Dover to Liverpool. He left the latter journey leisurely and lived extravagantly all the time, stopping at first-class hotels, betting at games of hazard and indulging brilliantly in every form of dissipation. When he reached Liverpool he had only a few pounds left, and he spent his last shilling in buying a steerage passenger's ticket and outfit on a steamer bound for New York. He went across the Atlantic, but, being a pauper, was not allowed to land at New York. He was brought back on the same steamer by which he went out, and was turned adrift at Liverpool. He wanted to return to Belgium, and, having no other resources, he tramped back from Liverpool to Dover, begging his way at the places where a few weeks before he had spent money like a prince. He arrived at Dover ragged, famished, footsore and worn out by his sufferings and exposure. He was arrested as an insane vagabond, and at the police station it was noticed that he answered the description of the embezzler Bisch, who had been wanted by the police for eight months. He did not deny his identity and has been sent to Belgium where he will be placed in a lunatic asylum.

TOPICS FROM LONDON.

Drunkenness Increasing—Zola's Latest Novel—Vessel Frenzied Critics and Theatricals.

LONDON, Nov. 17.—In spite of the spread of education, drunkenness is greatly on the increase in London, especially among women. Out of thirteen drunken persons brought before the police courts every day for a week, seven were women. Of 1,307 persons apprehended during twelve months in Liverpool, 7,009 were women.

Zola's latest novel, "Nana," is the talk of Paris now. She will not purchase the favor of Boulevard critics by money or otherwise. She poses as a Hyde or a Jeypdel, but is thoroughly well behaved, and is admitted into the best French society in Paris. Her figure is very high and her hair auburn, the forehead, brows and eyes show intensity of character and intellect, and her mouth is simply perfect. The hair is massive, and has naturally a beautiful wavy. She adores the stage, and sings only because she wants money. She is so luxurious in taste and habits, and has a dream of happiness in the tranquil life of an Amsterdam or Brussels lawyer.

The Paris correspondent of The Daily News of London has been much impressed with some strange complaints anent the cholera. A chemist sadly commented that it was not such a source of profit to men in his line as one might have thought. Meanwhile the jeremiad of the undertaking business was that the friends of cholera victims do not invite suspicious funerals. A fashionable chemist more cheerfully reiterated that precautionary medicines are doing well. Phenol and mineral sulphates have gone off rapidly; there is excellent business in sulphates of iron and copper, and cholera drops at two francs the small vial are splendidly brisk. Ladies carry them in their muffs and business men in their waistcoats.

Fire in an Insane Asylum.

OSHKOSH, Wis., Nov. 17.—Shortly before 11 o'clock fire was discovered in the boiler room of the Northern Hospital for Insane, situated about two miles south of this city. The flames spread rapidly and the main building was soon enveloped. Engines were dispatched from this city. By the diligent work of the employes and firemen the fire was confined to the main building. At midnight was brought under control. Wild excitement existed among the 800 inmates, but they were all hurried to the chapel in the rear building and remained there until they were taken to their regular apartments. Two or three escaped during the excitement, but nearly all the parties are now after them. The origin of the fire is unknown. Loss, $125,000; insurance, $75,000.

Gen. Butler is Very Jubilant.

BOSTON, Nov. 17.—A Washington special says: Gen. Butler was [illegible] by [illegible] his favorite [illegible] against the District of Columbia, which has been pending before the courts for the past twelve years. By the terms of the award, Strong was given $264,788.48, his claim being $483,000 and interest, on account of the [illegible] the [illegible] of the city.

This is the largest judgment ever given against the District, and the claim grew out of work on sewers and is connected with extensive changes of grade on the streets in Georgetown.

Is Gov. Cleveland to Marry?

SYRACUSE, Nov. 17.—[illegible] society gossips of this place are at present much excited over the approaching marriage of a lady well known in social circles here to Governor Cleveland. He was her father's former partner in business. The young lady is quite a favorite in Buffalo social circles, and is said to be a very intelligent lady. Rumor also has it that the wedding will occur before Mr. Cleveland is inaugurated, and that his success in the presidential contest has hastened the date of the ceremony.

Hawk Shot.

Hawk, a native of Sullivan county, but now residing at Port Jervis, a few miles west of this place, made an assertion, [illegible] [illegible] United States. He says as soon as the stockholders give up the title deeds to the property he will [illegible] clean shave.

Winding Up a Bank.

NEW YORK, Nov. 17.—On Tuesday next there will be a meeting of the [illegible] of the [illegible] when the question of declaring a dividend of the amount [illegible] will be considered. It is said that the amount have been received. There is said to be no opposition to the plan among the directors, who, according to an estimate [illegible] [illegible] [illegible]

LONDON, Nov. 17.—[illegible] has been caused by the discovery, in the course of excavations for the new Northern [illegible] London, of traces of [illegible] [illegible] in the fields. It is rumored that they were hidden for future use by smugglers.

RAISING A STORM.

The Way to Make Thunder, Lightning, and Rain

Disclosing the Secrets of a Theatrical Stage Contrivance Behind the Scenes That Produce Weird Effects.

[New York Times]

It was evening, otherwise known as p. m. or night. The glare of gaslight illuminated the edges of the theatre curtain, and the flutter of fans made a gentle commotion in the stale, unprofitable atmosphere. In two seats close to the orchestra railing, in the two prosy rows, one of whom regarded the scene with the air of a weary man of the world, while the other viewed his surroundings with the deepest interest. When the curtain went up and the play began the latter gazed with watchful the progress of the performance with great intentness. There was a thunderstorm in the scene. The thunder thundered, and the lightning lightened, and the wind winded, and the rain rained, and the crashing tree branches crashed. The young man nudged it all with the awe of one who could not comprehend how it was done, but his older companion smiled a weary smile and intimated in language somewhat less eloquent, that it was a "clear case."

Any one who knew the two young men would have recognized them at once as the famous Theophilus ago Josephus, and his simple-minded pupil Pizzicanadder. After the curtain had descended upon the last scene of the drama they wended their way to a neighboring resort, and sat down to partake of the "succulent bivalve" and the foaming vintage of Burton.

"Josephus," said Pizzicanadder, swallowing one end of his cigarette in his absence of mind, "that was a remarkable illustration of a storm, was it not?"

"My dearly beloved, unfledged gosling, you speak as one who talks in his sleep. Poor little boy! Let me tell you that these things are imitated easily and effectively by simple mechanical contrivances worked by the skill of man. They are a regular set of Olympian gods, those fellows behind the scenes. They launch their thunderbolts at will—or rather—and whenever the bosom rain and wind when and where the author will permit them. The property man and the stage carpenter are the presiding deities, and the prompter is the great Jove who hids them do so to hurl their thunders."

Pizzicanadder looked crushed, and for a few moments was occupied in a muzzle of dismal silence. Soon, however, he recovered his accustomed imbecility of spirit and asked Josephus another question.

"How do they imitate the thunder?"

"Listen, my boy; compose muzzle inside, and I will unfold to you the secrets of my prison house, so that they shall no more be hidden from your bright and yellow head stand on and like quills upon the fretful inhabitant. Thunder is in these days of Progress and modern improvements produced by what is known as the thunder drums. In the good old times, when Eddy floated upon a pair of flats every night at the Bowery theatre, it was produced by means of a large piece of sheet-iron, suspended over the prompter's desk, and supplied with a handle at one end. A vigorous shake of this instrument produced a deep, low, metallic crash, which is often heard in thunder-storms. This kind of thunder, however, doesn't have that lasting, tweet-soothing sound which is so characteristic of natural. While the old sheet-iron thunder is still useful in its way, it has been supplemented and improved by the thunder drum. It consists of a heavy box frame with a calf-skin drawn tightly over it. Upon this the prompter operates with a stick, which has a padded head covered with buckskin, and resembles the favorite instrument of the bass-drum punisher.

"The theatrical lantern is great!" exclaimed Pizzicanadder. "Now, how do they manage the rain?"

"Oh, that's done with the rain machine."

"You don't mean to say that they have a machine for raising rain? Why, certainly, I don't they get it patented and sell them to farmers in dry weather and make their everything fortunes?"

"Rest, perturbed spirit, rest," murmured Josephus. "The machine doesn't make rain; it simply imitates it. A sprinkler is made of half-inch wood, and is about two feet in length and four in length. Inside are rows of small wooden teeth. A quart of dried peas is also placed inside. Then the machine is put in motion by turning the crank. On the stage, and a rope belt passing around one end of it and down to the prompter's desk, and the prompter has only to do when he wants a shower is to pull the rope and turn the sprinkler. The dried peas rattle around among the teeth, and then you have a shower as real as the "delicious article" made in a country theatre that does not possess the genuine article. A common child's toy is procured and a piece of heavy brown paper is pasted over it, after the manner of a small-size sheepskin which the newspaper carrier boy has just received. A handful of dried peas is placed inside. Then the machine is put in motion by turning the crank. By sending it to and around the room, a fairly good imitation of the sound is made.

"How do they imitate the wind?"

"Ah, my boy, you are getting deep. You are almost ready to enter the profession. The wind machine is a square and elaborate affair. It consists of a large box, in the centre of which is set a cylinder provided with paddles or vanes. Around this there is an outer cylinder of Ohio river bass-wood, which, when the machine is ready for use, is thickly studded with a series of heavy iron rods. The top and bottom of the box are covered with the round pieces of the machine across the centre of the box. A small crank passes through the side of the box, and by means of it the cylinder is made to revolve. The way of a wind machine is to turn the crank slowly at first, and then gradually increase the speed. When the wind is supposed to be blowing a gale the crank is turned with great rapidity. The machine is not a reliable producer of wind when used in the open air, but in the theatre it is very effective. Sometimes, however, it gets out of order, and then the stage carpenter has to fall back upon his powerful lungs and produce a gale by blowing.

"Now you have all the mysteries of a theatre explained to you, my boy, and you can go home and practice on your self-respect. Good-night."

"I make my lightning with a flash taught me by Professor Pizzicanadder, whose

HOME IS THE SAILOR, HOME FROM THE SEA.

[Southern Christian Advocate.]

[I knowed a man, whom he lived in Jones, Which Jones is a county of red hills and sand,
And his name were matthis' but skin and bones,
And his legs was distant his corn-bread planted,
And he had 'bout a thousand acres o land.

This man — which his name it was also Jones,
He swore that he'd leave them old red hills and stones,
For he knowed matthis' make matthis' but pickaxes cotton,
And little 'n that, did his fathers were rotten,
And what little corn he had, his was no glutton,
And 'sidesof it a 10'ch rule to the land.

And the longer he were the matthis' he got,
And he sit and he smiled to the matthis lot,
And he hollered to Tom to come fier and hitch,
For to emigrate somewhar wher land was rich.

And to quit raisin' cockleburs, thistles and chick,
And a wastin' their time on the cussed land.

So him and Tom they hitched up the mules,
Perteckly that folks were mighty big fools
That 'ud stay in Georgy their lifetimus out,
Just scratchin' a livin' when all of 'em
Gift places in Texas wher cotton would sprout.
By the time you could plant in the land.

And he driv by a house war a man named,
Was a little sick for to die, the neighbors said,
And he hollered to Tom for to stop at this place,
And said that bein' as money was scace,
And bein' as sheriffs was hard o' face,
Two dollars an acre would git the land.

They closed at 4 o'clock in the day,
And he bought him a wagin and hoss,
And he bought his corn and his wittles and sich,
And moved to Texas, which it tuck,
His entire pile, with the best of luck,
To git thar and git him a little land.

He driv a wagin, and Tom he driv a hoss,
And he hollered back to his brother-suffered his arm,
And he picked all the rocks from off'n the ground,
And he rocked it up and plowed it down,
Then he sprigged his corn and his wheat
In the land.

Five years sold by, and Steve one day
(Which he'd got so fat that he wouldn't weigh),
Was a settin' down, easter lazily,
To the tantalizin' dinner table one,
When one of the children jumped on his knee,
And says, "Uncle James, which you bought his land."

And thar was Jones, stealin' out at the door,
And he hadn't got eight, my pickes, nor more
For he had left Texas afoot and cum
To George to see if he couldn't git some
Employment, and he was lookin' an Injunction
In the land.

He had never owned any land.

But Brown he acted him in, and he put
Him down to his vittles smackin' hot,
And when he'd got through with the finest Brown looked at him sharp and 'rite and
Thar, Jones, you hain't got what it's to pay!
Thar was more in the man than thar was in the land."

Practical Telegraphy.

[New York Cor. Chicago Journal.]

There is one Englishman who has amused Americans a great deal, and instructed us to some extent, and that is Mr. Preece, who has just gone wanded. The main I mean is Martin Farquhar Tupper, the "Proverbial Philosophy" man. He has been entertained in London by one of his shyest plutocrats, and literary men in general rate him among those writers who are eminently worthy. Well, but as for Mr. Preece, he is, after all, at his best he is a reporter of undiscovered rebel truths. I have met up with Mr. Preece in the important by a mutual friend in London, and I was delighted to the extent of actual conversation, and also because I can doubt that surprise you by the assertion that a million of his books in us have sold in the course of a single year. Of course, I am not certain of the exact figure, but the author himself has recently secured the dollars, though failing to achieve the kind of fame which they would especially prize. The Queen of England has conferred upon Mr. Tupper the usual no other to circumvent those Americans and thieves who have pirated his works. Mr. Tupper is now in the best books how much the poet bought the right to have received approximately in this country.

"Why, Preece, you're an old guy, you're the most perfect bore I ever met," said Tupper to the roguishly commonly paid to authors whose works have only a slender sale, and who are protected by copyright from robbery. Mr. Martin Tupper would have received $100,000 during the past twenty-five years. Being a foreigner, of course, he couldn't get any copyright here, and was at the mercy of any bookseller who chose to publish his works. Had he been a American, he might have sued the offenders in sheets of his books, and thereby collected damages. But his "Proverbial Philosophy" at the time of publication was a novelty, and therefore is not susceptible to even that measure of protection.

New York Business.

The position of Justice of Superintendent of it is usually called, of a large building in New York. It is one that is not necessarily occupied by any one person. The position of a Justice of the Superintendent is one that is frequently an object to the highest envy. To be a Justice of the Superintendent of a building, and a distinguished looking and looks like a banker or merchant. He knows how to dress, and he does it. He knows every body, by doing the work in the house. The salary is 60,000, with board and lodging for himself, but not his family. His servants are well clothed and the house is admirably managed.

The fact is, the janitor in large apartment houses is a man who makes the restaurant in Astor Place, in the early days of its existence, on the basis of a big head. In the case of the janitor he has the janitor to work for him. The janitor's salary is 60,000 to 80,000 a year, and he has to do all of the work—that is, all of the manual labor. He comes down town with a big bundle of keys, and he has to attend to 60,000 or 80,000 a year, and he has to do all of the work—that is, all of the manual labor. He comes down town with a big bundle of keys, and he has to attend to 60,000 or 80,000 a year, and he has to do all of the work—that is, all of the manual labor.

Mr. Gould said in a lecture in New York the other night: "The morality of the golden rule is as certain in your great affair as it your own mother Hood."

Don't use any of these thrilling bear stories as we planned him.

[Chicago Journal.]

A girl's fair, if possible; green and beauty; we spend the day in making hay, sweet day.

Business is business, but pleasure is pleasure. One quick call back, a stopping brook, some clover; a day of grief, the story old, a lover.

A fair, sweet maid, is the word said; what is it? Fay my lad, and not too late to seize it.

The years have gone, and still loves on that lover; he thinks of those days and days pass over.

A loving wife, a home, long His together, have made him glad that day, sweet "Yes, forever."

Preaching Tramps vs. "Philosophy."

Signal Office Prediction.

Partly cloudy weather, local rains, winds shifting to southwest and northwest, slight changes in temperature, followed by clear weather and rising barometer on Tuesday morning.

Chronological Events.

Boston Riot 1747.

JOTTINGS.

—The Sunday horse cars in Elizabeth are said to be paying.

—Sidney Dunning picked apple blossoms from a tree he was cutting down at Middlebrook last week.

—The Plainfield Sanger Band are to give an entertainment Thanksgiving evening, to be followed by dancing.

—The Board of Freeholders of Somerset County have authorized the Collector to borrow $4,500 in anticipation of taxes.

—A peddler in photographs of Cleveland and Hendricks did a rousing business during the parade last evening, by disposing of the poor rails at five cents a pair.

—The New Jersey State Agricultural Society has declared a dividend of 8 per cent. The meeting at Waverly this year was very successful one, the receipts being $20,376, the expenses $17,896.

—The Public Library was again thrown open last evening, having been closed for some time past owing to the illness of the librarian, who, however, has not yet entirely recovered.

—According to the Madison Eagle, Secretary Frelinghuysen will set out on his Harrison farm "as much from the will as at Mount Vernon where the bone of the great lie."

—Letters are at this office in care of Tax Newton for R. H., E. E. T., A. G. D., S., and C. L., in answer to advertisements for help and situations, which the proper parties may obtain by calling.

—Well-celebrated the Democratic victory to the extent of $500 last evening. Speeches were made, and the waiting colsaw entertained with roast pig, turkey, chicken, etc., at the Democratic wigwam after the parade.

—The second anniversary of the Young People's Association of the Park Avenue Church will occur next Thursday evening. A grand club of sixteen voices has been rehearsing music for the occasion. All friends of the church will be made welcome.

—During the progress of the parade last evening, the awning over the store of S. C. Hubbard on East Front street caught fire, which gained such headway that it was nearly consumed before it was extinguished. The awning was valued at $25.

—The long hours of the working day at the Singer Machine Works at Elizabethport has been reduced. The hands now report for work at 8 a. m. and stop at 5 p. m. How long this new time schedule will last is not known, but it is thought that regular hours will be resumed after the holidays.

—The Fire Eleven Star says: "Frenchtown has no bicyclers. In fact, we don't believe there are a quarter dozen bicycles in Hunterdon county." Some of the many bicyclers in this vicinity could take a trip to that region and give the inhabitants an exhibition.

—Mrs. Alice Fenton Haynes notice, of whose funeral appears to-day, was the sister of Senator H. M. Fenton of New York State, and widow of Edward B. Haynes, formerly of this city, a devoted and loving wife. She never recovered from the effects of his death, which took place Oct. 18, 1882. She was a member of the Park avenue Baptist church and took part in the prayer meeting last Wednesday evening.

—Ladies of the W. C. T. U., at Holly Tree Inn, last evening served the patrons to the number of about eight hundred with coffee, crackers and cheese. There was a constant stream of visitors from early in the evening until midnight. The making was arranged on very short notice, and had for its object to offset temptations to drink inducements by temptations to partake of good refreshments, and was inaugurated by Christian ladies for the public good.

—Julio Simmons, of New Brunswick, had his Thanksgiving turkey on in 1876 when twenty years old, feasting over his bones Tuesday night, surrounded by other flags and lanterns. In front of his house burned a cord of hickory wood cut by his own hands in 1876, and which was to have been burned at the inauguration of President Tilden. It had been preserved ever since, and Tuesday night that cord of old hickory wood burned for hours and was still burning at midnight.

—Cornelius L. Honeyman, agent for The Messenger, has a well-preserved copy of the date of February 29, 1840 (Vol. 10, Ellsworth's paper mentions President Tyler for a second term and an extension of the marriage of his daughter, at which no wine or other alcoholic liquors were furnished. Prominent notice is also given to a temperance meeting to be held in the C ert House—showing that there was temperance agitation in those days. A number of correspondents contribute articles on the re-adoption of specie payments and other subjects then before the people. The whole is an interesting reminiscence of days gone by.—Somerville Messenger.

Supreme Court Decisions.

Enos W. Burgen vs. Charles W. Bridges. On writ of error to the Somerset Circuit Opinion by Beasley, Chief Justice. Held, 1. Where the consent of parties to a cause is entered on the order of reference being general in its form, exceptions cannot be taken to the Judge's decisions on the motion to confirm the report of the referees, such report now to be treated as a verdict. 2. If the referees have proceeded illegally or decided properly, they are, by the consent recited, vested with similarity for what, I s., to set aside the report, and grant a new trial.

Asgar vs. Vanblyckle. On certiorari. Opinion by D ron, Jud e, R-11. A special school tax, ordered by a special meeting of the voters, which tax was called by the trustees, and which the district clerk did not give notice, will be set aside.

Ransold vs. Elmstein. On application for mandamus. Opinion by Dixon Judge. A director in a private corporation prayed for a mandamus against the co-directors, commanding their latter to permit the former to have at all times an equal share and equal rights with him in the manage ment and direction of all affairs and business of the company. No interference with the petitioner's right to participate in every incident was alleged. The writ was refused, on the ground that the prayer was too general and too broad, and that the writ if issued would be practically unenforceable.

The Punch and Judy entertainment at the Muhlenberg Fair will take place Thursday instead of Wednesday as previously announced.

—The nurse maid and servant of the recently mysteriously deserted party in high life respected to leave on the 2.37 train this afternoon.

In the Supreme Court, at Trenton, Thursday, the following opinions among others were read:

Presbyterian Board vs. Marsh, collector. Tax reversed in part and in part reduced.

Miller vs. Hillsborough Mutual Insurance Company. On motion to strike out pleas. Opinion by Judge Van Syckle. Pleas held irregular and stricken out with costs.

The Democratic Jubilee.

The Democrats of this city and vicinity held their grand jubilation last evening over the result of the election of Grover Cleveland to the Presidency. A number of visiting clubs participated with the home organizations in parading through the principal streets. Many residences and stores were illuminated, and there were fine exhibitions of fireworks at various points on the route.

The proverbial mill river steamer for the transportion of the defeated party was carried on wheels in the procession. A number of transparencies emblematic of the defeat also developed by the campaign were waving aloft to delighted hearers. The 13 Hebrides campaign hat was also worn. There was a greater display of fireworks and more illumination than during any other Democratic parade of the campaign, but the parade as was by no means the largest the Democrats have had this campaign.

—One dollar is the usual price Boston audiences pay for seats at Miss Nellie Brown's readings. The Plainfield Orchestra performs. Seats also sell at 7 the price of reserved seats for the Park avenue course.

A Serious Accident.

Yesterday afternoon while Mrs. Hooley, of Central avenue, was out driving at Nethermood a large dog ran out from one of the yards, and gave repeated jumps at the horse's head. The animal, which is very gentle, paid no attention to the dog for a time, but finally became frightened and running suddenly, upset the carriage. Mrs. Hooley was thrown out, having her collar bone broken and other serious contusions and injuries. The only other occupant of the carriage, a child of twelve, was unhurt. The horse was stopped a short distance from the scene of the accident by a little child. Mrs. Hooley was taken to her home in this city and Dr. Pitts was summoned to attend to her injuries.

—The Muhlenberg Hospital Fair opens this evening in Reform Hall.

—In the windows of the house last night on East Front street a part of the decoration displayed was the Cross of St. George! In this emblematic of Free Trade principle!

—A picture of the buildings of the World's Exposition at New Orleans is on exhibition in one of the windows of Butler's drug store, and attracts great attention.

—John Henry Sheridan, the twelve year old lad of Saturday, who made a home in the city and drove it over to Rahway Brook, about six weeks ago, is to be sent to the Industrial Reform School.

—The 210th anniversary of the organization of the Board of East Jersey Proprietors will be celebrated in Perth Amboy on November 20th. The Board still exists and has maintained its organization and kept its papers since 1685, when the twenty-four men who had bought the northern portion of the State from Berkley and Carteret took possession, formed themselves into the association.

—In an interview this morning with Mr. Potter, proprietor of the Potter Press Works, we were informed that the dismissal of thirty-seven employes this week, is done with much regret on his part. He does not know when he will be able to re-employ them, and the only discouragement exercised is in the selection of those whom he thought could best afford to stand it, and as far as possible he has selected those who are without families.

Personal.

Mr. Augustus Andrews passed Sunday in this city with his brother, Mr. Amos Andrews, of West Front street, preparatory to leaving for the South.

Mr. Mather, a former insurance agent of this city had now of Washington, D.C., has been visiting his brother-in-law, Judge Harper, of West Second street, for a few days.

The Black Tuxedo-Cable Readings.

Owing to outside attractions less appearance of Mark Twain and George W. Cable at the Music Hall last evening failed to attract a large audience, but the highly appreciated musical welcome these well-known authors to this city. There was, however, a fair number present, who listened with marked appreciation to the selections which were rendered. In opening, Mr. Cable requested any among the audience who might be curious as to why the Democratic demonstration outside to leave whatever sky rockets or Roman candles they might have about them at the door. The following was the

PROGRAM.

From De Scribe—Narcissa and John and Mary Richley.

Selected 'tother, is fact, I can bear that fifty dollar from me again.

Sounds of Plaza Congress.

GEO. W. CABLE.

Dressing for the Facts.

Tragic Tale of the Fleshpot.

MARK TWAIN.

From De Scribe—Narcissa is mourning for Lloyd Byron.

GEORGE W. CABLE.

A Tyring Situation.

Why I Left the Editorship.

MARK TWAIN.

From De Scribe—Narcissa's Night Ride.

Creole Song.

GEO. W. CABLE.

A Ghost Story.

Cure for Stuttering.

MARK TWAIN.

Of the 2 l-cious that of Mr. Cable's of Mary's Night Ride from Dr. Scribe called for the most marked revolutionary display, and elicited loud and continued applause from the audience. His Creole Songs were listened to with more than ordinary than otherwise, though they were sadly given.

Both Mr. Cable and Mr. Cable, in conversation after the entertainment, said that the enthusiastic manner in which they were received amply compensated them for the inclement weather. It is probable that they will appear again here before the season is over.

Nellie Says.

Editor Evening News—Passing up Front street last evening I paused to the parade there was but one thought in my mind and that took entire possession of me, depressing me so sadly that I could hardly control my feelings. That was triumphant; every saloon was in a blaze of glory." Had God forsaken us! One of the most flagrant of the sights in favor of this city, I am told, has an indicator registering every drink passing over the bar. In the sound of that constantly running indicator last night I heard wail of wives and children, I heard the bitter remorse of the poor drunkard, not only this side—but oh, the other side of the river of death, and the cries of the lost in my ears—too late, too late. Has God forsaken us? Are we working in vain? Calling on a friend later in the evening I received my answer—when I was reminded that one glorious example should out before doing and having done so much good. It is the man who said only a few days ago that this was the first campaign he had ever stood through in many years without drinking.

Nellie.

Recollections of Cleveland.

At 8 Sixth avenue, Newark, now resides Mrs. Ann Vanderhoof, whose maiden name was Waldeman, who in her young days surrounded the next President of the United States. Her recollection of the Cleveland family is quite vivid, and she remembers Governor Cleveland as a chubby, good-natured, though sometimes wilful, child of two years. She says that even in his worst baby moods it was possible to coax him to do anything that was desired of him, and that he was the great favorite in the family. Of the late Mrs. Governor Cleveland, she spoke in the highest terms of praise, and says that if ever a mother tried to bring up her children in the right way it was Mrs. Richard Cleveland.

To Discharge Employes.

It has been rumored on the street that at a meeting held on Saturday by the Philadelphia and Reading R. R. Co., the company they had decided to discharge every employe who was not absolutely required, and that the balance would have their salaries reduced twenty per cent. This move is done, it is said, to enable the company to pay the semi-annual dividend, which will shortly be due.

—A paragraph going the rounds of the press relating to an infringement suit against the Messrs. Potter and Co. epoxy, manufacturers of Potter Press, the suit being brought by Cottrell and Company, is calculated to be misleading. The Potter presses have a reputation co-extensive a period of thirty years, and the Company are abundantly able to and do guarantee everything they sell.

—George Farmer returned to his home at Westfield unexpectedly yesterday afternoon after an absence of seven years. The family had not heard from him for some time, and had supposed that he was dead.

Some Foolish Prayer.

Allow a cent to run until it gets beyond the Postoffice limits, and you pay 2c. on it. It will wear away, but in small cents it wears them away. Could they be induced to try the magical remedy of Dr. Sage's Catarrh Remedy, which is a positive guarantee to cure, or money refunded, many of the cases of catarrh which are taking the lives of many people all around us. Sold by Dr. R. V. Pierce's Pyrol agents, opposite Park avenue.

Deaths.

HAYNES—Sunday, Nov. 16th, at the residence of her brother-in-law, Charles A. Haynes, Alice R. Haynes, widow of the late Edward B. Haynes, aged 57 years, 9 months and 17 days.

Funeral from the residence of Chas. A. Haynes, 10 First Place, Wednesday evening 19th inst at 7 o'clock.

Relatives and friends are invited to attend.

Special Notices.

MARBLE AND ENGLISH

The Democratic men of Plainfield and vicinity are invited to meet at Democratic Associate Hall, Front street, corner Somerset, this evening, to advise upon an equitable arrangement of their Club and the best means of advancing the cause of democracy. A full representation of reform vote is expected. 18-0

THE LADIES ARE MAKING

extensive preparations for the Fair in Reform Hall on Tuesday evening, and Wednesday afternoon and evening, Nov. 25th and 26th, for the benefit of Muhlenberg Hospital. "Punch and Judy" will be there to see the children Wednesday afternoon. Come!

FOR SALE OR TO LET.

10 two and 15 acres of land at Evans, three miles from depot, or exchange for Plainfield property. Enquire A Swain, No. 8 North avenue, Plainfield, N. J. 11-6

THE P. S. C.

At their meeting Thursday evening unanimously adopted the following:

Resolved, That the Reform Club of Plainfield hereby declares its sympathy with the organization with partisan politics, but desiring that the cause of sobriety may be advanced within this city, hereby declares its readiness to co-operate to the extent of the nomination of a candidate for Mayor, Common Council and School Committee, and such special election, to support only such candidates, irrespective of party political name, as are known to be temperance men, and in favor of the prohibition of the sale or keeping for sale of liquor in Plainfield.

Frank W. Dunham, Sec.

Business Cards.

T. E. HAZELL, TEACHER OF MUSIC.

No. 7 East Sixth street, cor. Dunellen, Plainfield. Reading vocal music at sight a specialty. Lessons either private or in small parties. Also a good thorough elementary instruction upon violin. Also thoroughly tunes pianos. Monday evening of each month at Mallard Institute, 9 East Front street (over Dr. Shaw's Drug Store.) Terms satisfactory.

My method of teaching is considered much easier than the old as anyone with taste for art can learn to shade and paint from nature in a very short time and with less expense and less study. Everything made plain and simple but directly to the point. Special instruction given to those who desire it. Private lessons where desired. Pictures of all sizes put up to order. Very Respectfully,

A. H. Johnson.

Orders, or call, at Park House will be received with pleasure.

OPERA GLASSES TO HIRE

at Collier's, 3 Park avenue and the lobby of the Music Hall during the course. 25-0-tf

EXTREMES.

Two rival spirits roam the world
And turn the scales of fate;
One through the potency of love,
The other, hate.

Two forces are at enmity,
Divided by a breath;
The victory of one is life,
The other, death.

—William H. Hayne.

A YEAR AGO.

I was so rich a year ago
That every day
A little child climbed up to me
And left its place,
I was so very rich because
The child was mine;
I am not rich but he was lost
A little time.

I dreamed, for him, bright dreams,
And he?
The castles that he built
Were all for me.
I cannot tell why, if I try,
Of golden bright,
The head upon my pillow
Every night.

I never could begin to tell—
I wish I could—
How sweet this child of mine
How sweet, how good;
Or half how rich I felt myself,
You do not know
How rich I was
A year ago. —George Kringler.

Good husbands have no legal excuse for late hours.

NOVEMBER now gives us a second edition of October with cold nights and mornings.

ALREADY pleasant entertainments come to fill up the gap caused by the cessation of political excitement.

BET ADAMS are very nice. If it serve as a good lesson to keep hands off, it would be money not spent in vain.

THE man "who knows it all" politically will have less to bore his neighbor with than he had during the campaign.

CIVIL SERVICE REFORMERS are going to have a chance to see whether promises, like pie crust, are made to be broken.

FROM experiments by M. E. Mercadier on tone of equal and low heat of 1200 degrees, it appears that the number of vibrations is proportional to the thickness in the direction of the displacement, inversely proportional to square of the length, and independent in the breadth.

THE election of Governor Cleveland as President makes Lieutenant Governor David B. Hill Governor of New York State. Governor Cleveland will resign in December and Governor Hill will assume office in January. The promotion of Lieutenant Governor Hill will make Senator Dennis McCarthy President pro tem. of the Senate and a Republican Lieutenant Governor of the State.

MEN OF MILLIONS.

CATTLE MEN OF THE WEST HOLDING THEIR FIRST CONVENTION.

The Enormous Wealth They Represent—Thousands of Acres of Land and Herds of Cattle Controlled by Them. Some Very Large Figures.

ST. LOUIS, Nov. 18.—The first national convention of cattlemen ever held in this country opened its session at 11:30 in the Exposition building, which has been handsomely fitted up and decorated for the occasion. Delegates are present from all sections, including nearly all the western states and territories, several eastern states and Mexico, England and Scotland. Col R. D. Hunter, of this city, who originated the project, called the convention to order and announced the object of the gathering—the formation of a national league of cattle interests for mutual good. After urging unanimity of action, he introduced Col. C. C. Rainwater, of St. Louis, as temporary chairman. On motion of ex-Governor Crittenden, Delegate Thomas Sturgis, of Wyoming, was made temporary secretary. A resolution inviting each state and territory to be represented in the convention finally prevailed by an overwhelming vote. Gov. Crittenden and Mayor Ewing appeared before the convention and welcomed the delegates in behalf of Missouri and St. Louis. A band of martial music sounded, and the distinguished gentlemen appeared with a military escort. Gov. Crittenden, leading on the arm of Gen. W. T. Sherman, and accompanied by his staff, ex-Gov. Thomas C. Fletcher, Adjt. Gen. of the State guard, and others, Mayor Ewing being introduced, and thanked the delegates for the honor done St. Louis in selecting it for the place of the convention, and extended to all the hospitalities of the corporation. Gov. Crittenden followed in an elaborate address, adding his welcome to that of Mr. Ewing and speaking at some length on various topics in the questions to be discussed by the convention. His remarks were followed by vociferous applause.

Here a loud call was made for Gen. Sherman, who sat on the stage. The general responded in a brief address of a general nature. He concluded as follows: "I used to regret to see the wild and untamed steed disappearing from the plains and to see in their stead a race of scrawny, long horn Texas cattle. But now, however, there was a decree of nature, and that very gentleman have reared a race of 20,000,000 of fine breeding cattle, which supply the world with meat."

An amusing feature of the convention is a cowboy band from Fort Dodge, Kas., 90 men strong, in full frontier costume. They rendered selections during the morning session, eliciting great applause. The leader wields in place of a baton his silver-mounted derringer, nearly a foot long.

An idea of the enormous wealth which is represented by the delegates to the Cattleman's convention, may be gained from the following: Delegates from the 20 cattle companies and associations that have sent delegates, the statement being obtained from officers of the various companies. The Wyoming Stock association, with headquarters in the country, perhaps, in the Texas Live Stock association, which extends nearly all over the state of Texas, and embraces in its membership a large number of cattle companies. Of 14 of what are known as district associations. Wm. Lambert, its secretary, says the association have 3,000,000 head of cattle, the same number of sheep and 350,000 horses, and that a moderate estimate of their value would be $45,000,000. The largest of the district organizations in the state is the Southern Texas Live Stock association, which owns 420,000 head of cattle, 450,000 horses, and a large number of sheep, the whole valued at over $9,000,000. They also have 500,000 acres of land valued at $11,625,000, making their entire property worth about $21,000,000. They employ 1,500 men as herders. The cattle companies and associations in Texas are the Northwest Texas Cattle Raisers' association, Colorado and Brazos Cattlemen's association, Pan Handle Live Stock association and the Old Comal and Comanche Stock association, all of which own immense herds and send large delegations to the convention.

From New Mexico seven associations are represented, the largest of which is the Northern New Mexico Cattle Growers' association, whose range practically covers Colfax, Mora and San Miguel counties, and embraces 15,000,000 acres, on which 800,000 head of cattle graze, besides a large number of horses and sheep. The other associations in New Mexico and the Aqua Caliente, with 240,000 head of cattle and a capital of $2,500,000; the Upper Rio Grande association, 170,000 head of cattle and a capital of $2,000,000; Lincoln County association, with 200,000 head of cattle and a capital of $2,000,000; Central New Mexico association, with 500,000 head of cattle and a capital of $4,000,000; Doña Ana association, with 85,000 head of cattle and a capital of $1,000,000, and the South western association, with 20,000 head of cattle and a capital of $2,000,000.

Of the ranches owned or controlled by St. Louis men and companies, one is in Texas, in this city, the largest interest in that of Hunter & Evans, which embraces several ranches in Texas, the Indian Territory, Kansas and Nebraska, with 300,000 head of cattle, with a capital of $562,000, and owns and controls 11,464,000 acres of land. Next comes the Continental, with 60,000 head of cattle, and a capital of $1,200,000, and the land grant 250,000 acres; Clark Cattle and Land company, with 80,000 head of cattle and a capital of $800,000, and 1,000,000 acres; Hughes' Cattle company, with 51,000 head of cattle and a capital of $360,000, and 1,000,000 acres, Rainer Cattle company, with 25,000 head of cattle, a capital of $250,000 and 100,000 acres of land, and the St. Louis Cattle company, with 15,000 head of cattle, a capital of $150,000 and 200,000 acres; Grand Cattle company, with 30,000 head of cattle and a capital of $300,000, and 1,000,000 acres; Pelham Cattle company, with 31,000 head of cattle and a capital of $360,000, and in land 3,000,000 acres, Rainer Cattle company, with 25,000 head of cattle, a capital of $250,000 and 100,000 acres of land, and the St. Louis Cattle company, with 15,000 head of cattle, a capital of $150,000 and 200,000 acres; Hughes' Cattle company, with 30,000 head of cattle and a capital of $300,000, and in land 1,000,000 acres; Pelham Cattle company, with 31,000 head of cattle and a capital of $360,000, and in land 3,000,000 acres, Rainer Cattle company, with 25,000 head of cattle, a capital of $250,000 and 100,000 acres of land, and the St. Louis Cattle company, with 15,000 head of cattle, a capital of $150,000 and 200,000 acres; Grand Cattle company, with 30,000 head of cattle and a capital of $300,000, and in land 1,000,000 acres; Pelham Cattle company, with 31,000 head of cattle and a capital of $360,000, and in land 3,000,000 acres, Rainer Cattle company, with 25,000 head of cattle, a capital of $250,000 and 100,000 acres of land, and the St. Louis Cattle company, with 15,000 head of cattle, a capital of $150,000 and 200,000 acres; Hughes'

THE LABOR MARKET.

Reducing the Wages of Operatives in Several Places.

PASS. RIVER, Mass., Nov. 18.—The Old Colony and Mount Hope Iron companies, of Somerset, have posted notices of reduction of ten per cent. in the present wages of all their employes, the reduction to go into effect on December 1. This is said by the employes to be the third reduction made by the above firms in two years, the first two being 15 per cent. each, and that when the next notice of reduction appears, they will be in the position they were in the first three years, i. e., they will be receiving 60 per cent. The manufacturers say that the overstocked market, caused by the competition of iron mills of the middle and western districts, has forced them to either shut down or make a reduction, and they chose the latter course in order to keep their employes at work. The Old Colony mill at Somerset is a branch of the Old Colony company at Taunton, which is one of the largest concerns in the eastern district. Nailers will have paid them about $2.25 per day, helpers about $1.25, and puddlers about $1.70. No trouble will ensue from the reduction, as the men are anxious to work, preferring reduced pay to idleness.

CUMBERLAND, Md., Nov. 18.—Notices were posted throughout the Cumberland Coal region by all the companies this to-end after Dec. 1st until the price of mining coal would be reduced from forty to forty cents per ton. It cannot yet be ascertained what action, if any, the miners will take regarding the proposed reduction.

DANVER, Nov 18.—About 200 coal miners employed in the Walsenburg mines by the Colorado Coal and Iron company of this city have gone out on a strike. These miners took part in the recent general strike, and only returned to work last Thursday. As they are members of the Miners' union, serious trouble throughout the state is probable. The present grievances are unknown.

LAWRENCE, Ms., Nov. 18.—It has been announced that the Androscoggin mills, employing 1,400 hands, would probably shut down on two weeks indefinitely. Possibly they will substitute a cut down of 12 per cent. The operatives in those mills were cut down a few weeks since 10 to 15 per cent.

BRADFORD, Pa., Nov. 18.—The employes of the Bradford Belt Works, 225 in all, have struck in consequence of a reduction of 10 per cent. in wages and cutting off one hour from the day's work.

TAUNTON, Mass., Nov. 18.—The Eagle Union company has notified its employes of a reduction of ten per cent. on the 25th.

An Aristocratic Walking Match.

NEWPORT, Nov. 18.—An aristocratic walking match took place here and was witnessed by a large and fashionable assembly. The contestants were John Whipple, son-in-law of the late Gov. Sprague of Rhode Island, and Charles M. Ostricke, brother-in-law of Theo A. Havemeyer, the Austrian consul general at New York. The course was from the old house above ocean avenue and back to the starting point, a distance of 10 3-2 miles. Whipple was allowed full five minutes start to be obliged to walk best answer, while Ostricke had a "go as you please." Ostricke won easily, this being 1 hour, 37½ minutes, beating Whipple 15½ minutes. The race was for $100 a side, Water L. Kane backing Whipple. Ostricke backed himself.

Going to the Theatre by Telephone.

BOSTON, Nov 18.—On Saturday evening the New England Telephone and Telegraph company placed two of the ordinary blake transmitters in Music hall theatre on either side of the stage and these were connected with the office at the corner of Franklin and Washington streets. Twenty receivers were placed in circuit, and with these could be heard all the music of "Falka," and most of the dialogue was distinctly caught by those at the receivers. This has been tried in Paris, but it is said to be the first time that it has been done on so extensive a scale as this country, previous experiments having been confined to a single receiver.

A Mariner's Dreadful Plight.

HURON, Mich., Nov 18.—Capt. George McClure, of Detroit, arrived here at noon with the schooner Frank Morris and reported the loss of his crew, William Clark and John Chilford, of Detroit, were knocked off the deck by the breaking of the foremast when off of Forest, Mich., on Lake Huron, and drowned. Capt. McClure brought the dead bodies to shore. A severe fall gale, with snow, was blowing from the north when the men were drowned. He is also exhausted with labor to save the vessel.

A Trust Company Restrained.

PORTSMOUTH, N. H., Nov. 18.—It was learned with considerable surprise that the bank commissioners had obtained an injunction from the supreme court restraining the Portsmouth Trust and Guarantee company of this city from further continuance of business. The institution was incorporated in 1871 with a capital of $200,000, and a guarantee fund of the same amount for the protection of depositors.

Gov. Adam Badeau Sued.

WASHINGTON, Nov. 18.—The solicitor of the treasury has instructed the United States district attorney for the middle district of Alabama to bring suit against Richard Bustard and Jacob Hanwood, of that state, superiors on the bond of Gen. Adam Badeau, late consul-general at London, to recover the sum of about $12,000 received by that officer as notarial fees, and alleged to have been illegally retained.

The Brooklyn Bill.

LONDON, Nov. 18.—In the house of commons this afternoon Mr. Gladstone said that if the house of lords would agree to pass the Brooklyn bill so as to make its provisions terminate operative in January, 1885, the government would pass a redistribution bill early next year. The house of lords will probably accept Mr. Gladstone's offer, and pass the Brooklyn bill.

A Mysterious Attempt at Incendiarism.

HOBART, Nov. 18.—On Sunday night, at 8:30, Michael Burke, keeper of a roadside house, discovered a fire in the woman's sleeping room. He aroused his wife, and after they had escaped from the house, the latter went back to her room to look after her children, but Burke refused to say anything.

The County Contest.

LINCOLN, Nov. 18.—Telegrams received here from English officers attached to the Nile expedition complain of outrageous attempts at practical jokes in the matter of [illegible] Gen. Stephenson, commanding the expedition, has issued a general order [illegible] such practices. Gen. Stephenson has also issued an order [illegible] of the army, and even English gold is received at a discount of ten per cent.

Gen. Grant's Cousin.

WASHINGTON, Nov. 18.—Colonel Fred Grant has been married to a cousin of the general in a very quiet manner. He is now in Europe with the party of which the general is the most distinguished member. It is currently reported that Colonel Grant will remain in Europe with the expectation of obtaining a consulship.

Pleading Insanity.

CHICAGO, Nov. 18.—Mrs. Mary Hilton, who killed her husband with a hatchet, is trying him to said to have already prejudiced the judge against him. His interruption of counsel in the cross-examination of witnesses is considered unfair. It is currently reported that Mrs. Hilton's counsel is bringing with the proceedings of a dangerous defense in a criminal court.

Consumption can be Cured!

This fact has been demonstrated in more than

TEN THOUSAND CASES by

DR. S. D. HOWE,

The Great Consumption Doctor of New York, PROPRIETOR OF THE

Arabian Medicines,

Celebrated throughout the World for their remarkable Cures.

Dr. Howe's Arabian Milk Cure,
Dr. Howe's Arabian Tonic,
Dr. Howe's Arabian Liver Pills.

The Only Medicines that have ever been known to positively cure Consumption.

TESTIMONY

Of the Hon. Jos. E. Cary, Judge of the Superior Court, Chicago, Ill.

CHICAGO, Dec. 14th, 1870.

DR. S. D. HOWE,

DEAR SIR:—Permit me to add my grateful testimony to the army of witnesses to the virtues of your justly celebrated Arabian remedies. For a long time my wife was seriously afflicted with hacking cough, night sweats and other symptoms of decline, and constant acute pains in the lower portion of the right lung and under the shoulder blade. Her sufferings were intense, and the doctors extremely anxious and pronounced. Her disease was pronounced consumption by the most skilful physicians, and other eminent, whose prescriptions had been taken without benefit. When your celebrated Cancer is gone, they, we called on you, having very little hope of deriving help from your remedies, which you placed very kindly and with due caution in her hands, your directions in accordance with your plan and method of administration were conscientiously and unflinchingly followed, and the result was that the cough loosened and soon ceased, night sweats and pains disappeared, the bones of the chest was relieved and all pain removed, she began to gain in flesh and improve in strength and appetite. I gladly bear this testimony to your skilful advice have served the life of my wife. She unites with me in the grateful tribute to the merits of your remedies.

Very respectfully yours,

JOSEPH E. GARY.

The above letter is only one among thousands received from all parts of the United States.

Price of Milk Cure & Tonic, each $1 per Bottle.

PILLS, 25 Cents per Box.

Sold by C. A BUTLER, Druggist, Sole Agent for Plainfield.

A NEW PAVEMENT.

The undersigned has secured the exclusive agency for the sale of the

Diebold Patent Iron Stone,

which for elegance and durability, is unsurpassed, and in price will compare favorably with any other pavement now in use. It is the most beautiful ornamental stone for walks and yards, gutter stones, floor tiling and street blocks. Also used to build fences and laying wood vaults, and for building purposes generally. These pavement blocks have many striking peculiarities. They show no perceptible wear; are non-absorbent; do not sod over; are proof against all kinds of moisture. When dampness accumulates on the ordinary brick the mercurial remains perfectly free from it. These flagstones rest on the natural iron like and will last for ages. Specimens can be seen on exhibition, at Warner's Fancy Store, opposite Dellmore Music Hall. For further particulars call on or address

The Sun.

THE Sun for 1884 will continue to be a newspaper which tells the news, prints what it investigates, which goes at the facts, no matter how much the process costs, which presents the news of all the world as completely as it can be learned, and which, though, which is working with all its heart for the cause of honest government, and which therefore believes that the Republican party must go, and must go in this year of our Lord, 1884.

About forty million copies of THE SUN have been sent out of our establishment during the passed twelve months.

If you were to paste end to end all the columns of THE SUN printed and sold last year you would get a continuous strip of interesting information, common sense wisdom, sound doctrine, and zeal not long enough to reach from Printing House square to the top of Mount Washington in the state of Maine, but Printing House square, and three quarters of the way back to the mean again.

But THE SUN is written for the intelligence of the people, the vast majority of the intelligence residing in the eight twenty-acres or seventy-eight times.

If every buyer of THE SUN during the passed year has spent only one hour over it, and if his wife or his grandfather, mother or brother, has done somewhat in only his afforded the human race thirteen thousand years of steady reading night and day.

It is only by little coincidences like these that you can form any idea of the importance of the most popular of American newspapers, or of its influence on the opinions and actions of American men and women.

If you know THE SUN you like it already, and you will read it with accustomed diligence and profit during what is sure to be the most interesting year in its history. If you do not yet know THE SUN, it is high time to get into the swallow.

THE ORIGINAL "DIXIE."

The New Orleans Times-Democrat gives the following as the correct original of the famous "Dixie:"

I wish I was in de land of cotton,
Old times dar am not forgotten—
In Dixie land whar I was bawnded,
Early on a frosty mawnin'.

Oh massa marry Will de weaber,
Will he was a gay deceaber;
When he put his arm around her
He looked as fierce as a forty-pounder,

His face was as sharp as a butcher's cleaber
But dat didn't seem at bit to grieb her;
Will run away, missus took a decline,
Her face was de color ob de bottom ob de kline.

While missus libbed she libbed in clober,
When she died she died all ober;
How could she act for foolish part
An' marry a man to broke her heart?

Buckwheat cake an' cawn-meal batter
Makes you fat, or little fatter;
Here's a health to de neat ole missus,
An' all de gals dat wants to kiss me.

Now if you want to dribs away sorrow
Come an' hear dis song to-morrow;
Den hoe it down an' scratch de grabble,
To Dixie land I'm bound to trabble.

CHORUS.

I wish I was in Dixie, hooray, hooray!
In Dixie's land
We'll take our stand.
To live an' die in Dixie
Away, away, away down South in Dixie;
Away, away, away down South in Dixie!

RAINY DAY WORK

For a Farmer and Son Who Are Proud of the Corner Grocery.

(N. Y. Sunday Letter.)

I looked over the "Corner Grocery" crowd that rainy day and speculated on what might have been. Had the farmer been the right sort of a man his boy would have been at home. It would have been as good as a holiday for both. All the items in the day-book would have been posted up after dinner-table, and we'd have looked over the diary to see what day we sowed wheat in lot No. 4—what time last spring we set out those apple trees—how many days we sold the wool and bought that new wagon, and we might even run back a year to see when the equinoctial set in and how long it lasted.

Then there would be something to do down cellar—old vegetables to carry out—a pane of glass to put in the window—boards to be nailed on the bins—shelves to put up for the canned fruit—perhaps some whitewashing to sweeten the place for the winter.

By 10 o'clock we would be in the barn. The harness should be oiled on a damp day. We'd find a few rents and give each piece a thorough wash in soap-suds, and if straps or buckles were lost the sewing-awl and needles would speedily repair damages. As boss's work would add a year's wear to every harness. Then the crank to the grindstone should be fixed so solid that loose plank in the middle walked. Or, what would be the ladder going up to the mow made secure—the mangers overhauled to prevent waste of fodder—all pieces of rope and straps picked up and hung where they could be found when wanted, and the barn swept clean. In this latter task we'd find a clevis or two, odds and ends of chain, that hammer which has been lost for weeks, two or three drag-tools and other articles, all of which should be secured where they would not get astray again.

After dinner the barn-doors, which have bothered all summer long, should receive attention. The doors place in the stable into which the hay is to be drawn, or would drive should be made snug. Every hinge on every door of barn or sheds should be oiled. Pitch-forks, spades and shovels with loose handles should be seen to, and that spade should be ground to an edge.

It wouldn't be a bit like work to take a wrench and overhaul the family carriage and the wagons. Loose nuts should be tightened, springs oiled, bolts driven home and the grease cleaned away before it works into the hubs and weakens the axle wheel.

And then those iron knees might be driven in place in the smoke-house, a new handle fitted to the ax, the fanning mill cleaned up, and all the grain bags hunted up, marked and placed together, and by supper time we'd have saved $50 of wear and tear and put in a day full of enthusiasm and good nature. The evening should be saved for books and papers, and bed-time would find father and son content with the whole world.

Elocution in the Proof-Room.

(The Current.)

[Unerring proof-reader, thinking of the gradual decadence of Schweiser-kase, and waking up his copy-holder] "Come now; here's some poetry, and the fellow's set it in brevier—look sharp." [Reads] "Sing, quad, up To die comma dash, to sleep comma dash parenthesis, up No more parenthesis dash, and by a sleep comma, to say we end paragraph, up The heartache one word comma, and the thousand spaced out natural shocks paragraph, that flesh is heir to parenthesis comma dash, apostrophe T down to a consummation paragraph, up Devoutly to be wished period. To die, to sleep comma, to sleep colon dash paragraph, up To sleep comma, perchance to dream colon dash, ay there's the apostrophe S down to the rub semicolon paragraph, up For in that sleep of Death what dreams may come comma paragraph, up When we have shuffled off this mortal coil comma paragraph, up Must give us pause period paragraph. Rest in minion revise, fifty-three K. [To boy.] There, take this out to that blacksmith on slug twenty-four. [To copy-holder.] Why I never set up editorial out of "Hamlet" again. [Impressively to copy-holder.] "Why I played Hamlet at Kentuck to $400 once myself." Appearance of the revise:

To die—to sleep—
No more; and by a sleep, to say we end
The heartache, and the thousand natural shocks
That flesh is heir to,—'tis a consummation
Devoutly to be wished. To die,—to sleep—
To sleep! perchance to dream—ay, there's the rub;
For in that sleep of Death what dreams may come
When we have shuffled off this mortal coil,
Must give us pause.

An Exception to the Rule.

[New York Times.]

"It is not every one who can dance. It takes a good leg to waltz well."

"I don't agree with you, Mr. De Silver," replied Miss Badger. "I saw a dog lead the German the other day."

"That was very strange. Where was it?"

"On Fourteenth street. The German was blind."

Comprehending His Clothes.

[St. Louis Post-Dispatch.]

A man who had had occasion to call the fire on which Buffalo is built requested all present to "set up the drinks" and "have one right for $3 and a thumping big drink of whisky. There's his regular rate for reliesprinking, and he is taking the cabs in rotation.

Her Son Williams.

[Bloomington Eye.]

"You may speak," said a fond mother, "about people having strange ways of doing, but when it comes to my son Williams I don't mind, my son Williams surpasses everybody I ever knew."

Cheerfulness at the Fire Island.

(Charlotte World.)

Husband reading from Scripture—"Not one in twenty marries their first love. How was it in your case, my dearie?" Wife—"How was it in your case?" Husband—"If you must make the first move, I'll answer your question." Wife—"Well, here's the honest truth. If you married your first love, I married my first. If you didn't, I didn't."

A Far-Famed Sectionian.

[Life.

J. L. HERBERT SULLIVAN.

This renowned philosopher and sociologist was born as a matter of course in Boston, in 1855. Fifty years of his immediate ancestors come over to this country from Portugal in the Mayflower, and were subsequently killed at Bunker Hill. The rest either went to farm or study at Harvard or Yale crews, or partially distinguished themselves in humble walks as gas users of Massachusetts. Herbie—"Yi-yi," as his intimate friends prefer to call him, was wonderfully precocious as a child, and when six years of age was already deep in the books and culture of which his native city is so proud. He never indulged in the rude games of spelling and figures of which his playmates were so fond, but delighted his proficiency by his close application to shinny, base ball and rowing, graduating from Yale in those sciences at the age of eighteen. Here he started in and devoted himself to that branch of conchology which treats of mussels. In 1881, in New Orleans, he delivered a lecture on gravitation and spectrum analysis, which was frequently and brilliantly illustrated by the Hon. Patricio Ryan, an Italian savant, who assisted him. Upon this his home was in the present height. He has, in New York, delivered a similar lecture, at Madison Square garden, but the experiments failed, owing to the carelessness of the Hon. Peg Wilson, who failed to remain quite long enough in the recumbent position required, and on the second occasion failed to appear, to the indignation of the subject of our sketch.

Again on November 10 he experimented in New York in company with Prof. Tuffle, in the same line, but to be as proud an exemplar, before an audience repres ating the wealth and vitality of the metropolis. The occasion to be of the superior culture and training Boston supplies.

Mr. Sullivan is a modest, retiring gentleman, and never at others' and never boastful. He represents the best blood and sentiment of his native state, and unless he lectures again, will probably live long to tell what he is going to do.

Proceedings of the Lime Kiln Club.

[Detroit Free Press.]

THE EMBLEM ADOPTED.

"On motion of Calamity Hastings the matter of a national emblem for the colored race was taken from the table for debate. He favored a beehive himself, but would not be cautious about it.

Prof. Bannister favored the coon as an emblem of industry, vigilance, wisdom and courage. Colored people were often referred to as coons, anyhow, and the emblem would suit both parties.

Trustee Fullbank had given the matter much thought, but his preference was for an old hen sitting on about thirty-four eggs. If that didn't typify industry and clear grit he didn't know what would.

Samuel Shin had made up his mind that the only emblem he would vote for would be that of a cucumber walking in a shady lane with a wax rosebud under each arm.

Sir Isaac Walpole favored the figure of a black bear; Bodley Cadaver stood in favor of the beaver; Judge Cadaver would have nothing but the figure of a black man waving a plow in one hand, a threshing machine in the other and a cotton-field darky

JOTTINGS.

—Read the temperance notice in another column.

—Reserved seats for Esmeralda are now on sale at the drug stores.

—Some Democrats have won as many as fifteen hats at the recent election.

—Master Willie Hyde and Miss Edna McKibbin make their final appearance at the Casino this evening preparatory to leaving for the west.

—The regular weekly rehearsal of the Vocal Society was held last evening. The Society is making good progress in the selections to be given at the coming concert.

—One of Plainfield's society young men is receiving the commiseration of the young ladies upon his having to shave off his mustache as the result of an election bet.

—John Ainsborough was arrested Monday for being drunk and making himself offensive to ladies on the street. He was sent to the county jail for sixty days by Mayor Maxson. James Scott also arrested for being drunk was fined two dollars.

—Peter Doll, a resident of Cranford was arrested yesterday afternoon by Officer Kelly for being drunk and disorderly. It being his first offense Mayor Maxson reprimanded and discharged him. Hugh Feeley arrested last evening for drunkenness, was fined one dollar.

Death of Mrs. Alice Fenton Haynes.

The friends of Mrs. Alice Fenton Haynes were shocked this morning to learn of the sudden death which occurred at the residence of Mr. Charles A. Haynes, her brother-in-law in Plainfield, N. J., Sunday afternoon at 4.45 o'clock. Last Thursday Mrs. Haynes went into N. Y. City and in crossing the threshold of the house on her return received a stroke of apoplexy. She retained consciousness though unable to speak and it was hoped that she would survive the malady but Saturday her condition became alarming and death ensued Sunday afternoon. Mrs. Haynes was the youngest daughter of George W. Fenton of Frewsburg and neice of Senator Reuben E. Fenton of this city. She was born August 15th, 1833, and consequently was 51 years of age. About six years ago she was married to Edward B. Haynes of Plainfield, N. J., whom death prevented that of his wife by exactly one year and one month.

As Alice Fenton she passed much of her time before her marriage in Jamestown, at the home of her brother, Martin L. Fenton. She was possessed with a singularly sweet and sunny disposition which made her a favorite with all, and the number of those who sincerely mourn at her early death is very large.

The interment will take place in Greenwood and the remains placed beside those of Mr. Haynes. It is probable that several of the relatives of Mrs. Haynes will leave for New York to-night to attend the funeral. Her two brothers, T. J. Fenton and M. L. Fenton, are on a hunting expedition in the Adirondacks, and it is doubtful if the family group of the sister's death can reach them in time for them to attend the funeral.—Jamestown (N. Y.) Journal.

The Rising Wife.

The New York Sun of this morning has the following concerning Plainfield's latest sensation:

Mr. Henry W. Livingston, a real estate broker, who has an office at 150 Broadway, resides at his home in Rose Knoll street, Plainfield, N. J., on the night of November 7, expecting to be cordially greeted by his pretty wife, Lillie Boyd Livingston, and his two little boys. He was surprised to see no lights in the windows. He entered the house and was more surprised to find no traces of his wife or children. Even the cook and nurse were missing.

He hurried in company with a young man, she had taken the 2.30 p. m. train for this city. He came to this city that night but was unable to find his family.

It was then Mr. Livingston has been living alone in his house in Plainfield. There was a report in the village yesterday that the young man who accompanied Mrs. Living-ston is her brother. Mr. Livingston said that this young man was a relative, and that it was not an elopement case.

The return of Mrs. Livingston's nurse and servant to this city, mention of which was made yesterday, was for the purpose of securing some wearing apparel which they had left behind. They brought with them an order from Mrs. Livingston, addressed to whom it might concern, which authorized their taking the goods. Having obtained what they desired they returned to New York on the 5.30 p. m. train. They intimated that Mrs. Livingston was with relatives in New York, and that she had left her home on account of cruel treatment, the special case in point having occurred the day before, and which Mrs. Livingston intended as the initiatory proceedings for divorce on the ground of cruelty. Mr. Livingston is understood to deny that this is the case.

Personal.

Mr. Samuel D. Morrison, of the firm of W. L. Morrison & Co., publishers, was married in Rahway last night to Miss Josie Lindsay by the Rev. J. A. Liggett, Mr. Morrison is one of the proprietors of the Rahway Advocate.

Reform Hall Transformed into a Bazar.

The members of the Ladies' Auxiliary to the Board of Governors of Muhlenberg Hospital opened their fair last evening in Reform Hall. The Hall was very prettily arranged, booths occupying the sides and centre of the room and also the platform. Refreshment tables were placed in the galleries, and young lad es in dainty aprons flitted airily back and forth.

The different booths are presided over by members of the various churches, each church being represented by a table or portion of a table. The Grace Church table was quite elaborate and occupied the platform. On the table was a bamboo stand made by Mr. Herring of this town and who is a resident of this city. The stand is a fine piece of workmanship, and displays Mr. Herring's skill to advantage. The other tables also contain many costly articles in addition to those usually found at such places. The Crescent Avenue Church table is designated by a large crescent made of many colored flowers, and the lady who presides over the fruit stand in the centre of the room is protected from the heated rays of the gas flames by a huge Japanese umbrella.

The ladies who are on the various committees and who have charge of the Fair are as follows: Executive committee—Mrs. Wells, Mrs. Sellentan, Miss Schipper, Mrs. Tracy, Mrs. Whiton, Mrs. Cox, Mrs. Tomlinson; Committee on Tickets—Mrs. Burlingham, Mrs. Crawford; Committee on Flats—Miss Tweedy, Miss Love, Miss Cook, Mrs. Ostrom, Mrs. Faber; Committee on Children's Tables—Mrs. William Taylor, Mrs. Honegger; Committee on Confectionery and Fruit—Miss Schipper, Mrs. Lessignola; Committee on Refreshments—Mrs. R. Sherer, of Grace Church; Board of Directors of the Crescent Avenue, Miss Runyon, of the First Baptist, Mrs. Randolph, of the Seventh Day Baptist, Mrs. Cadmus, of the First Presbyterian, Mrs. Van Alstyne, of the Congregational, Mrs. Anderson, of St. Mary's, Miss Ackley, of the Holy Cross; Committee on Fancy Articles—Mrs. Cox, of Grace Church, Mrs. Edgarton, of the Crescent Avenue, Mrs. S. A. Potter, of the First Baptist, Miss Nettie Potter, of the Seventh Day Baptist, Mrs. Pope, of the First Presbyterian, Miss Harbergor, of the Calvary, Mrs. Le Fevre, of the Congregational; the ladies of the Lookout League; Committee on Printing Slips—Miss Cook, Mrs. Edgarton. There are many other ladies who have been active in forwarding the affair, whose names are not on any committee. The committee of gentlemen from the Board of Governors who work in conjunction with the Ladies' Auxiliary are Capt. W. B. Orrow and Messrs. Charles Tweedy, W. E. Lowe, Charles Schipper, E. W. Erickson, W. R. Cook.

The ladies are particularly fortunate in having but very little expense connected with their enterprise. The use of the building is donated them as is also the gas and the coal. The attendance last evening was quite large, and the receipts were fully up to the average first night of a fair. The fair will be continued this afternoon and evening and also to-morrow afternoon and evening. The Punch and Judy show will take place to-morrow afternoon.

How the Nominees Take It.

The hotels of Plainfield represent an investment of about two hundred thousand dollars. "The News Rambler" has been rambling among them with a view of ascertaining how the movement of prohibiting the granting of liquor licenses will affect them, if successful.

Mr. Woodruff, who by the way, has been a very strong temperance man for the past twelve years and has done an immense deal of good for the cause, says that should there be any agreement against granting licenses, he would be compelled to close his house. His long experience teaches him that if his guests are not able to buy wine or liquor in the house and be saved the trouble of bringing out from New York, and the extra expense of corkage, they will go where liquors will be furnished to them. In other words, said Mr. Woodruff, people will not go to an inland hotel to spend the summer if they cannot buy wines and liquors in the house if they wish it. Mr. Wood ruff has now upwards of eighty guests in his house, two-thirds of whom, should they be unable to buy their dinner wine in the house, would leave. He has lately added new boilers for heating the house by steam and has put in a great number of stoves with a view of making it a permanent summer and winter resort. All this will be a loss to him should he be obliged to close his house. It is impossible, he says, to run a house in a first-class manner, that is, for people who pay first-class prices, without keeping wine and liquor for those who wish it.

Genial Mr. Johnson of the Park House was next visited. He said that he had been a temperance man all his life and addressed temperance meetings, but, although he has not sold wines or liquors her etofore, he finds it impossible to run a house successfully without dispensing the article, and that if the prohibitory law is enforced he shall leave Plainfield. Mr. Johnson is the proprietor of Lolley's Hotel, or being interviewed upon the subject says, that he would not be satisfied to close his house to commercial men, actors, etc., to fill his house and they expect to have wine and liquor furnished them, and if they cannot get it they will go where they can get it. He says that a hotel without liquor is like a railroad of the outside limits of the city upon which the regular mail train does not stop. Everybody knows that the Farmers' Hotel has been in operation for many years and that it has been a success, and he asks what is the reason for the change that Plainfield will be a failure as a hotel. Mr. Thomas Parvin, of Farmers' Hotel, says that as he generally goes to the same class of people as Mr. Johnson he shall have to do the same thing. Undoubtedly the sentiment in favor of the prohibitory liquor law.

Mr. Daly, of Daly's City Hotel, says he will close his house. Others declined to say the receipt of no license.

A Visit to the Muhlenberg Hospital.

Apropos at the Muhlenberg Hospital Fair which opened last night Tom Nurse' "Rambler" visited the hospital which stands at the extreme end of West Third street and is a very pretty building, of wood, built in Elizabethan style with a charming little porch in front overgrown with ivy. The building has two stories with long one story wings on each side.

Miss Josephine Dunmont, the matron, a very pleasant little lady, piloted the "Rambler" on his tour of inspection and answered all his questions in a most courteous and kindly manner. Passing from the pretty little office into which he had been first ushered, he was shown the man's ward in the right wing of the building. This is a long bright room, and contains eight iron cots. There are now four patients in this ward. The women's ward was next visited in the corresponding wing and is much the same as the men's. In this ward there are five cases. The operating room, which is in the north end of the building, is a sunny apartment with windows running up to the ceiling and on the outside there is a hood that may be raised should more light be wanted. The room is fitted up with the usual operating table and has a large medicine closet at one end well filled with medicines, bandages, splints and various other villainous looking objects. Next to the operating room is the dining room similar in size, with pantry connecting, there the convalescing patients dine. The others have their meals sent them on small queer trays, with four legs about a foot long, not unlike toy tables. These trays have ridges around them to keep the dishes from sliding off. The building is heated by an automatic steam heating apparatus which heats every part of the house thoroughly, with only two pounds of pressure. The kitchen is a well lighted room with a large range. The dining room is clean as a whistle, the sight of which would fill the soul of many a housewife with envy. Across the hall is the laundry into which the "Rambler" (it being wash day) merely glanced, for obvious reasons. In the women's ward is a young girl, whose sister has been paying $10 a month for her sister's boarder out of her meage wages of $14.00. This coming to the notice of the Board of Governors, Miss Dunmont was directed to return to the poor working girl the money she had paid for her sister's board. The Rambler suggests that some benevolent individual increase the facilities of the Hospital by presenting the institution with a horse and wagon, to be used as an ambulance. Perhaps some arrangement might be made with one of the Fire Companies to use one of their horses. The Hospital was opened for the reception of twenty persons, October 24, 1878. A Board of Governors have control of the institution—Samuel Huntington, Pres.; W. Rockhill Potts, 1st Vice-Pres.; J. Evarts Tracy, 2d Vice-Pres.; W. R. Cook, Sec.; Chas. Schipper, Treas. and Nathan Harper, Asst. Sec. E. H. Erickson, Chas. Tweedy, John M. Whiton, J. F. Hubbard, Frederick Chamberlain, Rev. A. V. V. Raymond, L. V. F Randolph, Mason W. Tyler, Chas. H. Smith, Wm. E. Lowe, W. B. Ostrom.

Managing Committee—Messrs. Huntington, Cook, Lowe, Ostrom and Rev. Mr. Raymond, to whom or to one of the physicians application for admission (except in cases of accident) should be made.

The physicians are Doctors Burlingham, Field, Edicott, Tomlinson, Bonne, Probasco, Long, and Miss Josephine Dunmont, matron.

Annie Russell's Romance.

(From the N. Y. Truth.)

Miss Annie Russell will not play Hazel Kirke after next week, as her health has been very poor for some time past. The gossips about the Madison Square Theatre, as well as the personal acquaintances of Miss Russell, attribute the young lady's illness to a very romantic affair. It seems that, for some time past, Miss Russell has been the object of tenderly, amorous attentions from young Mr. Prosbury, one of the artistic attaches of the Madison Square. Now Mrs. Russell, Annie's mother, is a woman of very wide common sense, and while she had no personal objection to Mr. Prosbury as a son-in-law, she did not wish her daughter to marry anyone. Miss Annie is a dutiful daughter, and her young heart was rent between the appeals of young love and the demands of maternal duty. As a consequence the young actress pined away and finally had to give up acting.

I give this story as it was given to me, and consider that my authority justifies me in doing so. I would advise Mrs. Russell as a friend, however, to give her consent to the union of the young couple. The consummation of their youthful hopes could certainly not make the situation worse.

Park House Tableaux.

There was a select and social gathering at the Park House last evening to witness a series of very pleasing tableaux, presented under the auspices of Mrs. Karl T. Polak and Mrs. Wm. Hogan, which those ladies and those who participated, have, by request, promised to repeat later on, for the benefit of the Children's Home.

Annexed is the

PROGRAM:

1. Statue,
2. Faith, Hope and Charity,
3. Coming through the Rye,
4. The Sailing Lord, (2)
5. Rock of Ages,
6. The Village Wedding,
7. The Artist Dream,
8. Cornelia and her Jewels,
9. Joan of Arc,
10. The Gypsy Encampment.

Brass Fashion Purpose.

Allow a scrap to run small in girls' hood and cloak sizes, and a quarter of an inch to a yard in full-grown sizes, and in most cases it wears down evenly. Child's hood is shaped in the same way as a woman's, but is smaller. Many mothers, when they put on a pointed cape-piece to a hood, would not take the trouble to cut it down, but would simply turn the point under. Price, 10 cents each. E. S. & Shaw, Fresh stock, also Fort's cream.

Deaths.

HAYNES—Sunday, Nov. 16th, at the residence of her brother-in-law, Charles A. Haynes, Alice R. Haynes, widow of the late Edward B. Haynes, and daughter of George W. Fenton of Frewsburg, N. Y.

Funeral from the residence of Chas. A. Haynes, to-day P.m. Wednesday evening 19th inst at 7 o'clock.

Relatives and friends are invited to attend.

Special Notices.

NOTICE.

A meeting of the Second Ward Republican Association will be held at the engine house, north main and Cherry, to be held at the office of the Plainfield Light Guard, corner of Front and Pemington streets, for the following purposes, viz., to discuss the interests of said Association, to elect officers thereof, to transact business relating to the forthcoming Primaries and City election and such other business as may properly come before the meeting.

All republicans of the Second Ward are cordially invited to attend.

CRAIG A. MARSH, Pres. Asso'n.

THE ATTENTION OF THE TEMPERANCE voters of this city is called to the fact that their attendance is earnestly requested at the approaching primary meetings of their respective parties to be held shortly, dates to be hereafter announced in the various newspapers. It is the duty of every advocate of temperance in this city to attend these primary meetings, and see that men are placed in nomination for the Democratic offices, who next year will vote for no rum in Plainfield.

A LARGE MILK YIELD.

The Holstein cow, "Jessalca," owned by John Mitchell Vallegan, of Jamaica, whose record is being made this year is likely to gather up the sweepstakes. Her last week's milk was 172 pounds, 2 ounces of milk. In five months and nineteen days she has given 2,000 pounds of milk. G. W. Thompson & Son of Station, Middlesex county, this state, are importers of and breeders of this breed of Holsteins. Those interested in high bred stock are invited to visit the Station stock farm.

MABEE AND ENGLISH

The temperance reform men of Plainfield and vicinity are invited to meet at Democratic Association Hall, front street, this (Wednesday) evening, at half past seven, to advise upon an equitable management of their claims at the polls, and of advancing the cause of temperance. A full representation of reform men is desired. 18-2t

THE LADIES ARE MAKING

extensive preparations for the Fair in Reform Hall on Tuesday evening, and Wednesday afternoon and evening, Nov. 25th and 26th, for the benefit of Muhlenberg Hospital. "Punch and Judy" will be on hand to see the children. Wednesday afternoon. Come!

THE P. R. C.

At their meeting Thursday evening unanimously adopted the following:

Resolved, That the Reform Club of Plainfield hereby reaffirms its non-connection as an organization with partisan politics. Meaning that the cause of sobriety may be advanced within this city, deems it appropriate and wise to support as heretofore the nominees of the club, whose sentiments concerning the voting privileges of a citizen at the municipal election, to support only such candidates, irrespective of their political bias, as we know to be in sympathy with the cause of temperance, the welfare of the people of Plainfield.

FRANK W. DUNHAM, Sec.

Business Cards.

E. HAZELL, TEACHER OF MUSIC.

East Sixth street, cor. Franklin, Plainfield. Lessons given at pupil's residence if desired, either private or in small classes. Correct and thorough instruction given on Piano, Organ and Harmony. WEDNESDAY, NOVEMBER 19, 1884.

The Mayoralty Contest.

There is an open secret about the forthcoming Mayoralty about which a deal is pleased to communicate, if one may judge by the significant suggestions and winks of the knowing ones.

This is the size of it. The Democrats have agreed to take up ex-Mayor L. V. F. Randolph, the Republicans to first nominate him, and, according to the present program, he is to be called the Temperance candidate —meaning the candidate who will not favor prohibition, but will favor temperance.

The Reform Club has committed itself unqualifiedly on the side of Prohibition, and Mayor Musson as its leading exponent is the most prominent candidate talked of.

Republicans and Democrats may favor Prohibition and a Mayor and Council to *enforce it*, are understood to favor Mayor Musson, while Republicans and Democrats who favor Temperance, but not Prohibition, are understood to favor ex-Mayor Randolph. It is further understood that ex-Mayor Randolph wants a vindication, while the present Mayor, by whom the ex-Mayor was defeated, is understood to be quite willing to have the last dose of vindication repeated.

The laughable part of the affair is that the *elements which are now combined* in favor of Randolph and against Musson, is the very element which, at the last election opposed Randolph and favored Musson.

Upon the nomination of Randolph, the Junior Democratic organ is to have a glowing tribute to his past record, which is generally admitted to have been good, and the Senior Democratic organ is to copy the article and say that, in view of the coming return for which it is understood the candidate is elected, *it is to do the loveliest* to secure the substitution of Billy as postmaster in place of the present incumbent. If the latter's removal can be secured, or dropped up charges or otherwise.

The part of the Republican party which is out of this alleged deal, is the nomination of Councilman J. B. Dumont, while the corresponding element on the Democratic side favors Mr. A. C. Baldwin. These gentlemen have not been consulted, and is very doubtful if Mr. Baldwin would accept, although, every one admits that he would make a splendid mayor. The same may be said of Mr. Dumont.

There are a number of other candidates talked of, and these are just as likely to get the nomination as any of the others mentioned, provided the deal is not carried out as it may not be if an opposition with sufficient strength can be developed. Among the other names prominently mentioned are Mr. Cornell, President of Council, Councilman Frank Marsh, Corporation Counsel Marsh, and Mr. George F. Hoadley, representing all shades on the part of the Republicans, and Col. Julian Scott, Judge Harper and Judge Wadsworth—on the part of the Democrats. Judge Harper made a good Mayor and was popular, although he was considered a rather rabid partisan. He is also a strong prohibition-temperance man, as indeed may be said of the other two gentlemen mentioned.

The partisan organs would not of course dare so go into the merits of the contest as to free it from a strict standpoint, but we are not bound to any clique, and give all the news without fear or favor for the public good.

MR. BLAINE TALKS

TO HIS FRIENDS AND REPUBLICANISM ADJUSTED.

Mr. Blaine on the Significance of the Election—Our Commercial Relations—Able Letter to the Southern Problem and Makes Some Comparisons.

AUGUSTA, Me., Nov. 19.—A large number of the elected personal and political friends of Mr. Blaine serenaded him this evening at his residence on the Kennebec and were addressed by him. They marched through the streets, under the marshalship of Col. Frank Nye. When they reached Mr. Blaine's house their friendly reception was announced in a handsome speech by Herbert M. Heath, of the Kennebec bar. Mr. Blaine responded as follows, his speech being continually interrupted by applause:

"Friends and neighbors: The national contest is over, and by the narrowest of margins we have won. I thank you for your call, which, if not one of joyous congratulation is one, I am sure, of confidence and of sanguine hope for the future.

"I thank you for the public opportunity *you give me to express my sense of obligation* not only to you but to all the Republicans of Maine, who responded to my nomination with genuine enthusiasm and ratified it by a superb vote. I count it as one of the honors and congratulations of my public career, that my party in Maine after struggling hard for the last six years and twice in that period losing the state, has come back in this campaign by an old fashioned 30,000 majority. No other expression of popular confidence and esteem could equal that of the people among whom I have lived for 30 years and to whom I am attached by all the ties which unfold human nature and give joy and dignity life.

"After Maine, indeed along with Maine, *my first thought* is always of Pennsylvania. How can I fittingly express my thanks for that unparalleled majority of more than 80,000 votes, a popular indorsement which has deeply touched my heart and which has, if possible, increased my affection for that grand old commonwealth: an affection which I inherited from my ancestors and which I shall transmit to my children. Nor do not limit my thanks to the state of my birth.

"I owe much to the true and zealous friends in New England who marched so nobly in the Republican party and its candidates, and to the eminent scholars and divines who, stepping out from their ordinary vocations, made a new campaign and won *to loyalty* to principle added the special compliment of standing as my personal champions in my own district.

"But the achievements for the Republican *cause in the east are even surpassed by the* splendid victories in the west. In that magnificent section of the U. S. that stretches from the foothills of the Alleghanies to the golden gate of the Pacific, beginning with Ohio and ending with California, the Republican banner was borne to victory by the hand of the state failed to join in the wide acclaim of triumph. Nor should I do justice to my own feelings if I failed to thank the Republicans of the empire state who so cheerfully so many discouragements and obstacles, who fought against foes from within and without, and who finally won a victory so glorious that a change of one vote in every thousand would have given us the victory in the nation.

"*Indeed, a change of little more than 5,000* votes would have transferred New York, Indiana, New Jersey and Connecticut to the Republican standard, and have made the north and east solid as the south. My change would still be incomplete if I should fail to recognize, with special gratitude, that great body of workingmen both native and foreign born who gave me their almost unanimous support, breaking from old personal and party ties and finding in the principles which I represented the best safeguard for the wages and protection of their own fireside interest.

"*The result of the election, my friends,* will be regarded, I think, as extraordinary. The northern states, leaving out the cities of New York and Brooklyn for the count, sustained the Republican cause by a majority of more than 400,000, almost half a million indeed, of the popular vote. The cities of New York and Brooklyn threw their great strength and influences with the solid south, and were the decisive elements which gave to that section the control of the national government. Speaking now not as a candidate but *simply as a loyal and devoted American*, I think the transfer of the political power of the government to the south is a great national misfortune. It is a misfortune because it cannot insure harmony and prosperity to the people; because it introduces into a Republic the rule of a minority. The first instinct of an American is equality of right, equality of privilege, equality of political power—that equality which says to every citizen, Your vote is just as good and just as potential as the vote of any other citizen. That cannot be said to-day in the United States. Over wide areas in the south has crushed out the political power of more than 6,000,000 American citizens and has transferred it by violence to others.

"Forty-six electoral votes to-day are assigned to the south on account of the colored population, and yet the colored population with a total of more than 1,000,000 votes have been unable to choose a single elector. Those *citizens are scarcely trodden under foot.*

"The eleven states that composed the rebelling Confederacy had by the census of 1880 1,540,000 more white population and 5,300,000 colored population.

"The colored population, *almost to a man*, desire to act with the Republican party, but by a system of great intimidation and fraud, violence and murder, whenever violence and murder are thought necessary, they are absolutely prevented from exercising power. If the outrages stopped there it would be bad enough, but it does not stop there, for not only do the negro population disfranchised, but the white population who vote Republican practically belongs to them in addition to that of the white population, enabling the white population of the south to control the government of the nation. So far beyond that exerted by the same number of white people in the north. To illustrate, take the state of Massachusetts, with her 1,900,000 white people and her 13 electoral votes. In the south, the states of Louisiana, Mississippi, Arkansas, Georgia and South Carolina have in the aggregate 1,900,000 white people and 2,900,000 colored people. In the north the states of Wisconsin, Minnesota, Iowa, Kansas and California have 1,900,000 white people and 25 electoral votes, and they have also 1,900,000 people of all sorts, or just the same as the five southern states which I have named. Massachusetts and the five southern states have practically an equal population, but in the former, without that the white men in these southern states by purging and obtaining the right of colored men to vote, destroying the political power of the white men in the northern states.

"Let people, my friends, look at the question of labor by sectional lines, subject

MARRIED TO AN ASTOR

A QUIET WEDDING AT THE RESIDENCE OF THE BRIDE'S MOTHER.

Miss Dahlgren Becomes the Wife of Col. William Astor—Interesting Details of the Bride's Romance—A Love Match.

Out of a Passing Bank.

NEW YORK, Nov. 19.—Miss Carrie Astor was married by Mr. Orme Wilson in the Church of the Holy Communion on Fifth avenue yesterday afternoon. The bride is the youngest of the four daughters who have been born to Mr. and Mrs. William Astor. Her sisters are Mrs. Daughters—Mrs. Gen. J. Van Allen—died in her early youth. The other two sisters of the bride are Mrs. J. R. Roosevelt and Mrs. J. Coleman Drayton. An old gentleman of the young lady who was yesterday married began in the humble room of her father's house. It is one of three pictures of excessively pretty American girls. The face is young and animated by a pair of large blue eyes and surmounted with a profusion of curly locks. The resemblance of the sisters one to another is striking. In the picture the fourteenth guest is one who happily have married daughters of the sisters of Astor have invariably won beautiful brides. Mr. Marshall Orme Wilson has been the favored suitor.

Socially speaking and independent of its special brilliancy, which alone would assure it a much more than passing newspaper mention, the wedding was of great importance.

The metropolitan society world has for some years recognized the families of *John Jacob Astor and his brother William* Astor as its leaders and heads. No entertainment in the more fashionable society circles of the city has been given or accepted absolutely perfect or correct at which one or both of the Mesdames Astor are not present or to which they have not been invited. Their position as the pinnacle of fashionable society man or woman is to have his or her name placed upon the Astor visiting list, and the more obliging it gives an entree to all other houses in the city. It decides and establishes the position of the person thus favored unquestionably. For the last ten years Mrs. William Astor has not been as prominent in society as Mrs. John Jacob Astor, and her solo entertainments have been *termed semi-weekly dinners* given during the season of 1883-84. Mrs. William Astor has in consequence become the most prominent and best known member of the family in the society world, and her presence at any entertainment given by a character not otherwise objectionable. A daughter of a family who enjoys the recognition of Mrs. Astor in their day, of New York society, Mrs. William Astor has been a society woman from her girlhood days, and no one is better fitted by education, experience and natural aptitude to speak *ex cathedra* upon all matters that interest or affect the society world. She is the youngest daughter of the late Abbaham Hasbrouck Dahlgren.

Mrs. Schermerhorn was a *Van Courtland* and she and her husband were graceful representatives even in those early days of New York society. Their eldest of the daughters are all handsome and of superior intelligence. Eleanor became the wife of Gen. Stewart Jones. Ann married Mr. Chas. Baydam, and the beautiful Helen, who united in marriage to Mr. John Trust Irving, whose life of his uncle, Washington Irving, has received such high praise from and their own homes, Mrs. Schermerhorn broke up her establishment in Bond street and removed to Mrs. Charles Suydam in Madison avenue, where she died a few years ago.

The history of the Astor family dates back to the early colonies. The original John Jacob Astor came to this country in 1783, and landed at *Baltimore*. After remaining there a short time he removed to New York and began his career in this city in the fur business. He acquired some means and identified himself with the fur raising districts of Canada, securing a monopoly of the business, quickly amassed wealth, which he largely increased by judicious investments in Broadway and uptown real estate. His son inherited as a small cottage on the site of what is now the Astor house, which latter he built, and, in a spirit of generosity, deeded to his son—the consideration named being $1.

The bride's dress was the crowning creation of Worth's. The material of the train was of heavy white satin, wrought with threads of silver in long sprays, the train and the effect is that of chased or engraved silver. The front of the dress is covered with point lace, the skirt being of corresponding point lace. At the shoulder the dress is here puffed with plain white satin instead of lace, and the effect is very becoming. The bottom of the corsage, which was cut rather low in front, was slightly draped at the back and finished in points. The train, which was fully three yards long, is in double box plaits from the belt and pendant from the drapery of two glittering, graceful folds of silver gauze. The veil, purchased in Europe especially for the occasion, is one of the finest pieces of Brussels point lace ever wrought by the needle. It was fastened in the hair by a long shading diamond spray and clusters of orange blossoms, and completely covered the entire length of the train. The bridal bouquet was a loose bunch of white orchids tied with white satin ribbons.

It is estimated that the presents, including a fully furnished house on Fifth avenue, from the bride's father, were worth $250,000.

A Republic Sent Packing.

CAIRO, Nov. 19.—Advices from Dongola state that the rebels returned in great force to Ambukol, some 20 days ago. They placed 50 men in a house and began firing from the windows on the road back of the station. Gen. Gordon sent five steamers to shell the rebels from the river. The shelling commenced vigorously with Krupp guns and soon after the rebels were dislodged. Thereupon Gen. Gordon sent a force to Ambukol and occupied the town without opposition. The rebels fled in confusion, leaving behind them their camp equipage, provisions and ammunition. Gen. Gordon has now established a strong garrison at Ambukol.

A Republic Sent Packing.

CAIRO, Nov. 19.—Advices from Dongola state that the rebels returned in great force to Ambukol, some 20 days ago. They placed 50 men in a house and began firing from the windows on the road back of the station. Gen. Gordon sent five steamers to shell the rebels from the river. The shelling commenced vigorously with Krupp guns and soon after the rebels were dislodged. Thereupon Gen. Gordon sent a force to Ambukol and occupied the town without opposition. The rebels fled in confusion, leaving behind them their camp equipage, provisions and ammunition. Gen. Gordon has now established a strong garrison at Ambukol.

Socialists Attack on Gen. Fogg.

WASHINGTON, Nov. 19.—The trustee at task by Gen. Grosvenor, counsel for Gen. Swaim, on Gen. Fogg, who presided at the late contest of legality of the election of Swaim to require a court martial. Gen. Grosvenor said that Swaim's efforts in behalf of Gen. Swaim, and that Swaim into about all the trouble he ever had. He appealed to Gen. Fogg, being anxious to *carry favor with the* power that he thought it might benefit to favor Gen. Swaim. Gen. Fogg who had served him faithfully. Gen. Swaim made the charge that Fogg had cross-questioned witnesses before the court of inquiry so as to produce an unfavorable impression. Gen. Grosvenor was engaged in hearing the testimony of M. M. Parker, of Bateman's bank, which was given in support of the testimony before the court of inquiry.

A Negro Financial Agency.

MONTREAL, Nov. 19.—Mr. Hendon, one of the proprietors of the Crystal Palace opera house, has absconded, leaving behind him a host of debts and creditors. In addition to his theatrical venture, Mr. Hendon was doing a rushing business as head of a financial agency, which now turns out to be a fraud. Last night by which many leading citizens were induced to invest their money. Of course the shrewd Hendon left early enough to avoid arrest. Two warrants were issued last night, but the bird has flown. Hendon's agency was a negro concern, and the principal victims are colored people. It is believed that Hendon has gone to New York, where it is believed he was arrested for a similar charge.

THE SEVENTH-REGIMENT FIGHT.

A SECRET MARRIAGE.

Arrested by Order of Col. Sullivan.

THE SEQUEL TO WHICH IS POISON AND A DIVORCE SUIT.

NEW YORK, Nov. 19.—The gloves between Colonel Sullivan and Private Greenfield of the Seventh regiment, which were taken off last night before an audience of 2,000 persons at the Madison Square Garden, were put on again this afternoon, when the principals appeared in police court to answer to charges of assault and battery preferred against each other. Sullivan weighed 194 pounds, while his opponent tipped the scales at 156. In the first round Sullivan showed considerable sparring and some clever work, but nothing decided of what time was called. At the conclusion of the round Greenfield was said to have had the best of the exchanges.

In the second round Sullivan led off at the chest, but Greenfield jumped back and no contact was made. Greenfield returning the compliment and Sullivan's fancy footwork. Greenfield then let go his right hand full on Sullivan's jaw. The latter tried to counter but missed his man, two, three which landed on the face with the left and one on the right jaw and the chest with the left again. This forced Greenfield back, but while he was retreating he managed to reach Sullivan's nose and his cross counter got to the mark. Sullivan again got his calculations right, and with a right hander hit Greenfield on the left jaw and the blood spurted. After some heavy exchanges on both sides the men again clinched, and while locked together Capt. Williams separated the pugilists and placed them under arrest. They were taken to the *Twenty-ninth* Precinct station where they were bailed in $500 each.

THE RAILWAY MAIL SERVICE.

Important Strides Made in the Last Half Decade.

WASHINGTON, Nov. 19.—W. R. Thompson, the general superintendent of the railway mail service, in his annual report, shows that on June 30, 1884, there were 117,186 miles of railroad upon which mails were carried, as compared with 78 miles in 1838. During the last fiscal year the increase was 4,500 miles. The number of railway mail post office lines in operation June 30, 1884, was 228. The increase in the number of places where mail was handled during the fiscal year was 538, 144,321 pieces. The percentage of increase in 1884 over 1883 was 13.52. The number of casualties during the year was 1,096. Of this 7 postal clerks were killed, 99 seriously injured and 69 slightly injured. When clerks are injured while on duty it has been the practice of the department to grant them leave of absence with pay, for a period not exceeding one year, and to fill their places with temporary clerks. During the past year this action cost the department $5,250. Recommendation is made that the postmaster general be authorized to pay to the widows or minor children of all clerks killed in the service a sum equal to one year's salary of the deceased. The average clerk belonged at the time of his death. An appropriation of $4,401,000 is asked for to pay the latter during the next fiscal year.

New Hampshire's Constitutional Convention.

CONCORD, Nov. 19.—The entire vote of 263 towns and wards on the question of a constitutional convention was 24,999, of which 11,874 were in favor and 13,125 against; majority against, 1,251. Twenty-four principal objects to be accomplished in revising the constitution would have been to change the time of holding the legislature from June to January, and of fix the salary of its members who are now paid at the rate of $3 a day.

A Memorial Photograph.

BALTIMORE, Nov. 19.—A photograph of the whole class of graduates at St. Mary's seminary, including the 12 archbishops, 80 bishops, 30 secretaries, etc. The photograph is the largest ever made—and 48 by 20 inches. Archbishop Kenrick, of St. Louis, the oldest Catholic prelate in the United States, is among the group. *This is* the first time he has sat for his picture in his life, he having always refused before to do so. The original is intended to be sent to Pope Leo XIII., and reproductions in various sizes will be put on sale.

A Millionaire Incendiary.

OTTAWA, Nov. 19.—Al Arnprior James *Hartney*, an old and respected merchant was pulled to be worth a quarter of a million, was arrested on a charge of having set fire to his large shop and stock last month, in order to defraud the insurance companies. On the night of the fire his most valuable effects were found in the hall of his house, ready for removal. His sworn claim for $27,000 compensation for his stolen articles proved to have been saved. His arrest was brought about by representatives of the insurance companies.

Reducing Coal Miners' Wages.

BALTIMORE, Nov. 19.—Agents and officers of the various coal companies of this city whose mines are located in the Cumberland region have decided that the reduction of wages would not precipitate a strike. The miners, it is alleged, have anticipated the reduction for some time past and when the move was made they will be prepared to accept it. They understand it is accepted that the reduction would inevitably follow the similar action of the companies in the Clearfield region.

Hog Cholera in New York.

NEW YORK, Nov. 19.—Government inspectors seized in Washington market 21 carcasses of hogs that were found to have suffered from the hog cholera. The carcasses were part of a consignment from Jersey City. The consignee suspected that something was wrong and informed the inspectors, who promptly recognized the characteristics of the disease. The lungs were found to be full of the offal dock. A thorough inspection was made of the market, without, however, discovery of further cases of complaint.

A Strike Quickly Ended.

NEW HAVEN, Ct., Nov. 19.—The strike which began Monday morning at the Hartford lock works, Deadfield, with a force of fifteen of which 300 men left their work, ended at o'clock yesterday afternoon by the company granting the order reducing both wages and hours of labor. The company has on its books orders sufficient to run all summer several months and could not afford a strike of long duration.

Private Bankers Suspend.

NEW YORK, Nov. 19.—Hyatt & Livingston, bankers at 5 Nassau street, at the end of this city, have closed their doors, having in fact place the greatest confidence, as the firm has been doing a large banking business and retained the confidence of the public essentially for many years. Lately they have been carrying too much paper. The liabilities are heavy.

Arrested for Embezzlement.

NEWBURYPORT, Mass., Nov. 19.—John Sawtelle, treasurer of the Newburyport Gas and Light Co., has been arrested on the charge of embezzling funds in large belonging to the company. He is a Republican, and has always been a good republican. His bonds for $30,000 are held by Republicans. He denies the charge.

A SECRET MARRIAGE.

THE SEQUEL TO WHICH IS POISON AND A DIVORCE SUIT.

Very Sensational Reading for a Newspaper Courtship—A Young Wife's Narrow Escape from a Violent Death.

Happiness Once More.

GOSHEN, N. Y., Nov. 19.—In the fall of 1876 a young lady belonging to one of the best families of this county was married to a gentleman high in government circles, and with a national reputation, while visiting a temporary home in New York city and fell in love with a young man then connected with a mercantile house of that city. He was but 18 years old, but very handsome and slightly acquainted. They proceeded to marry the young man, but kept her attachment and engagement secret from her family, as she knew they would not countenance the choice she had made. Her affianced was poor, and had nothing to recommend him to the girl but his handsome person. He finally induced her to consent to a secret marriage, assuring her that he would put forth every effort to provide a home for her as soon as possible, when they would make their marriage known and enjoy their happiness.

The secret was kept for two years, the young wife living at home and meeting her husband at her sister's and other places, apparently as they were compelled to do. In 1878, however, it became necessary for the marriage to be made known, as the young wife was about to become a mother. The husband had not as yet succeeded in providing a home for his wife. In the summer of 1877 he visited his wife at her mother's and carried a small trunk containing a few clothes. He had at last established himself successfully, and had rooms ready to receive her in New York. A few days later the couple started for the city, the husband telling his wife he had told that he had some business to transact in the city, and that they would stop over night there. They went to quarters at a hotel, where he ordered up a glass of ale sent to their room. He met the waiter at the door with it. Thinking of his wife's weakness, he remembered that he stood with his back to her some time after taking the ale and dismissing the waiter, and that when he approached her with the glass his manner was unusual and that his face was pale. She asked him if he was ill, but he laughed at the suggestion and offered her the glass of ale. She took it, and after holding it in her hand for a moment placed it on the table, saying that she already had a headache, and she feared that it might make her worse if she drank it. She had no suspicion of anything wrong, but simply seemed to take a dislike to the idea of drinking the ale, and her husband thought no more of it. He finally took both glasses and poured their contents out. He then went out and did not return until late. He was intoxicated.

The husband remained with his wife the first few days in viewing her husband's clothing from a chair and dropped from his pocket upon the floor. She picked it up. It was empty, but the sight of it recalled her husband's singular conduct of the evening before, and the horrible thought that he had attempted to poison her flashed to poison her. She awoke him at once and begged him to relieve the agony of her mind by denying that there was any ground for her fears. He feared to deny it, but at last acknowledged that he had brought her to the hotel to poison her and himself at her request, as he could not live for the first time that he was in no brutality had no home for her, and no prospect of one. He said he was tired of life, but he could insure her happiness in death if she was happy with some one else. For that reason he had resolved to kill her as well as himself. He had purchased poison to that effect, and it was in his coat pocket, addressed to her sister. Horrified, his wife found the letter, tore it open and read the facts as her husband had stated them. She then left him, left him herself and was out, leaving his wife half conscious on the bed. Recovering herself after a little, she resolved to fly. She drew a hasty bundle and hurried to the depot. She took the first train for New York. She reached her sister's home in the city, more dead than alive. Her child was born that night and lived but a few hours. She found that her husband, although of good family, was shiftless and worthless and had been cast off by his parents. She returned with her from the Paterson hotel the letter her husband had written to his brother, declaring that he intended to kill her, and this was found effective testimony in the divorce proceedings. She subsequently instituted suit for divorce, was granted her in 1880, and as all the testimony was taken by a referee the matter never came before the public. A few days ago the heroine of the unfortunate secret marriage was married again, this time to a gentleman of wealth and position and well known politically throughout the State. He became acquainted with her and sought her hand through hearing her narrative and was favored by her. She was married at the home of her husband's brother, to which place she had returned to tell her, and this was considered a favorable omen. The divorce proceedings she subsequently instituted for divorce, was granted her in 1880, and as all the testimony was taken by a referee the matter never came before the public. The National War.

NEW YORK, Nov. 19.—There is no change in the attitude of the railroad companies, and the war of rates is still as bitter as ever. It is understood that the Lackawana road would undoubtedly make a rate of $2 to Chicago as soon as the West shore road was an arrow, as the latter road is in close alliance with the Vanderbilts. In circumstances would the Central put the rate at present rate of $12.50 as the brokers' offices the figures from reports of the roads which they receive daily. The Erie people still holding out for $15 and the New York Central road demanding $20. Not a move on counters.

Cholera On a Boston Vessel.

BOSTON, Nov. 19.—The Boston ship Anabaal, owned by the William P. Webb estate, is lying at Long Island with cholera on board. It is reported that Capt. Freeman and his first officer have died from cholera, and that a new commander will be sent from here to take charge of her destination.

Scarcity of Water Stops Business.

GRAND FALLS, N. B., Nov. 19.—The mills in Grand Falls have begun running on two-thirds time, on account of scarcity of water. The help was also cut down in wages 15 to 20 per cent. The lack of water affects all kinds of business.

CONDENSED NEWS.

The Pittsburg papers report over $1,000 unreported in the city.

A friend of John W. Mackay, the bonanza king, says he has already spent $6,000,000 on the new Atlantic cable.

It is said in Washington that Speaker Carlisle's ambition is to retain his office, and that he is confident of re-election.

It is believed that a collision between the Democratic factions in Virginia at Richmond is inevitable, and must come sooner or later.

The annual dinner of the Chamber of Commerce of New York was held at Delmonico's last night. Many distinguished men were present.

Richard Rochester, at one time district attorney of Philadelphia and well known in politics in that city, died in the insane asylum yesterday, aged 74 years.

A WILL CONSPIRACY.

How an Attempt was Made to Divert $200,000.

PHILADELPHIA, Nov. 18.—Joel M. Van Arsdalen, an ex-member of the bar, died in the Eastern penitentiary from a stroke of paralysis. He was sentenced to 10 years' imprisonment, with his law partner, William R. Dickerson, in 1880, for complicity in the Whittaker will conspiracy. The history of the case is as follows: Robert Whittaker, a woolen manufacturer, was struck by a locomotive in August, 1876, and instantly killed. He left an estate appraised at over $800,000. A will dated in 1871 provided that the estate should be divided between his nephews and himself. The will was discussed by Barrister C. Heath, who had left in the possession of Dickerson. After the death of Mr. Whittaker Pulte, J. Wheelings, Jonathan M. Schofield and Dickerson went to New York, where they met J. B. Reed, of Chicago, and drew up a second will dated subsequent to the genuine instrument. By the provisions $15,000 was bequeathed to each nephew and niece, $5,000 to the Oxford church, $50,000 to erect the "Whittaker Memorial church," and the balance was to be held in trust by the executors for the purpose of founding the "Whittaker Practical Institute for Rearing and Educating Orphan girls." The powers of the executors were restricted "by the advice and consent," of Dickerson, and in the event of the death of an executor another was to be appointed "with the consent of my old and beloved counselor, William B. Dickerson," who was appointed advisory counsel, and was to receive $10,000 in lieu of fees. Pulte, Wheeling, and Schofield turned state's evidence and exposed the forgery. Reed escaped and the two lawyers were convicted. Dickerson is over 80 years old and will have to serve six years to complete his sentence.

THE CONGO CONFERENCE.

England Relies Upon America to Give Her Support.

LONDON, Nov. 18.—There was no session of the Congo conference at Berlin to-day. The members have been generally entertained ever since the opening session on Saturday at Prince Bismarck's palace and at the various embassies, and their time has been fully occupied with social and semi-official engagements. To-day they settled down pretty steadily to business, but they found such an enormous mass of details to be examined that it was deemed impracticable to hold a formal session. It is believed that this will frequently be the case, and that the conference will be greatly prolonged thereby. It appears probable now that the protocol adopted will resemble the one held in London on the Egyptian question, where England's hand was against every one, and every one's hand against her. Sir Edward Malet, the English delegate, has arranged an entente cordiale with Italy and hopes to secure the co-operation of the United States, but with these exceptions, England is, and is likely to be, isolated.

Vermont's Legislature.

MONTPELIER, Nov. 19.—The final adjournment of the legislature will probably occur Nov. 26. In the remaining seven days of the session the important measures to be considered are the bill giving municipal suffrage to women, the bill considering property rights of married women, the bill providing for a state agricultural experiment station, the bill exempting mortgaged property from taxation and the bill creating a railroad commission. Great interest is manifested in the latter. In the house the bill to compensate the trustees of the Soldiers' home was passed, and the bill to raise the salary of the governor from $1,000 to $1,500 was then read for the third time.

The Standard Oil Company's Last Monopoly.

PITTSBURG, Nov. 18.—Some time ago the Fuel Gas company was formed by the consolidation of gas interests, owned respectively by Dr. Hostetter and Emerson and Pew, of this city. To-day it became known that Dr. Hostetter, representing the Standard Oil company, purchased of Emerson and Pew their entire interest in the Fuel Gas company. The amount paid is not known, but it is said to be somewhere around $1,000,000. This transaction gives the Standard Oil company a controlling interest in the Natural Gas interests.

$100,000 for Charity.

BOSTON, Nov. 19.—By the will of Anne Gray the following bequests were made: American Seaman's Fund society, of New York, $5,000; American and Foreign Christian unions, of New York, $5,000; American Sunday School union, of Philadelphia, $3,000; Massachusetts General hospital, for beds, $5,000; Perkins Institute and Massachusetts Asylum for the Blind, $7,000; Massachusetts Charitable Eye and Ear infirmary, $1,000.

Thirty-Three Loaded Cars Wrecked.

EASTON, Pa., Nov. 19.—Thirty-three loaded coal cars were wrecked on the Lehigh and Susquehanna railroad, at Parryville, at 4:30 A. M. by a broken axle. Where the accident happened there is a single track, and all trains on that road either way must be stopped was clear. The passenger train which was behind the wreck and detained over five hours. The wreck is the largest on this road in a year.

Eight Stores Destroyed by Fire.

MEFFLINTOWN, Pa., Nov. 19.—Fire broke out in Patterson, Juniata county. Eight stores, occupied by families, were destroyed. The largest buildings occupied the post office and the stores of G. W. Wilson, W. W. Copeland, Joseph Fennell, F. B. M. Todd, Daniel Stamper, and W. J. Hamilton. The loss will aggregate $60,000; insurance, $40,000.

Barthodi's Liberty to Arrive in May.

LONDON, Nov. 19.—Admiral Peyran, the French minister of marine, has put the steam transport Isere at the disposal of the French American Union for the purpose of conveying to America Bartholdi's colossal statute "Liberty Enlightening the World." The statue will leave Havre for New York early in May, 1886.

The Skye Crofters Submissive.

LONDON, Nov. 19.—The police and marines who reached the Isle of Skye passed through the districts of Dig, Staffin and Portree, which were the centers of the most serious disturbances. The Crofters remained indoors, but displayed signs in token of their loyalty. No arrests have yet been made.

Commodore of the New York Navy Yard.

NEW YORK, Nov. 19.—Lewis A. Kimberly has been appointed commodore of the New York navy yard, succeeding the late Commander Fillebrown. He has been on duty at Washington for several years, and is highly spoken of by naval officers.

The Illinois Legislature.

CHICAGO, Nov. 19.—From reports just received it is positively stated that the Illinois legislature will be Democratic on joint ballot.

A New Cabinet in Peru.

PARIS, Nov. 19.—From midnight Monday until 6 o'clock there were 20 new cases of cholera in this city.

Consumption can be Cured!

This fact has been demonstrated in more than

TEN THOUSAND CASES by

DR. S. D. HOWE,

The Great Consumption Doctor of New York, PROPRIETOR OF THE

Arabian Medicines,

Celebrated throughout the World for their remarkable Cures.

Dr. Howe's Arabian Milk Cure.
Dr. Howe's Arabian Tonic.
Dr. Howe's Arabian Liver Pills.

The Only Medicines that have ever been known to positively cure Consumption.

TESTIMONY

Of the Hon. Jno. E. Gary, Judge of the Superior Court, Chicago, Ill.

CHICAGO, Dec. 24th, 1878.

DR. S. D. HOWE:

DEAR SIR:—Permit me to add my grateful testimony to the many of others, of the virtues of your justly celebrated Arabian remedies. For a long time my wife was severely afflicted with hacking cough, oppressed breathing, soreness of the chest, and constant acute pains in the lower portion of the right lung and under the shoulder blade. Her sufferings were intense, and she became extremely nervous and prostrated. Her disease was pronounced consumption by the physicians of Chicago and other cities, whose prescriptions had been taken without benefit. When you visited Chicago in June, 1878, we called on you, having very little hope of deriving help from your treatment. We were much impressed with your skill in the manner in which your thorough examination was conducted, and the confidence of expression with which you closed your diagnosis. My wife determined to take your treatment in accordance with your plain and practical directions. She began to use the Arabian Milk Cure and Arabian Tonic. Their beneficial effect at once became manifest; the cough subsided and soon ceased altogether, the soreness left the chest, the chest was relieved and all pain removed, she began to gain in flesh and became in every appearance, I am fully believe that your medicines and skilled advice have saved the life of my wife. She united with me in this grateful tribute to the merits of your remedies.

Very respectfully yours,
JOSEPH E. GARY.

The above letter is only one among thousands received from all parts of the United States.

Price of Milk Cure & Tonic, each $1 per Bottle, PILLS, 25 Cents per Box.

Sold by C. A. BUTLER, Druggist.

A NEW PAVEMENT.
The undersigned has secured the exclusive agency for the sale of the
Diebold Patent Iron Stone,
which for elegance and durability, is unsurpassed, and in price will compare favorably with any other pavement now in use. It is the most beautiful pavement known for walks and yards, gutter stone, floor tiling and street blocks. Also used to build fire and Burglar proof vaults and for building purposes generally. These pavement blocks have many striking peculiarities. They show no perceptible wear; are non-conductors; resist ice and snow, as well as all kinds of corrosive acids. Where dampness exists on the ordinary brick, the material remains perfectly free from it. These blocks are cast in the molten lava from the mouth of Kilauea, Sandwich Islands, on exhibition at Warner's Fancy Store, opposite Bellamy Music Hall. For further particulars call on or address
W. H. WARNER,

The Sun.
THE SUN is, and will continue to be, a newspaper which tells the truth without fear of consequences, which goes at the facts, no matter how much the process may, which presents the news of all the world without waste of words and in the most readable shape, which is working with all its heart for the cause of honest government, and which therefore believes that the Republican party must go, and must go in this year of our Lord, 1884.

About sixty million copies of THE SUN have gone out of our establishment during the passed twelve months.

If you care to pause and to and all the columns of THE SUN printed and sold last year you would get a continuous strip of interesting information, comic and serious, sound doctrine, and some grit long enough to reach from Printing House square to the top of Mount Copernicus in the moon, then back to Printing House square, and three quarters of the way back to the upper edge of Brooklyn.

But THE SUN is written for the inhabitants of the earth; this same strip of intelligence would girdle the globe twenty-seven or twenty-eight times.

If every buyer of THE SUN during the present year has placed only one other reader, and if his wife or his grandfather has spent another hour, this newspaper in 1885 has afforded the human race thirteen thousand years of steady reading night and day.

It is only by little calculations like these that you can form any idea of the circulation of the most popular of American newspapers, or of its influence on the opinions and actions of American men and women.

If you know THE SUN you like it already, and you will read it with accustomed diligence and profit during what is sure to be the most interesting year in its history. If you do not yet know THE SUN, it is high time to get into the sunshine.

THE BATTLE FIELD

As an Old Soldier Describes It in His Diary.

Quite Different from the Sentimental Gush of the Orator—Looking Over the Field—Burying the Dead.

[Pittsburg Dispatch.]

The Fourth of July orator loves to talk about the field of carnage. He says the ground is red with blood, and the dead bodies lie so thickly that one cannot walk without treading upon them. This is the veriest bosh imaginable. How many men would it have taken to thickly strew the battle-field of Chaplin Hills, or how much blood to paint it red? The ground fought over was about nine miles in length, and from one to four miles in width. The dead and mangled the cavalry operations. There were not men enough in both armies to "strow it thickly" if every one of them had been killed and strewn around. The diary from which the sketch of the battle was taken contains the notes of a tour of a portion of the field the next day, which are more reliable than the sentimental gush of the orator, or the lurid sketches of the war correspondent:

FIELD HOSPITAL, CHAPLIN HILLS, KY., Oct. 9.—Fighting is bad business. Hell's cruel, it is damnable; but there is only room enough in this country for one flag, and that flag is the "stars and stripes." Men may come and men may go, but the old flag shall stay forever.

Bragg skipped out last night in the direction of Harrodsburg. Our batteries sent one feeler, but got no response, and it was not long after daylight until it was learned they had all gone, bag and baggage, leaving their dead for us to bury. There was no pursuit made last night, but, instead of looking after their killed, they went to killing our pickets, whereupon the truce was declared off, and their dead sent back. All day long ambulances kept coming in with wounded that had been picked up in old places or overlooked last night.

The rebels were kind to our wounded, always giving them attention, but not until after their own had been cared for. As they had possession of that portion of the field where our regiment did most of its fighting, a number of our wounded fell into their hands.

In company with two other slightly-wounded men, I went over that portion of the field where our division fought. The place looked natural enough, and, save for the number of twigs and small limbs covering the ground and the scars on the trees there was nothing to show that anything unusual had been going on. I looked in vain for the heaps of dead and the pools of blood, so much talked about by stump speakers and poets. Up on the knoll where we received the first volley we found three or four bodies. Then, following in the direction of the regiment as it changed front, we found several more. Down in the hollow, where we hammered the Twenty-second Mississippi hard, there were quite a good many dead rebs.

I stood up on a log, where I could see all around for a considerable distance, and I could only count about a dozen bodies. As near as we could estimate, our regiment fought over fifty acres of ground. Our loss in killed on the field was about thirty. Supposing the rebels lost the same, that would make sixty, or a little more than one man to the acre. That is not very thick strewing. Sometimes there are two or three in a place, but generally they are lying around, every one to himself.

There were details from each regiment sent out to gather up their dead and bury them. The one killed in my company was buried under an oak tree on the hillside near where they fell. Stout stakes were driven at the ground at the head of each grave, on which was carved the name of the occupant. The names were also carved on the oak tree, together with the number of the grave. The best we could do was to wrap the boys in their blankets closely, cover them over with leaves, and then tumble in the dirt. It was not much like a funeral—it was more of a business matter. The idea was to keep the bodies in as good shape as possible, so they may be recognized if their friends come after them.

I suppose our folks at home would think us a hard lot if they could see how indifferently we Kill on a dead man. While out in the the cornfield, near where Loomis' battery had such a long, hard tussle, I saw them carry a lot of dead rebels up to where a long trench had been dug. There must have been fifty bodies, and when the trench was finished they commenced putting them in. At first they were dropped down carefully, but the boys got tired, so it was simply unloading the job, and began tumbling them in with handspikes, as they would a log.

Sometimes one would tumble in face down ward, and the boys would sing out: "About face," "Close up on the left," "Cover your file leader," "If you get tired turn over," and so on. It sounded a little rough, but these are rough times, and this is rough business; besides, these are rough men. They are from Kentucky, and they l ate a rebel even after he is dead.

While coming back to the hospital we found Ike Green, of C company, hanging across the fence dead. He gave out yesterday while we were on the skirmish line, and he was not able to get into a wagon. After getting rested I suppose he started to hunt up up, and while climbing over the fence he was struck with a bullet, and there he stopped. The ball passed through his stomach and cord spine. He was no coward, else he would have faced the other way when he had such a good chance.

Several dead men have been found in hollow logs or behind logs or trees, as though they had been wounded and crawled in there to protect themselves. One poor fellow sat beside a big tree with a Bible in his hand. He had been mortally wounded in the breast during the fight, and his comrades dressed his burial squads, but they all thought that he was alive. He had been shot in the thigh, and he had gone to the tree for protection. Taking his Bible out, he thought, no doubt, that he would find consolation in reading it, but while sitting there a ball cut him through the back of the head, severing the spinal cord. He had dropped forward a little, and there he sat.

Over in the open field, where Hardee's battery was posted, the ground was torn up awfully. Had we remained there with our battery many men would probably have been killed. There must have been at least a dozen dead horses around there, but, somehow, there were not many men killed. I guess that is the deadliest effective work in scoring the boys think hard frightfully.

There was a good many solid shot and shell lying around, and bullets were thick enough when one got down and looked closely for them.

Laying sentiment aside and battle-field romance as much as possible, I don't know how you would get boys here able to run anything about that old dreadful field, from the day of the fight to the present. In fact, a person not aware of what had been going on would scarcely pass from one end of the field to the other without thinking that a battle had been fought. There is a great deal written about battles and battle fields that is not borne out by the facts.

HIS PRAYER.

[Boston Transcript.]

God keep you safe, my little love,
All through the night!
And shine the moonlight on your face
Until the light,
My heart's love, you in it kneel to pray!
Good-night; God keep you in His care alway.

Thick shadows creep like silent ghosts
About my head;
I lose myself in tender dreams;
Overhead
The moon comes stealing through the window bars,
A silver circle guarding unto the stars.

For I, though I am far away,
Feel safe and strong
To trust you then, dear love—and you—
The night is long;
I say with sobbing breath the old fond prayer,
Good-night! Sweet dreams! God keep you everywhere.

BROTHER GARDNER THINKS

The Tribes of Life Annoy Us Far More Than the Wild Tribes.

[Lime-Kiln Club.]

Just previous to the opening of the meeting Sir Isaac Walpole, who had his left shoe off to cool a bunion, got his foot in the way of Elder Rice's No. 12's, and the result was a spirited little affair, in which Sir Isaac had his nose roughly used and the elder found three of his front teeth loosened. Blows had nearly been exchanged, however, before both old patriots extended their hands with words of apology, and while Sir Isaac fairly begged of the elder to step on his bunion all that he could, the latter in his elder was earnest in his hope that Sir Isaac would loosen all the rest of his molars.

"Which goes to prove," said Brother Gardner, as he rapped to call the meeting to order, "dat de tribes of life annoy us far mo' dan de wild tribes. A sore toe will give a man mo' anxiety an' mo' pain dan a whole Sioux nation. A bile on de leg will delay a king's journey. Tight butes have plunged Europe into war. A sour stomach has led to grieve'us quarrels among famous men.

"Let a man's house burn down, or an epidemic sweep away his family, or reverses come to his fortune, an' he will bear it like a sheer his sand. Let a cy's appear on his toe—a blister rise up on his foot—a tooth begin to ache—an' he strike for higher wages or do front doah bell git cranky, an' ordinarily good men outer twenty am all broke up an' ready to assert dat dis am 'a cold world an' life ain't worf de trouble.

"Let dis be a lesson to us to guard our weak side. It ain't dat we shall go hang ourselves bekase we can't meet a bank note due to-morrer, but dat we don' lower our dignity in de nayburhood if we happen to shut de gate on our own coat-tails. We want to congratulate a man fur risin' from poverty to affluence by his own individual exertions, but we don' keer to be around when he makes a hardock and strikes his foot wid de hoe. We reverence gray hairs in our council chambers, but we fail to respect dat de owners of 'em give way to tears of indignation' ober a shirt too high in de back or a leak in de kitchen waterpipe."

The Webb-Brooks Duel.

[Ben: Perley Poore.]

Hon. James Watson Webb, who was for many years editor of The New York Courier and Enquirer, was the last second killed at the north. His last "meeting" was at Wilmington, Del., with Tom Marshall of Kentucky. He was not only second, but principal, but on his return to New York he was tried and sentenced to two years hard labor in the penitentiary. Governor Seward pardoned him and he resumed editorial duties when he was at Washington, at the time of the assault on Sumner, he was challenged again, as he thus told the story:

"I was at Washington at the time of Brook's assault on Sumner. The Courier and Enquirer came out denouncing Brooks. Brooks' cousin, Preston Quitman, a northern man and an old and intimate friend, waited on me and said, 'General, I am sorry to see you!' I knew what it meant and handed him a cartel. 'I have a message for you,' he continued, 'and I am ashamed to bear it, but if I refused I couldn't live in the south.'

"About The Courier-Enquirer paragraph?" I asked. 'Yes!' he said. 'Well,' said I, 'just keep it in your pocket till to-night. That paragraph was written in the office. I am responsible for it, and will fight for it, but I prefer to fight for what I have written myself. I sent a letter two days ago, published in the paper this morning. It will be here to-night. Your time is as severe as that paragraph; but when that gets here you can take your choice, and we will fight to-morrow afternoon at 5 o'clock!' I called on Quitman at 5 o'clock, received his communicant, and have changed my views on dueling. I would not now fight a personal duel—not a duel for a personal affront. Moreover, I had no personal quarrel with Brooks. He and I dined together at Governor Aiken's only three days ago. But I will fight for my country and for its institutions and principles in private combat the same as armies do, and ask the blessing of God upon the issue. I will fight Brooks to-morrow. Come to me in the morning.'

"My offensive letter arrived. Next morning Gen. Quitman waited on me, and said the South Carolinian, after a two hours' consultation with his friends, withdrew the challenge! I never was so astonished in my life."

A Cool-Headed Engineer.

[Cor. Locomotive Engineers' Journal.]

Leaving Salida we have to use two large mogul engines to take us over Marshall pass, a grade twenty-six miles long and 317 feet to the mile, winding around twenty-six degree curves. On one side you look down 2,000 feet, while by looking up on the other side of the track you can see the snow-capped peaks more than a mile high, one of the grandest sights that a man ever saw and worth the time and expense of the trip alone. Forty-four miles is counted a day's work on this division for engineers, and their monthly earnings amount to from $120 to $225, and the risks they run and ability they are required in worth all the money they get.

It is here that our old friend "Curley" Whitney had his runaway. Curley was coming down this grade with his train, got out of order and his brain got the start of him. He was running at second section, and seeing no hopes of avoiding a collision by reaching the next siding, he had his fireman after doing all they could to check the speed of their train jumped off and let it go. Instead of them on the first section was one of those every-day-in-the-week fellows who always look to both ends of his train, and he was looking back when Curley and his fireman jumped off. Realizing his danger at once he reversed his engine, opened it out the speed of the runaway train. He then stayed them and held both trains until he brought them to a full stop without a broken drawhead or even a bent bumper. For this gallant conduct and presence of mind he was called before President Palmer, his heroism complimented, his good judgment commended and presented with $5 and told to go back to work. He was promoted to the position of fireman, at $75 per month; leave of absence, and his former position to Horace gold, together with all personal expenses. The hero's name is John Moyer.

IN THE NORTHWEST.

The Country of the Columbia River and Puget Sound.

Which Is to Be the Future Great City—The Resorts of Oregon and Washington—Staple Products.

[Portland (Ore.) Cor. New York Sun.]

A general boom prevailed throughout Oregon and Washington territory from the time of Virgil Hall's arrival, and there are undeniable indications prevails in all kinds of business. Many of the leading business men, capitalists and politicians of that region have invested their money and time heavily in Northern Pacific, Oregon & Transcontinental, Oregon Improvement, and Oregon Railway & Navigation company stocks and do-mestic enterprises, and all kinds of business have suffered through the embarrassment of these companies.

The opening of the Northern Pacific railroad, the construction of which was attended by such genuine good times, has been followed, as is generally the case, by great disappointment. It has changed the course of business, rather than increased it. The merchants of Portland, who supply the larger part of both Oregon and Washington territory, have been exchanged. Instead of buying their goods largely in Chicago and other eastern cities, instead of at San Francisco as heretofore. Credits have been curtailed, and smaller stocks of merchandise are now carried. The suspension of railroad building has thrown many laborers out of employment, so that business is less active, and money is scarce. Wheat, wool, fruit, and hops, which with lumber are the staple products of Oregon and Washington territory, have been grown in greater quantities this year than ever before; but the demand for export is so limited, and prices are so low—lower than ever before—that the feeling in regard to them is very poor, notwithstanding that their larger crops and the lower prices of all articles which they consume ought to produce the contrary feeling. Wheat free on board sells here at about 68 cents per bushel, and this leaves the farmer in the interior less than 50 cents, in some cases even less than 37 cents per bushel.

And yet the prosperity of the country tributary to the Columbia river has not culminated nor come to an end. Climate, soil, and unlimited resources combine to make one of the most attractive, although one of the most remote regions of the United States. Now that it has rapid and direct communication with the eastern states by both the Union and Northern Pacific roads, it is destined at no distant day to become the seat of a dense population and of a great and profitable commerce, both foreign and domestic. The Columbia and its tributaries, as well as Puget sound and its many channels, will contribute greatly toward fostering the general growth. All of which all that has been said in their praise.

The only question is where the future great city of the region is to be. Portland has grown within late years to be a city of from a city of 8,000 to one of 40,000, and as it is accessible by the largest sea going vessels, and as the government is improving the channel through the bar at the mouth of the Columbia, there is no perceptible reason why Portland should not maintain its lead in the business it now has with San Francisco itself. Tacoma, the ocean terminus of the Northern Pacific, and Seattle, both situated on Puget sound, are thriving and enterprising towns, and both with the bitterest jealousy of each other aspire to be the future great city. Their harbors are most excellent in every respect, except that they are too deep to afford good anchorage. Each claims to have the best harbor and the best of everything else, but so far as a disinterested person can see, there is no very difference between them, except that Tacoma has the best hotel, an exceedingly good one, and has been designated as the terminus of the Northern Pacific railroad.

The forests of Oregon and Washington west of the Cascade mountains contain the largest and most valuable body of accessible timber now left in this country. Experts estimate that they contained when discovered 150,000,000,000 feet, board measure, of merchantable lumber, of which only about 3,000,000,000 feet have so far been cut and sent to the market, leaving 147,000,000,000 feet standing. It is also estimated that 300,000,000 feet have been cut the year 1888, at an average of $14 per 1,000. The proceeds are said to have been divided approximately as follows:

Labor, logging and sawing, receive	
one-half.....	$3,150,000
Stumpage receives 50 cents per M..	250 000
Towage or hauling, 50 cents per M.	250,000
Profits of mills, 75 cents per M....	375,000
Wear and tear of machinery.....	500,000
Net gain, $4 per M.....	2,000,000
Total.....	$7,000,000

At this rate, the supply would last nearly 200 years, with the understanding that the consumption will increase not only with the population, but with the demands of all countries bordering on the Pacific coast, and to a still greater degree with wants. Already forest fires and the axe of the settler have made sad inroads upon the forests, and both settlers and forest fires are increasing in number and fatality. The alarm of fire and destruction call for radical measures of prevention. The state and territorial, as well as the national government, should combine, and each do its part to protect these splendid forests.

Governor Crosby, of Eastern territory has recently recommended to the territorial government to protect the far less generous supply of timber in that territory, and it is to be hoped that it will not stop with this advice, but resort to the most radical and effective measures to be applied wherever it has jurisdiction. It cannot act too soon, nor too thoroughly for Oregon and Washington territory.

"The Empire to Peace."

[Rochester.]

The Russians are reducing their army expenditure by $4,500,000 per annum. According to The Moscow Gazette, this economy is to be brought about by shortening the time of service and decreasing the annual number of recruits. Instead of the 320,000 recruits serving two-and-three years, only 240,000 will serve four years for cavalry; it was decided at the last meeting of the commission charged with the consideration of the subject: 1. To reduce the Cossack regiments of the whole empire by 10,000 men, and to increase the reserve forces in time of peace so as to diminish the standing army by 160,000 men. 2. To fix the period of service at five years for infantry and six years for the cavalry. 3. To settle the annual contingent of recruits at 160,000 men, and only a period of four-five to six years' service. 4. Owing to the reduction of the number of recruits by 80,000 men. If the measures under consideration are carried out, the empire will save more than $4,500,000 per annum.

Philadelphia Call: "To mad'ner to do for," said the poet. That he been married he would have written, "To madness to endure."

Don't Hang Your Shoulders BUT INVESTIGATE!

Parties desiring to invest in one of the soundest, best paying products, either in its raw state or manufactured,

Signal Office Prediction.

Light rains, followed by clearing weather, northerly winds, becoming variable; slight rise in temperature.

Chronological Events.

Garfield born 1831.

JOTTINGS.

—Fifteen arc electric lights are being put into the Scott Machine works.

—Ann is Russell, referred to yesterday, plays in Emerald's Saturday.

—Mr. Woodruff is arranging to have electric lights put into Hotel Netherwood, which is to be kept open all winter.

—Mr. Livingston, of the all-ged elopement case, is not a native of Senator Livingston. The senator is a native of New York State, while the other person is an Englishman.

—Attention is called to the wretched condition of the sidewalk on Fifth street, near Richmond, people are compelled to walk in the middle of the street. It should be attended to at once.

—The Democrats of Cranford will celebrate the election of Cleveland and Hendricks this evening by illuminations, fireworks and a parade. The Democrats of Elizabeth will celebrate to-morrow evening.

—A young lawyer of New York city who was known to have shot quail in this vicinity before the limit, made his appearance here again yesterday, and was promptly taken in charge of by Officer Band of Fanwood for violating the game laws. He was taken before Justice Nash who held him in $500 bail to answer to the charge. The case will be heard Nov. 28.

—Specimens of fire and water-proof building material, hollow brick, furring brick, embracing ten different samples from the Fire Proof Building Company, of New York, with whom the Plainfield Clay Mining Company have become associated, have been just received and are on exhibition at the office of the treasurer, Mr. Edward C. Mulford. They will repay inspection by those seeking a good investment in stock, or otherwise, as per advertisement.

—The foundry at the Scott Foundry and Machine Works was started up last Monday, the pattern work having been begun about six weeks since, and progressed sufficiently to keep the foundry in full operation. The smelting furnace is one of the latest improved, and on the exterior no one would would suspect the thoroughness of its operation, as no sparks are emitted and there is in no other respect the nuisances which usually annoy neighborhoods in which foundries are located. The machine shop is running on tools. New men are being employed each week.

—Mr. Walter Scott, who has probably had as good an opportunity as any one could have in his visits to the various establishments scattered over the country in the process of machinery for his work, states that previous to election owners simply kept men on to await the result. They did not care to lessen out until they knew what it would be. Since that has been learned they have been discharging men by the dozen daily, and this is not due to a belief in any great change in the Free Trade and Financial policies, but to a want of confidence and the belief of what is probable with Democrats in power.

A Petition for Prohibition.

At a Temperance Convention of the quarterly meeting of Friends which convened in the Meeting House on Pierce street in this city on the evening of the 16th inst., the following form of petition was considered and approved. It was directed to be signed by the clerks on behalf of the meeting and forwarded for presentation to the ensuing Legislature:

To the Senate and Assembly of the State of New Jersey:

We, the Temperance Committee of the Shrewsbury and Rahway Quarterly Meeting of the Religious Society of Friends, most earnestly represent that the increasing evils of intemperance are wasting the substance of this community and creating much misery within our borders. That these evils are the direct outgrowth of the manufacture and traffic in intoxicating beverages. We, therefore, do respectfully and earnestly renew our petition that the Legislature will, at an early session, pass a law or adopt an amendments to the Constitution of the State prohibiting, when only ratified by the people, both the manufacture and sale of all intoxicating liquors for drinking purposes.

Hurled in Sand.

Accidents will happen. A gentleman and his hired man went to a sand bank yesterday in North Plainfield to get a cart-load of sand. The hired man, in digging, with his attendant went to a neighboring house to use "out his whistle." He threw shovelful after shovelful into the cart, and was delving in deeper to a finer vein, when all of a sudden the bank, in height of about eight feet, gave way, smothering him completely. The hired man just came up in time to see his lord and master crowding out through the treacherous sand. Neither of them were, but both laughed heartily.

Ex-Mayor Rice, of Burlington, a Stalwart Republican, worked in a Democratic parade a few nights ago in payment of an election wager.

Dr. Forest Frazier, a young man living near Bordentown, shot a gray eagle while on the marshes the other day. The bird's wings measured eight feet across.

An other Bonaparte Prisoner.

On the Fatherland, is a German engaged in the beer-bottling business on Greenbrook avenue, near Somerset street, North Plainfield, and has been in this country about fifteen years. He has been married, but a few months, as in many other cases of a similar nature, the ale was not of the most wholesome and lasting kind; for about a month ago the wife of his bosom suddenly disappeared, and as afterwards came out, skipped off with a young German greenhorn, in the employ of Hilary Obits on Somerset street, near Mountain avenue, a sojourner in the land of only two years' standing, and of just ten years younger than the gentlemanwife of the forlorn Gustav, carrying off with her the youngest child of the family. A little while after the deserted husband came to the conclusion that the best thing to do under the circumstances would be to get a divorce, which he claims he has so procured, and let the faithless and erring woman go.

One day last week Mr. Sutterlin was in New York, and finding out the place of abode of the gloating couple, went in that direction, with his great surprise and joy he chanced to meet, on the sidewalk, his captured child, and hastily seizing him, brought him back to his old home in North Plainfield. But the child was not destined to tarry long in the old abode, for about half-past eight o'clock last Sunday evening, the destroyer of this man's home and happiness, accompanied by the fickle wife, appeared on the scene, and entering the house engaged in a wrangle with Sutterlin, and becoming enraged grabbed him by the throat, forcibly a knife to a threatening attitude, and finally drew it a pistol on his victim. While all this was in progress the ex-wife made an onslaught on the defenseless housekeeper whom she chastised most furiously, and frightened to such an extent that she prostrated took to her bed, and at latest accounts was greatly indisposed. During the melee the child was seized by the demonstrative trio, hustled into a carriage, which lay waiting at a convenient distance, and was soon out of sight of the head of the unhappy household, who seems to have become reconciled to his lot and still "skims the pool, sequestered vale of life, pursues the noiseless tenor of his way."

At the Casino.

The rainy weather last evening did not dampen the ardor of the devotees of roller skating who with their friends flocked to the Casino Roller Rink to witness the last appearance of Master Willie Hyde and Miss Elsa McKibbin. The young experts of the graceful art have been the daily observed of all observers for a week, and have won hosts of friends. While it is remembered that they did not skate at all until last May, their skill is the more to be wondered at. In the grape-vine and other difficult acts they received the hearty applause of the audience. Miss McKibbin was especially commended for her rope jumping while on skates, and for her picking up a number of handkerchiefs placed at equal distances on the floor, while whirling around on the front rollers. The waltzing of the couple and the cutting of the figure eight seemed especially to delight the spectators.

At the conclusion of the performance Master Weavers a young skater not yet out of frocks, presented Miss McKibbin with a handsome bouquet, and skated around the rink with her. Guy Elliot Demarest, of the Constitutionalist, on behalf of the skaters' club presented Master Willie Hyde and Miss McKibbin with handsome gold medals, with their names inscribed thereon.

From here Master Hyde and Miss McKibbin go to Lancaster where they stay a week. From there their route carries them to somewhere other places throughout the east and west.

In Aid of the Hospital.

The attendance at the fair of the Ladies' Auxiliary for the benefit of the Muhlenberg Hospital, which is being held in Reform Hall, was somewhat below what was expected last evening, owing to the rainy weather. It is thought that a large number will be present this afternoon, when the Punch and Judy show will be given, and also this evening, when it will be necessary to sell many other more costly articles at a sacrifice in order to clear the tables.

A handsome doll with all the paraphernalia pertaining thereto, has attracted considerable attention at the First Regular table. The name of the doll is a secret, the lucky guesser of which is to be awarded the doll. The nominal sum of one dollar is charged for a guess, merely to make the matter a little lively.

What Mr. Livingston Says.

Mr. Livingston, of this city, about whom certain stories reflecting on him are current and published as to the cause of his wife leaving him, called on us last evening and emphatically and unequivocally denied those statements each and all, and particularly the allegation that cruel treatment was the cause of his wife's departure. He further states that the affair is not an elopement case, and that he does not suspect his wife of infidelity, and never has so suspected her. He furthermore is convinced that there is no truth whatever in any statements in any manner reflecting on her virtue. The true cause of the affair, in his opinion, lies in no connection, whatever with the alleged acts time of her departure, and has not been suggested in any of the published rumors or reports.

A Fire at Somerville.

Last night about midnight, a fire occurred on a large vacant building in course of construction for the Somerville Land and Improvement Company, on the corner of Main and Division streets, Somerville. The fire started from a defective flue of the boiler in the basement, and the flames entirely consumed the building, as well as the adjoining scenery, and also a wooden shed on the opposite side of the street. The scenery was the property of Mr. Charles Hyde, of New York, and was valued at $1,000. The building was owned by Mr. Charles Hyde, of Somerville, and was valued at $5,000. The fire was discovered by Mr. Hyde's watchman, who turned in the alarm. The building was insured for $3,000 in the Home Insurance Company, of New York, and the scenery for $1,000 in the Hartford Insurance Company, of Hartford, Conn.

Forwarded across Fresh Oddities.

Mayor Rudolph Nevin—I wish to present to the common council of this city, the many citizens, property owners and others the following extracts from an article by the venerable Dr. Dio Lewis, which appeared in the August number of the North American Review. I believe I could not do better than present the reprint in the columns of your valuable paper.

"Anglo-Saxon civilization staggers under strong drink. If we could rid our country of it by the annihilation of all who are engaged in the bad traffic it would be the best of Yankee bargains.

More than a dozen of our States have tried prohibition. Most of them have abandoned it. Under exceptionally favorable conditions Massachusetts tried prohibition for twenty years, and finally gave it up, but not for lack of interest in the temperance cause. That interest had grown deeper and wider.

Prohibitionists say that we miss the point; that they have never proposed to treat drinking as a crime; that the sale is the crime. The cook who contributes to gluttony by his superior compounds is necessary to a vice, but is not guilty of a crime. Tea grog-seller is accessory to another vice. Many that he is guilty of a crime because he is accessory to a vice, is to ignore the dictionary and talk nonsense. To admit that a man has a legal right to drink, and then stand between him and the opportunity, is an insult. To say that you have a legal right to use patent medicines, and then send an officer to stand between you and the drug store, is a life absurdity. A prohibitionist once, at a dinner party, turned to me and said, 'My dear fellow, you have a perfect legal right to drink, but I should smile to see you buy any liquor.' Top rights to drink includes the right to buy; not the right to buy through the lying prescription of a tricky doctor, but the right to buy of any one who consents to sell without crime, and without making the business a nuisance.

"Then," exclaims the prohibitionist, "you would have us lie helpless on our backs while millions of our fellow men go down to perdition." A man who can indulge this thought in full view of that magnificent revolution of 1776 as Washingtonians, and then sneaking outcast, the Woman's Crusader—a man who, in full view of these proofs of the overwhelming power of moral force, will say that it is cannot have the constable to help his cure his neighbor's vices, he must go to labor on his back is a queer creature.

I am an old man, but I expect to live long enough to see the friends of temperance turn their backs upon the constable, join hands and hearts in a grand movement combining the issues of Washingtonianism and the Woman's Crusade, and within twelve months fill the most wonderful page in the history of Christian civilization.

DIO LEWIS."

That Democratic Outrage.

We have received a somewhat combative tirade, dated at Westfield, signed John T. Lawrence, President Democratic Association, and endorsed "A. J. Weather, Chairman Executive Committee," with a demand that it be published. The tirade relates to a Democratic outrage on the Postmaster at Westfield, the particulars of which we published at the time as furnished by the postmaster himself to his brother in this city, and by him to us. We stated that the republican democrats of Westfield had come with Republicans in an effort to bring the villains to justice. The communication denies that the act was done by Democrats, and intimates that the persons by whom it was committed are known. We have never published a less respectable Democrat had anything to do with the affair, and so stated but if the gentlemen who sign the communication know who the parties are, as their communication intimates, they, in the interest of the Democracy and people of Westfield, should have them furnished and indicted as would prove a salutary lesson to the lawless class, to whom the perpetrators evidently belong. If the President of the Association referred to had shown proper courtesy and brevity, and less of the style of Don Quixote, and had made a request instead of a demand, we should have been pleased to comply. This trivial error in judgment is not necessary for us to consign the missive to our waste basket.

Pigeon Shooting.

James Force, Dr. Tinsey and Billy, made up a pool of $6 at the Cumpb'n Club House, last Tuesday, for a pigeon match. Billy and Jeems shot three birds each, and the Doctor shot two out of three aimed at. The first prize was $4, which the two first named shooters divided rather than contest again, and the ubiquitous doctor got back his $2. A second match was had between the parties for a stake of $6 to be divided between the two best shots. This was also won by the Forces. A third match between Jesse Miller and Ed. Campbell resulted in a victory for the latter, who killed two of three birds, against one of three by Mr. Miller.

Personal.

Mrs. Sarah Squires, who for the past few weeks has been visiting friends in this vicinity, left yesterday for her home at Medina, Mo.

Colonel John Dietrich of this city has a handsome ivory handled cane, which was presented to him by Deputy U. S. Collector of Customs, E. L. Stone of Galveston, Texas, in 1883, at which time Col. Dietrich was a Surveyor of Customs at the mouth of the Rio Grande, located forty miles south of Galveston, Texas.

Sunset Football Tonight.

Allow a couple to run until it gets beyond the reach of sunshine. They often say, Oh, it will start away, but in most cases it starts home again. Couple, by the bedpost to say I'll be gathered home before Evergreen to see you, they would be glad to see you, and you will be glad to see the first gun. Price $1 each. R. J. Dale, Front street, also Park grocers.

Special Notices.

NOTICE.

A meeting of the Second Ward Republican Association is hereby called for Thursday evening, Nov. 20, at 8 o'clock, to be held at the office of the Plainfield Gas Light Co., corner Fourth and Washington streets, for the following purposes, viz: to increase the membership of said Association to meet different districts; to transact business relating to the forthcoming election; to nominate officers and such other business as may come before the meeting.

All members of the Second Ward are cordially invited to attend.

CRAIG A. MASON, Pres. Ass'n.

WHEN THE LADIES OF PLAINFIELD are putting away their plants for winter, will they remember the Band of Hope? It is desired to procure a few plants, and any growing plant. Hardy varieties are most desired le.

THE ATTENTION OF THE TEMPERANCE people of this city is called to the fact that their attendance is earnestly requested at the approaching primary meetings of their respective parties to be held shortly, dates to be hereafter announced. The object of the meetings is to the end of every advocate of temperance in this City to attend these primary meetings, and see that men are elected to represent them as delegates to the offices, who next year will vote for no rum in Plainfield.

THE P. E. C.

At their meeting Thursday evening unanimously adopted the following:

Resolved, That the Reform Club of Plainfield hereby reaffirms its non-co-operation as an organization with any political party, but declares that the success of temperance principles within this city, demands it appropriate and expedient to earnestly recommend to the voters of the city, at the when exercising the voting privileges of a citizen at the municipal election, to support only such candidates, irrespective of their political name, as we know to be temperance men, and in favor of the total prohibition of the sale of liquor in the city of Plainfield.

FRANK W. TOOZE, Sec.

Business Cards.

TEN LINES ON TENNIS.

My heart is as a tennis ball,
And gaily do you whack it;
I strike—rebound, I by, I fall—
I tumble to your racket.
O lady of the vernal court!
My heart is sore entangled
In Cupid's net, whereto in sport
Your fair arms—ah! ever-tangled—
Hath struck it (by mere tennis ball)
To play another at Rest-fall!—Life

THE STOREY ESTATE.

An Objection to the Appointment of Col. Forrester Overruled.

CHICAGO, Nov. 20.—The question of the appointment of a receiver for the Storey estate, including The Times property, came up before Judge Tuley this morning again. Fifteen bills were filed in the case, and on these the first was based, on both sides, that of Mrs. Emma C. Storey, and that of the blood relatives of the late Mr. Storey. They was first read the bill filed by Judge Trumbull last week, asking for the appointment of a receiver. Then was read the cross bill of Mr. Gouley, in which the facts in the case as then far developed in the probate court, were recited, and coupled with the request to appoint Mr. Austin L. Patterson as such receiver if any were appointed.

The answer of Mrs. Storey to the cross bill denies that Mr. Patterson enjoyed the full confidence of Mr. Storey. On the contrary, on several occasions Mr. Storey had instituted an investigation into his conduct and kept watch over him while in his employ. In the opinion of Mrs. Storey, somebody else appointed in Mr. Patterson's place as receiver would be better, so long as it was an "indifferent and competent person."

Judge Tuley continued the case until to-morrow at 2 P. M.

The Cattle Kings.

ST. LOUIS, Nov. 20.—The third day of the cattle convention opened with a promise of better weather. There were 1,142 delegates present when the convention was called to order. Telegrams were read extending congratulations and sympathy from Pitt Assistant Postmaster General Crosby and John Robinson Whitely, director general of the American exhibition at London, and an offer from the Chicago and Alton railroad of a special train to Chicago during the week was received. The committee on permanent organization presented its report, as follows, for president, John L. Routt, of Colorado, with one vice president from each state; secretary, Amos T. Atwater, of St. Louis. Gov. Routt was escorted to the chair, and made a short speech thanking the convention for the honor paid to Colorado by his election. A resolution that a committee of five be appointed to draft a constitution for a permanent national association was carried. Judge Carroll, of Texas, presented a resolution that the convention memorialize congress in behalf of the national cattle trail, and appoint a committee to present the memorial to congress. The trail is to begin at some point on Red river, and extend in a north and north westerly direction to the north line of the United States.

A New Crematory.

LANCASTER, Pa., Nov. 20.—The Lancaster Cremation and Funeral Reform association has completed and on next Tuesday will formally open the cremation furnace which it undertook to build about the time the Lemoyne crematory of Washington, Pa., was closed to the public. The building has two furnaces, two retorts, reception and chapel rooms, and is situated near Woodward Hill cemetery. Experiments with animal matter have satisfied the Lancasterites. The exercises of opening day will include addresses by Dr. M. L. Davis and Rev. J. M. Hart, touching the subject of cremation from a sanitary and religious point of view.

Connecticut Will Have a New Prison.

NEW HAVEN, Nov. 20.—At the last session of the Connecticut legislature a committee was appointed to examine into the condition of the state's prison, and report as to the expediency of the erection of a new one. Prof. Brewer, of Yale, a member of the committee, says that the committee will report recommending the purchase of a plot of ground adjacent to the present structure for the erection of additional prison buildings. He says that the sanitary condition of the prison is as good as the average.

To Quiet the Negroes.

BUFFALO, Nov. 20.—E. W. Crosby, associate editor of The Times, and secretary of the late Fillmore conference of colored men, and Rev. Richard Hayward, of Cleveland and worker among the negroes of the city in his interest, is preparing a letter to Gov. Cleveland reviewing the negro question. It is intended to circulate through all sections of the south, with a view to quieting the unnecessary alarm of the negro population, which he believes is encouraged by demagogues.

Sullivan and Greenfield Indicted.

NEW YORK, Nov. 20.—Sullivan and Greenfield, after being informed that they had been indicted by the grand jury, were taken before Recorder Smyth in the court of general sessions and held for trial in $1,000 bail *on a charge of misdemeanor.* Counsel for the accused asked that his clients be granted a speedy trial. Bail was then furnished and the two pugilists left the court with their friends.

A Convict Killed by a Detective.

MONTREAL, Nov. 20.—A notorious convict named Fantaux recently escaped from St. Vincent de Paul penitentiary after shooting a guard through the leg. He was found here lodging in a low quarter of the city. Detectives Gleda and Lapointe proceeded to arrest him. On entering the room both were shot at by Fantaux and Lapointe was wounded. Gleda then shot Fantaux dead.

Destructive Forest Fires in Virginia.

PETERSBURG, Va., Nov. 20.—Forest fires are burning in Dinwiddie county, in the neighborhood of Richmond, in this state. Considerable quantities of timber have been destroyed, and some farm houses and considerable amount of fencing. In consequence of the protracted drought, the grass and undergrowth have become so dry that the least spark will ignite them.

Infantile Knights of the Road.

NASHVILLE, Nov. 20.—Two colored boys, aged eight years, were peremptorily sentenced to three months' imprisonment for highway robbery. After a long search for both boys, a policeman found one of them with a pocket full of money, and on questioning him he stated that he had robbed a white man of a dollar and a half, from which time he had plenty of money with them.

Illegal Country Votes.

BROOKLYN, Nov. 20.—The democratic board of canvassers have completed the canvass and give the vote as follows on the electoral ticket: Cleveland, 38,795; Blaine, 38,514; Butler, 2,141; St. John, 1,341. Leaving Cleveland's majority over Blaine 15,768.

A Mayor Sentenced to Jail.

LITTLE ROCK, Ark., Nov. 20.—In the circuit court a verdict of $10 each and one day's imprisonment in the county jail was rendered against the mayor and aldermen, unless, by Jan. 1, the railroad bonds condemned as a nuisance be removed.

Our New Navy.

NEW YORK, Nov. 20.—The office of the new naval cruiser of the United States navy has arrived here from Roosevelt's yard at Chester, and was towed to the Morgan iron works to be fitted with boilers and machinery.

Ada Cavendish Dying.

LONDON, Nov. 20.—The consultation of Ada Cavendish, the actress, is very much worse and can have no other result than death, and it is believed cannot long survive.

Consumption can be Cured!

This fact has been demonstrated to over three

TEN THOUSAND CASES by

DR. S. D. HOWE,

The Great Consumption Doctor of New York, PROPRIETOR OF THE

Arabian Medicines,

Celebrated throughout the World for their remarkable Cures.

Dr. Howe's Arabian Milk Cure.
Dr. Howe's Arabian Tonic,
Dr. Howe's Arabian Liver Pills.

The Only Medicines that have ever been known to positively cure Consumption.

TESTIMONY

Of the Hon. Jno. E. Gary, Judge of the Superior Court, Chicago, Ill.

CHICAGO, Dec. 14th, 1876.

DR. S. D. HOWE,

DEAR SIR:—Permit me to add my grateful testimony to the many of witnesses to the virtues of your justly celebrated Arabian remedies. For a long time my wife was seriously afflicted with hacking cough, oppressed breathing, soreness of the chest and general debility, pains in the back, nervousness of the right lung and under the shoulder blade. Her sufferings were intense, and the best of the regular doctors and prescribed, but disease was pronounced consumption for the physicians of Chicago and other cities, whose prescriptions had been taken without benefit. When your Arabian Milk Cure was used, a change in sensation was conducted, and the satisfactory results followed which have kept your friends happy. I am fully determined to take your medicines in accordance with your printed directions, and the result began to see the Arabian Milk-Cure and Arabian Tonic. Their beneficial effects are most marvelous. The cough loosened and I was relieved, respiration became easy, the soreness of the chest was relieved and all the symptoms of my lung to take a fresh and improve in strength and appearance. I do not believe that your medicines and skillful advice have saved the life of my wife. She unites with me in this grateful tribute to the merits of your remedies.

Very respectfully, yours,
JOHN E. GARY.

The above letter is only one among thousands received from all parts of the United States.

Price of Milk Cure & Tonic, each $1 per Bottle.

PILLS, 25 Cents per Box.

A NEW PAVEMENT.
The undersigned has secured the exclusive agency for the sale of the
Diebold Patent Iron Stone,
whichfor elegance and durability, is unsurpassed, and in point will compare favorably with any other pavement now in use. It is the most beautiful pavement for stables, cellars, floors, sidewalks, floor tiling and street blocks. Also used to build fences and Burglar proof vaults. For building purposes generally. They are now in use in many large cities, and in every instance have given entire satisfaction. They are so made as to be laid by any mechanic. Parties wishing to put down pavements, can get as good ones, as well as all kinds of mechanics. This company is responsible for any defective brick, that may occur in pavements laid from it. These Blocks are cast 1 1-2 the inches thick, and are made by the Plainfield Stone Co., opposite the Baltimore & Ohio Depot, Plainfield, N. J. Orders solicited at Warner's Fancy Store, opposite Park Hotel. For further particulars call on or address

The Sun.

THE SUN is, and will continue to be, a newspaper which tells the truth without fear of consequences, which gets at the facts, no matter how much the process costs, which presents the news of all the world without waste of words and in the most readable shape, which is working with all its heart for the cause of honest government, and which therefore believes that the Republican party must go, and must go in this year of our Lord, 1876.

About sixty millions copies of THE SUN have gone out of our establishment during the passed twelve months.

If you want to spend cent to end all the columns of THE SUN printed and sold last year you would get a continuous strip of interesting information seven times wisdom, sound doctrine, and news in it long enough to reach from Printing House square to the top of Mount Capomon northeast of Peru, then back to Printing House square, and three quarters of the way back to the moon again.

But THE SUN is written for the inhabitants of the earth; the mere strip of intelligence would girdle the globe twenty-seven or twenty-eight times.

If every buyer of THE SUN during the present year has spent only one hour over it, and if his vote or his influence has been given in accordance with the sentiments in 1876 has afforded the human race thirteen thousand years of stately reading night and day.

It is only by the most economical use of these that you can form any idea of the circulation of the most popular of American newspapers, or of its influence on the opinions and actions of American men and women.

If you know THE SUN you like it already, and you will read it with accustomed diligence and profit during what is sure to be the most interesting year in its history. If you do not know THE SUN, it is high time to get into the vanguard.

VICTUALS AND DRINK,

As the Traveler Finds Them While Sojourning Abroad.

Hotelics in the Orient—European Manner and Mine—The Water Supply, Generally Speaking, Very Poor.

[Foreign Cor. Inter Ocean.]

In Japan, China, and the eastern insular countries, you eat three meals per day; a good substantial breakfast at noon, a light little of bread, cheese and fruit at 7 o'clock, and a heavy dinner at 7 or 8. The fruits of Singapore make tiffin the most enjoyable meal of the day there. Mangoes of pine-apples, bananas, oranges, mangosteens, pomeloes, cocoanuts, etc., make my mouth water even now. In India the same rule holds, but I think the tiffin is nearly always preferred to an lunch. When you strike Egypt the abominable French system of café-au-lait in the morning is encountered, varied sometimes as a special luxury by a light broiled egge. I stopped at , one Levantine hotel where this most unsatisfactory breakfast was actually charged extra. Even on the French steamers to the Orient you must make a day a la carte. *In the Himalayas there are six meals a day*—bearer, chotie, bearer, tiffin, lunch and dinner. Verily, the round-the-world stomach has to endure everything.

Until Egypt was reached, I enjoyed that distinctive Oriental dish, rice curry, at least once a day, and usually twice. Everything in the way of meat is carried in India, from shrimps to wild geese.

The butter and milk supplies were the most indifferent. Tinned butter and condensed milk, from Switzerland or California, prevail almost exclusively throughout the Orient. The local goat and buffalo products are even worse. Rancid butter and fly-blown eggs of enterprise has resulted in dairies, as at Yokohama, but the supplies are expensive and decidedly inferior. The orthodox cow does not flourish where punkahs are swung. The butter is invariably white, like lard, and unsalted. It is a question concerning the brown yellow of artificial grease, and most of the hotels do not attempt to put it on the table more than once a day—at noon—if they do that often. Otherwise the resident foreign people live well, and three or four meat courses are enjoyed by those in the most moderate circumstances. I enjoyed genuine pumpkin pies at one or two missionary tables in Japan and China, and other American delicacies served without an ocean of condiment at the hospitable boards of some of our representatives in Syria. Oatmeal, griddle cakes, hot biscuits, genuine pies, and custard, are unknown out of America, save in a few London and Paris restaurants, where they are sometimes counterfeited, without the success that might be desired.

Papered rooms are unknown in the east. Frequently the walls are left in the roughest public buildings. The effort is to exclude the fierce heat, and to this end bare walls, venetiaians, windows without glass, lofty rooms, and all sorts of intermittidies are provided, such as I have described in former letters.

The water supply is poor, save where municipalities have been at enormous expense to construct waterworks, as at Hong Kong, Singapore and Calcutta. Citizens of Canton buy water by the barrel, which is brought from the mountains by natives or up the river from Hong Kong on steamers. The local wells contain only brackish water, which may be used in washing clothes and dishes. In the principal Indian cities it is no longer necessary to drink boiled water, owing to the excellent supplies furnished by the public waterworks. In Delhi the water is intolerably brackish. In Roust-chuk the muddy Danube is filtered and sold to the native Bulgarians.

In Vienna the water-works are very extensive, and the water the best that I know of, being nearly ice-cold on the hottest day. In Aden and a few similarly torrid mundane reminders of the doom of wicked men, the public water supply is obtained by condensing and distilling common sea water by means of large engines. The unpalatable product is then sold for as high as 8 cents a gallon. Rains are too rare to be depended upon.

Filtered rain water is used in Jerusalem, and it is not cheap for a bath you must pay for it extra.

Drinking water seems to be furnished nearly everywhere outside of America in a flask-like bottle with a neck about an inch and a half in diameter, and long enough to be comfortably grasped. In India these ewers are made of porous clay in order to keep the water cool, and it is wonderful how well they accomplish this considering the climate. Elsewhere the bottles are of glass, varying somewhat in shape.

Gone is the charm.

[Chronicle "Undertaker."]

The charm of a city seldom is gone, with a lot of other estimable things. I don't mean novel writing, for perhaps no previous age ever saw such a wash of cheap trash in that way as the present, but the charm of the fireside story. How the old lies used to sparkle and glitter in the ruddy glow! How the young imaginations were quickened and set on fire with which could only impose on ignorance. Now the merest boy will smile at improbabilities, and the youngest girl object analytically to the harrowing narrative of the heroines of fireside stories. I passed three little boys, huddled up in a dark corner of a doorway, the other night. It was a cold night, that evening, was very and they were relating stories to one another. The one who held the floor, to speak metaphorically, was glowing and animated, and the other two were declining with opening eyes and ears. The point of the story seemed to be reached at last, because they all relaxed, and I heard one little fellow say:

"There ain't no such things nowadays. I tell you, fellers, I ain't got a use for this here story. I want to go away where a feller can sit, well, blame me, if I care much about livin' now any way."

It was a little touch that carried me back a good many years, and I wondered what was the difference between youth and age. I have met so many men who have said the same thing, only they were men and these were boys.

Americans Educated Chinamen.

[Boston Advertiser.]

It may interest those who know the Chinese students in the United States to learn that they have not been very considerable themselves admirably in the fight between the French and Chinese fleets at Foo Chow on the 18th of August. Kang Wing Chang, of the Massachusetts Institute of Technology, class of 1880, was a lieutenant of the vessel which did the best fighting. He it was who commanded when the vessel went down. Ching Shu Hsun, of the famous school, class of 1881, was midshipman on the Yang Woo. He died, on the 5th Yaw Foo, of the shock of the explosion of the Yang Woo magazine. Woo Yi Fan, of the class of 1881, Polytechnic Institute, Troy, was on the Yang Woo. Yung Hing, of the Hartford high school, class of 1878, was on the Yang Woo, and escaped. Yang, a nephew of Yung Wing, is a hero of whom any country but China would be proud.

WORKING A BARBER SHOP.

A Seedy Gentleman's Way of Making a Living—Cash but no Shave.

[New York Sun, 23rd.]

A long bedraggled, with a shiny coat and frayed trousers, sat in a down-town barber shop last night and fondled a week's growth of a stubby beard that looked as if it might have been knocked off with a jack-hammer, but could be separated from his visage in no other way. Like Dickens' ghost of art, he was waiting that beard for all it was worth, and while the shop was crowded with customers and unshaven men, in a hurry to get home after work. The seedy gentleman exposed his chin and stiffly looked over a newspaper, until the barber said "next," and then started up from his seat. A cheerful gentleman looked at him for a second with glowering suspicion and then said:

"Shave, my good fellow; if you will let me take your turn I'll stand a treat for your shave."

"You're my man," was the reply. "Fork over the tin."

Fifteen cents was handed him, and he relapsed into his chair and continued his newspaper until the barber-helper began the labrents wilderness on his face. The old gentleman got his baldness trimmed up and his whiskers dressed down, and left. The barber again called "next," and the seedy individual again hastily arose. A fussy-looking clerk gazed upon him with sad pathos, and said:

"Look here. Really, if you let me come ahead of you I'll give you a quarter and stand treat."

"Fork over the oyster I'm huntin' for," said the seedy one. And again was his pocket made richer by the addition of a 25-cent piece. He leaned back and watched the tonorial operations

JOTTINGS.

—Pressey and Lester the great bicyclists at the Casino this evening.

—Mr. A. H. Johnson is being urged to start an evening school in drawing and painting, and he will probably do so.

—The name of Alexander Titworth, has been suggested by several citizens for the office of City Treasurer. All we know him as collector and that would be a good nomination.

—A game of rink polo was played at the Casino last evening. The manner in which the players tumbled about was enjoyed by many, but some objected to the length of time taken.

—Ex-Mayor Randolph, in a letter to us, seems to feel that some of the statements in our article on his Mayoralty a few days ago were a reflection on him. Of course nothing of the kind was intended, as any one who knows THE NEWS, will admit. We are aware that Mr. Randolph had nothing to do with the proposed deals, and that he is too straightforward and honorable to knowingly get caught in any questionable trap. The program, however, was as we stated, and if the Republicans and Democrats should both unite on him, we certainly don't see what there would be therein for him to feel sore about. All we know of him is to his credit.

One Hundred Dollars Stolen.

The house on the corner of Plainfield avenue and Fourth street is occupied by a man named Chamberlin, who works at the Potter Press Works. His son and a young man boarding with him also work there, and they occupy the same room at the house. Last evening about half-past six before the men had come home from their day's work and while the women were engaged in cooking supper, a man entered the house through the parlor window and going directly to the boarder's room took a considerable sum from his trunk. The boarder's and the son's watches were hanging near, but were undisturbed. When the burglar was leaving the grounds he met Peter Collins who was coming from the barn. Collins carried a lantern and the man thinking he was after him jumped at Collins, smashing the lantern and tearing his clothing. Collins was getting the best of the affray when a colored man came to the burglar's rescue and released him. The parties escaped.

Young People's Association Anniversary.

The second anniversary of the Young Peoples' Association of the Park Avenue Baptist Church which occurred last evening was appropriately observed by a social gathering in the chapel of the church building. A large number of the members of the association and their friends were present. During the evening a chorus of fourteen voices selected from members of the association sang several selections in a very creditable manner. Dr. Lowry encouraged the young people and gave them some very good advice in a short address. Miss Mary L. Runyon favored the gathering with two recitations, and Mrs. Mosher and Miss Adella Runyon sang a duet. Refreshments were served at the close and the whole affair passed off very pleasantly. It this can be taken as an ind x to the social le to be held by the association during the coming winter the interesting gatherings may be looked for.

A Horse Thief Makes Off with a Colt.

About twelve o'clock last night the family of Mr. Samuel Hudson of Somerset street, North Plainfield, were disturbed by the barking of their dog. They thought nothing of it at the time, but this morning it was found that an eighteen months old colt belonging to Mr. Hudson's son had been stolen. The colt had a heavy mane, and was of a black color with the exception of two feet which were white. No clue to the thief has been discovered.

The Republican Association of the Second Ward.

The Republicans of the Second Ward met last evening and perfected the organization of their association by the election of officers as follows:—President—George H. Goddard, Vice-President—William Thompson, Secretary—Charles R. Corwin, Treasurer—John H. Dunn, Executive Committee—Craig A. Marsh, John B. Dunn sr., E. L. Morris, E. A. Dunham, George H. Goddard.

Thanksgiving Services.

The statement that has appeared in the local newspapers that there will be no union Thanksgiving services in this city this year, is incorrect, as there will be a union service of the two Baptist, two Presbyterian, the Methodist and other churches in the First Baptist church, at eleven o'clock. The sermon will be preached by the Rev. Wm. R. Richards of the Crescent Avenue Presbyterian Church.

Artistically Made Chicken.

[By The News Reader.]

About a mile out of town on the south west corner of Grand avenue and Seventh street, stands a large white house in the rear of which is a row of chicken houses and chicken parapherna lia in general. This is the headquarters of the "Plainfield Poultry Company" who raise chickens by steam, or rather hot water, for market purposes. The company commenced business with Mr. G. H. Passmore as manager, about the first of last May and have been very successful so far.

The manager boards in the house with the family of the "ranch" attendants. The hatching machine or incubator, as it is long officially about ten feet long, resembling an ordinary meat safe, and heated by a series of radiating pipes connected with a galvanized iron tank, running lengthwise through the middle, is located in the cellar.

On the outside of the machine at one end is a small iron drum, in which the water is heated by means of three oil lamps; and pipes lead from the tank and then into the apparatus keeping up a uniform temperature throughout. On the top is an electric arrangement with a battery attached, which regulates the temperature by means of a number of small brass rods, opening and closing the ventilator, turning up or down the lamps, and ringing an alarm in the room of the manager, automatically, should anything be wrong with the machine.

For the convenience of handling the eggs, the machine is divided into three compartments with two wire trays in each, fitting into shelves one above the other. The eggs are first placed in the upper trays and are allowed to remain for five days, when they are taken out and tested. The Tester is a tin cone about a foot long, tapering from three inches in width to a point. Over the wider end is tied a piece of cloth with a slit cut in it in which the egg is fitted. On being held to the light any flaw in the egg may be easily detected.

The eggs which are not fertile are taken out and boiled for food for the young chickens, or may be used for other purposes, as they are still good eggs. The perfect ones are now returned to the tray and kept there fourteen or fifteen days longer, when the chicks begin to make their appearance, after which they are put into the nursery, a large room underneath the trays where they remain long enough to scratch themselves out of their shells and are fed on a boiled cannibal-tic diet, of what might have been, but for the slight accident of unfertility, their brothers and sisters.

The nursery is heated by a stove "Rooding house," a building about fifteen feet wide, with a glass side like a green house, inside of which, along the ground (the building having no flooring) against the glass wall, are arranged a number of small c ops boxes or "Artificial Mothers," as they are called, which are kept at a temperature of 90 deg. Fah. made to take the place of the wings of the hen. The brooding house is heated in the same way as the incubator, by hot water, the pipes running under a wire grating upon which the chicks stand. In front of each "mother" is a small yard or "Run" into which the chicks are fed. Here they remain until they are three weeks old, when they are allowed their first stroll of pure air in the large "Run" outside. When they are about two months old they are given the run of the "Ranch" or are sold at the "Pen" by auction to the highest bidder. When three months old they are designated as "Broilers" and are marketable, bringing various prices according to the season.

The incubator hold 1,000 eggs, and great care must be taken in the selection, as there is a way of testing almost like that of testing them in the machine for days, and the success of the "Hatch" depends a great deal upon the percentage proven to be fertile. From sixty to eighty per cent is the general average with good eggs.

The enterprise having only been running since May, there has not been time to raise eggs. These are purchased. In time the company will have their own poultry for the purpose of providing eggs.

Close of the Hospital Fair.

The Fair by the Ladies' Aux iliary Board for the benefit of the Muhlenberg Hospital which has been in progress during the past three days, at Saltford Hall has concluded last evening and has proved a gratifying success.

During the evening Mr. Samuel Huntington, President of the Board, invited upon the stage Mr. John H. French, President of the Reform Club and therein in a few appropriate remarks, presented to him for the club an elegant silver plated water pitcher and goblet to match, suitably engraved and inscribed. They were purchased from the Middletown Plate Company, through Mr. J. Wesley Johnson of this city, their agent. The presentation was made on behalf of the Ladies' Auxiliary Board, in return for the donation by the Club of the free use of their Hall for the Fair. Later in the evening Mayor Maxson auctioned off a number of articles from the Refreshment stand.

The successful recipients of the various articles to be drawn for were announced during the evening. Miss Mabel Potter drew the handsome doll which was on the First Baptist table. The name of the doll, of which Miss Potter was the successful guesser, was Alice. Miss Flora Bonnyman drew the doll's cape, which was on the Indian cabinet, and Mrs. Mattie Tyler the peacock.

The Event To-morrow Night.

Extraordinary success has stamped the efforts of the Music Hall Association, and has enabled it to command such a sterling company as that of The Madison Square Theatre, which is to appear at the Music Hall to-morrow night, on Saturday night of this week.

This past record is a guarantee that there will be the greatest dramatic event in Plainfield for the year. We know the play and the company of stars, and think that among the crowning successes of the year will be that of the Esmeralda production on Saturday night.

Tickets are on sale at Shaw's and Sayward's and should be secured ahead to secure good seats.

Both Want the Child.

Further developments in the Butterlin case which was reported in yesterdays issue, make the matter more complicated than at first reported. It appears that several years ago Mrs. Butterlin sent for Miss Higgins, who had been brought up by Mr. Butterlin's parents, and was living with them in Germany, to come to this country, and live with her. Accordingly Miss Higgins came to North Plainfield. A few years afterward her brother Ernest Higgins followed her, and obtained employment with Hilary Obitz, of Somerville.

About six months ago the heads of the Butterlin household became suspicious of each other. Mr. Butterlin claimed that his wife had been too intimate with Higgins, and in turn Mrs. Butterlin averred that her husband had been entirely too frequently in the company of other women, chief among whom was Miss Higgins. These suspicions led to two divorce suits, one on behalf of the husband and the other on that of the wife. The cases were heard by Hugh M. Gaston, Acting Master in Chancery, Mrs. Higgins remained with Mr. Butterlin as his housekeeper.

Mr. Butterlin has since been on the watch for information which might lead to the recovery of the child. He finally secured evidence which led him to believe they were living in the vicinity, of Forty-first street, New York. Taking with him one Ritter and another man, he went to that locality, and met Mrs. Butterlin out walking with the child. Mrs. Butterlin alleges that the two men seized and held her, while Butterlin made way with the child. On their departure she proceeded to the Fifty-seventh street police station, and preferred charges against the men of assault and battery and kidnapping.

On Sunday Mrs. Butterlin concluded to take the law in her own hands, and in company with Higgins and another man came to this city. The stranger stopped at Butterlin's place and asked for beer. As he was leaving, Mrs. Butterlin and Higgins walked in, and in the course of the dispute which arose Higgins seized Butterlin by the throat, and brandished a knife before him. Mrs. Butterlin at the same time attended to Miss Higgins, the housekeeper, and according to accounts did not spare much mercy in her attentions to the latter. They finally seized the child and left.

Butterlin immediately went before Justice McLachlin and preferred charges against the parties. In the affidavit of her proceedings Mrs. Butterlin claims that Butterlin is not the father of the child.

Obsequies of Mrs. Alice Fenton Haynes.

Notwithstanding the severe storm that prevailed on the evening of the nineteenth, a large number met at the residence of Mr. Charles A. Haynes on First place to attend the funeral rites of all that was mortal of Mrs. Alice Fenton Haynes, widow of the late Rivert R. Haynes.

Rev. Robert Lowry, D. D., was in charge. After reading selections of Scripture appropriate to the occasion, Rev. George E. Horr of Somerville addressed the company, having as a basis for his remarks, the following texts: Psalm 46:1—"God is our refuge and strength, a very present help in trouble." Words spoken by the departed a host, only a week before in the prayer meeting of the Park avenue Baptist Church. He then spoke of the great loss she sustained just thirteen months ago, the death of her beloved husband, and how that while loving friends and kindred had endeavored to smooth her pathway many times, she was dogged by bereavements, she refused to be comforted, and longed for the time when they should be reunited in the spirit land. At times she would seem to resolve to be calm and to join with them in home and social life, but then the sorrow would come and the same scene would show, and these moments were often repeated.

And this was the trouble that burdened her dear one and to which she referred. In David's words, "God is our refuge and strength in very present help in trouble."

After further remarks and the reading of a very appropriate poem, the services were closed by an earnest prayer by Dr. Lowry. Among others present we noticed Mr. George W. Fenton of Frewsburg, the father of the deceased, Senator Reuben E. Fenton of Jamestown, Mrs. Lewis Lockwood, Mrs. W. H. Haynes and family from Roswell, N. J., Mrs. John E. Burton of Albany, N. Y., Mr. A. Haynes, E. Haynes and Walter T. Pell of New York, Mrs. Grassly and Mr. and Mrs. L. J. Busby from Brooklyn, Mr. and Mrs. Chas. Bishop and Miss R. Garwick from Newark, N. J., Mr. and Mrs. T. F. Bonnell of Dunellen, N. J., Mayor Job Male, Mr. Evan Jones, Mr. Abner G. Conger, Mr. and Mrs. Peter Wyckoff, Mrs. J. W. Johnson, Geo. Sterling and many others. Yesterday morning the interment took place in Greenwood Cemetery.

—Game of pool this evening at Gerstel's for a supper.

—Prof. Ivet French of the Reform Club made a fine speech at the Club meeting last evening.

—One of the train hands on the local afternoon freight was slightly injured at Bonhan yesterday afternoon by being caught between the cars.

—The Gloucester Gingham Mills, employing several hundred hands, shut down Saturday night for an indefinite time.

Some Foolish People.

All we can say to you would be quite beyond the reach of medicine. They often say, Oh, it will wear away, but it never does, only fastens itself. Could they be induced to try the wonderful remedy, Dr. Kenny's Pile Ointment, which we sell on a positive guarantee to cure, they would immediately see the excellent effect after taking the first dose. Price, 50 cents per box. E. J. Shaw, Front street, cor. Park avenue.

CASINO FRIDAY and SATURDAY EVENINGS,

A government order is compelling the inhabitants of Sierra Leone, in Western Africa, to dispense with all bamboo thatched houses on account of their liability to fire.

Large numbers of dried and smoked lizards are imported by the Chinese physicians, which are used in cases of consumption and anæmia with considerable success.

Shaw, a Colorado surveyor, reports that he and his party of surveyors have found almost a solid mountain of alum over a mile square, some of the cliffs of which rise to an elevation of 700 feet above the bed of the Gila river. Most of the alum is in an impure state, and tasting very strongly of sulphuric acid, but of which there seems to be an inexhaustable quantity. Some of the cliffs, however, show immense quantities of almost pure marketable alum.

Two eminent veterinarians from Canada have gone to Kansas and Nebraska to study pleuro-pneumonia as it exists among the cattle there. One of these, Dr. Andrew Smith, Principal of the Veterinary College at Toronto, is said to have expressed the opinion that the only way to thoroughly stamp out the disease is to kill every infected animal. A severe remedy, truly, and one that would cost the United States from five to ten millions of dollars, but Dr. Smith thinks the money would be well spent.

Professor Schelbler, of Berlin, has invented process for the production of phosphoric acid from the slag made in the Thomas Gilchrist method. The slag, having been roasted in an oxidizing flame, is pulverised and sifted. The powder is dissolved in hydrochloric acid, and the solution saturated with lime water. The resulting product contains from 35 to 37 per cent. of phosphoric acid in the form of bibasic phosphate of lime, and a second roasting yields a substance in which the content of phosphoric acid is as high as 45 per cent.

From 1865 to 1885 the lottery players turned into the Royal Italian Treasury $275,000,000. Count Cavor used to call the lottery the "tax on fools."

GOV. HENDRICKS TALKS

IN A MEASURE DEFINING THE NEW ADMINISTRATION'S POLICY.

Thankful for the Independent Support. Democratic Supremacy and Its Effect on the South - The Kind of Civil Service He Believes In.

BROOKLYN, Nov. 21.—Ex-Gov. Hendricks addressed a large audience at the Clermont avenue rink this evening. About 5,000 persons were present. The meeting was called to order by Augustus Van Wyck, chairman of the Kings County Democratic committee, and on his motion ex-Mayor of Brooklyn John W. Hunter was chosen to preside. Informal vice-presidents were appointed. They were Congressman Wm. E. Robinson, Gen. Horatio C. King, ex-Adjutant Gen. Woodward, Wm. A. Fury, secretary of the Democratic committee, and counsellors of Brooklyn; Henry W. Maxwell, chairman of the Independent Republican committee; ex-Senator Martin, Edmund Driggs, Andrew McLean and several other local political celebrities. A goodly portion of the audience were ladies.

Mr. Hendricks was received with prolonged cheering. After cheering to be effective contribution of Indiana to the general victory of the Democracy, and attending greeting from that state to the Democracy of Brooklyn, he continued: "This is no ordinary triumph. We have not only outnumbered the voters at home who opposed us, but we have overcome the influence and power of an official organization of 120 regiments of officeholders. I rejoice with you that a party has at last come into power in the face of the people's government. I rejoice that there has been a party held together by their principles alone for a quarter of a century of defeat. Such a party, in what it believes to be right, cannot fail to be of service to this country in the future. The responsibility rests upon it and it shall bear fruit in its period of triumph. Whether it shall be as gr at in the day of success as it has been patient and wise, and faithful in the hours of defeat, is to be a consideration of great pleasure to me that this battle has been achieved exclusively by Democrats. I believe I am as earnestly a Democrat as almost any man, but here, to-night, in New York, adjoined to Connecticut and Massachusetts, it does give me pleasure that we have had such to the Independent Republicans. It is a hard thing to tell how strong are the bands that hold partisans together. But in this day the voters, the patriots, the brightest, the scholars, the patriots, have stepped out from their ranks and taken hold of the Democratic banner, and have helped us and helped achieve freedom from rings and cabals. Let us see to it that we drive none of these men back into their old ranks by any misconduct on our part.

"The question presents itself, 'what does our victory signify? What ideas of government attain I expressed in the votes cast on Nov. 4? Perhaps the chiefest is the idea of *stability. The Democratic party in all its* history has been distinguished for its stubborn support of stable government and firm authority, until it came by way of derision to be called by the opposite party a Bourbon party. So far as the idea of stability is in favor of right I accept it. So far as it expressed stability and support of the wrong I throw it off as a load. Our history does show that we will stand by established institutions. The result means change, but it does not signify destruction. We do not propose by means of the ballot to destroy established in periods of its past for the better safety and security of the country. The constitution which amendments we propose to stand by. Nothing in the platform or act that has passed can justify any one in suggesting that the Democracy will be in favor of any violation of the constitution. In its last struggles, if that period shall ever come, the Democracy will be found the firm supporters of constitutional rights and constitutional liberty.

"Because of some things that have been said within a very few days, I beg to say to you that this contest, in the local developments does signify any disturbance of the legal and constitutional rights of the colored people. As the colored man comes into the new administration as a voter, so he will go out of that administration as a voter. As he comes in a free man and clothed with the beautiful garments of citizenship, so will he step down at the close of the administration clothed with the same legal and constitutional rights. At the end of this administration it will only have learned that the colored man is protected by the same constitution that protects you and myself, my brother and sister.

"It has been declined by the people that that there shall be executive and administrative reform. Do you see me in favor of civil service reform? Of course I am. I cannot be in favor of a continuation of so many things that we have seen in some of the years gone by into voters out who are tired of it, and they want a change. Do you desire to know from me what civil service I have confidence in? I am free to say to you people to-night that the particular element of success after a schoolmaster's examination; but I tell you what I have confidence in, as it was in the days of Andrew Jackson: let a true man come to be the president, and let true men be called around him to aid him in the public service, let those men remain in office only so long as the position for office under them shall be honestly and fitness for the service, and you have civil service reform.

"This great contest has established it that there must be revenue reform." Mr. Hendricks here referred to the large surplus arising from the tariff and adopted Pres't Arthur's maxim, that the standard of taxation should be "the needs of the government to economically administered." He also praised Governor Cleveland's admonition to congress that the pressing question now is, what legislation will relieve the people of the burdens of unnecessary taxation.

How to Cut Up Meat.

CHICAGO, Nov. 21.—The National Fat Stock Show opened in the exposition building here yesterday, there being very few visitors. The butchers consumed most of the day in removing the dressed carcasses to the places where they were placed in the southern corner of the building. One half of each steer was cut into quarters and the other half was cut up into every sort of piece that a butcher ever sells from a block or place up. Some of the cattle are to be taken to New Orleans for exhibition. The show has been one only to exhibit specimens of stock the world has ever seen, but has come nearer to being remunerative than any previous show under the same auspices.

The Jersey Central Dividends.

PHILADELPHIA, Nov. 21.—The application of President Gowen for the election of managers of the Philadelphia and Reading railroad company, for an order to compel the receivers to pay the dividends on the stock of the Central railroad company of New Jersey, falling due December 1, was presented to the United States circuit court. The court, after a short argument, decided to postpone the matter for one week. New Jersey should be informed of the proceedings.

CLEVELAND OR HENDRICKS.

The Boys Are Divided Upon Their Favorite for President.

NEW YORK, Nov. 21.—The Boys' Democratic club, of Astoria, Queens county, was asked if he was aware of a decision existing among the young people of the north that a change in the administration would unfavorably affect their condition. To the question he promptly replied:

"Yes, I have been astonished at the statement that there was an appreciable existence of such a sentiment, and that in some way their rights now secured to them under the laws and Constitution of the United States, were in danger from the success of the Democratic party. I am ever told that some of them are led to suppose the result of the recent election means that they may be deprived of their rights.

"All of this," continued the governor, after a moment's pause, "has appeared to me to be so absurd, and I have been so sure that the slightest intelligent reflection would dislodge such foolish fears, that I can hardly deem any notice of them necessary. But there is not the slightest objection to the fullest discussion of the whole in the least uncertain upon this subject in the fact that the title of the colored people to freedom and to all the rights of citizenship cannot be disturbed except by a change in the constitution, which it would be absolutely impossible to make. Besides, the fact

RECEPTION TO THE PRELATES.

Baltimore's Welcome to the Members of the Plenary Council.

BALTIMORE, Nov. 21.—A reception to the members of the plenary council by the Catholics of Baltimore took place at Concordia hall. Addresses of welcome were made by Charles J. Bonaparte and ex-Judge William M. Merrick.

Mr. Bonaparte said there were many reasons for which they rejoiced to the Catholic church in view of the present plenary council as a great and joyful day in that church. At this moment the people of America have discharged the grave duty of choosing their chief ruler, and the assembling of this council should recall to us the principles on which our policy is founded. The Catholic church knows nothing of candidates or platforms, of tariff or currencies, but she requires of men to vote with an unclouded judgment, with the good of the country and their native, with the fear of God before their eyes. No man can be at once a good Catholic and a bad citizen.

Judge Merrick said that if the assemblage of any body of men, whether in science, politics or industry, was an event of importance, much more so must be that which assets to consider the spiritual welfare of millions in accord with the teachings of the Catholic church. The reception was meant to signify the unity which exists between the Catholic clergy and laity of America. Many people fail to understand how loyalty to the state can exist with subordinance to the church, and cannot understand that non-intervention with forms of government is a doctrine of the Catholic church, and that its preachings are the very radicals out of which modern political freedom has grown.

Archbishop Williams, of Boston, in responding, said that the members of the council had come to this city with far different feelings than those which they would have experienced had they gone to any other city. It was the home of the first bishop and the first archbishop of the church in this country; and now they saw his successor surrounded by educated clergy and presiding over the third plenary council, which represented 5,000,000 of American Catholics. Great changes had taken place in the last century.

Burned by Lightning at Sea.

BOSTON, Nov. 21.—Private advices from Pernambooo state that the ship Alert, of Boston, Capt. A. Park, from York, Oct. 28, for Shanghai, with 4,000 gallons of case oil, was struck by lightning and burned. The date of the disaster is not given. Capt. Park and officers and crew were saved. The Alert was 1,169 tons net and was built at East Boston in 1874. She was owned by Messrs. A. and E. F. Littlefield.

First Conciliate, Then Annex.

LONDON, Nov. 21.—Rear Admiral Livonius, formerly director of the German admiralty, who is Prince Bismarck's chief adviser in colonial matters, is preparing a book advocating German colonization on an extensive scale in Africa. He is heartily in favor of the British policy in colonizing schemes, which he says consists of first conciliating the natives and then annexing their territory.

Recalling the War.

NEW YORK, Nov. 21.—The suit of H. G. DeKlyne, Lamar, son and executor of Gazway B. Lamar, of Savannah, Ga., commenced in the supreme court of this state in 1873, against Hugh McCulloch, secretary of the treasury, for the recovery of $23,000, the alleged value of 435 bales of cotton, confiscated by the New Orleans revenue agents in 1865, terminated in a verdict for the defendant.

One Hundred Men Out of Work.

IPSWICH, Mass., Nov. 21.—Pierce, Harding & Co.'s hosiery mill in this town will shut down in a few days for three months. It is thought the mill will change hands and start up again. For the last few years the stockholders have realized nothing, and rumors have been afloat of mismanagement. About 100 hands have been thrown out of employment.

An Actor's Princely Salary.

LONDON, Nov. 21.—Mr. William Terris, formerly of Mr. Irving's company, who is now playing Romeo to Miss Anderson's Juliet at the Lyceum theatre, has signed a contract with Mr. Henry E. Abbey to accompany Miss Anderson to America next spring. He is to support her in the leading male parts, and is to receive $200 per week.

Blaine as Cameron's Successor.

ERIE, Pa., Nov. 21.—There is a growing feeling among Republicans here in favor of James G. Blaine as Senator Cameron's successor in the next senate. A movement is reported to be on foot among Blaine's active friends to secure pledges from the representatives elect from this part of the state to support Blaine for the senate.

To Prevent Fraudulent Pay Accounts.

WASHINGTON, Nov. 21.—The annual report of the inspector general of the army has been made public. He recommends that hereafter the paymaster be supplied with lists of officers whose pay accounts he shall cash. By this system he thinks the fraudulent duplication of pay accounts will be prevented.

The Jingle of Sleigh Bells.

BANGOR, Nov. 21.—About eight inches of snow fell in this city, and sleigh bells jingle in the streets. The small streams and ponds are frozen over, and there is considerable ice in Moosehead lake and the Penobscot. There has been good sleighing and strong ice in the Aroostook for a week past.

New Hampshire's Official Vote.

CONCORD, Nov. 21.—The state board of canvassers, consisting of the governor and council, met and canvassed the vote for presidential electors with the following results: Blaine, 43,249; Cleveland, 39,193; St. John, 1,975; Butler, 633. Blaine's plurality, 4,067—majority, 1,056.

Three Children Burned to Death.

EAST SAGINAW, Mich., Nov. 21.—Stone Veaner, Tuscola county, three children named Bidder were burned to death. They had been left in the house while their parents were busy on the farm, and the building catching fire all were consumed before help could reach them.

Stranded Thespians.

WOONSOCKET, R. I., Nov. 21.—The "Magnolia Girl" combination opened here to a slim house. The play and company proved failures, and the company stranded. Their baggage was attached, and several had to place watches in the hands of constables for security.

An Ocean Steamer in Collision.

LONDON, Nov. 21.—The Belgian steamer Pensland, of the Red Star line, from New York to Antwerp, came into collision with and sunk a ship off the Goodwin sands. The crew of the vessel were saved and the Pensland was uninjured.

Deaths from Cholera.

PARIS, Nov. 21.—From midnight to 6 o'clock last evening 69 deaths from cholera were reported.

Consumption can be Cured!

This fact has been demonstrated in more than

TEN THOUSAND CASES

by

DR. S. D. HOWE,

Arabian Medicines,

Celebrated throughout the World for their remarkable Cures.

Dr. Howe's Arabian Milk Cure.
Dr. Howe's Arabian Tonic.
Dr. Howe's Arabian Liver Pills.

The Only Medicines that have ever been known to positively cure Consumption.

TESTIMONY

Of the Hon. Jos. E. Gary, Judge of the Superior Court, Chicago, Ill.

CHICAGO, Dec. 14th, 1876.

DR. S. D. HOWE,

DEAR SIR:—Permit me to add my grateful testimony to the many of witnesses to the virtues of your justly celebrated Arabian remedies. For a long time my wife was sadly afflicted with hacking cough, oppressed breathing, soreness of the chest, and constant acute pain in the region of the right lung and under the shoulder blade. Her sufferings were intense, and she became extremely nervous and prostrated. Her disease was pronounced consumption by the physicians of Chicago and other cities, whose prescriptions had been taken and tested in vain. When you visited Chicago in June, 1875, we called on you, hardly very little hope of deriving help from your treatment. We were inspired with hope by the skillful manner in which your thorough examination was conducted, and by the confidence of pleasantness with which you closed your diagnosis. My wife determined to take your medicines in accordance with your plain and practical directions. She began to use Dr. Howe's Milk Cure and Arabian Tonic. Their beneficial effect at once became manifest. She caught the cough less frequently, respiration became easy, the soreness of the chest was relieved and all pain removed, she began to gain in flesh and improve in strength and spirits. I fully believe that your medicines and skillful advice have saved the life of my wife. She unites with me in this grateful tribute to the merits of your remedies.

Very respectfully yours,
JOSEPH E. GARY.

The above letter is only one among thousands received from all parts of the United States.

Price of Milk Cure & Tonic, each $1 per Bottle.
PILLS, 25 Cents per Box.

Sold by C. A. BUTLER, Druggist,

A NEW PAVEMENT.
The undersigned has secured the exclusive agency for the sale of the
Diebold Patent Iron Stone,
which for elegance and durability, is unsurpassed, and in price will compare favorably with any other pavement now in use. It is the most beautiful pavement known for walks and yards, gutter stones, crossings, curbing, etc. Also used to build fences, line cellar and street blocks. Also used to build fences and for ornamental and for substantial purposes generally. These pavement blocks have many striking peculiarities.—They never wear smooth; are non-conductors; resist ice and snow, as well as all kinds of chemicals. When dampened, nevertheless as the ordinary brick, the material remains perfectly free from it. These blocks are cast in the molten iron slag and the hardest of substances. Specimens on exhibition at Warner's Fancy Store, opposite Bethlehem Music Hall. For further particulars call on or address

The Sun.
THE SUN is, and will continue to be, a newspaper which tells the truth without fear of consequences, which gets at the facts, no matter how much the process costs, which presents the news of all the world without waste of words and in the most readable shape, which is working with all its heart for the cause of honest government, and which therefore believes that the Republican party must go, and must go in this year of our Lord, 1884.

About sixty million copies of THE SUN have gone out of our establishment during the passed twelve months.

If you were to paste end to end all the columns of THE SUN printed and sold last year you would get a continuous strip of interesting information among mean windows, sound doctrine, and sane wit long enough to reach from Printing House square to the top of Mount Copernicus in the moon, then back to Printing House square, and three quarters of the way back to the moon again.

But THE SUN is written for the inhabitants of the earth; this same strip of intelligence would girdle the globe twenty-seven or twenty-eight times.

If every buyer of THE SUN during the passed year has spoken only one hour over it, and if his wife or his grandfather has spent another hour, this newspaper in 1883 has afforded the human race thirteen thousand years of steady reading night and day.

It is only by little calculations like these that you can form any idea of the circulation of the most popular of American newspapers, or of its influence on the opinions and actions of American men and women.

If you know THE SUN you like it already, and you will read it with accustomed diligence and profit during what is sure to be the most interesting year in its history. If you do not you know THE SUN, it is high time to get into the procession.

Terms to Mail Subscribers.

DAILY—50 cents a month, $6 a year, with Sunday edition, $7.50.

SUNDAY—Eight pages. This edition furnishes the current news of the week, special articles of exceptional interest, literature, fashions, and much of the best matter of the daily issued, at $1.20 a year.

The Nineteenth Century Girl Who Was Up to Snuff

"With a Mocking Laugh He Turned to Go"—Her Face Lights Up with a Weird, Material Smile."

[Chicago Tribune.]

"I forgive you, Hetty."

Thomas Turnstile turned away with a heart whose load of sorrow was almost too great to be borne, and walked slowly down the shady lane which led to his mother's humble cottage at the foot of Huckleberry hill. Young, hopeful, and with spirits as buoyant as health and a clear conscience could make them, he had fallen in one instant from the sun-kissed heights of contentment and happiness to the black depths of desolation and despair. And why? Because a girl—absolutely beauty when father's wealth had placed her far above Thomas Turnstile in the social scale—had, after having him on and on with all the arts which women know so well and practice so skillfully, haughtily refused the love that he offered her—the love of a true, honest heart—a love of which any woman no matter how exalted her station, might well have been proud.

And she had told him plainly that she had been toying with his heart—had led him into the same low, direct tone that he had so often wielded him in the days gone by when they had wandered together through mossy glade and bushy dell, through the silent woods in which the rustling of the zephyr-kissed leaves was the only sound that came to them. She had told him in cruel words that severed their lives forever, softly enough, but on the beautiful face that had for years haunted his memory and been the beacon-star of his endeavor, there was a scornful, haughty curl-rate expression that told him only too truly that each syllable was uttered in earnest, and that to hope for a revocation of the sentence she had just had pronounced were indeed foolish. And yet, despite this fact, he loved her with a mad, consuming, chloride-of-lime-on-an-old-shirt passion that was scorching his very soul, every beat of his great, manly heart seeming only the knell of a life that was soon to be quenched forever.

* * * * * * *

One year had passed. On all sides one hears talk of the wonderful success that has crowned the efforts of Thomas Turnstile as a speculator. His daring operation of buying all the poker decks in Chicago just previous to the assembling of a national convention had made him a millionaire and to none was this piece of news more interesting than Hetty Hallowheart, the proud beauty of Horse-Fly Ville. Judge of her surprise when one day there came a note from Thomas Turnstile asking permission to call on her. It was at once given and the evening of the following day appointed for the interview. At 8 o'clock a carriage rolled up to the door and Thomas Turnstile was ushered into the parlor, where Hetty waited to receive him. In the soft mellow light of the 85-per-thousand gas she looked more radiantly beautiful than ever and there was a tremulous tinge of admiration in the young man's tones as he spoke to her.

"A year ago," he said, "I offered you my hand in marriage and you refused it because of my poverty. I am now rich and repeat that offer. Do you accept it?"

"I do," she answered.

"Ha! false woman," he cries, "at last my revenge is accomplished. Know, then, that I do not love you, and that my only object in coming here to-night was to humiliate you;" and with a hollow, mocking laugh he turns to go.

"Stay," says the girl in an imperious manner, and as she speaks Thomas Turnstile sees two men, one a lawyer and the other a stenographer, come from behind a Japanese screen which stands near an Etruscan cupboard. Hetty's face lights up with a weird, baleful smile.

"What does this mean?" he asks. "Why have my words been taken down?"

"It means," she answered, "that I am loaded for bear."

The Old Stockman's "Shake."

[San Francisco Post.]

Some years ago an emigrant from the United States kept a small restaurant in a town situated in one of the great stock-raising districts of South Australia. He was presumably the only Yankee in those parts. There was an enormously rich old stockman who came into town from his lordly cattle range at intervals, whose nationality was a matter of doubt, though he usually passed for a backwoods and uncommunicative bachelor Scotchman.

One day this wealthy but solitary old chap entered the restaurant of the man from the states. When he left he looked hard at the proprietor, and then simply remarked:

"American, aren't you?"

On being answered in the affirmative the millionaire cowpuncher walked away without another word.

Regularly once a week he reappeared, silently as before, but each time he made the same stereotyped inquiry, receiving the same emphatic, "Yes, sirve" in reply. At last there came a time when the eccentric old customer did not return. He usually went by—for at last a wagon stopped at the door, and the old fellow, pale and wasted with sickness, was helped out and supported into the saloon. He called for a drink, and with a weak but dogged determination, ate a morsel and then tottered up to the counter. As he paid his bill he whispered, hoarsely:

"American, aren't you?"

"You bet," replied the proprietor, pleasantly.

Stretching out his hand the old customer said,:

"Shake! So am I!"

Then he tottered away without another word. Three days afterward a lawyer came into our young countryman's place and told him that the queer old guy on the Thompson range had died and left him a cool $1,000,000.

The Science of Guns.

[Clara Belle's Letter.]

"There is a character in every step. A person takes," said a man who delights to hear it all, so far as the science of gait was concerned. "When I saw you pass our house the other day, Miss Clara, I was impressed by the easy, self-reliant freedom of your walk. Such firm yet gentle strides betrayed the dominant unconventionality of your character."

He was a doctor of divinity, and I didn't care to see him, but I felt bound in Christian humility to ask him: "Was I wearing my brown and black plush suit?"

He believed so.

"Then I was making a special effort to take long, swinging steps," I said, "because that's the only way I can make the confounded drapery look right. That must suggest my character. See me in my new dark-blue street costume, with its narrow skirt and inbound strappings, and you'll say I'm a rubber dog's dissection."

Paintings: Contributors enclosing self-addressed envelope may write on both sides of their paper.

BURDETTE'S DOG HORSE.

A Little History of the Ways of a Million Hunters.

[Burlington Hawkeye.]

Well, sir, that dog—ah! That Gordian setter I used to own. I was telling you about him, you know; well, he was smart. Didn't take him long to catch on to all a man's points, and he soon found out all about my Remrod and Musket, summer vacation style of shooting. You know when you take your gun out of the case for a day's shoot and the bird dog goes wild with joy, dances all around you, thrusts its tongue into your face and gives you a weak wink to let you know, confidentially, that it's got you into the yard and yelps and howls and chases the cat and the chickens up into the trees from sheer excess of delight and exuberance of spirits. That's usually the way of the dog. Well, this Gordian setter of mine, he used to watch me pretty close along about the 15th, and some day, when he'd see me unlocking the gun case, he'd sneak in sit down very solemnly, and watch me with an expression that said, plainer than words:

"You ain't going to take it out this year, are you?"

But I'd go on and take the gun out and rub it up a little, and he'd shake his head and look doubtful generally, and say:

"I wouldn't go out if I were you; what's the use?"

And when I'd sit down and oil the locks, he knew it was useless. He would heave the most heart-breaking sigh that ever drew on human sympathy, get up and go out into the back yard and sit down in the shade of the wood pile and cry, and think and cry, and cry, not loud, you know, but silently. Most touching thing I ever looked at. And then he wouldn't eat a bite of supper, when it was brought out to him he'd shake his head and say it would choke him if he tried to eat, and get up and crawl under the house, and moan and mutter to himself all night. He did hate to see me shoot. Sold him, finally, when I reformed. Couldn't do any shooting after that, of course.

Well, I sold the dog to a hunting friend, who was a splendid shot, and you talk about a dog's undying fidelity and love for his old master! Three days after I sold that dog I met him in the street. Called him by name and put out my hand to pat him. I'll eat a wire cartridge if he didn't back off a few steps, look at me steadily, as though he never saw me before in all his life, stick his tail straight out, raised his forefoot and made a dead point on me and then walked away to the other side of the street. Cut me dead. And he never spoke to me again.

English and American Divorce.

[Philadelphia Times Interview.]

"American divorces are the bugbear of the English courts," said Queen's Counsellor Inderwick, member of parliament from Sussex, in conversation with a Times reporter at the Continental hotel last week. "We have constantly to wrestle with one or more of them. They are convenient to start with, but unsatisfactory because of their want of lasting qualities. Any man or woman who needs a divorce wants it very badly. He or she desires something that can be relied on all over the world. To feel that one is a bigamist, never intended. It very unpleasant—must be, I mean, for I involuntarily make the cause of my imagined client mine. It will have to be attended to by international treaty. The more convenient the present state of affairs is the greater the legal complications. You must adopt our law or we yours or both of us somebody's. Divorce the throughout the civilized world must be uniform.

In this country it is possible for you to have as many separate laws as you have states. Think of it? While our law some times works hardship it never does moral injustice to either party. We are exacting to the highest degree. In England a petition in divorce must be served personally on the parties to the action. When that is done the other notice can be served on the attorney. The judge will not proceed with the case if personal service of it in his opinion the party is evading service or cannot be found after fair search has been made. In that case the petition is advertised and notice is served on a near relative. We have only had divorces in England by legal process since 1858. Formerly relief for unhappy wedded folk was found under the canon law or through parliament."

Stonewall Jackson as an Instructor.

[B. H. Todd in N. Y. Times-Democrat.]

As an instructor Professor Jackson appeared to be careful and painstaking; but he fell far short of being a success in that line. But Jackson's fame does not rest upon his career as a professor; the latter is a mere episode in his life, and anything many of his admirers is not taken into consideration at all. At recitations he shot out questions like words of command, and the student who answered quickly and rapidly was sure to receive a better mark than one who replied slowly and with deliberation. He tolerated no legends, and woe be unto the cadet who might be negligent of studies or the proper performance of his military duties. He carried his soldier manner into the class room, and replied, elbows and close attention during recitations. Those at the blackboard were supplied with wooden pointers in demonstrating problems, and handled them with the precision of a drill. They did their steel sabres on drill or dress parade; whilst those called up for oral questioning took position squarely in front of the professor, and assumed the position of a soldier at equal drill.

There was little or no social intercourse between him and the cadet. If a student went to him in his private room, for some explanation or in reaction in regard to his studies, the conversation was confined strictly to the subject in hand, and this through with, he bowed and retired without further delay.

A New and Delicate Mode.

[Chicago Herald.]

A new and delicate mode of advertising is coming into vogue. A young man of fair street for example, A small householder in that thoroughfare exhibits in his window the riding habit worn by the wife of Col. Thornton who spoke to the great-uncle of Mr. Flint at York, in Aug. 1804. A tobacconist shows Sir Isaac Newton's tobacco pipe and stopper, and the stump of the cigar Marshal Moreau smoked when they cut off his limb at Leipsic. A shoemaker exhibits the riding boots of Claude Duval, the gentleman highwayman, and a pair of Wellington boots, the pumps worn by Beau Nash during his reign as master of the ceremonies at Bath. And so on.

Candid Indeed.

[Exchange.]

Palet displaying his picture—Now, candidly, Browne, old fellow, what do you think of the painting? I flatter myself there have been worse pictures painted than this.

Browne (candidly)—Yes, indeed, I have seen worse myself, and I have seen a great many poor pictures, too.

Oscar's New Hat.

Oscar Wilde has evolved a new style of hat which he hopes will supersede the prevailing "pot" shape. It is worn a trifle on the slant, the brim being a flower-pot set bottom upward.

Whene'er winter days are here
You'll have frozen pipes we fear,
And ye plumber with his tools will make
a call.
Eye bill for rosin and for lead
Will make you scratiche your poor olde
head.
And baddy words fromme out your lippes
are sure to fall.

They Now White He Will Keep.

[Rambler.]

Charley Backus, the well-known negro minstrel performer, was in the habit of visiting his mother, in New Bedford, Mass. While he was there he would go to church with her regularly Sunday morning, Sunday afternoon and Sunday evening. On one occasion a collection was being taken up in aid of the missionaries at the Sandwich Islands. The plate was being passed around and the frugal congregation were putting in their pennies and their shin-plasters, in the denomination of twenty-five cents. Backus almost mumificently dropped in a silver dollar.

His mother leaned over in the high-back pew and whispered:

"Charley, you will you be so extravagant! A quarter is plenty to put in that box."

"Never mind, mother," said the minstrel, "I play to the Sandwich Islanders next month, and I'll take in the whole collection."

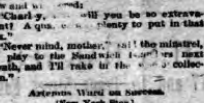
Artemus Ward on Success.

[New York Star.]

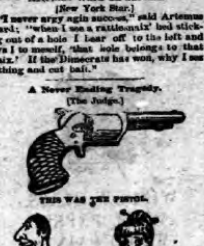
"I never enjoy agin success, said Artemus Ward; "when I see a rattlesnake bed sticking out of a hole I lear off to the left and says I to myself, 'the hole belongs to that snake.' If the Dimocrats has won, why I see nothing and cut bait."

A Never Ending Tragedy.

[The Judge.]



THIS WAS THE PISTOL.



THIS WAS THE YOUTH.

THE NAME OF HIS SWEETHEART. THE VICTIM, WAS RUTH.

HE WASN'T AWARE THAT THE PISTOL WAS LOADED.

AND HE ONLY FOUND OUT WHEN THE DARNED THING EXPLODED.

The Result of a Consultation.

[New York Sun.]

"Have you a revised copy of the New Testament in the library, Miss Smith?" asked the young minister, who was making an evening call, partly parochial and partly otherwise.

"No, Mr. Longprayer," she replied; "I regret to say that we haven't."

"What's a revised copy?" asked Bobby, who had been permitted to sit up beyond his usual hour.

"You are rather young yet, Bobby, to understand such matters," said his sister, kindly. "A revised copy means that certain changes have been made in the Bible that were considered necessary to a better understanding of the text. Now you had better run off to bed, that's a good boy."

The young minister could scarcely conceal his admiration.

"Well, if that's what it is," said Bobby, "our family Bible is revised, 'cause pa changed it the other day. He inserted out the date of your birth and made it three years later. He told me something about you and the minister, and said that it would fit do any harm nohow; and if ever Mr. Longprayer wanted to look at it, it might do a good deal of good."

Prosperity the minister went away and a family consultation was held. It resulted in Bobby's getting a sleepless night on the pit of his stomach.

Honest Enough.

[Texas Siftings.]

"Mamma, why is pa bald?"

"I am his fourth wife, darling."

Parliamentary Parallel: "The first steamship appeared in England in the year 1777." It is not stated whether the first steamship appeared in England, but it is safe to wager that was also in 1777.

Don't Shrug Your Shoulders BUT INVESTIGATE!

Parties desiring to invest in one of the splendid, new paying properties, either in the new south or manufacturing line, will find

PLAINFIELD SCHOOL OF ART.
No. 7 East Front street. I am now prepared to open classes in drawing, painting in oil, crayon, pastelle, monochromatic and water colors, at Room No. 7 East Front street (over Dr. Shaw's Drug Store). Terms satisfactory.
My method of teaching is considered much easier than the old in manner with taste for art can learn to sketch and paint from nature in a very short time and with less expense and less study. Everything made plain and simple but directly to the point. Special inducements to teachers in the public schools. Private lessons where desired. Pictures of all kinds to be had to order. Very Respectfully,
A. H. JOHNSON.
Orders, or calls, at Park House will be received with pleasure.

Thermometer Record.

Chronological Events.

La Salle born 1643.

JOTTINGS.

—Mabee and English are expected in Rahway next month.

—Springfield celebrated the Democratic victory on Tuesday evening.

—The American Agriculturist is out for December, as interesting as usual.

—Read the special notice in another column of Mr. Marshall's lecture on Monday evening.

—The Reformed church of Bloomington has called to its pastorate the Rev. Augustus Todd, of Schoharie, N. Y.

—The Women's Christian Temperance Union prayer meeting will be held on Monday at three p. m. in Reform Hall.

—In illuminating on the night of the recent parade at Somerville 300 candlesticks were used which served the same purpose in Jackson's time.

—There will be a special meeting of Gazelle Engine Co., No. 1, on Monday evening, at half-past eight o'clock, at which every member is earnestly requested to be present.

—The Philadelphia & Reading Railroad Company is making preparations to set about thirty maple and magnolia trees in the park, opposite the depot Bound Brook.

—The city Republican convention will be held in Association Hall on Tuesday evening. The primaries for the election of delegates will be held at the usual places on Monday evening.

—On Saturday, Nov. 29, the Somerset County Board of Examiners will meet for the examination of candidates for teacher's certificates, at the Public School building at Somerville.

—The case of Burns vs. Lynch came up before Mayor Mazson in the absence of the city judge, yesterday. Lynch was accused of breaking down a fence belonging to Burns. He was fined ten dollars. The case was appealed.

—Pressey and Lester, the famous star bicyclers, drew one of the largest crowds yet present at the rink last evening. They were most heartily received, and will appear again this evening. Music is furnished every evening and Saturday afternoon.

—The Boards of Registry of the various wards will meet for the purpose of revising and correcting the certified copy of the original register, and for the purpose of adding new names thereto on Tuesday, at seven a. m. and remain in session until seven p.m.

—Edsall's special November bargain sale commences next Monday. The novelty of this sale is an extensive line of fine wax dolls and ladies' handkerchiefs, as well as a long list of attractive bargains in useful and staple goods. The low prices at this sale will astonish the closest cash buyers.

—Daniel Webster was right when he said of the press: "Small is the sum required to sustain a newspaper; amply rewarded is its patron. I care not how humble and unpretending is the gazette which he takes, it is next to impossible to fill it without putting into it something that is worth the subscription price."

—Our jovial friend ex-Mayor Taylor, of Jersey City, now a permanent Park House guest, stopped us to-day to tell us that he never at Tue News was a success. We guess that the old gentleman is right. He says he not only has the paper left at his address, but also buys an extra copy on the street, to be sure not to miss a single number. A lady subscriber on Fifth street said to a carrier a few days ago that she could not do without it if she had to pay fifty cents per copy. We have numerous other similar testimonials of the kindly feeling toward Tue News, which make us as joyous as a summer day.

—The senior Democratic organ is politely referred for "verdant and bucolic" journalism to such metropolitan papers as the Tribune, Sun and World of New York. It is just possible that the organ grinder of a second-class country weekly knows more of journalism than the editors of the ab ovo-named enterprising dailies. On several other occasions the editor with the long name tried to teach New York journalists their business, but signally failed in the attempt. We refer of course to the exercises attending the dedication of Reform Club Hall. We were under the impression that a local newspaper, especially, should give local news. We may be mistaken in this, but at present we find our views very well met by the people of this locality, the long-eared weekling to the contrary notwithstanding.

Dayton—Potter.

Mr. Howard B. Dayton, of New Brooklyn, and Miss Nellie A. Potter, of Mount Pleasant, were united in marriage on Wednesday by the Rev. R. F. Ketchem, of the First Presbyterian church, of this city. Both groom and bride have many friends in this city.

CHARITY'S DARLINGS.

"Of Such is the Kingdom."

The News "Rambler" rambled into North Plainfield the other afternoon to visit the Children's Home, a very pleasantly situated three story building on the corner of Jackson and Westervelt avenues. The house is large, roomy and homelike, and admirably adapted to the noble purpose for which it was erected. On the ground floor are the reception room, dining room, kitchen, store room and a large apartment to be fitted up shortly as a winter play room. On the second floor are the two dormitories. The one for the girls, is bright and sunny and that for the boys, although not quite so cheerful, is very warm and comfortable.

In the girls' dormitory are nine little cots, and in the boys' dormitory seven.

On the walls are hung a number of pictures which, although not artistic, are no doubt very amusing and instructive.

Between the two dormitories, is the room occupied by the matron, with some unoccupying doors, so that she may be within call during the night in case of sudden croup or the never-failing request, in a stage whisper, "Please can I have a wink of winking water?"

The servants' rooms are on the third story, and there is besides a room that may be used as an infirmary in case of any contagious disease and the immense bare room, used as an indoor play room. Here the youthful members of the "Home" play, with leave to make as much noise as they like and are probably make use of the privilege to the fullest extent.

The children attend the Public School in North Plainfield, and on returning home each day, run to their patron saint, "the matron or "Ma'am," as they call her, to be kissed.

Every morning and evening they assemble for prayers and hear the bible read. On Sunday they go to church, in the morning and in the afternoon to Sunday School.

The children have the very best of tender, loving care, seem bright, happy and healthy. The institution is now in a flourishing condition and has the hearty support of every mother in the vicinity.

There are two little children, a boy and a girl, now at the "Home" whose amateur father deserted them to go West and marry again. The girl, a very affectionate little thing, took quite a fancy to the "Rambler" and allowed her small, chubby hand to rest main in his, while he talked with Mrs. Nevius the matron.

There are seventeen children now at the "Home"—ten girls and seven boys. As soon as expedient homes are found for the children in good families, where they are sure of being well taken care of.

Mrs. Nevius has had charge of the institution a long time, and is spoken of in the highest terms for her kind, motherly care of all the children that have been placed under her gentle guardianship.

The officers of the association are Mrs. Horace Kimball, President, Mrs. James Mc Gee, Vice-Presidents, Mrs. Chas. Place, Rec. Secretary, Miss Lucy H. Arrott, Cor. Secretary, and Mrs. L. W. Sorrell, Treasurer, Visiting Physician, Dr. Edward Rushmore, Matron of the "Home," Mrs. C. V. F. Nevius.

The Play this Evening.

We give below the cast of principal characters and the program for to-night's grand performance of Esmeralda at Stillman Music Hall. There is said to be no better play on the boards. The play is by the well-known authoress, Mrs. Frances Hodgson Burnet and Mr. William Gillette.

Esmeralda Rogers (her original role)
.....Miss Annie Russell
Elbert Rogers, her father.....Mr. F. Armstrong
Lydia Ann, his wife. "Mother ye know."
.....Mrs. Kate Denin Wilson
Dave Hardy, a young farmer.....Mr. Fred Ross
Estabrooke, a man of leisure.....Mr. G. Henderson
Drew, a mining engineer.....Mr. W. H. Pope
Jack Desmond, an artist.....Mr. Dana.
Noah } His sisters.....Miss Fanny Reeves
Kate }.....Miss Marion Russell
Marquis Montcada, an adventurer.
.....Mr. H. D. Clifton

Miss Fanny Reaves, Miss Annie Russell, Mrs. Kate Denin Wilson, Mr. W. H. Pope, Mr. H. D. Clifton and Mr. G. J. Henderson, appear in the above original parts, as played by them upwards of fifteen months.

Act I.—Interior of Old Rogers's House in North Carolina.
"Under the Shadow of Old Bald Mountain."
Act II.—Jack Desmond's Studio in Paris.
"The Letter which brought good news."
Act III.—Drawing Room in the Rogers's New House, Paris.
"Three aint North Ca'liny ways."
Act IV.—Desmond's Studio.
"The Sun still Shines on the Little House."

Board of Chosen Freeholders.

A special meeting of the Board of Chosen Freeholders was held Thursday afternoon with a full attendance except Mr. Debbie.

There was very little business except the passage of election bills.

Freeholder Hubbard offered a resolution that the Freeholders of Plainfield be instructed to build a culvert on Park avenue at a cost not to exceed $50. The resolution was adopted.

Upon resolution of Freeholder Doty, the collector was authorized to pay the Wrought Iron Bridge Company $1,000, the contract price for the construction of a bridge over the Railway river between Union and Springfield townships.

By resolution of Freeholder Etheridge, the representative from Linden township was instructed to repair six culverts in the township at a cost not to exceed $50.

Freeholder Pierson offered a resolution that a committee of three be appointed to build a bridge on South avenue, Westfield, at a cost of $500. Adopted, and Director Martine appointed Freeholders Pierson, Howard and Chapman as the committee.

A Painful Scene.

Last Saturday at the session of the Court of this County, Judge McCormack presiding with associates Hyer and Harper, the following occurred according to the Elizabeth Herald.

An indictment was presented against one Frank Chamberlin for horse-stealing.

"Indictment charged with the larceny of a horse from the stable of Mr. John W. Stearns in Plainfield last. In answer to Judge McCormack, Chamberlin said he had been a resident of Jersey City for fourteen years and was a shoemaker by profession. He could give no reason for his crime, except that he had been drinking and was crazed for the time. He said that he had the opportunity to sell the horse, but told the would-be purchaser that it did not belong to him.

Judge McCormack and his associates consulted for a few moments, and then imposed a sentence of one year in State prison. In passing the sentence Judge McCormack said that the court had received several applications in behalf of the prisoner from men occupying exalted positions in the State. The court was aware of what and who the prisoner was, but these were matters which must not influence a court of justice. It was true, it would bring disgrace and shame to a family, but this must be thought of by persons before falling into crime. The court would like to have included the gentleman who had written, but it was impossible. The crime carries with it a punishment by confinement in State prison. It was a painful to the court to pronounce as it was to the prisoner to receive, but there was no other alternative.

Chamberlin was greatly affected by the remarks of the court.

The name Chamberlin is not the correct one of the culprit. He told the court that he did not wish his family disgraced by his conduct and requested permission to be committed under a fictitious name, which request out of consideration for them, the Court granted. On Thursday the prisoner in company with two others, all three being handcuffed together, were taken to the State prison by Sheriff-elect Stiles. This was the first time he has performed such a duty. He did all in power to spare the prisoners needless publicity, removing them from the prison by a rear entrance and taking them to the depot in a hack that they might shun the gaze of the curious crowd in front, and then on the train to Trenton covering their shackled wrists with his overcoat, whereby they seemed as ordinary passengers. They kept their hats drawn over their faces and their heads bowed to escape observation and seemed to feel their situation keenly, particularly Chamberlin.

Church Services.

Rev. A. R. Tuttle will preach in the Methodist church to-morrow morning and evening. The morning subject will be particularly for young people. Subject: "How to Achieve Success."

Special attractive services will be held by the Women's Christian Temperance Union in Reform Hall at four o'clock, p. m., when a delegation of the prominent speakers of the Reform Club, including the president, Mr. John H. Franck, will deliver addresses. Mr. Dunham with a full chorus of Choristers will render spirited music. A full house and an interesting time may be expected. The choristers are requested to be in their places promptly at four o'clock.

Personal.

Mrs. A. L. Shotwell has again left her friends on Jackson avenue, North Plainfield, for her pleasant home in the far West.

Mr. and Mrs. A. R. Bushnell, of West Front street, who have been absent for about two weeks on a visit to Albany, N. Y., returned home last evening. During their sojourn in that city they were introduced to President-elect Cleveland, whom they say they found a very fine man. He stated that he feels very proud of New Jersey as his birthplace and otherwise. He gave the visitors his autograph which they brought home with them. They say that there has been a heavy snow storm in that city, sleighing is still very fine, and the weather very cold.

The Reason Given.

The New York Tribune contains the following concerning the Livingston case:

Mrs. Livingston is the daughter of Mrs. Marian-Pyne Cobb, whose forty-fourth birthday was the widow of a Bound street merchant of that name, who at the time left a large sugar plantation near Tuscumbia, Cobb.

Mr. Livingston, jr., has also written a letter, which was published in the Tribune, in which he says he knows why the wife left her husband, and that the reason is not that of physical inability on the part of her husband, who has been before the public as a prominent athlete and oarsman. The "stranger" who went to Plainfield for her was her brother.

The News said at the time that the "stranger" was her brother, but this Mr. Livingston, jr., denied. He furthermore in to-day's Tribune in a letter denies his father's allegations explicitly, and with a forcible-ness that don't show much insanity.

Advertised Letters.

The following is a list of advertised letters remaining in the Plainfield post-office, Nov. 21, 1884.

Allen, Mrs. E. H.
Broon, He 77

The management, in behalf of patrons, reserve the right to refuse admission to any objectionable person, or the use of the skates, and to call any person from the floor and refund money.
C. L. SKINNER, Manager.

Special Notices.
GRAND ENTERTAINMENT TO-NIGHT will be given at Stillman's Music Hall by the Literary and Musical Association. Admission thirty cents.
WHERE ROLLS THE OREGON.
If any one wants to find out just what kind of a country we have in the great northwest and cannot spare the time or money to take a trip through it, they should by all means go to hear Mr. Wm. I. Marshall in his Illustrated lecture in the Congregational Chapel on next Monday evening, Nov. 24th. The views with which Mr. Marshall illustrates his talks are simply grand. The lecture on Colorado two weeks ago was fully equal to the one on the Yellowstone. Those who have not visited the west, of which the present State of Oregon is only a small portion, will find in Mr. Marshall's talks a description of the best Mr. Marshall has already shown in our city. Go and see what a grand country we have beyond the Mississippi.
WINFIELD SCOTT POST OF THE G. A. R. will entertain their comrades and the Decimber Hall by the Literary and Musical Association. Admission thirty cents.

THE ATTENTION OF THE TEMPERANCE voters of this city is called to the fact that their attendance is earnestly requested at the special meeting of the Reform Club, for the especial purpose to be held shortly, dates to be hereafter announced by the committee appointed. It is the duty of every advocate of temperance in this city to attend this meeting, for the purpose of having placed in nomination for the Aldermanic office, who next year will vote for no rum in Plainfield.
THE P. D. C.
At their meeting Thursday evening unanimously adopted the following:
Resolved, That the Reform Club of Plainfield hereby reaffirms its non-connection as an organization with parties politic, but declares that the cause of sobriety may be advanced within this city, by means of temperance men, and hereby earnestly recommend to each member of the club, when exercising the voting privileges of a citizen at the municipal election, to support only such candidates irrespective of their political name, as we know to be temperance men, and in favor of the prohibition of the sale of liquor in the city of Plainfield.
FRANK W. DOREE, Sec.

Business Cards.
T. E. HAZELL, TEACHER OF MUSIC.
East Sixth street, cor. Franklin, Plainfield. Reading vocal music at sight a specialty. Lessons either private or in small classes. Correct and thorough singing instruction upon violin. Also Harmony. PRESS GLEANINGS.

It is said that the great desert tract in Northern Africa into which it is proposed to turn the waters of the Mediterranean was formerly an estuary of that sea, from which it was detached by some convulsions of nature. Traces of the old water-courses have been found, and the surveyors have been able to follow them for long distances.

Notwithstanding the complaints about the decline of shipbuilding in the United States, it appears that twenty-two thousand men are employed in this industry, and that 9,000 odd that are connected with railroad transportation. The value of vessels built yearly is about $40,000, and $22,000,000 is invested as capital by the ship-builders.

No less than a hundred and seventy-three inventions of car-couplers were brought to the notice of the Massachusetts railroad commission at a recent meeting. They were all intended to enable cars to be connected or detached with safety to the limbs and lives of the railroad men. Many hundreds of such devices have been patented within the last few years, but it appears that all the desirable features have not yet been met.

In a recent experiment at Paris several thousand copies of a newspaper were struck off in a press driven by steam generated by solar heat. To effect this the sun's rays are concentrated by a reflector, which moves so as to keep them focused upon a vertical boiler, the heat being so great as to produce steam. The heat of the sun has thus been utilized before, but this is the first instance in which a printing press has been run by this agency.

Gum-arabic comes from the tropical regions of the Soudan, where no little care is exercised in preparing it. It is usual to pick the material about a month after the rains are over—that is to say, in September. The gum is first dried and hardened, and then it is sent from the Soudan by one of two different routes. It either goes from Khartoum to Suez, via Berber and Saukin, which transport occupies three months, or it goes from Khartoum to Cairo down the Nile.

The crop of flax seed in this country this year will be from eight to nine million bushels, and the price ranges from $1 10 to $1 15 per bushel. Fully half of this is raised in Minnesota and Dakota. The flax straw is of comparatively little account, as we do not make linen, but it seems singular that we should not be able to utilize these thousands of tons of the best vegetable fibre raised. Why couldn't the paper makers use it as a substitute for rags? Here seems to be a chance for inventive genius.

A chair is in use in a Newport town which registers the weight of any one sitting in it without the sitter's knowledge. It is said that several ladies have been sincerely vexed at this stratagem.

AT THE END OF A ROPE

IT'S A VESSEL THIS TIME AND NOT A MAN.

The Latest Addition to Our Valuable Navy, The Dolphin, Meets With Disaster on Her First Trip—Where Has She Gone?

NEW YORK, Nov. 22.—The Sun has the following: The new dispatch-boat Dolphin, which John Roach & Son built about completed, was boarded, on Thursday morning, by Admiral Rodgers, Commander Belknap, Lieut. Barker, Constructor Fernald, Chief Engineer Hunsdon, and Mr. Henry Steers, members of the naval advisory board, as well as by a party of English and Dutch naval officers. A lot of baskets, boxes, cans and bottles had preceded them. Mr. John Roach and a small party followed them, and the whole party were received on the quarter-deck by Engineer Rodman.

About 9 o'clock Mr. Rodman ordered the lines cast off, and the vessel was then slowly backed away from the pier. When she had headed up toward Hell Gate the advisory board made a short visit to the hampers in the ward room, and then repaired to the engine room to watch the trial of the machinery.

Two accounts of what followed have reached The Sun. One says that the Dolphin steamed along under moderate pressure until she was abreast of Faulkner's Island light, a distance of about 90 miles from New York. Then word was passed to send her ahead at full speed in order that she might be tested over the course to New London. At the word, the story goes, the throttle was given a whirl, the steam rushed into the cylinder with a jump, and then came a crash that shook the ship from the starboard quarter to the stem-head and sent the pressure-gauge and the iron thing that projects above water-shaft the rudder. The main shaft had broken off close by the stern-post and the main bearing. The Dolphin made no further progress on her trial trip there-after.

As it was at that time about 2 o'clock the party went to lunch, and then Commander Howell was put ashore in a cutter in order that he might go on to Washington and make a report to Secretary Chandler, and thus keep the news of the failure from the press. On his way he was to stop in New York and send on a tug to haul the Dolphin home.

The other account says that the Dolphin steamed up through Hell Gate and around the Brothers, under the Astoria pontoon until she reached Larchmont, the starting point of the steam yacht race of last summer. Mr. Roach did not believe in luck, and hoped to return on the same course and the prestige of when Jay Gould's yacht Atalanta, built by the Cramps, beat his own Yosemite. From Larchmont on the straightaway course was taken under full steam. It is said that the Dolphin was as agile as the muscular fish whose name she bears, and easily exceeded in her speed the requirements of the board. When at 2:30 o'clock the vessel was off Faulkner's island light every one was perfectly satisfied with the work done, and the pilot-house order was given to head for home. He had just put the wheel over when without warning, the crash came, and the vessel was stopped. She was to anchor in 13 fathoms of water. The pilot was then sent on to New York for a tug, and the stock of good cheer being ample, all hands prepared to make themselves comfortable until help arrived.

At the navy yard yesterday it was said that there was no officer from the yard on board. They had nothing to do with the Dolphin there until she was formally accepted by the navy department.

At the office of John Roach, Mr. John Read said that he had received a short despatch only, which stated that the machinery had broken in some way. He had expected the party to return to-day, and as no one had arrived, so far as he knew. He expected the Dolphin back in tow somewhere between midnight and Saturday morning.

The Rest of the Navy.

NEWPORT, Nov. 22.—The new lighthouse steamer Cactus, accompanied by the tug Lyden, has arrived here, the latter having on board five large buoys, the largest weighing 11 tons, which are to be planted in Long-dington cove for the purpose of ascertaining and regulating the compass deviation of the new steel cruisers. Each ship will be swung around on to accurately expose any deviation at each point of the compass. Lieutenant Commander Lyons is officer in charge. The Cactus has steam launches to hoist the buoys from the deck of the Lyden to-day, but failed. She careened over to the water's edge, and as she began to lift it was found that the chain was "foul" the job up and engage a wrecking company to place them in position.

WASHINGTON, Nov. 22.—The secretary of the navy has ordered a survey of the United States steamer Tallapoosa, to determine the probable cost of her restoration to a serviceable condition.

Archbishop Purcell's Creditors.

BALTIMORE, Nov. 22.—A circular letter has been received by the members of the Plenary council from an association of the creditors of the late Archbishop Purcell, of Cincinnati, appointing a committee of five to confer with the council and take any action in the matter of the subject being referred to it. A prominent theologian said that he did not think the council would take any action in the matter, as the subject being referred to did not come within the scope of the discussions of the body. It is thoroughly understood, however, that it has been intimated by several prominent members of the council, that the claim has been adopted. The council experienced considerable difficulty in arranging satisfactorily the canon laws so that they might harmonize with the civil laws governing certain states. In considering this important subject the council proceeded with the utmost caution only after the most profound deliberation that they decided that the Catholic churches in the United States were entitled to canon law.

CINCINNATI, Nov. 22.—The archbishops of certain archbishops of the late Archbishop Purcell for redress to the plenary council at Baltimore has been received here. It is stated the courts will be besieged again for relief. A motion for reverse judgment in the district court will be filed. That failing to bring satisfaction they will go with the case to the supreme court.

Hanged for a Double Murder.

ST. LOUIS, Nov. 22.—Oliver H. Bateman was hanged at Savannah, Mo., for the murder of Austie and Adella McLaughlin, aged respectively 9 and 7 years, on Saturday, Aug. 21 last. The girls visited Bateman's on noon, ate dinner there and started for home. This was the last seen of them alive. Monday searching parties found Bateman's victims. The girls were found in a corn field. The coroner's jury after several day's session returned a verdict, filed by the hands of parties unknown. Newton Bateman and his brother Oliver were suspected of the crime Oliver Bateman was arrested on the 5th of September, and it was found that the ball taken from the head of Adella McLaughlin fitted Oliver's pistol. He afterwards made a full confession of the deed. At the trial he refused counsel, pleaded guilty and was sentenced to be hanged.

HE WASN'T THERE.

A Marriage Which Didn't Come Off—Troubles Caused by It.

SYRACUSE, N. Y., Nov. 22.—The young couple in love at Solvay, who were to have been married by Justice Hall on Thursday evening, but who disappointed the crowd that had gathered to witness the ceremony, were Miss Minnie E. Bailey and Mr. Frank Van Langen, a brother of young Von Langen, and one of his employers went to Miss Bailey's home and demanded the gifts that Von Langen had showered on his sweetheart. The ladies in their excitement surrendered almost everything, and they went away with the valuables and presents, filling an express wagon to transport them. On being informed of this fact Miss Bailey's attorneys had replevin papers issued for the return of the property. The officers went to Von Langen's house and secured the property.

The property replevined consisted of an elegant lamp, a beautifully upholstered easy chair and a large and plush rocking chair, square table, the center of which is beautifully inlaid with different kinds of wood, and a table of cake completed the list. The groom-elect, Mr. Von Langen said, was at Fellows Bros.' store, where his brother is employed as a travelling salesman.

Regarding the gifts Mr. Bailey gives the assurance that the property was safe in his possession, obtained one gold bangle ring, the bangle having on one side the initials of the giver and on the other side the date, 1883; one fine pearl opera glass, one plain band ring marked "M. E. Bailey, January 1, 1883," one cluster diamond ring marked "Minnie," set diamond pin, in the form of a sword and shield, one pair of diamond bracelets, the ends of which are crossed and the monogram "M. E. B." on each, one gold fan and box. The sticks of the fan were of pearl and the rest down and satin. There were also four jewelry articles.

The property will be transferred to the keeping of the girl, she giving bonds for their return to the Von Langens in case the marriage does not take place. The case will probably come up for trial at the February term of the county court.

It has been reported that the invitations to the wedding were issued without Mr. Von Langen's consent, but one of Miss Bailey's intimate lady friends said that this was untrue and added that Von Langen himself sent many of them away.

THE VOTE OF NEW YORK

Announced Officially by the State Board of Canvassers.

ALBANY, Nov. 22.—The state canvassers met at 10 o'clock this morning. Secretary Wood announced the footing of the tables as follows:

Democratic elector (Priest).....	563,154
Highest Republican elector (Carson).....	562,052
Democratic plurality.....	1,102
Lowest Democratic elector (Ottendorfer).....	562,048
Lowest Republican (Harris).....	561,891
Democratic plurality.....	1,157
Highest Prohibition elector (Wilson).....	29,002
Lowest Prohibition elector (Ellsworth).....	28,845
Highest Butler elector (Campbell).....	16,722
Lowest Butler elector (Campbell).....	16,722

After this announcement the members of the board signed the tables and certificates.

Hanged After Four Trials.

LEXINGTON, Nov. 22.—After four trials and three convictions John Bush, a negro, was hanged at noon for the murder of Annie Van Meter, a girl of 14. At the last moment Gov. Knott refused to commute the sentence. The case was before the courts nearly six years. Bush leaves a wife and seven children.

He made a speech of 25 minutes on the scaffold, asserting his innocence and charging that the girl's father shot her in shooting at him. Bush, while in jail, became a convert and for his kindness while the noose was being adjusted.

The father of the victim of Bush's crime is Henry Van Meter, a prominent farmer. On his return home from the county court on the day of the murder he undertook to regulate the vicious tongue of Bush's wife by complaint to her husband. Bush, then in the presence of Mrs. Van Meter, pronounced the charges against his wife a lie and called Annie Van Meter a liar. Bush then left the house and went to his cabin, where he obtained a pistol and returned to Mr. Van Meter's. In the yard he was met by Annie and Henry Van Meter. Bush fired at Annie, who was holding a baby in her arms, and fired, wounding her in the thigh. At or about the same time Van Meter went around the house with a double-barrel gun and the negro, but did not hit him. Annie's injury was but a flesh wound, which was not thought dangerous, but proved not in and she died a week after the shooting.

Rejoicing Turned to Mourning.

HAMMONTON, N. J., Nov. 22.—A peculiarly sad accident occurred here, by which several young men were severely injured. Last night there was a social out-come of an attempt to celebrate an occurrence which has been the subject of a great deal of gossip about here. Some days ago a disturbance arose between the families living close together. The husbands and wives of both families separated. On Friday last the quarrel was made up and matters were settled. The two families got together and chose Saturday evening to give the parties a salute. They fired a cannon. Supper was afterwards had and lasted until Tuesday night. Then they met again and fired. They were reloading for the fourth shot when the powder in the cannon exploded. A terrific explosion followed, and when the smoke had cleared away a sickening sight was revealed. Ellsworth Kirk, who had been operating the cannon, lay on the ground with his eyes blown out and the blood coursing from his face. He was alive but insensible. Others were differently hurt. Others suffered the loss of eyes and fingers. The sufferers were conveyed to their homes and medical aid was summoned.

Sabre Thirst Very Little.

CINCINNATI, Nov. 22.—At 9 P. M. the night watchman of the office of H. E. Hill & Co.'s wholesale grocery, on Pearl St., going to the office when four masked men sprang out and three revolvers were levelled at him. He was sternly ordered to keep still. The intruders pushed him into a side room, where one sat on him, while the others drilled the safe. The burglar from his seat on the prostrate watchman directed them. They lighted the fuse, and for safety conducted the watchman to an adjoining room. When the safe was blown open the disguised robbers found but $1 in cash. They plundered the watchman and ordered him not to stir for an hour under penalty of death. He obeyed, and the robbers escaped with $1. Mr. Anderson's dry ware manufactory, where they blew open the safe to pieces and got less than $10. Burglars have also entered Ranson's and Case-bolt's grocery stores.

West Virginia a November State.

WHEELING, Nov. 22.—Gov. Jackson has issued a proclamation declaring that hereafter West Virginia will hold her general elections in November. An amendment to the constitution to that effect at the recent election was ratified by a large vote.

A PECULIAR PERSONAGE

INTERESTED SPECTATORS LISTENING TO SOME AMUSING TESTIMONY.

Examination of the Defendant—Love Making in a Hurried Fashion—Flattering—A Test of Insanity, Sleeping with the Pigs.

NEW HAVEN, Nov. 22.—The society of Woodbridge and Bethany is stirred to its very depths by the developments being made in the court proceedings which are to decide whether Miss Minnie E. Doolittle is to enjoy the society of his young and pretty wife in peace, or whether a convention is to be appointed to take charge of the unfortunate subject. The court room was packed, persons coming for miles around to hear the testimony. Mr. Doolittle looked fresh and rosy-cheeked, while Miss Doolittle, who looked as pretty as ever and modestly seated herself in an obscure corner of the court room to avoid the gaze of the spectators, took several frightened glances at the object of her future consequence. When a child she had been compelled to work in a match factory. Her mother, she said, brought $4,000 to her father when she married him. Her father died and left her a farm, went to church or not. He indulged in obscene language and made love to the servant girl. He wanted to keep her, and would spring into the air to show how spry he was. On one occasion he crawled around the kitchen floor on his hands and knees and "barked" around the room like a dog. He would at times yell out "Happy day," and blow a silver whistle at the table while the family were at table.

Charles A. Doolittle testified that Mr. Doolittle had ridden around on his horse at a fair, and Mrs. Castle testified that she had heard him say that day that he wanted to get married.

"Now, madame," smilingly remarked Attorney Doolittle, for the defense, "does it betoken insanity in a man who wants fast that he wants to get married?"

The woman was puzzled to know just how to answer. Mr. Doolittle repeated the question. Mrs. Castle finally replied that she could not say that it was any sign of insanity, and the whole court room laughed.

Mrs. Ida Alling, another married daughter, appeared on the stand clad in black silk. She is less than 20, and a handsome woman. She testified that her father frequently ate his dinner by candlelight, saying that pork was "pretty good eating." He also objected to their having butter and gravy at the same meal. On one occasion he had asked her to give him 25 cents at a circus and regretted it ever since.

"Truly said," interrupted Attorney Doolittle, indorsing the thrifty and saving disposition of his client.

Mrs. Alling recalled that he had a cotton string fastened to the whistle which he carried in his vest. "Yes," she continued, "I've known him to be up with it in the night, and sleeping in the pig-pen. At the deathbed of my mother he stood and said he would never get married again."

Mrs. Alling told how her father sometimes cooked skunks and ate them. More unexplainable conduct on the part of Mrs. Alling's father, Mr. Kinsley, was that he lived, people, mostly women, to a house in Wood-bridge. Her father did not contribute one cent to her support.

"Didn't your father advance $200 to purchase household goods for you and your husband?" asked Mr. Doolittle. The witness said she did.

He was continually talking of marriage, and manifested a decided preference for a plethoric woman.

Reuben Perkins, a blacksmith, had seen Farmer Doolittle distributing sugar plums to ladies. Thomas Hieriahy, a farm hand, said the defendant formerly drank nothing but cider, and now he drank a little strong whisky. He told Hieriahy one day that he would soon be married, before the snow flies.

"Do you think he is doing better or worse now?" asked Mr. Hamilton of his witness.

"Begor, I think he'll do better now that he's married," replied Hieriahy. Every now in the court room roared with laughter and Judge York joined in.

There are 60 witnesses for the defense, and the trial will continue for several days.

A Conspiracy to Kill a Marshall.

CHICAGO, Nov. 22.—The existence of a conspiracy to kill Orange D. Douglas, the detective and deputy United States marshal, who is the principal witness against Wm. H. Tuthill, the alleged counterfeiter, Frank A. Owen, charged with illegal registration and bribery, is claimed by United States Attorney Tuthill. Douglas was waylaid while coming to vacated on Sheffield avenue after dark by two masked men and cruelly beaten. The assault was so sudden and the night so dark, that Douglas caught but a very imperfect glimpse of the men. After knocking him down they beat him terribly over the head and left him for dead. Douglas remained in the position he had fallen until 7 o'clock in the morning, when he was discovered by passers-by. Mr. Tuthill is satisfied that the assault was connected with the case of the above named gentlemen, and that this is the second attempt to murder Douglas, he having been twice fired at within a week near the same spot. Douglas will recover.

Lieut. Greely Received in New York.

NEW YORK, Nov. 22.—A reception was given to Lieut. Greely by the New York Geographical society at Chickering hall, and was largely attended. Among the prominent gentlemen present were Gen. Hazen, Gen. Sigsbee, Gen. Meredith Read, Daly, president of the New York Geographical society; Chief Engineer Melville, Prof. Theodore Dwight and a large number of naval officers. Lieut. Greely and the officers accompanying him on his Arctic explorations, including several of the Greely party. Mr. Greely spoke at length, recounting his experiences in the Arctic regions, and paid high tribute to the bravery and fidelity of his comrades.

Connecticut and the World's Exposition.

HARTFORD, Ct., Nov. 22.—Arrangements have been perfected for a meeting of Connecticut women at the Allyn house in this city Tuesday next, Nov. 25th, when Mrs. Julia Ward Howe, chief of the department of women's work of the World's Exposition, will speak. It is proposed to form a women's association that Connecticut be fully represented in that department.

The Week's Failures.

NEW YORK, Nov. 22.—The business failures throughout the country during the last seven days, as reported to the mercantile agencies of R. G. Dun & Co. of United States, and for Canada 29, or a total of 217 failures. This is an increase as compared with last week, when the total was 203. The increase is mainly in the western and southern states.

A VERY PECULIAR CASE.

The Curious Ways and Whims of a Politician.

NEWARK, Nov. 22.—Matthew C. Eaton, who claimed to be a resident of the town of Eaton, of Connecticut, has caused a sensation here by bringing a suit against William Shurts for a part of the expenses of a trip by Chicago to attend the Republican National convention. Both are prominent society men and members of the Jefferson club, a political organization composed of the leading Republicans of the city. At the trial Shurts claimed that Eaton hired an Associated Press reporter to go with him and paid him in the press. Eaton, also in sworn affidavits, says he privately engaged in order to impress ex-Senator Eaton of his importance. When the party reached Chicago Eaton claimed Shurts gave him elaborate letters to prominent men to deliver in case that Cleveland could not be nominated. They were to "boom" the ex-senator. Mr. Shurts says Eaton "boomed" himself in ways addressed M. C. Eaton as Mr. Eaton. He also says that M. C. Eaton tried to pass as an influential politician and that it cost him several thousand dollars to do it. After the Chicago convention Eaton proposed a trip to Yellowstone park in Dakota. As a matter of convenience Eaton suggested that Mr. Associated Press reporter of the party might be secured. The reporter got passes and the party went to Yellowstone park. On their return Eaton told the reporter to stay in Chicago and he would send him word to return. This he forgot to do. By a strange circumstance the reporter happened to be in the same car with Eaton on the train for obtaining money under false pretences. The reporter expostulated, but he was held in bail. The trial will be resumed on Wednesday next.

Eaton is looked upon as an eccentric individual. He is about 30 years of age, and is possessed of considerable means. His main object in life seems to be to figure as an influential politician. He calls the president-elect "Grove," and Mr. Hendricks "Tom."

Mr. Shurts is a highly respected citizen and the senior member of the firm of Van Alstyne and Shurts. The newspaper man seems to be the most unfortunate one of the lot. He is a Washington correspondent and is well known in New York journalism.

FRANK HATTON INDIGNANT.

He Says His Order Did Not Help to Defeat Blaine.

WASHINGTON, Nov. 22.—Postmaster General Hatton has addressed a letter to Joseph Medill, editor of the Chicago Tribune, replying to a statement originating with Mr. Blaine's friends, that Hatton's order to assistmasters, and recently published in the Tribune, in which Mr. Clarkson, after giving many reasons why Mr. Blaine was defeated, said: "Add to these Hatton's order to postmasters to stand still at the time; that in reply to a telegram on the subject he informed Mr. Rikin's that there was no law making election day a holiday, and that the postmaster at New York, if he so desired, could certainly give the employees of his office time to vote without seriously interfering with the business of the mails, and that Gen. Hazen, who was acting postmaster general at the time, telegraphed Postmaster Pearson to give employes a full opportunity to exercise their right of suffrage."

The House of Lords in Dungeon.

LONDON, Nov. 22.—The house of commons was never more like a bear garden than last night. Mr. Henry Labouchere made a speech in favor of abolishing which was full of sarcasm but was tempered by drollery. He arraigned the peers of England for every manner of crime committed since the days of Cain. Labouchere's speech was made in advocacy of his own motion to abolish, by act of parliament, the house of lords as a legislative adjunct. The Conservatives got angry at the attack and part of the minority vote was a surprise to every one. Although the house was very small there were 74 votes cast in favor of the motion and 189 against it. Twelve Parnellites voted with the minority. More than a score of members dodged the vote.

The size of the minority vote, despite the humorous aspect given to the affair by proceedings by Mr. Labouchere's address, is considered by some of the more puritanical of the Conservatives to be ominous. It was not believed possible that such a large registration in the commons could be secured in favor of the abolition of the legislative function. Collins, known as "Sir Hubert fun." Many a Tory admits that his eyes have been opened to the fact that a serious discussion of the question would show a much more strong enough to prove a menace to the existence of the house of lords as a legislative body.

A Theatrical Scandal.

RICHMOND, Va., Nov. 22.—Theatrical circles are exercised over a scandal which has culminated in the elopement of the youngest flight of W. T. Powell, the manager of the Richmond theatre. Powell's wife is the owner of the theatre. She is an elderly lady and was a widow when she married him some ten years ago. Rumor states that there were other than mere managerial troubles. Miss Powell, who is a very young and powerful man, assaulted his wife, striking her in the face both with his fist and a satchel. She caused his arrest, but he was bailed to answer charges in a criminal sum, and has since fled the city. The rupture will necessitate advirces, and require a new manager for the theatre here.

Regrets That He Was Not Killed.

ADAMS, N. Y., Nov. 22.—At a dance held at the residence of Mr. Samuel Holman, on Saturday night, Nov. 15, Mr. Dan Danks and was ordered out of the house by Holman. He refused to go, and a free fight ensued, in which revolvers were the weapons used. Samuel Holman was shot in the head by one Daniel Larkins, James Remington in the hand by Holman, and Boudette was shot by Holman in the leg. Many regrets are expressed that Boudette was not killed.

A Thousand Buildings in Canada.

OTTAWA, Nov. 22.—In Wood village the black smallpox is increasing. The fear of it in the neighborhood have purchased a full supply of provisions, built fences around their houses, and closed their doors against neighbors for fear of the contagion being carried into their families. Patients are neglected and left to die without assistance. In Village of Hemmingford the fair is suspended, and the village is cut off from the outside world.

A Through Line to the South.

NORFOLK, Nov. 22.—A large party, representing the New York, Philadelphia and Norfolk, the Pennsylvania, the Norfolk and Western, and the Seaboard and Roanoke railroads inspected the new line to Cape Charles. The new line is now open for business. The running time between Norfolk and New York is only 18 hours. It is designed to make this the great through line to the south.

LONDON'S SENSATION.

THE ADAMS-COLERIDGE LIBEL REVELATIONS.

The Lord Chief Justice in the Role of a Stern Parent—How an Unutterable Attorney was Sought to be Broken Off.

LONDON, Nov. 22.—Lord Chief Justice Coleridge is placed in a most unenviable position before the public by the action he has just brought against his son, Mr. Bernard Coleridge, by Mr. Mantell Adams. Mr. Adams, as a journalist, seems to be shrewd and determined in his suit, and has thus far managed to secure a large share of the public sympathy. He is conducting his own case, and during the proceedings endeavored to make a strong point morally against the Coleridges, both father and son. He showed by many letters which he read that the married lord chief justice's daughter. He said that the young lady was perfectly aware that he was a poor man, compelled to make his own way in the world. She had not been made the victim of any deception in this respect, and entered into the engagement with a full appreciation of the change in her material circumstances which her union would entail, and agreed to the marriage from motives of the purest and highest affection. When the lady made Adams' poverty fully acquainted with her intention, her father, Lord Coleridge, became furious and treated her with meanness and barbarity. When he found that his daughter's affection for the young man's fortune, he instigated his son Bernard to engage in the effort to poison her mind against her betrothed.

Bernard's efforts towards this end culminated in his composition of the letter to his sister, which forms the basis of the present action. In the letter Miss Coleridge was told that her lover was an adventurer, who sought her hand from unworthy motives, principal among which was a desire to secure membership in the firm of which he was the sole purpose of becoming, through her, a sharer in its property. He was further described as a man utterly devoid of principle and shunned and avoided by all. Everything sloped with a girl under age, taken her to Paris, and treated her with great cruelty. She was held in such collure by his strong will's parents, that on one occasion they took his child from him in order to protect it from his ill treatment. With faithful simplicity the young girl at the young lady's self-esteem by alleging that Adams had admitted to an inquiring friend that he was not going to marry Miss Coleridge for her fortune.

In his presentation of the case Adams said that Miss Coleridge was not shaken in her affection by the letter, but believed that the latter served only to excite her indignation. She immediately delivered the letter to him (Adams), for such action as he might choose to take with it. When Adams had found this out, he disinherited her and turned her out from the parental roof. Mr. Adams further showed that Miss Coleridge adhered to her engagement, and that she warmly supported him in his present action against her brother. Towards the lord chief justice, himself, Adams was very bitter, declaring that he was a "judge who would move heaven and earth to frustrate justice," when it adversely affected himself or his personal interests.

The action is being brought for £50,000 damages, Mr. Bernard Coleridge shows a disposition to make a vigorous resistance. His plea in defense is that the letter in question is a private communication from one member of the family to another, from a brother to a sister, warning her of her danger, must be considered a privileged communication, and is therefore not actionable. Adams contends against this that the law concerning privileged communications does not extend to the protection to only such communications as those, for instance, which pass between lawyers and their clients, and cannot be extended to cover such communications as the present injuries. So far as the rulings of the judge have indicated he appears inclined to support the plea raised by the defense.

Many of the leading men of the day have been subpoenaed to appear as a witness on next Monday, to which date the hearing was adjourned. Mr. Mildred Mary Coleridge, the heroine of the case, has also consented to appear on the witness stand.

No More Silver Wanted.

BOSTON, Nov. 22.—At a fully attended meeting of business men in the Merchants' exchange it was unanimously resolved to petition congress to discontinue the coinage of silver, for the passage of a national bankrupt law, and for a reciprocity treaty with Mexico and Canada. Speech Edward Atkinson, P. A. Valentine, Lewis Boutwell and A. A. Ranney were the principal speakers.

The Thief was Too Smart.

NEWARK, N. J., Nov. 22.—Gen. Williams, of Morristown, N. J., had his coat stolen while he took dinner in the Park hotel. The coat contained a pocket book with $1,000. Detectives were placed on the case, and the coat was found in a pawnbroker shop with the bond in the pocket, having been overlooked by the thief.

The Swain Court Martial.

WASHINGTON, Nov. 22.—The Swain court martial was devoted to the hearing of arguments pro and con on the claims in the second charge, referring to Gen. Swaim's neglect of duty in not notifying the secretary of war of Col. Morrow's duplication of his pay accounts.

Laughing at Justice.

PORTLAND, Ore., Nov. 22.—Pricke Sorho robbed the First National bank of Portland several months ago, and was captured in New York and brought back. He has been cleared on technicalities.

The Cholera in Paris.

PARIS, Nov. 22.—Twenty-three new cases of cholera appeared in this city from midnight to 6 P. M. Friday.

CONDENSED NEWS.

The New York Central passenger depot at Batavia, N. Y., has been destroyed by fire.

The will of the late Frank S. Chanfrau, the actor, has been probated. The estate is valued at $100,000.

Fire occurred in the Hotel Helan, Boston, by which it is believed two children will die from asphyxiation.

The lobbyists are beginning to assemble in Washington. The Chesapeake canal will be looked after by them.

The carpet weavers of Philadelphia, whose wages were reduced Thursday, propose to strike rather than submit to the reduction.

Abraham Barcaw, a brakeman on the Pan Handle railroad, was killed at mine 1 of the Masselon Coal and Coke company, near Connellsville. He leaves a wife and several children.

Abraham Barcaw, a brakeman on the Pan Handle railroad, was killed at mine 1 of the Masselon Coal and Coke company, near Connellsville. He leaves a wife and several children.

Mrs. Sarah Bell, of Hamilton, Ont., a woman of 70 years, was found dead in her bed. She had been murdered by some person unknown, who had entered the house and struck her on the head with a hammer.

In St. Thomas, Ont., a mass has been preaching sermons on the Canada Southern, and so demoralized the railroad employes that the company was seriously inconvenienced. To suppress him they had him arrested for vagrancy, and under an old statute he was sentenced.

THE RAILROAD WAR.

The West Shore Again Renews Hostilities. Other Roads Follow.

NEW YORK, Nov. 22.—The railroad war was vigorously renewed again by the West Shore railroad local agent announcing that the sale of round trip excursion tickets between New York and Chicago would be resumed forthwith. Bulletins to that effect were hung out at all the West Shore offices. Assistant General Passenger Agent Richards, of the New York Central, said the offices of his company would follow suit, and the Erie and Lackawanna agents also declared their intention to do the same thing. The general passenger agents of all the lines leaving west, with the exception of the Pennsylvania, agreed to withdraw the sale of theses round trip tickets three days ago. An agent of the West Shore claimed to have purchased a New York Central round trip Chicago ticket since the agreement took effect and hence this sudden declaration of war.

The general passenger agents of all the trunk lines between New York and Chicago are to meet at the latter city and act upon a proposition to restore rates, a penalty of $100 for'eit being contained in it for each act proven against an offending company; but it is now said that the agreement will not be signed because the Central's round trip coupons are a barrier. They are good until December 20.

Tickets to Buffalo are sold at the West Shore offices for $5, and by the scalpers at $3.50. The Chicago rate is $10.50 by the Central and $9 by the West Shore.

Mr. Blaine's Winter Home.

WASHINGTON, Nov. 23.—Mr. Blaine has at last succeeded in securing a house here for the winter. He was so certain of occupying the White House after the 4th of March that he paid but little attention to anything else until nearly all the desirable places had been taken for the season. If Mr. Blaine had been elected he would have remained quietly in Augusta till the latter part of February. To-day he engaged through his son, Walker Blaine, the Windom house on Massachusetts avenue.

If Mr. Blaine were still a candidate he might hesitate before entering this house. It cost its owner his seat in the United States senate. It was through a liberal distribution of pictures of Mr. Windom's house in Minnesota that brought about Mr. Windom's defeat for re-election.

Mr. Blaine will have among his near neighbors Senators Don Cameron, of Pennsylvania, and Palmer, of Michigan. The family expect to take possession in about ten days.

Hendricks Visits Cleveland.

NEW YORK, Nov. 23.—Ex-Gov. Hendricks went to Albany in a special car on the New York Central this morning, accompanied by Messrs. Barnum, Gorman, Jones, Smalley, Judd, of Illinois; Ham, of Iowa; Sullaway, of New Hampshire; Torpey, of California, and Wilson, of Maine, all of the Democratic national committee; also Gen. Carey, of Ohio; Mr. Preston, of Kentucky; Stenographer Dickenson, of the national committee, and others. On arriving at Albany they will be the guests of Gov. Cleveland until 2:40 P. M., when they will return to this city. This will be the first meeting of Messrs. Cleveland and Hendricks since the late election.

A New Use for Kerosene.

CINCINNATI, Nov. 23.—Mr. Ring and Charlie Gurrard, a lad aged 14, started for New Orleans in a steam yacht run by a kerosene oil engine. The craft is 21 feet long, 3 feet 10 inch beam; engine of one-horse power, and weighs 248 pounds; flour space, 42x26 inches; the cylinder is 2 inches in diameter and the stroke is 6 inches. The fire formed a pressure of air through an atomizer, which throws the kerosene in a very fine spray into the fire box.

Gen. Garfield's Estate Sued.

BOSTON, Nov. 23.—A Washington special to The Record says: "Mr. Rose, a clerk in the treasury department, acted for a year as private secretary to Gen. Garfield. His services were never paid for. After long correspondence he has placed his claim for $12,000 in Gen. Butler's hands for collection. Mrs. Garfield has offered him $3,000, but he insists upon the whole. It is hoped that some settlement will be made without bringing the matter in court."

Secretary Chandler Feels Hurt.

WASHINGTON, Nov. 23.—Secretary Chandler thinks that the fourth auditor in criticising the officers of the navy department, in his annual report, overstepped his authority and assumed functions that he did not possess. The secretary contends that the auditor's report contains no truthful statements, which have not been fully known to him and properly dealt with, while the auditor's form of presenting them he regards as highly improper.

Mills Reducing Wages.

LEWISTON, Me., Nov. 23.—The operatives in the Farwell mills at Lisbon have been notified of a reduction in wages varying from 10 to 15 per cent., on the first of next month.

The Hill and Androscoggin mills will shut down during the next week, and on resuming, the Androscoggin wages will be reduced 12 per cent.

Moody in Detroit.

DETROIT, Nov. 23.—Dwight L. Moody, the great evangelist, has arrived here from Buffalo and began a convention of Christian workers at Wattle's theatre, which will last two days. On Monday he leaves for Elmira, N. Y., and will then visit his two schools in Massachusetts. The audience at the theatre was very large. The meetings here are not revivals in any sense.

The Knights of Labor Triumphant.

HAVERHILL, Mass., Nov. 22.—The labor trouble at C. H. Hoyt & Co.'s shoe factory has been settled by the proprietors hiring again the man whose discharge caused the difficulty. All workmen have returned to work. This is regarded as a triumph for the Knights of Labor.

Another Garfield Statue.

ST AUGUSTINE, Nov. 22.—The congressional committee appointed to select a site for the Garfield statue, which is to be provided by the army of the Cumberland, have decided to erect the statue in the circle east of the Capitol building, at the intersection of First street and Maryland avenue.

Roses Blooming in Oregon.

PORTLAND, Ore., Nov. 22.—Emigration to Oregon is increasing. Over 500 have arrived since the 1st of November at Portland. They are a good class of people and come to make Oregon their permanent home. The weather is mild and roses are still blooming.

Discussing the President's Message.

WASHINGTON, Nov. 22.—At the cabinet meeting the president's annual message, which is now being prepared, was the topic of discussion.

Their Wages Reduced.

PETERSBURG, N. H., Nov. 22.—The wages at the Phœnix and West Peterboro cotton mills will be reduced ten per cent. Dec. 1.

Consumption can be Cured!

This fact has been demonstrated in more than

TEN THOUSAND CASES by

DR. S. D. HOWE,

The Great Consumption Doctor of New York, PROPRIETOR OF THE

Arabian Medicines,

Celebrated throughout the World for their remarkable Cures.

TESTIMONY

Of the Hon. Jos. E. Cary, Judge of the Superior Court, Chicago, Ill.

CHICAGO, Dec. 14th, 1876.

DR. S. D. HOWE,

DEAR SIR—Permit me to add my grateful testimony to the many, of witnesses to the virtues of your justly celebrated Arabian remedies. For a long time my wife was seriously afflicted with hacking cough, oppressed breathing, soreness of the chest, and constant acute pains in the lower portion of the right lung and under the shoulder blade. Her suffering were intense, and she became extremely nervous and prostrated. Her disease was pronounced consumption by the physicians of Chicago and other cities, where she went, but all to have without benefit. When you visited Chicago in June, 1876, we called on you, having very little hope of her recovery from your treatment. We were inspired with hope by the skillful manner in which your thorough examination was conducted, and the confidence and appreciation with which you aimed your diagnosis. My wife determined to use your medicines in accordance with your plain and practical directions. She began to use the Arabian Milk-Cure and Arabian Tonic. Their beneficial effect at once became manifest—the cough loosened, the nervous exhaustion became easy, the soreness of the chest was relieved and all pain removed, she began to gain in flesh and strength, and in a few weeks, I verily believe that your medicines and skillful advice have saved the life of my wife. She unites with me in this grateful tribute to the merits of your remedies.

Very respectfully yours,

JOSEPH E. GARY.

The above letter is only one among thousands received from all parts of the United States.

Price of Milk Cure & Tonic, each $1 per Bottle.

PILLS, 25 Cents per Box.

Sold by C. A. BUTLER, Druggist.

A NEW PAVEMENT.

The undersigned has secured the exclusive agency for the sale of the

Diebold Patent Iron Stone,

which for elegance and durability, is unsurpassed, and in price will compare favorably with any other pavement now in use. It is the most beautiful pavement known for walks and yards, gutter stones, door sills, and street; likewise for the build fire and Burglar proof vaults; and for building purposes generally. These stones have many striking features. They show no perceptible wear; are non-absorbent; repel ice and snow, and on all kinds of asphalts. When stones are taken on the ordinary brick, the material remains perfectly free from dirt. These goods are on the market from time and are the leaders of cheapness. Specimen on exhibition at Werner's Fancy Store, opposite Stillman Music Hall. For further particulars call on or address

The Sun.

THE SUN is, and will continue to be, a newspaper which tells the truth without fear of consequences, which gets at the facts, no matter how much the process costs, which presents the news of all the world without waste of words and in the most readable shape, which is working with all its heart for the cause of honest government, and which therefore believes that the Republican party must go, and must go if it does not do right. (Adv.)

About sixty million copies of THE SUN have gone out of our establishment during the passed twelve months.

If you were to paste end to end all the columns of THE SUN printed and sold last year you would get a consecutive strip of interesting information, one seven inches broad and a mile long. That would be long enough to reach from Printing House square to the top of Mount Copernicus in the moon, then back to Printing House square, and three quarters of the way back to the moon again.

But THE SUN is written for the inhabitants of the earth; this same strip of intelligence would girdle the globe twenty-seven or twenty-eight times.

If every boy of THE SUN family the passed year has spent only one hour over it, and if his wife or his grandfather has spent another hour, this newspaper in 1883 has afforded the human race thirteen thousand years of steady reading night and day.

It is only by little calculations like these that you can form any idea of the circulation of the most popular of American newspapers, or of its influence on the opinions and actions of American men and women.

If you know THE SUN you like it already, and you will read it with accustomed diligence and profit during what is sure to be the most important year in its history. If you do not yet know THE SUN, it is high time to get into the sunshine.

Cor. Somerset and Emily Sts.,

North Plainfield,

John W. Hughes, Prop.

Permanent and Transient Board, at fair rates. First class Stabling and sheds attached.

Meals at all (reasonable) hours. 5-6-12-82.

KING'S PATENT COAL ELEVATOR.

This machine is now in use to my yard, No. 62 Park Avenue. It thoroughly proves the coal that passes over it. The coal comes down a spout from the street, so that the dirt goes straight through. I invite the public to call and see it work. I have also Honeydew Kind other first-class coal to serve, as follows: Also Lehigh Wood, and A. Mikell, Jr's Fertilizers and Iowa Grain.

MONDAY MILD.

Park Avenue, Plainfield, N. J.

The Dunning Self-Feeding Bone Steaming Boiler for Grinding Bone, Feed and Fertilizers. Also Bone Mills for Hand and Power. Send for circular and price list. E. W. GARFIELD, Agent, Plainfield, N. J. Also agent for Lehigh Wood, Iowa Grain, Fertilizers and Bone Meal. Office, 25 Somerset street.

KINDLING WOOD

Wood for Open Grates a Specialty

Guaranteed Split just wood in the city. E. C. MULFORD, 35 Monday street. P. O. Box 35.

PROMINENTLY BEFORE THE PUBLIC

A Pictorial Introduction to a Few Faces of the Discerning Pompers.

MARY MAPES DODGE.

Probably no editor in the country occupies a more delightful sanctum than that of Mrs. Mary Mapes Dodge in The Century Co.'s new home in New York; and few editors have the faculty of knowing so thoroughly what is practical and pleasant reading for youth. Mrs. Dodge is the daughter of Prof. James J. Mapes of New York city. She married, and was left a widow, with two sons, at a very early age. To the education of these sons she has given all the time and intelligent attention that a devoted mother could. In 1870 she first acted in an editorial capacity on The Hearth and Home. For nearly ten years, for she was present at the birth and christening of The St. Nicholas Magazine, has Mrs. Dodge been its editor. She has written numerous juvenile books. Her "Hans Brinker" has been translated into many languages. "Baby World" is her most recent compilation, though "Donald and Dorothy" is the book she is most proud of.

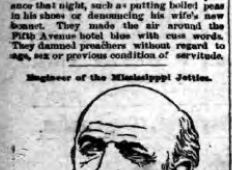
"Rum, Romanism and Rebellion."

REV. SAMUEL D. BURCHARD.

At the meeting of ministers held at the Fifth Avenue hotel, New York city, to honor Mr. Blaine, prior to the late election, the Rev. Mr. Burchard, as chairman, in his address of welcome, said: "We are Republicans, and we don't propose to identify ourselves with the party whose antecedents have been Rum, Romanism and Rebellion." The result of this alliteration was, according to "Gath," that the first distress in this campaign began to go around. The Republicans had been petting up our Irishman, playing tunes to him from Tom Moore and the Irish melodies, and they thought they had a sure thing on him for once. They knew he was pretty slippery, like the Man of his native land, and might get away. But here was an old Baptist Calvinist who had in two minutes undone all the work of Blaine's great hour.

It was discouraging. If old Dr. Burchard had heard the damns and the various forms of blasphemy which straightway proceeded from the Republican throat he would have had occasion to resort to some kind of penance that night, such as putting boiled peas in his shoes or distressing his wife's new bonnet. They made the air around the Fifth Avenue hotel blue with cuss words. They damned preachers without regard to age, sex or previous condition of servitude.

Engineer of the Mississippi Jetties.



CAPT. J. B. EADS.

An apparently insurmountable difficulty in the navigation of the mouth of the Mississippi river has been the enormous quantities of mud and sand which have been carried down the river and deposited at its mouth. An idea of the extent of this deposit may be gained from the fact that the river empties into the Gulf of Mexico 74,000,000 cubic feet of water per minute, each *cubic foot containing nearly two cubic inches* of mud and sand. This earthy matter has, in the course of ages, formed a delta which extends 100 miles from the main shore line of the gulf. To remove the bars already formed and to secure a perfectly navigable channel at all times was a question that puzzled engineers until the winter of 1874 Capt. Eads appeared before congress and offered to perform the above task without remuneration until his undertaking was an accomplished fact. After considerable opposition on the part of rival engineers, who had plans of their own to recommend, permission was granted him in March, 1875, and in June he commenced the construction of "jetties" and improved the channel so that the largest vessels may pass the Mississippi river.

An Irish Bull—Latest Edition.

[New York Tribune.]

A man having built a large house was at a loss what to do with the rubbish. His Irish steward advised him to have a pit dug large enough to contain it. "And what," said he, smiling, "what shall I do with the earth I dig up from it?" To which the steward, with great gravity replied: "Have the pit made large enough to hould it all."

Left by the Former Cook.

[Plaquedo Monitor.]

A lady who often changes her servants found on the first day after the arrival of her new cook a dragoon concealed in the kitchen dresser. "Jane, how did the soldier get there?" "I really can't tell, madam; I fancy he must have been left there by the former cook!"

The Extraordinary Young Lady.

[Cincinnati Tribune.]

Once in a Large City there dwelt a Maiden whom Mother, being in Moderate Circumstances, was put to great straits to so educate her Daughter that she might occupy a Higher Walk in Life. She worked hard, and deprived herself of every Comfort. And how was she rewarded? Strange to say, this Young Lady appreciated her Mother's Sacrifices, and did all she could to lighten her Labors. Upon returning from School she would devote her time to the Kitchen until the hour for her Music Lesson arrived, and then she would make the Old Home Howl. She arose early and assisted with the Washing and Ironing, and when her Young Man took her to the Ice Cream Parlor at Night she always slipped some Choice Cake into her Pocket for Ma. Finally She and the Young Man were married, and the Best Room in their House was devoted to the Old Lady, who never afterward did a Lick of Work.

MORAL.

This is not a True Story. It is a Fable.

A Hero of the Soudan.

MAJ.-GEN. C. G. GORDON.

The name of "Chinese" Gordon has been constantly before the public within the past year in connection with his mission of pacification among the unruly tribes of the Soudan. An expedition for which the British parliament has voted the sum of $50,000,000 is now moving down the Nile to his relief. Gen. Gordon is 54 years of age, and has been a striking figure in the foreign policy of England for the past twenty-five years, serving with success on missions to China (where he earned the sobriquet of "Chinese" Gordon), to India, to Africa and various parts of Europe. The experiences and result of his stay at Khartoum during the present year will be exceedingly interesting reading.

Reasoning by Analogy.

[Philadelphia Call.]

Little Dick: "What is those animals in that big window, mamma?" Mamma: "Them is a fur store window and the animals are seals and bears." "Is they alive?" "Oh, no. They were shot and stuffed, and then stood up to look as if they were alive." "Why are those ladies in the window by them, mamma?" "They are dressed-up figures to show the new styles in furs." "Ain't the ladies alive, too, pa?" "Was they shot and stuffed, too?"

Founder of the "Paulists."

REV. ISAAC T. HECKER.

One of the most prominent figures at the late plenary council held at Baltimore, was Father Hecker, the editor of The Catholic World, and founder of the Order of the "Paulists." A native of New York city and a brother of the celebrated flour merchants, he early began the study of social and communistic theories and with that end in view he joined in 1843 the Brook Farm community, and later the "Oneneida Family," both of Massachusetts. After the failure of these societies he entered in 1845 the Roman Catholic church, became a priest, and in 1857 founded a community called the "Congregation of St. Paul the Apostle." This society has about completed a church edifice in New York city which will be numbered with the largest in the United States.

A Question of Her Art.

[Boston Courier.]

"Have you weak eyes?" said a lady to an applicant for a kitchen position who wore blue spectacles. "No, ma'am," said the applicant, "but I never cook and things so thoroughly that the glitter of them hurts my sight."

Founder of the Rugby Colony in Tennessee.

THOMAS HUGHES.

The author of "Tom Brown's School Days," "Tom Brown at Oxford" and other popular works, though 61 years of age, is still active and hearty. He has served in parliament many times and distinguished himself by his efforts in the cause of education for the laboring classes. He visited the United States in 1869 and 1870, and has established a social and industrial colony in Tennessee.

One Way to Apologize.

[Pittsburg Chronicle Telegraph.]

It was in a car-house. A big man and a little man stood side by side. "Gimme the nail, please," said the little man. "I'm not the weakest," said the big man in a surly tone. "Excuse me," was the retort. "It was a mistake any one would have made."

Boston Post: A lady, joking about her name, said: "I had nothing to do with giving it. It was a birthday present."

Author of "Words and Their Uses."

RICHARD GRANT WHITE.

Though Mr. White has been a constant writer for over forty years, his book on "Words and Their Uses," published in 1870, brought his name into greater prominence, and placed its author among the leading etymologists of our time. Mr. White was born in New York in 1822, studied medicine and law, and began about 1840 as a newspaper writer on The Courier and Enquirer, and has been an almost constant contributor to various journals since.

Not a Dissenting Voice.

[Columbus Dispatch.]

Said a good sister in her testimony at a late camp meeting: "My husband opposed my coming to this sacred spot, but I can truthfully say that in coming here I have received a blessing, and I know that when I reach home my husband will get a blessing." No one seemed to doubt her.

A Distinguished Boston Divine.

REV. JAMES FREEMAN CLARKE, D. D.

Among the clergymen whose opinions where quoted during the recent political campaign, the name of James Freeman Clarke was conspicuous. Dr. Clarke is 74 years old and has for fifty-four years been a prominent leader of thought as an author and preacher. He has for years been one of the overseers of Harvard College, and for over thirty years pastor of the Church of the Disciples at Boston. He has recently expressed a desire to retire from the ministry.

Eager to Meet Him Now.

[Arkansaw Traveler]

"Let's cross the street and meet that fellow again," said a man to a companion with whom he was walking, "I owe him a dollar, and I want to pay it to him now." "Why, you spoke just now if you have business with him!" "I have no business with him." "Then why do you wish to meet him again?" "Well, you see, I used to owe him, and in consequence would avoid meeting him. Recently I paid him up and now I like to meet him. It's like Mark Twain's story of *the boy who found a dime. He kept throwing it into a crack in front of him to get it again.* Come on, I want to meet him. I wish I had nothing to do but to meet him all day."

Now Visiting the United States.

FLORENCE MARRYAT.

This well-known novelist is the daughter of Capt. Marryat, whose writings most every schoolboy knows, now in 67 years of age; began writing stories at the age of 11 years, and has since published nearly fifty books, besides being a regular contributor to the periodical press, and for a time editor of London Society. She is now making her first visit to this country, with the intention of publishing her impressions of us.

Men Who Work the Lever of Public Opinion.

[Eugene Field.]

The Man is at the Desk. He is an Editor. What is that in his hand? It is a Microscope. What does the Editor want of a Microscope? He is looking for his Salary.

Behold the Printers. He is Hunting for a Pick-up of half a Line. He has Been hunting for Two Hours. He could have set the half Line in Twenty Seconds, but it is a Matter of Principle with Him never to Set where he Can pick up. The Printer has a Hard Time. He has 2,000 type all night and Play pedro for the Beer all Day. We would Like to Be a Printer were it not for the Night Work.

Here we Have a Business Manager. He is Blowing about the Circulation of the Paper. He is saying the Paper has Entered upon an Era of Unprecedented Prosperity. In a Minute he will go up stairs and Chide the Editor for leaving his Gas Burning while he Went out for a Drink of Water, and he will dock the Reporter Four Dollars because a Subscriber has Licked him and he cannot Work. Little Children, if we Believed Business Managers went to Heaven we would Give up our Paw in Church.

Making Her Bangs Stay Bang.

[Semi-Weekly Death Rattle.]

In anger her two agile jaws, and sweet words darted from her tongue; the maid was fighting mad, because she couldn't make her bangs stay hung.

Boston Transcript: Stanton Alcott proposes that Sumvant's house at Concord shall become a Mecca for literary pilgrims from all parts of the earth. Concord ought to Mecca good thing out of it.

Signal Office Prediction.

Slightly warmer, fair weather, variable winds, gradually from southeast to southwest, lower barometer.

Chronological Events.

La Salle born 1643.

JOTTINGS.

—Reserved seats for "Olivette" are now on sale at the drug stores.

—The wind last evening was playing havoc with the Democratic banner when some kindly disposed persons pulled it in.

—Rev. Mr. Richards of the Crescent Avenue Church will lead the young men's meeting at the Y. M. C. A. this evening.

—The rite of baptism will be administered in the parlor of the Methodist Episcopal church by the pastor on Friday afternoon.

—Services will be held in the Trinity Reformed church, Rev. A. V. Raymond, pastor, on Thanksgiving Day, at eleven o'clock a. m.

—The first Bowan Class prayer meeting of the season will be held to-morrow evening at the Warren Mission Chapel, North Plainfield.

—L. M. French is turning out some very fine carriages. Read his bargains in second hand carriages, announced among the special notices.

—Justice Nash this morning committed Frank Moncton to the county jail to await the action of the grand jury in default of one hundred dollars bail, for an assault on James Kelly.

—There is to be a sociable in St. Mary's Hall on Thanksgiving night for the enjoyment of the ladies and gentlemen who assisted at the late fair. Good music will be in attendance.

—Correspondent "Nellie," sends us a communication with an extract, too long for publication, urging voters to attend the primaries to-night and secure delegates in the interest of prohibitionists.

—A lady was heard inquiring to-day as to where she could procure a suit of men's clothes whereby to attend the primary in her ward to-night and do what she can not do as a woman—vote. It might be well to advertise for a suit, giving dimensions.

—The sermon on "Success," which was to have been preached in the Methodist Episcopal church last evening by the pastor, the Rev. A. H. Tuttle, was on account of the weather deferred until another time. The present adjourned to the lecture room where a prayer meeting was held.

—The city fathers of Elizabeth are gravely considering the feasibility of mounting their police on bicycles. The spectacle of a fat policeman on a hot day going up hill after a timber-logged drunk and disorderly would be a sight at which gods and men might well wish to lean up against the fence and die.—New Brunswick Home News.

—General Sherman and President Arthur were present at Ford's Opera House, Washington, on the occasion of the performance of "Olivette" by the Wilbur Comic Opera Company, who are to present the same opera at the Music Hall in this city on Wednesday evening. At the close of the encagement there, General Sherman said, "I am more pleased with this company than any I have yet seen in Washington, and hope to see you again soon in this city."

A Ladies' Commission.

Governor Ash-ti has appointed the following as a New Jersey Ladies' Commission to collect an exhibit of women's work in this State for the New Orleans exposition, viz:

Commissioner, Mrs. Erminnie A. Smith, of Jersey City.

Alternative Commissioner, Miss Emma Lewis, of Woodbury.

As Assistant Commissioners, Miss Annie Apgar, of Trenton; Mrs. C. H. Barney, of Hackensack; Mrs. James Buchanan, of Trenton; Mrs. Edward W. Evans, of Trenton; Miss Fayette Jennings, of Camden; Mrs. Daniel Jones, of Freehold; Mrs. P. T. Kempson, of Madison; Miss M. M. Lowrey, of Hamburgh; Mrs. James W. Miller, of Newark; Miss Anna H. Merrill, of Vineland; Miss Eva D. Morford, of Newton; Mrs. J. F. McCoy, of Jersey City; Mrs. David O'Mara, of Newark; Mrs. William Reid, of Newark; Mrs. C. L. Rowland, of Vernon; Mrs. P. H. Silliman, of Jersey City; Miss Anna Weibert, of Jersey City; Mrs. Isaac Westbrby, of Trenton; Mrs. W. W. Warner, of Forth Amboy; Mrs Mason C. Weld, of Closter; Mrs. E. F. C. Young, of Jersey City.

An Election Bet in Springfield.

Prior to el-ction, A. P. Stiles, a well-known Springfield, U-ion county, Republican, offered to allow J. C. Bell, a Democrat, to cut down a flagstaff which he had erected, should Blaine be defeated; but if-the returns he has changed his mind and declared that it shall be spared. The young Democrats declare that it must come down. Several attempts have been made to lower the top of the staff but the men were put to flight. Each morning the colors have been taken in the direction of the staff and as it still stands they express pleasure or disgust according to their politics. The owner of the staff declares he will defend it with his shotgun, while his opponents declare it will come down if they have to erect a "boosting" and dig the staff up. There is much feeling over the matter, and threats of blood-shedding are made.

Democratic Primaries.

The Democrats of the First and Second Wards held their primary meetings on Saturday evening in the rooms of the Democratic Association on Park Place and Front street.

The First Ward meeting was called to order at half-past seven. Walter L. Hetfield was chosen chairman and Louis F. Wadsworth secretary. The following nominations were made: For Councilman—Tallman Flaig; For Justice of the Peace—Tallman Flaig; For Constable—Vincent L. Frazee; For Judge of Election—Vincent L. Frazee; For Inspector of Election—Louis F. Wadsworth; For Clerk of Election—Walter L. Hetfield. Delegates to the city convention were chosen as follows: Louis F. Wadsworth, Vincent L. Frazee, S. C. Littenberry, W. L. Force, Solomon Fiaig, Walter L. Hetfield. Resolutions were passed giving the delegates to the city convention the privilege of forming themselves into a citizens' meeting, if they deemed it advisable.

The Second Ward primary was called to order at eight o'clock. James Martine was chosen chairman, and Louis F. Stover secretary. The following nominations were made: For Councilman—Gilford Mayer; For Judge of Election—Albertus Swain; For Inspector of Election—Louis F. Stover; For Clerk of Election—Joseph G. Miller. Delegates to the city convention were elected, as follows: James Martine, Louis F. Stover. Resolutions authorizing the delegates to the city convention to form themselves into a citizens' meeting if they deemed it advisable were also passed.

The Third and Fourth wards will hold their primaries at the rooms of the Democratic Association this evening at half-past seven and eight o'clock respectively. The city convention will be held at the same place to-morrow evening at eight o'clock.

The Coming Attraction at the Music Hall.

Manager Marsh, of the Music Hall, has been fortunate in having secured for the evening before Thanksgiving the well-known Wilbur Comic Opera Company, who will perform in "Olivette." This opera has achieved unbounded success wherever and whenever presented.

The Philadelphia Evening News says concerning "Olivette" as performed by the Wilbur Company:

There was a large and delightful audience in the Academy last Tuesday night to witness the performance of "Olivette" by the Wilbur Opera Company, and when the curtain fell on the last act it was evident that the charming opera had never been so well rendered in this city. The Wilbur Opera Company is a remarkably well drilled and balanced organization and gives an entertainment far more complete and effective than is usual with travelling organizations. Miss Susie Kirwin's "Olivette" is a charming comic piece, full of brightness and sprightliness, and her singing was perfect in the bell-hackneyed performances of the character we have had. Miss Kirwin sings well and acts effectively, and on Tuesday night was especially effective as to command unanimous encores. Miss Ray Dacosta made an admirable "Countess Valentine," and Miss Ada Gray's article, Mes-rs. J. E. Brand, as the Duc Des Ifs, and Frank L. Lowe, as Captain Fracasse, all that could be desired, and Mr. McClinn' De Merrimac calls for a word of praise. The chorus is well trained and the work generally well done. Altogether, it can be said that those who miss seeing "Olivette," which it will be repeated this week will miss seeing the best performance of the opera yet presented in Philadelphia.

Somerset County Petit Jurors.

The following list of petit jurors for Somerset county was drawn Tuesday by Sheriff McMeekin, before Judge Scudder, Thompson and Jameson, to serve during the December term of the Somerset courts:

Bedminster, Morris M. Crater, Emanuel Wood, John P. DeMott.

Bernards, George W. Doty, Robert Van Doren, James C. Lefevre, Frank Ballantine.

Branchburgh, Richard Sutphen, Wm. F. Williamson, Charles W. Clark, John C. Crater, George C. Schomp, Benjam D. Vanderbeck.

Bridgewater, Richard H. Layton, Augustus Mc Clain, Charles Updyke, Ebenezer S. Daily, Peter H. Smith, Conrad Stein, John H. Van Doren, Wm. Brown, Ferdinand H. Van Derveer, Jos. Richardson, Edward C. Stover, Geo. W. Van Sant, Lemuel Kitchen, Jacob Butler, John B. Lane.

Franklin, Franklin De Hart.

Hillsborough, George H. Miller, James Z. Barcus, Jacob Young, Abram C. Wikoff, D. Reading Disbrough, J. Rue Sutphen.

Montgomery, Henry Van Zandt, Jacob M. Vreeland, Abraham T. Smith, Abm. V. Voorhies.

North Plainfield, Norton H. Spencer, Frederick S. Martin, Henry A. Mayo, Henry A. Bryant.

Warren, Theodore Brodley, Peter D. Mundy, Wm. B. Kipsey, Andrew Mantz, Geo. Wood.

At Reform Hall.

The stormy weather which set in last evening had the effect of keeping many away from the meeting in Reform Hall, who would otherwise have been present, but notwithstanding, the hall was comfortably filled and the same degree of interest manifested as on preceding occasions.

Mr. John H. French presided and the singing was led by Mr. A. Vanderbeek, the choir being absent. The customary addresses by selected speakers were omitted, to give way to the Rev. Wm. E. Richards, who gave a finished prohibition temperance sermon from the sixth chapter of Galatians and eighth verse: "For he that soweth to his flesh shall of the flesh reap corruption, but he that soweth to the Spirit shall of the Spirit reap life everlasting."

The preacher having concluded, the President read several announcements of meetings, and requested that all the members of the club and those interested in the Temperance cause be present at the principle this evening and if their duty in that direction.

The meeting was closed with the benediction by Rev. Mr. Richards.

George L. Lockhard has purchased the farm of Dougald Bonnington, near the Manville Park race course, and will remove his stables there from Islip, L. I.

Roller Skating Flirtation.

For the benefit of roller skaters we give below the flirtation code of the pastime, as given by the Morristown Herald:

Lying on the right side, "My heart is at your feet."

Lying on the left side, "I have money in bank."

Standing on your nose, "I have no objection to a mother-in-law."

Jumping on the skates, "I'm afraid I can't trust you."

Lying on your back, "assist me."

One leg in the air means, "catch me."

Two legs in the air means, "smashed."

Goosestep in your mouth, "crushed again."

Hitting the back of your head with your heel, "I am gone."

Recklessly placing your legs here and there on the floor like the letter V indicates, "I am paralyzed."

Punching your neighbor on the stomach with your left foot, "I'm on to your little game."

A backward dip of the heels and sudden cohesion of the knees to the floor indicates, "May I skate the next music with you?"

Thanksgiving Proclamation.

WASHINGTON, D. C., Nov. 7.—President Arthur to-day issued the following Thanksgiving-day proclamation:—

A PROCLAMATION.

The season is nigh when it is the yearly wont of this people to observe a day appointed by the President of the United States as an especial occasion for thanksgiving unto God. Now, therefore, in recognition of this hallowed usage, I, Chester A. Arthur, president of the United States, do hereby designate as such day the twenty-seventh day of November. And I do recommend the people of the several States of the Union that on this occasion they cease from their usual occupation do then keep holiday at their several homes, and that in their several churches and with heart and voice pay reverent acknowledgment to the giver of all good for the countless blessings vouchsafed to be visited this nation. In witness whereof I have hereunto set my hand and cause the seal of the United States to be affixed.

Done at the city of Washington this seventh day of November, in the year of our Lord one thousand eight hundred and eighty-four and of the Independence of the United States, the one hundred and ninth.

CHESTER A. ARTHUR.

The Contest for the City Offices.

The Republican primaries for the nomination of wards and the election of delegates to the city convention, to be held tomorrow evening, takes place this evening. The contest for the various offices is very lively. Especially is this the case for the mayoralty there being no less than five prominent candidates in the field. They are Mayor Incumbent Mayor Maxson, President of the Council Frank Coriell, Councilman Frank Marsh, ex-Mayor I. V. P. Randolph and ex-Councilman Washington Lithgow and Mr. William McD. Coriel, father of President Coriell. While all the candidates named have a strong circle of friends, indications at present point to the nomination of ex-Councilman Litbgow or W. McD. Coriell.

Two of the Democratic primaries have already been held, and the other two will be held this evening. By their action at the primaries held on Saturday evening, they announce themselves as ready to seize any official plums which their opponents may wrangle too much over.

Ordination at Coontown.

On Tuesday week, Dec. 2d, in the Coontown German church, on the second mountain, Warren Township, Mr. Voegle will be ordained to the gospel ministry at two o'clock in the afternoon. The gentleman to be ordained has been with the parish for the short space of a month, having succeeded the Rev. John Schaver, who accepted a call to a church in Kansas, but during that time has become very popular and given universal satisfaction in his ministrations to the flock committed to his charge. He is a graduate of the renowned Mission School at Basel, in Switzerland, an institution of large proportions, which has sent many missionaries to various quarters of the globe. Many talented men have ministered to this mountain parish, among them Rev. Dr. Schaeberen, Rev. Mr. Schneidenreeder and others.

The "Esmeralda" Performance.

The performance of Mrs. Burnett's play of "Esmeralda by the Madison Square Theatre Company at the Music Hall on Saturday evening was very satisfactory, and was thoroughly enjoyed by those present. Miss Annie Russell as Esmeralda and Mr. Fred. Rose as Dave Hardy, especially commended themselves as was also Miss Reeves as Nora, and Mr. Armstrong as the father. All the parts were well taken.

Personal.

Mr. Francis S. Harte returned from Europe Saturday on the steamer "Werra" of the North German Lloyd S. S. Co. and is now at his home on East Front street.

Mr. Fred Singer and wife of British America are visiting Mr. Singer's sister, Mrs. Fred Knight, of West Second street.

Jacob C. Dunhemer, who was last week elected by the Board of Freeholders of Camden to the position of Warden of the County Jail, has received the following anonymous letter: "John Dunhemer, if you don't give up the jail business and get out we are going to lay for you. We are Democratic voters, and honest Dick Smith was elected square. You'll have a hard hold on the jail any longer. We give you two more days; if you don't give it up then and my pals are going to shoot you. Prepare for your life, so look out for the gang."

A Beautiful Discovery.

Read, ponder and profit thereby. Kemp's Balsam for the throat and lungs is conceded by all who have used it to excel any preparation for the cure of coughs, colds, croup and lung healer. All persons afflicted with that dreaded disease consumption—will find speedy relief and it a sanitary of cases. The proprietor has so much confidence in it that he will give a sample bottle free to any sufferer who will call at his store. Large bottles 50 cents and $1. Sold by druggists.

VERY HUNGRY GUESTS.

A MESSAGE TO THE SUPERINTENDENT OF THE BOUND BROOK BRIDGE.

The Steamer Dolphin Runs Down the Lehigh Valley Canal Boat Columbia.

The Absent Predicament They Were in for Two Days—Hungry with Food Almost in Their Grasp—Anxious by Waiting for Relief.

NEW YORK, Nov. 24.—The disabled dispatch boat Dolphin has been made fast to the wharf at John Roach's shipyard, foot of East Eighth street. Owing to the strong current it took more than an hour for the tugboats to get her from mid-channel to the dock. She started away from the pier at 9 o'clock Thursday morning with colors flying and her nerves in good shape for a six hours' trial trip. She came back under the cover of darkness with rather a shamefaced appearance, notwithstanding her pluck, broken shaft, and a tired and hungry crew.

After leaving the dock Thursday morning the vessel steamed along easily through Hell Gate until Execution Rock Light was passed, when Superintendent Henry Rodman, who was in charge, gave orders to "let her out." For the next four hours the steamship slipped through the water at a speed of nearly 19 miles an hour, driving the waves like a duck, with the engines working beautifully. John the naval architect, who broke shaft, and a tired and hungry crew.

After leaving the dock Thursday morning the vessel steamed along easily through Hell Gate until Execution Rock Light was passed, when Superintendent Henry Rodman, who was in charge, gave orders to "let her out." For the next four hours the steamship slipped through the water at a speed of nearly 19 miles an hour, driving the waves like a duck, with the engines working beautifully. John the naval architect, who board were delighted with her success. The now steel shaft had been spinning around with from 72 to 75 revolutions a minute without a hitch. The steam steering gear worked like a charm. When the vessel was about opposite the little above town of Ulina, Ct., in full view of Execution Island lighthouse, orders were given to turn around and head for home.

Pilot Frank W. Bell had just "thrown the wheel over," as the saying is, when there was a jar that shook the vessel from prow to stern, the engines came to a standstill. Mr. Roach, Mr. Rodman, and Capt. Wers hurried to the engine room. Disaster awaited them there. The new steel line shaft, which was supposed to be as perfect as a line shaft, without a fault or a flaw, had snapped off like a stale pencil near the coupling for the crank shaft, about four feet abaft the engine. Externally the shaft was polished as bright as a new dime, and near the break it was weak and honeycombed. The sea was running high at the time, but the order to bring to was given, anchor in 15 fathoms of water and wait for relief.

The prospect was anything but cheerful or encouraging. Signaling for or hailing a passing tug were about equal to those of a man who should fall and break his leg in Central Park after midnight, and his three hopes of getting a hamper with his morning cab. To make matters worse, there was an immediate pro pect of some body having to go hungry. A hamper with $20 roll easily enough, and the usual bodily comforts of naval trips and similar pleasure excursions, where government officers are guests and money is not wanted, had been accordingly somewhat reduced. The boat had not been provisioned for a European voyage. It would take at least 48 hours to get aid from this city. The party might get along comfortably, although by no means luxuriously, but how about the crew? The short afternoon was waning, and darkness was soon due out the shore from view. Something must be done and that quickly.

A council was held in the cabin to that end. The shore was at least ten miles distant. It was too dangerous to think of sending the government officers or Mr. Roach ashore in a small boat in such a sea. They must stay where all might find safety and help and get relief. Finally Pilot Bell started off. Those on board anxiously watched his little boat till it died away a bobbing black speck in the distance. Then came the long wait. All the land from view. The disabled ship tossed and lugged at her anchor as though impatient to be off. The guests looked glum, and the crew looked as if inside the it. Till late at night they kept watch for the tug, which Pilot Bell had been instructed to send out from New Haven. They watched in vain. The Sound steamers swept by in the distance without noticing them. The Falkner's Island light gleamed steadily across the waters, as though sympathizing with them in their loneliness, but no one came near them, and they went disconsolately to bed. Even a few stewed prunes to relieve their seasick stomachs would have been hailed as a godsend.

Meanwhile Mr. Bell had landed at Clinton, bought up a few buns and such provisions as he could find in a village store and sent them back to the vessel in the small hours of Friday morning, straining their eyes in vain for the tug. Noon passed, evening shadows began to darken the waters, but no tug came them. Finally, when everybody had concluded to pass another uncomfortable night on the rolling deep, the lights of Pilot Bell's tug came in sight. In an hour he was on board again, and the Dolphin was being ragged through the water by a little fellow not quarter her size towards Bridgeport. There Mr. Bell got some more grub ashore and hurried by rail to this city. The Dolphin resumed at Bridgeport until morning, when she was towed the rest of the journey. The crew hurried ashore as soon as the gangplank struck the wharf. Some of them admitted that they were anxious to get a square meal, but declared that no one would admit that he actually suffered for food. After the work was done Supt. Rodman sat down to a comfortable little meal prepared for him in his cabin. He gave a brief statement of the accident, but when asked about the ration answered with a merry twinkle in his eye:

"Well, we didn't get prepared for such a long trip, of course, but I didn't hear of anybody's stomach flapping against his backbone."

SIX PERSONS DROWNED.

CHATTANOOGA, Tenn., Nov. 24.—News has reached here of the drowning of six persons in the Tennessee river near Coppinton's Ferry, Ala. Seven persons were crossing in a ferryboat, when it was capsized. Three escaped. The ferryman named Thomas Key, two women and three children were drowned.

His Sinner Went Straight.

NEW YORK, Nov. 24.—Father Paul, editor of The Irish World, has read Father Kullihan, editor of Ireland's Liberator, for $100,000 damages for alleged libel. The latter commenced suit in Dublin. Father Kullihan's paper in October and September M. Fox's beauty.

JAY GOULD'S TACTICS.

LEAVING THE MARKET TO THE BEARS TO DOVER.

A Remarkable Week in Wall Street—Depressing Weather, Dear and Yet the General List in Remarkably Good Very Clever Manipulation.

NEW YORK, Nov. 24.—The time's "In and out of Wall Street" article says: The past week in Wall street has been in many respects a curious one. There was no bullish speculation, and yet the list was not depressed. Every factor, failure, legislation and cessation of work formed a peculiarment feature. Yet the stock market was remarkably strong. Even the shares of the Wabash Company, for instance, showed a substantial advance, in spite of the report that the Rock Island, having obtained control of the Wisconsin Central, would extend the line from Chicago to the Northwestern, and that the latter road shows a formidable decrease in earnings and is embarking in the coal business to Ogden. W. H. Vanderbilt, who talked for years about the cutting of the North-western watering stock, sold out his stock in satisfaction of the Chicago Grand Trunk, Granger legislation, and is now reported to be selling Rock Island. The advance in the price of Northwestern and St. Paul took place before the report that the sons to become the pivotal stock of the market, Union Pacific, remained sluggish and weak. Several explanations of the fact have been given, but the true one is that Jay Gould, one of them was that Jay Gould left the market to the big bears headed by Commodore Vanderbilt, with a view of allowing them to cover their shorts, as some of these gentlemen intended to go to Europe and Florida, and did not wish to be embarrassed during the time the covering process was over. Mr. Gould was to be left to handle the market without any bear opposition. The other story was that Vanderbilt, Bill Stokes, Russell Sage, D. O. Mills, Morgan, and a large banking firm, having practically the control of the West Shore, recognized the folly of preparing big blocks of different stocks property in the settlement of the railroad war. It depends on them to restore West Shore rates at any day, and, in fact, they have done so to a certain extent. Rather that the moment they stop the cutting the New York Central will stop it too, these speculators went boldly into the market under the leadership of Worthington. He covered his shorts, and bought large blocks of the Granger stocks, which, under the existing circumstances, were comparatively the best to buy. The small shorts were thus shaken out along the whole line, and the market has been placed in such a condition that if the Vanderbilts accept the Gould proposition to restore West Shore rates tomorrow, prices of all the leading stocks can be put five or six points higher, giving them about $100,000,000 of profit, not speculative purchases at a handsome profit, and to start a new bear movement from a higher level. If the story is not true, it is too ingenious for anything but the truth. The settlement, and Messrs. Gould and Vanderbilt, to judge by the suggestions of the fluctuations in their specialties, must be for the present out of the market. Friends of the co-leader of the Germans had spent what is to too smart to allow himself to be saddled with any kind of stock now; but on the other hand it is reported that they have been borrowing large sums of money of late, which, of course, he would not have had occasion to do unless he had long stock to carry.

Be it as it may, the Grangers, the Vanderbilts, and the Gould stocks will be for some time to come the pivotal ones on which the rest of the list is dead, and will remain so till the general business of the country shows substantial improvement. A great deal will depend, of course, upon the terms of the railroad war, and the issue must be left first of all by the Vanderbilt stocks.

De Young Improving.

SAN FRANCISCO, Nov. 24.—There has been a remarkable improvement in De Young's condition to-day. The patient was put under chloroform at other Friday evening, and after three hours' labor the doctors succeeded in cleansing the wound near the subclavian artery and inserted a drainage tube. He passed a good night and the symptoms were satisfactory. De Young is in good spirits, his appetite is good, though his stomach is still troublesome. His temperature at the last account was 102; pulse, 90. There are still six doctors in attendance. All agree that the danger from three sources is to be apprehended: First, blood poisoning; second, inflammation of the shoulder joint; third, trouble from the bullet, supposed to be lodged in the region of the lung.

The Chronicle to-day announces editorially its final policy to continue its exposure and criticism of all abuses and wrongs concerning the public.

Strangely Predicting His Own Death.

NEW ORLEANS, Nov. 24.—There is a notable circumstance connected with the sudden death of Dr. B. M. Bemis on Monday last. He was one of the visiting surgeons at the Charity hospital. A few hours before his death he delivered a lecture to the students in the hospital on apoplexy. At the time he was apparently in perfect health. In connection with the lecture Dr. Bemis remarked of man who was liable to be attacked, he pointed to himself and said: "I am a man in danger of apoplexy. I am liable to die at any moment." A few hours later and afterward he was dead, and apoplexy had killed him. He was one of the most prominent physicians of the South, and was the national board of health, and of the American medical association, and one of the professors of the Louisiana university.

Close of the Cattle Convention.

ST. LOUIS, Nov. 24.—The National Cattle convention memorialized congress on leasing public lands, and passed a resolution asking a repeal of the pleuro-pneumonia bill and appointment of state commissioners on the subject. Congress is asked to keep Indians on their reservations and to prevent them from carrying firearms. The following officers were elected as permanent officers for the ensuing year: President, D. R. Hunter, St. Louis, president; Geo. Jas. B. Bristol, Idaho, vice president; A. T. Atwater, St. Louis, secretary; E. C. Stanley, cashier of the Merchants National bank, Kansas City, Mo., treasurer. The national then adjourned to meet in St. Louis the fourth Monday in November, 1885.

Henry M. Stanley's Suggestion.

BERLIN, Nov. 24.—Mr. Henry M. Stanley suggests to the West African conference that the Congo country be opened up from the east by the old of a railroad to be constructed from Vivi and Stanley Pool. Mr. Stanley has declined the invitation to lecture before the Vienna Geographical society on Tuesday next, but has promised to the capacity as a representative of the interests of the United States.

Ada Cavendish Has a Relapse.

LONDON, Nov. 24.—Miss Ada Cavendish, who was thought to be recovering from the brain fever by which she was recently attacked on Belgrave line had a relapse and her condition is now deemed critical.

A SUCCESSION OF ACCIDENTS

A Series of Fatalities in the Coal Regions.

—CONSHOHOCKEN, Nov. 24.—Trade has been a remarkable epidemic of accidents in the Conshohocken and George's Creek coal region, where three men lost their lives and one was fatally injured in the space of the October. Coal company at Eckville Thomas Lavelty was caught under a ten-ton tonnel of coal which fell on him. The doctor stated that every bone in the body was broken. Lavelty lived about an hour and died. The man leaves a wife and ten children, the oldest only 12 years old. Lavelty was an imported miner brought here during the strike.

In the Hoffman mine at Pompey Smash, Arthur Gilmartin, who is employed about the engine, was caught in the up wheel and killed. His head and leg literally ground to pulp. The engine was running at full speed and no one witnessed the accident. The fearful sound made by the crushing of the bones of the victim attracted the workmen, who came up to ascertain the cause. When released Gilmartin was insensible. His death is expected every minute. He leaves a wife and children.

In the Middlebrook mine, near Lonsdowning, a breast of coal weighing several tons fell on Michael Shea, crushing his body badly. He leaves a wife and six children. Archie Gilchrist, a miner in the George's Creek Coal and Iron company's mine, was also terribly injured by falling coal. The miners' friends concerning within an area of five square miles, caused much excitement throughout the whole mining region, which has not had so many fatalities in the past four years.

CLEVELAND'S ADMINISTRATION.

It will be His Aim to Give the Country a Conservative Government.

BOSTON, Nov. 24.—In an interview with a reporter of the Herald, Governor Gaston, President-elect Cleveland, in speaking of the business and manufacturing interests of the country and the effect of a change in the administration, said substantially:

"It goes without saying that the Democratic party is made up of merchants, business and working men, and everybody in it certainly desires prosperity to the country, and realizes that all the people must be prosperous to insure that result. We have $5,000,000 people, almost boundless resources, hundreds of millions of dollars invested in the world, thousands of enterprising merchants, the most skilful manufacturers, and the most intelligent laboring men and women the face of the earth. Now, surely a country with these characteristics has every qualification for a solid, permanent prosperity. It will be my aim and the aim of all associated with me in the conduct of affairs at Washington to give the people of the United States safe, economical and conservative government. The fact that so many business men and manufacturers and workingmen voted with the Democratic party in this election shows that they were not afraid of it, and will carry the provisions of that platform which relate to the business interests of the country into effect. The most important thing is the restoration of confidence and the consequent revival of business, and not excitement, and to devote our lives to those things which tend to the substantial welfare of the country and all of its people. In this work every man should feel that he has a part to perform."

How the Election Bet was Paid.

CHICAGO, Nov. 24.—Not only has witnessed the payment of a number of idiotic election bets in the wheelbarrow, ecilo, and brass band line, but the idiotic features of some of them have not detracted from the interest sight of for the reason that it was in a good cause. Dr. Phillips, an aged optician of this city, was obliged to ascend a flight of three-legged stool at the corner of Randolph and state streets from noon until dark engaged in turning the handle of a barrel-organ, on which Jim Dunn, a well-known Cleveland man who won the bet, stood at his elbow and collected the nickels and dimes of passers-by to make up a fund for the benefit of the Orphan Asylum. The doctor died while saving lives in the recent Kinzie street fire. The doctor's time was up at 4 o'clock, but he has now money rolling in and expressed a willingness to enlist himself in a good cause, so he ground away until dark, never heeding the pouring rain. Nearly $200 was collected during the afternoon.

The Manchester Martyrs.

LONDON, Nov. 24.—The Irish Nationalists of Dublin are making elaborate preparations for execution of the fenians Allen, Larkyn and O'Brien, who are known as the Manchester martyrs. Last year when a similar demonstration was attempted the police interfered, and the police, but to-day there was no interference on the part of the authorities. A procession, comprising about 500 men wearing crapes on their hats, and headed by the principal streets of Dublin and out to the cemetery at Glasnevin, where Allen, Larkyn and O'Brien are buried. Addresses were delivered at the tombs of the martyrs while prayers were said, and then strewed flowers and sprigs of shamrock on the tombs and on the monument of Grattan and Curran. There were no speeches and no disturbances.

Frightfully Chewed by a Friend.

ST. LOUIS, Nov. 24.—John Buckley and James Dailey, switchmen, were found wandering about the head of the island in East St. Louis early this morning. Both were terribly mutilated. Dailey was in a most horrible condition. During the night they had quarreled, and Buckley literally chewed Dailey's ear, his nose, and the largest hole in his right cheek. The right ear was completely chewed from his head, a small shred of skin only holding it. His nose was chewed into a shapeless mass, and there was a hole missing. Dailey does not remember how he received the injuries, but is confident they were inflicted by Buckley. Dailey will probably survive, but will be disfigured for life. Buckley was arrested. He is a powerful man, about the head and face, but is not mutilated.

The Hocking Valley Situation Serious.

COLUMBUS, Nov. 24.—The situation in the Hocking Valley has become more serious than ever since the Trades Assemblies of Columbus and Zanesville have become enlisted, and collections are being taken up in New York city. The operators have now 1,200 men there, and are getting more. Two more assemblies of Knights have been actively engaged in the union, and those who are members of that organization are determined to remain there and have their friends join the local lists of the order, if possible. With this state of affairs, there are the gravest apprehensions as to the result during the winter.

Train Wreckers at Work.

MUNCIE, Ind., Nov. 24.—Last evening as the passenger train on the L. & I. and W. railroad reached Mahlon Brewer's dense wood this side of Reed's station, the engine suddenly struck an obstruction and was thrown up clear of the track, pulling over the engine, tender and baggage car. Upon turning, a pile of green railroad ties were found, which had evidently been purposely placed with the intention of wrecking the train. A deep ditch is on the west side of the track at this place, and had the villains succeeded in their fiendish work the loss of life would have been fearful.

A HUSBAND'S CRIME.

KILLING HIS WIFE AND THEN HIMSELF.

Insane Jealousy without any Reason is the Cause of the Dreadful Deed—A Young and Pretty Wife's Unfortunate Marriage.

READ, Pa., Nov. 24.—The little mining town of Schuylkill, in this county, was the scene of a terrible tragedy yesterday. A jealous husband having shot his young wife and blown out his own brains, after a long struggle to murder his two children. The tragedy occurred in the Eschbach row, where the husband had found his wife also looking for her nearly a week.

The former and his victim are 36 and Mrs. Charles Williams, of Cardiff. They were married about a year ago, but have lived unhappy owing to the insane and unwarranted jealousy of Williams. His wife was Miss Maggie Parshal, daughter of William Parshal, a farmer of Schuylkill. She was a girl of considerable personal attractions, of which she was quite conscious. She had many admirers, one of them being a clergyman. She possessed a fine voice, which, when in tune and not disturbed her husband, was a source of pleasure to him. Williams, who was naturally of a morose disposition, with no visible means of support, who, during his courtship so quietly showed his insane jealousy. He objected to her singing, and immediately after he married him, earnestly desired her to break off the connection and accept another home. The love sick girl turned a deaf ear to all entreaties. However, it is to late that a week after marrying him she became disenchanted and realized the full force of the warnings which she had disregarded.

Williams' insane jealousy and suspicious illness shown her by her gentlemen friends were regarded as fraught with unusual meaning by her husband, and the bitter quarrels and scenes that were almost of this week she packed her valise and left his home, going to Edenboro. There her husband followed her, and he and his stepfather, Mr. George Redmond, succeeded in the latter acting in the capacity of a mediator. As the resulting interview took place, resulting in Mrs. Williams consenting to return to her husband's home, to promising to treat her impolitely.

With a kiss and a fond embrace the reconciliation was sealed, and Williams and his wife passed out into the street arm in arm. They entered the store of F. L. Pronditand Williams purchased for his wife a pair of kid shoes. To the storekeeper they appeared to be most affectionate, the man lavishing upon her a whole vocabulary of endearing terms. Williams announced his intention of accompanying the ladies to their home in his wife had occupied, and the pair retired to rest about midnight.

Mr. George Redmond, the successful peacemaker, was aroused by Mrs. Williams exclaiming:

"My God, Charlie, I am innocent!"

"False dovil, you lief" he heard Williams reply.

Then a shot was heard, followed by a terrible shriek and a heavy fall. Redmond hurried up the stairs and was met on the landing by Williams, who stood with a revolver in his hand. He fired twice as Redmond, but missed him. Then putting the muzzle of his weapon to his right temple he sent a bullet through his brain, falling dead on the landing. The wife is still alive, but she cannot live. At present she is unable to talk.

The Work of the Post Office Department.

WASHINGTON, Nov. 24.—Third Assistant Postmaster General Hazen, in his annual report of the operations of his office for the fiscal year ending June 30, 1884, states the receipts of the postal service for the year to have been $43,932,127, and that the disbursements were $47,000,000, the excess of expenditures amounting to $3,066,823. The outstanding liabilities for the year are estimated at $877,471, which sum, added to the amount actually paid out, makes $1,200,000 credited to the Pacific railroad companies would make the total cost of the service in the fiscal year $48,543,411, or $5,294,463 in excess of the receipts. The decrease of the receipts from those of the previous fiscal year was $3,170,665, or 4.7 per cent., and was caused mainly by the reduction of letter rate of postage from three to two cents, which went into operation on the 1st of October, 1883.

The weight of second class matter, newspapers, periodicals, etc., mailed during the year was 47,240 tons, the postage on which was $1,888,040, an increase of $185,000 over the postage on the same class of matter during the preceding year. During the year 11,246,545 registered letters and parcels were handled, and of this number only 2,344 were lost, and of these 1,167 were found and returned, leaving 1,177 not found. Of this number 1,077 were found to have been properly delivered or accounted for, and 1,023 are still under investigation, leaving 54 unaccounted for. Letters 515, or cent cent of about 31,994 pieces mailed.

Accused, but is no Danger.

WASHINGTON, Nov. 24.—The United States signal service observer at Southville, N. C., reports that the schooner E. Powell, loaded with sand, sailed from Southville bound for New York, put in for harbor. She drifted aground during a squall, but is in no danger, and will probably be got off next high tide.

Two Children Arrested for Murder.

OMAHA, Nov. 24.—Walter and Frizz Allen, aged respectively 14 and 12 years, have been arrested on the charge of murder, and released under $1,000 bail each. Two weeks ago they kicked in the groin John Morris, a schoolmate, and yesterday he died from the effects of the injury.

Sentenced for Cleveland to Hanging.

BUFFALO, Nov. 24.—Gov. Cleveland has engaged a suite of rooms at the Genesee hotel, in this city, from Feb. 4 to March next. This city will be the office seeker. Mecca for a month at least.

CONDENSED NEWS.

All the gambling houses have been ordered closed in Denver.

Representative Wilkins, of Ohio, stabbed S. J. Randall, would not enter the cabinet and his wife will not be a member.

The Trades Assembly of Cincinnati has demanded of Gov. Hoadly the removal of the Pinkerton guards from Hocking Valley.

During the current quarter $7,000,000 have already been paid for pensions and $18,000,000 more will be required before the first of January.

Three lives in Gabelville, Pa., a Mrs. Catherine Gabel who is 106 years old. She remembers when people traveled in stage coaches and Indians were numerous.

A newspaper of the 17th which tells the discovery of Alaska and others, says there is nothing like the Sound steamers in Europe, and calls them floating palaces.

The Philadelphia Record claims the state is losing nearly $25,000,000 yearly through the suspension of anthracite coal mining and railroad pools in the bituminous region.

Richard L. Pue, proprietor of The Pittsburg Dispatch, and Col. Thomas A. Scott, president of the Pennsylvania railroad, other operating men have been indicted for their share in the recent Greenfield-Scranton prize fight in New York.

THREATENED WITH DEATH.

Startling Experiences of an Illinois School Teacher Who Came Penniless to New York.

TERRE HAUTE, Ind., Nov. 24.—The patrons of the Johnson school, near Graysville, Ill., a district school house, are agitated by an attempt to burn the school building, on Monday night, and by the threats against the life of the teacher, Miss Nettie Clark. The flames were extinguished before much damage was done. The next morning Miss Clark found the following note in her desk:

"Your father I swore vengeance against. But, because of his black soul, I never gratified it; but I swear to have it yet on his family. I will, by the eternal God. I have followed you more than once since you began this school with the intention of revenge. I hate you, for you are just like Sam Clark; and I now tell you, if you value your life, to give up this school. From the worst enemy Sam Clark ever had."

As she was returning home past a dark woods in the afternoon, an oldish man with a wild look in his eye stepped out and asked her if she were going to give up the school. She said no, and he then said he would give her a week more, and if she was not gone by that time he would kill her. He then disappeared in the forest. Her father has been dead 29 years. He was a respected citizen, and had no enemies as far as known. The country has been scoured for the man, but no trace of him has been found.

In Gratitude for Humbert's Devotion.

LONDON, Nov. 24.—King Humbert returned to Rome yesterday after his tour of the cholera infected districts of Naples, Genoa and the provinces. There was no regularity organized reception because the king had expressed his earnest desire that the money which had been intended to provide a grand fete of welcome should be given to the sufferers. There was, however, an impromptu reception of the most enthusiastic character, and the joy and gratitude of the populace were most emphatically expressed. The people were crazed and with delight and crowded around the royal carriage struggling to kiss the hand of the king through the carriage window. King Humbert sent away the cavalry guard that had been escorting him so that all the people could have free access to his carriage, and he was kept busy bowing his acknowledgments as the cheers and blessings of his people rang in his ears. The street through which the royal party passed were a blaze of color, every home being decorated with flags or flowers. The progress of the royal carriage was very slow on account of the throngs of people that constantly surrounded the king's carriage. It was after dark when the king reached the Quirinal, and by that time all the houses along the route were brilliantly illuminated and hundreds of torches were lighted and carried by the men in the streets.

A Desperate Attempt at Blackmail.

LONDON, Nov. 24.—A desperate attempt was made to blackmail a well known member of the aristocracy as he was crossing Hyde Park on his way to his residence after dining with a friend. He was abruptly accosted by two men and a girl, who demanded money from him and declared that unless he gave them a sovereign or two they would make an outcry and swear that he had attempted to commit an assault upon the girl. The gentleman happened to be an expert boxer, and he promptly knocked down the two ruffians. They soon regained their feet, however, and made an attack upon the gentleman, who took refuge in flight. He finally succeeded in reaching his house, but his garments were badly torn and he was in a fainting condition when he arrived at home. He has given a good description of his assailants to the police, and they will probably be found and arrested.

Difficult to Prove His Guilt.

LONDON, Nov. 24.—The judicial inquiry regarding the murder of Miss Kay at Radcombe, near Torquay, is making slow progress. The ex-convict, John Lee, who was in Miss Kay's employment as a valet, and confessed that he assisted in the robbery and murdered the lady, has retracted his confession, which he says was extorted from him by threats of the fear of lynching. He now swears that he knows nothing about the assault, the murder or the attempt to burn Miss Kay's house. As there was apparently no other witness of any part of the tragedy, it may be difficult to obtain legal testimony sufficient to convict Lee, although the circumstantial evidence against him is rapidly accumulating, and nobody who is acquainted with the facts has the slightest doubt of his guilt. Lee preserves a remarkably cool demeanor, and assumes himself during the examinations by chafing the court and the lawyers.

A Case Demanding Attention.

NEW HAVEN, Nov. 24.—Two years ago, Miles McPartland, of this city, was sentenced by the United States district court to 18 months' imprisonment and a fine of $5 for illegal voting. During his imprisonment McPartland became insane and there being no provision by the Federal laws for his removal to an asylum, unless pardoned by the president, and this being refused, he had to serve out his sentence. McPartland is still held on account of his inability to pay the fine, and also being unable, legally, to take the poor debtor's oath, which would release him.

St. Louis Loses her Opera House.

ST. LOUIS, Nov. 24.—A fire broke out in a heap of rubbish under the box office of the Grand Opera house about 4 o'clock, completely destroying the building. Nat. C. Goodwin was to have opened in "Confusion" there last night. All of his baggage was in the theatre when the fire broke out, but by prompt assistance of the theatre employes it was all saved. There was quite a high wind blowing at the time, and but for the efforts of the firemen other buildings would have been burned. The loss will be over $100,000.

Blind Boone Swallowing Cloth.

LIMA, O., Nov. 24.—The guard of the jail who was watching over Boss Jonts Harper, who is condemned to be hanged, noticed that he suddenly became very ill at 2 a. m. A physician was called, but the prisoner was past medical aid, and after death having occurred. At the post-mortem examination it was found that he had swallowed several strips of flannel and cotton cloth. He had made a most unsuccessful attempt to kill himself and finally accomplished it by swallowing pieces of his underclothing.

The Erie's Earnings.

NEW YORK, Nov. 24.—The annual report of President Jewett to the Erie directors to-morrow will show a decrease in net earnings of $1,276,000. With the New York, Pennsylvania and Ohio system included the decrease is $2,102,822. President Jewett will withdraw from the board. He says the Erie will commence to pay 1 per cent yearly on the $24,000,000 to pay the floating debt which they promised to supply if Mr. King were made his successor. He trusts they will do so hereafter.

Mr. Gladstone to Accept a Peerage.

LONDON, Nov. 24.—The Yorkshire Post says Mr. Gladstone will not seek re-election to the new parliament. He will accept a peerage after the passage of the franchise bill.

Consumption can be Cured!

This fact has been demonstrated in more than

TEN THOUSAND CASES

by

DR. S. D. HOWE,

The Great Consumption Doctor of New York, PROPRIETOR OF THE

Arabian Medicines,

Celebrated throughout the World for their remarkable Cures.

TESTIMONY

Of the Hon. Jno. E. Gary, Judge of the Superior Court, Chicago, Ill.

CHICAGO, Dec. 14th, 1876.

DR. S. D. HOWE,

DEAR SIR:—Permit me to add my grateful testimony to that of others in the praise of your justly celebrated Arabian remedies. For a long time my wife was seriously afflicted with a hacking cough, accompanied by soreness of the chest, and occasional acute pains in the lower portion of the right lung and under the muscular blade. Her suffering were intense, and she became extremely nervous and prostrated. Her disease was pronounced consumption by the physicians of Chicago and other cities, and she had given up hope. She was induced, however, by the skillful manner in which your thorough examination into her symptoms, to place herself under your treatment with which you closed your diagnosis. My wife determined to take your medicines in accordance with your plain and practical directions. She began to use your Milk-Cure and Arabian Syrup. The first medicinal effect of each became manifest—the cough lessened and soon entirely ceased—the tension between the shoulders ceased to be felt and all pain removed, she began to gain in flesh and increase in strength and appetite. I fully believe that your medicines and skillful advice have saved the life of my wife. She unites with me in this grateful tribute to the merits of your remedies.

Very respectfully yours,

JOSEPH E. GARY.

The above letter is only one among thousands received from all parts of the United States.

Price of Milk Cure & Tonic, each $7 per Bottle.

PILLS, 25 Cents per Box.

The Sun.

THE SUN is, and will continue to be, a newspaper which tells the truth without fear of consequences, which gets at the facts, no matter how much the process costs, which pursues the news of all the world without waste of words and in the most readable shape, which is working with all its heart for the cause of honest government, and which therefore believes that the Republican party must go, and must go in this year of our Lord, 1884.

About sixty million copies of THE SUN have been sent out of our establishment during the passed twelve months.

If you want to pass and to and all the columns of THE SUN printed and sold last year you would get a continuous strip of interesting information, containing more wisdom, sound doctrine, and news we'll long enough to reach from Printing House square to the top of Mount Copernicus in the moon, then back to Printing House square, and three quarters of the way back to the moon again.

But THE SUN is written for the inhabitants of the earth; this same strip of intelligence would girdle the globe twenty-seven or twenty-eight times.

If every horse of THE SUN's circulation of the passed year has spent only one hour over it, and if his wife or his grandfather has spent another hour, this newspaper in 1883, has afforded the human race thirteen thousand years of sound reading night and day.

It is only by light calculations like these that you can form any idea of the circulation of the most popular of American newspapers, or of its influence on the opinions and actions of American men and women.

If you know THE SUN you like it already, and you will read it with occasional diligence and profit during what is sure to be the most interesting year in its history. If you do not yet know THE SUN, it is high time to get into the swindles.

Delivered to any part of the city. Leave orders at 161 and 163 Front street, or at my residence, 4 Park Place.

GRANT'S GOING TO WEST POINT.

The Mere Accident That Put Him into the Regular Army.

[Croffut's Letter.]

"It was a mere accident that put me into the army," said Grant to his old cronies. "If I hadn't much failed in one study, I would not go to war. I thought of being a farmer, and I thought of going to sea; but of all the possible courses I dreamed of when a boy, I never a soldier was the furthest of them. I am not sure I had ever heard of West Point when my father told me to get ready to go to it for my preliminary examinations. This is the way it was. Our next neighbor's boy got a chance from our congressman to go to West Point. He went, and failed to pass the examination—for physical reasons, I believe. He did not come home at once for that, and the family did not allude to his failure, but his mother, who felt very sore about it, came and told my mother, confidentially, what was troubling her. Mother told father, and father wrote straight to our congressman and got the chance for me. Oh, yes, I know that those who pretend to be boyhood, will shoot my father a pistol without flinching. When I was 3 years old, and crying for more of it, but I don't think such tendencies were strong. I never thought of being a soldier. Going to West Point was just the accident I have told you."

"How came you to pass the examination?" asked my informant.

"Almost any boy can do that," answered the general. "I was 17 years old, and all that was required was some knowledge of reading, writing, spelling and ciphering to decimal fractions. If I was superstitious I should think there was some fatality in my going to West Point, for when the war was over I figured up, and as near as I could find out, the little country village of Georgetown, Ohio, from which I went—a place of 200 people—sent to the war one full general, [my self], three major generals, two brigadier generals, three colonels, three or four line officers and one private soldier. The private died, I think. I had no very easy time of it at West Point. In a class of more than a hundred I was behind them all in almost everything. I never succeeded in putting more effort the head or feet of the class. I was within three of the foot in language, I believe, and within five of the head in mathematics. I was at the head in horsemanship, but that didn't count. I graduated as No. 21, and was glad to get it."

"But only thirty-eight out of the hundred odd graduated," said his visitor; "rather harder luck than our class had."

"Not a few," said the general, "who had to leave school because of a failure to keep up with the class have since taken commanding positions in life, and would probably have succeeded in the army if they had only got into it."

Chinese Indictetion.

[Professor Felix L. Oswald.]

Arminius Vambery, the Hungarian traveler and Orientalist, has explained the queer irresolution of the Chinese government, which will probably enable the French adventurers to play a Billy Walker game. Like the image of Nebuchadnezzar, the Chinese colossus has an iron head, which, in case of a general commotion, threatens to dissolve the colossus of the compound. In the highland of Yunnan, in the southwestern extremity of the Chinese empire, there are millions of headstrong Mohammedans, who have more than once expelled the representatives of the government, and who wait for a couple of years have only awaited a favorable opportunity to rise in a general rebellion. They not only defy the emperor's envoys, but can compel him to sue for peace and question the legality of all feudal statutes.

In 1865 these Nihilists flayed the staff holder of Tunglan, and impaled some 60,000 of his subjects before their progress was stopped by the fortified towns of Kwei-echang, garrisoned by feudal chiefs and their Mongol retainers. After a few indecisive skirmishes the general government, as usual, tried to temporize. They opened negotiations in the name of the provincial government. They made several attempts to get up a counter-revolution. They tried to bribe the rebel chieftains, and at last purchased a temporary peace by the most humiliating concessions—any thing rather than to risk a direct encounter with the forces of a superior force.

A thousand years ago the same policy prompted them to build their "Northern Bulwark," equivalent to a continuous stone wall from Chinese Tartary to Lake Orby. Their Know-Knothing methods, too, were inspired by the instinct of self-preservation, the hope to conceal the fatal secret of their national impotence.

Lincoln and Stephens.

[Augusta (Ga.,) Chronicle.]

Our friend, C. F. Gunther, of Chicago, whose collection of valuable manuscripts we have already referred to, sends us a copy of the following letter from Abraham Lincoln, the original of which is now in his possession:

WASHINGTON CITY, Feb. 3, 1848.

DEAR WILLIAM: I just take up my pen to say that Mr. Stephens, of Georgia, a little, slim, yaller-complexioned man, with a voice like Logan's, has just concluded the very best speech of an hour's length I ever heard. My old fellow, it was full of truth and of tears yet. If he writes it out anything like he delivered it our people shall see a good speech when they read Mr. Stephens.

Yo W. H. HERNDON. A. LINCOLN.

There was always a bond of sympathy between Lincoln and Stephens, in spite of the divergence of opinions and habits, before and after the war. We do not know to what speech of Mr. Stephens the strange and fateful man who wrote the above letter referred to, but some of our older readers may identify it. The Logan to whom Mr. Stephens was interpreted vocally was Judge Logan, of Illinois, a pioneer of that state and a local celebrity.

A Timely Pardon.

[Argonaut "Storyette."]

Roquefavre, the deformed jester of Louis XIV., received his out of many a danger by his ready wit. One day he went to the king to ask his pardon for having struck off the helmet of one of his courtiers, who had failed to give him the military salute. Louis, who knew his man, wondered that Roquefavre should crave his pardon for so venial an offense, and said to him: "This is a serious matter, Roquefavre, but I will pardon you this time." It afterward turned out that the soldier's head was in the helmet, and fell with it to the ground.

The Home Stake.

Our daughters are all horse maids.

The man who assists in keeping up matters about the house, is a home aid man.

Wearing apparel is now made.

The girl who owns a sewing machine is now used.

The national debt is ever made.

A Gypsy is a nomade man.

A bachelor is a no maid man.

Soy Convicts.

[New Orleans Times-Democrat.]

Georgia is very pleased what to do with its convicts. It has no less than 1,200 of them between 21 and 17 years of age in its penitentiary, and it rightly considers that this population is no place for them.

"IN SEPTEMBER, 1779."

The Tradition of Horseheads Likely to Be no Longer Available.

The Pet Story of the Villagers Bent to Lose Its Pertinence—A Centennial's Mad Vow.

[Horseheads (N. Y.) Letter.]

When the first white settlers entered the Chemung valley, about 100 years ago, they found the skulls of hundreds of horses piled in one spot, and whence the place got its name. According to the tradition, these skulls had belonged to horses in the army of Gen. Sullivan when he made his historical march against the hostile Indian tribes in 1779. On the return march of the victorious army from the Genesee country a portion of the troops encamped here. As he intended to go down the Chemung with his forces on rafts, Gen. Sullivan ordered the killing of all the superfluous horses. Wild animals devoured their carcasses, and subsequently the skulls were heaped up by the Indians where the first settlers found them. On account of this incident the settlement received the name of Horseheads. In 1837 the village was incorporated, and the name was changed by the legislature to Fairport, against the wishes of most of the people. For eight years they petitioned regularly to have the original name restored. This was done in 1845. Each summer ever comes here when first question is not:

"Why is this place called Horseheads?"

Citizens are always lying in wait for strangers, and when they ask the favorable question comes, it is their one great delight and recreation to tell the story, with much detail, about Gen. Sullivan and the horses. The journalists, in their desperation in retailing the story has come to be so close among enterprising Horseheads people that the one who gets the story always gets the most frequently is looked up to with envy by his fellow townsmen. The wide-awake citizen has even reduced the thing to so exact a science that he can wait until the first stranger asks the entire question. The man who alights from the cars here and begins his first utterances with "Why" or "What" or "Will you," need speak no further, for the citizen, lying in wait, launches the story of Sullivan and the horse skulls at him at once. The man who is now looked upon as the smartest one in the place is a distinguished citizen who sat up for the 3 a. m. train the other night. Two strangers alighted. They were so sleepy they did not stop to ask why the place was called Horseheads. The wide-awake citizen collared them.

"I see you want to hear the story about Sullivan and the horse heads," said he. "Give me your valise; I'll tell you the story as we walk over to the hotel."

It may well be supposed that the fact that a strong effort is now being made to have the name of the village changed has raised a howl of indignation here. It seems a capitalist from another place wanted to become interested in manufacturing on an extensive scale in Horseheads. He visited the place a day or so ago to look over the prospects and talk with a Horseheads capitalist. After walking about the streets awhile, and being unable to find the man for whom he was looking, he stepped into a saloon to ask where the man lived. There were citizens in the place. The visitor approached the man behind the bar saying:

"Will you kindly tell me—"

That was as far as he got. The four citizens were on their feet and on all sides of him in less than a second. They all addressed him:

"In September, 1779, Gen. Sullivan, on his return from chasing the Indians in the Genesee country, encamped on this very spot."

Then followed the story of the horses and their skulls. The capitalist was overtaken with surprise.

"They got it all mixed up," said he to Horseheads. "Order your drink and go to the back room and I'll come in and tell you the story slow and straight."

The visiting capitalist hurried out. Meeting a boy on the street, he said:

"My son can you tell me—"

"Oh! yes," said the boy. "In September, 1779, Gen. Sullivan—"

The visitor dashed wildly down the street and met the man he had come to see. This citizen explained the state of affairs to him.

"Don't be discouraged," he said, "just put a dollar of his money in Horseheads unless the name was changed. Some of them want his money, and are working hard to induce the people to petition the legislature to change the name. Patriotic citizens, however, are outraged at the suggestion. As one walks along the street he sees groups of residents discussing the subject.

"It is sacrilege!" some of them exclaim. "Here, where Gen. Sullivan camped in September, 1779, after—"

Then if he doesn't pass on he will hear the rest of it. The movers in favor of a new name want to have the place called North Elmira.

A Millionaire's Marriage.

[Chicago Tribune.]

There were three romances in the life of the late Joshua Sears, the millionaire grocer of Boston. The first was when he was a very poor young man, and he courted a fiction with a wealthy beauty on a railroad train, called on her afterwards and finally found that his suit was in vain because he was poor and she was rich. The second was when he was past middle age and very rich. He became engaged to a dashing young widow, but when his friends ceased to laugh at her and began to congratulate him he found she was going to be married to that old fellow for" "For his money, of course," said one. Sears heard of this. "For my money, eh?" he mused; "well, by and by he will." He went to his lawyer, and was told she would have a good case in a breach-of-promise suit. He didn't want a lawsuit, so he handed a check for $100,000, and told him to go and see the widow and "fix things up;" which was done, she accepting the bribe and giving him his freedom.

The third was when he was an old man. He found himself enormously rich, he thought. "When I am gone, as I soon shall, who will enjoy it all?" he asked himself. He recalled Alphens Hardy, and said: "Hardy, I'm thinking of getting married. What do you think of it?" Hardy thought he knew a lady who would please him. "Then, Hardy, you go and arrange it." So Hardy commenced the negotiations, and Sears was accepted. On his wedding morn, the beautiful bridegroom called Hardy aside and said: "Hardy, I don't know anything about the ceremony, and you do. So I want you to stick close to my side and coach me, so that I won't make any blundering mistake." Hardy did so, and all went well.

In Explanation.

[Argonaut "Storyette."]

The remains of an Hogsflesh traveler had been exhumed for inherment in the family vault. When the coffin was opened we started back in affright. "Why, these specimens is no kin to the remainder of us, sir," replied a nephew of the deceased, with a sigh, "that's the lion that ate him up; under's inside of him."

BILL NYE IN PARIS.

An Amusement Programme of the Gay City on Sunday Night.

[Denver Opinion.]

There may be more beautiful sights, perhaps, than the quiet beauty of the French capital showing in the moonlight, but I cannot now recall at this moment what they are. Looking down from the mighty fortifications to where nearly 2,000,000 warm-hearted people, happy, gay, and yet rebellious, peaceful and yet belligerent people are slumbering, what numberless of blood and tears and war are soon accumulating in the brain of the beholder. Again, the air seems filled with the wild roar and rush of the victorious cavalry, the tumultuous boulevards run red with human blood, and the ghosts of Frankincense of forgotten centuries crumbles and yields to the mad tide of revolution and revenge. From the early days of the infant Paris, when the Gaul of Julius Cæsar, whose the French capital was simply an outfitting point, down to the days when she dictated to the world in the matter of national life and overshadowing the world's wonderful career of the great city. Again we see Cæsar rebuilding the city. In fancy we see his being at the head of the Tuileries, and resplendent flashing in the warm sunshine. His noble head is thrown back proudly, and across the horizon of his imagination there is a dash of pale light that shows where he sat down in the mortar-bed near where the Pavilion de Saltpetre now stands. Rapidly its eye sweeps down the Seine from the Louvre, along the Tuileries, the Rue Rivoli and the Rue Folderol to where the glistening mass of the Vendome de Cheristo tissue raises its pale beauties in the pure atmosphere. Then it dashes in, with an imposing pile, crowned with a gilded dome 105 metres high. Immediately under it stands the sarcophagus of Napoleon I. This sarcophagus was first built by Napoleon. He was proud and exclusive about his sarcophagi, refusing to use a second-hand sarcophagus, no matter how cheaply he could procure it.

Moving toward the background, we come suddenly upon the bourse, the imposing cup of which is the admiration of all. Near Bonbon and the Champs de Defiance. Farther on rests the Grand Boulevard de Parleyvoo, silent and abandoned, while down the river Seine, and still beyond rest the Palais de Leverty Stable, stands the historic Rue de Crazy Woman's Creek.

How fresh in memory still rests the pictures of Paris, and what a pleasure it is again and again to bring back its tender outlines. Imperfect though this pen picture may be, I know it will be read with much pleasure by those who own it, and though I should, at first blush, appear to be a vagueness, and, as it were, an incompleteness in the description, I hope the gentle reader will bear in mind that To Sidling, Wyoming, is about the nearest I ever got to Paree, and with a broken leg and the long, damp walk that stretches out between myself and France, I am afraid that I may be delayed in reaching there this fall.

My next letter will be from Rome.

For a cripple I intend to see as much of Europe this fall as possible. BILL NYE.

An Old Summer's Scheme.

["Manhattan's" New York Letter.]

There is one scheme of all politicians who will make a profitable campaign, judging by what I know of one of his days' work, no matter who gets to the White House. He walked constantly more than the requisite distance in coming from the door to my desk, as though veered by the sulphurs of past alcoholism from a distillery; and if was the mere chance of the weather which brought him to me rather than to any other point in the room. His clothes possessed all the polish his manners had lost, and he wore them with an air of badly damaged dignity.

"Can I have a word with you," he said.

"No," I replied.

"You wouldn't bounce me if you knew me."

"Why, who are you?"

"I'm a campaign lie," was the composed reply, as he instinctively thrust one hand into the breast of his coat and rested the other for stability on my desk. "Sir, I started out stalwart enough last spring, but I've been exposed so much and nailed so often that I'm tattered and torn, battered and worn. They have put me down as the Error, that "wounded writhes in pain and dies amid her worshipers." But they won't let me have a decent death. They keep me going, dilapidated as I am and single in fancied, looking for food and drink—especially famishing for drink. Will you give me a quarter? The novelty and freshness of the appeal conquered me, for his drollery was very funny. He got a dollar before quitting the building, and I subsequently learned that he did about as well on the street as he did in the private office in Park row. The last I heard he was going through the Wall street region with equal success. This old humorist with the dilapidated hat and seedy coat was for nine theatres until incapacitated for stage performances.

Some Funny Glimpses.

[Chicago Tribune.]

The "Memoirs of Lord Malmesbury" are creating a considerable sensation, and all the papers are quoting some of the choice bits. There are very funny glimpses in the private life of Gladstone, and Disraeli's appearance is described as disappointing, because so like that of a Catholic priest, and one of his crazes in the course of his political career was to wear ultramontanistic love of negro melody, which he used to sing with the greatest spirit and enjoyment, never having out a verse. "Campbell," he would say to his favorite valet, "Disraeli appears much less cold and apathetic in private than his sphinx-like image of public life would suggest. He confessed himself on one occasion, when there was a prospect of getting office, that he felt as delighted as a young girl getting her first ball." According to Lord Malmesbury, was, when outside the house, always in the highest state of elation or the lowest depth of despair, according to the fortunes of the Tory party. One of Disraeli's unconscious humor is this: "Disraeli was at the breakfast and roamed rather low. He told me the queen had sent him her last book."

A Picturesque Reformer.

[Chicago Journal.]

There are 30,000 acres of good land in the county of Essex, England, which are tenantless. The reason is said to be that English farmers are being educated above the love of acres, and desert the farm for the city. As a remedy for this Lady Catharine Gleskell proposes that farmers and their wives and children be compelled to work in the fields, to grow up entirely illiterate and uncultivated. She also says that they should not be allowed to wear clothing, and that they should be made to rise at 4 o'clock in the morning and spend all the day among the cattle in the fields. Lady Gleskell would make a picturesque reformer.

Memorable Fast.

[Philadelphia Call.]

It is a remarkable fact that one of the fifty-six signers of the Declaration of Independence was a bachelor. He was a wealthy planter and died 100 years ago this month.

Don't Sting Your Shoulders BUT INVESTIGATE!

THE EVENING NEWS.

Vol. 1, No. 152 PLAINFIELD, N. J. TUESDAY, NOVEMBER 28, 1884 Price Two Cents

Consumption can be Cured!

This fact has been demonstrated in more than

TEN THOUSAND CASES by

DR. S. D. HOWE,

The Great Consumption Doctor of New York, PROPRIETOR OF THE

Arabian Medicines,

Celebrated throughout the World for their remarkable Cures.

Dr. Howe's Arabian Milk Cure,
Dr. Howe's Arabian Tonic,
Dr. Howe's Arabian Liver Pills.

The Only Medicines that have ever been known to positively cure Consumption.

TESTIMONY

Of the Hon. Jos. E. Carey, Judge of the Superior Court, Chicago, Illinois.

CHICAGO, Dec. 14th, 187[illegible].

Dr. S. D. HOWE.

DEAR SIR—Permit me to add my grateful testimony to the host of witnesses to the virtues of your lately celebrated Arabian remedies. For a long time my wife was seriously afflicted with hacking cough, oppressed breathing, soreness of the chest, and consequent acute pains in the lower portion of the right lung and under the shoulder blade. Her sufferings were intense, and she became extremely nervous and apprehensive. Disease was pronounced consumption by the physicians of Chicago and other cities whose prescriptions had been taken without benefit. When you visited Chicago in June, 1883, we called on you, having very little hope of deriving help from your treatment. We were inspired with hope by the skilful manner in which your thorough examination was conducted, and the satisfactory explanation with which you closed your diagnosis. My wife then commenced the medicines in accordance with your pain and practical directions. She began to use the Arabian Milk-Cure and Arabian Tonic. Their beneficial effect at once became manifest—the cough lessened and soon ceased, expectoration became easy, the soreness of the chest was relieved and all pain removed, she began to gain in flesh and improve in strength and appearance. I fully believe that your medicines and skilful advice have saved the life of my wife. She unites with me in the grateful tribute to the merits of your remedies.

Very respectfully yours,
JOSEPH E. GARY.

The above letter is only one among thousands received from all parts of the United States.

Price of Milk Cure & Tonic, each $1 per Bottle.

PILLS, 25 Cents per Box.

Signal Office Predictions.

Fair weather, slowly rising temperature, winds shifting to southerly, falling barometer.

Chronological Events.

Battle of Chattanooga, 1863.

JOTTINGS.

—The city election takes place one week from to-day.

—Republican and Democratic city conventions will be held this evening.

—There will be a matinee performance at the Casino on Thanksgiving Day. Prof. George S. Hart will give a bicycle exhibition at that time, and will also appear in the evening.

—While Mr. John Anderson, of West Front street, was in a Park avenue store this morning, his horse became frightened and ran up the pavement to which it was harnessed. No damage was done.

—The Daily Buck Quartette will appear at the Stillman Music Hall on Thanksgiving evening, in the Y. M. C. A. series of entertainments. Madam Alberti, the elocutionist, will assist. A fine entertainment is expected.

—A clay pigeon shooting match at Campbell's Club House for $10 a side, Saturday afternoon, at 2 o'clock, participated in by Ephraim Apgar of Evona and Barry Craft of this city, and was won by the latter, who broke eleven out of fifteen, Apgar breaking ten.

—The Bi-ness Class prayer meetings are to be resumed this evening at the Warren Mission Chapel, and it will be continued every Tuesday evening during the winter. These meetings were largely attended last season, and the interest in them was sustained to the close. The Bible class will invite all friends especially their brethren of the Reform Club, to meet with them.

—Charley Miller, a newsboy, who has a thriving business on his own account selling THE EVENING NEWS, had a narrow escape from accident at the opening of his hurry business competitors who had not under way ahead of him he missed footing at the head of the stairs at the NEWS office, and turned a complete somersault, in his descent to the street. There was a general rush, all expecting to have seen him crushed. Not a word was heard. But on looking down, the little fellow was seen picking up his papers and arranging them *as if nothing had happened.* He was unhurt.

—Baltimore, Md., on April 3d, says the Wilbur Comic Opera Company $1,280.45, $600 in performances of this week, the contract upon which was let on Thursday, April 26th, for "Olivette," gave the company a $1,455 75 house, which are the two largest houses ever given to one comic opera company in the city of Baltimore. The box office closed at 7.40 Monday evening, and 7.30 Thursday evening, every seat in the house being sold, standing room barred away, unable to get standing room. Public and press unite in saying: Best singers, finest comedians, best chorus and handsomest girls, and the most elegant wardrobe of any comic opera company in America. This Company will appear in "Olivette" at the Music Hall in this city to-morrow evening.

The Wilbur Company in "Olivette."

The Wilbur Opera Company, which is to appear in "Olivette" at the Music Hall in this city to-morrow evening, received the following notice from the Evening Express of Portland on their appearance in that city:

Portland theatre had a large crowd last night, for the merits of the Wilbur Opera Company are well known here, but few had anticipated what the evening was enough to fill the house. Very few companies are to entertaining as they are now, The Wilbur are well supplied with good singers and the comedy-business is a rattling feature. The Company last night played "Olivette" for the first time in this city, though, no will were they up in their parts that very few suggested it. Miss Kavanagh made a perfect "Olivette." Miss Ray Samuels displayed a very powerful voice, and a fine stage. She will here with Salisbury's Troubadours, and made last appearance at Portland theatre Mr. Cody has a strong, though not powerful, voice. Mr. Bland also displayed good qualities. Mr. Chapman was very funny as Coquelicot. The chorus were well trained and paid strict attention to the conductor.

Escaped from the Jail.

George West, alias William Elliott, escaped from the County Jail at Elizabeth some time Sat day afternoon. He was put at work in the turnkey room as a fireman, and was first missed by Deputy Warden Breen about five o'clock when the supper was called to the evening meal. A investigation was immediately made, and it was found that West had escaped through the same window that Morris and Riley did several months ago. The bar broken at the time of Morris's flight was spliced by a file, and West had forced it apart again by using a grate bar. West was arrested in August last for burglary, and on September 10 he was sentenced by Judge McCormick to the County jail for six months less one day. Officers are on his track, and the recapture is expected.

In Hymen's Bonds.

Mr. Frank Cauly, manager of the Northern Pacific Tea Company on West Front street, was united in marriage to Philadelphia on Sunday last to an estimable young lady of that city. Congratulations are numerous.

The Republican Primaries.

The Republican primaries in the various wards in the city were held last evening. The new primary election law was rigidly enforced, and a list of officers were sworn in accordingly. In several of the wards there were attempts made by Republicans, who voted against Bisbee, to take part in the primary. These were disposed of according to the strict stalwart policy of allowing none but thorough Republicans to take part in the meetings. This action may cause some hard feeling, but in the eyes of the law such persons had no right to take part in the meetings.

The First Ward primary was held in Avenue Hall, on Park avenue. William Addis was chosen chairman, and J. F. McDonald secretary. The following nominations were made: For Councilman—Jacob Gruen, William E. Albaugh, J. B. Coward, William Addis, George W. Moore, John Chandler, J. C. Pope. The following were elected members of the city executive committee, George M. Stiles, J. B. Coward, Adam Rapp.

The Second Ward primary was held in the engine house on corner of East Fourth and Washington streets. Craig A. Marsh was chosen chairman and John Unrich secretary. H. H. Baker was elected Judge of the primary, George P. Baydam and C. B. Corwin, Inspectors, and John Ulrich, Clerk. The following nominations were made: For Councilman—C. M. Goddard; For Constable—C. W. Dodd; For Justices of the Peace—V. W. Nash, U. B. Crane; For Judge of Election—P. A. Dunham; For Inspector of Election—J. H. Dane; For Clerk of Election—B. B. Gray. Delegates to the city convention were chosen as follows: Craig A. Marsh was chosen chairman and John Unrich secretary. H. H. Baker was elected Judge of the primary, George P. Baydam and C. B. Corwin, Inspectors, and John Ulrich, Clerk. The following nominations were made: For Councilman—C. M. Goddard; For Constable—C. W. Dodd; For Justices of the Peace—V. W. Nash, U. B. Crane; For Judge of Election—P. A. Dunham; For Inspector of Election—J. H. Dane; For Clerk of Election—B. B. Gray. Delegates to the city convention were chosen as follows: Craig A. Marsh, Thomas Kelley, Andrew Lyons, Jr., Elmore D. Miller, Thomas Casey, James O'Neil, Hugh O'Donnell, Nicholas Daly, William Sullivan. Resolutions were passed authorizing the delegates to the city convention to form themselves into a citizens' meeting if deemed advisable.

Insolvent Cities.

Judge Dixon has delivered an opinion in Supreme Court in the cases respecting the constitutionality of the act of the last Legislature for the appointment of commissioners for the appointment of Commissioners of Taxation in cities, where the board charged with *the duty of raising money by taxes to pay municipal expenses fail* to organize or refuse to do their duty. The suits were brought by James Reed and others against the Commissioners of Taxation of Elizabeth. One was on a writ of certiorari and the other two on mandamus. In the first case it was asserted that the act is unconstitutional because it is special and not general in its operation, not being applicable to townships. The suits held that the act does apply to townships. The suits for writs of mandamus were brought by Thompson et al., to compel the Commissioners of Taxation of Elizabeth to levy a tax to pay certain judgments rendered against the city. It was held that the commissioners had no authority to do so under the act, and that they could not compel them to pay necessary municipal expenses. The Judge said that if the question of granting the commissioners power to levy taxes for all expenses and purposes or of not enacting the law at all had arisen, the legislature would have taken the latter course. The Judge refused to issue the writs of mandamus.

An Omnibus Line.

An omnibus line is about being started in this city by Mr. J. G. Bide, a gentleman from Orange Grove, Fla. Mr. Bide has a number of very large and comfortable stages, which will be used for this service. He will run upon a livery stable, where anything in his line may be had at short notice. For the route and time table of the new line see advertisement.

State Matters.

Over $250,000 represents the value that Mauch-Chunk residents have in existing cab-owners.

The Cornish organ factory at Washington, as to be enlarged by putting up an additional building 5x200 feet, two stories high.

Besides an organ and cornet, the Keyport Reformed Church has introduced a harp. The bride in one will be a string band with an ass tanid accompaniment.

The improvements and alterations to the Camden and Amboy railroad depot are about being completed. It will be now second to none in West Jersey.

While Charles G. Shute, a farmer living near Mullica Hill, was attending to shoeing a horse the gas burst and his left wrist was so badly shattered as to necessitate amputation.

The Presbyterian congregation of Flemington have just had erected a very comfortable little dwelling for Sylvia Dubois, the old colored woman who is about 117 years, living on Southland Mountain.

A party of Philadelphia capitalists is negotiating for the purchase of a large tract of land at Barnsboro station on the West Jersey railroad, with the intention of laying out a new town.

Two suits for $6,000 each have been commenced against the Rio Grande sugar mill and refinery in Hunterdon county, New Jersey, by Philadelphia parties. About 117 years, as far as heard from, as follows: Shell cane 1,000 barrels of fifty gallons each, or 50,000 gallons; and of sugar between 200,000 and 400,000 pounds.

The Lehigh Valley Railroad has under consideration the adoption of a plan for doing away with all level crossings in cities, towns and boroughs of its line. The style of the proposed improvement has yet to be selected, but it will be a large one. It will probably be identical with the Reading plan, which is in the same kind of connection that is used by the Pennsylvania between New York and Jersey Companies, so that the cars can be charged at Jersey City as well as at Philadelphia.

A Dreadful Disease.

Read, ponder and profit thereby. Kemp's Balsam is the best remedy in the world for all who have had it to excel any preparation in the market as a cure for throat and lung troubles. Sold everywhere. Price 25 cents and 75 cents. Large size, $1.50. Trial size free.

The Democratic Primaries.

The Democrats of the Third Ward met at the rooms of the Democratic Association on West Front street, at half-past seven o'clock last evening. W. S. Chase was chosen chairman, and W. J. Tobin secretary. The following nominations were made: For Councilman—Ephraim Miller; For Constable—James Mullen; For Justice of the Peace—James Whelan; For Judge of Election—Hugh O'Donnell; For Inspector of Election—W. J. Tobin. The nomination for Clerk of Election was made. Delegates to the city convention were chosen as follows: James Clark, W. J. Tobin, Augustus Saltzman. Resolutions were passed authorizing the delegates to the city convention to act in whatever manner should be deemed advisable.

The Democrats of the Fourth Ward held their primary meeting last evening in the rooms of the Democratic Association, at eight o'clock, on the conclusion of the first primary. Levi Hetfield was chosen chairman and Julius Sachs secretary. The following nominations were made: For Councilman—Arthur G. Gallup; For Constable—Nicholas Kelly; For Justice of the Peace—William H. Warner; For Judge of Election—Richard D. Moffett; For Inspector of Election—Michael Fields. For Clerk of Election—Andrew Love, Jr. Delegates to the city convention were chosen as follows: William H. Warner, Thomas Kelley, Andrew Love, Jr., Elmore D. Miller, Thomas Casey, James O'Neil, Hugh O'Donnell, Nicholas Daly, William Sullivan. Resolutions were passed authorizing the delegates to the city convention to form themselves into a citizens' meeting if deemed advisable.

It will probably be identical with the Reading plan, which is in the same kind of connection that is used by the Pennsylvania between New York and Jersey Companies, so that the cars can be charged at Jersey City as well as at Philadelphia.

Reform at Millstone.

The Corresponding Secretary of the Reform Club League held a meeting in Millstone last evening. A large and appreciative audience congregated in the Reformed church. Mr. Mr. Gerow, the President, presided in the devotional exercises. Hon. Wm. B. Mee was up for with more than ordinary enthusiasm, holding the attention with breathful attention for some time. John B. Sayre followed with one of his characteristic addresses. The meeting presided by the Club under the auspices of the Reform Club of Millstone was very fine, and altogether the meeting proved a great success, and a vote of thanks was unanimously voted to all who participated in the meeting.

Two New Counties.

The proposition to make two new counties in this State is again being agitated and will be considered at the approaching session of the Legislature. The first of the new counties is to be formed out of the part of Monmouth county that lies along the seashore and would include all the seaside resorts from Holly Beach to Long Branch. The other would include Keyport and Matawan, Ether Long Branch or Red Bank would be the seat of the new county. The other of the proposed counties would be carved out of the counties of Union, Somerset and Middlesex. It will include Round Brook, Plainfield, Westfield, Cranford and Rahway. This city would probably be the county seat. The aggregate population of the proposed new county in this vicinity would be about 20,000. Somerset county is about 31,000 Union county is 80,000, Middlesex county 50,000.

Personal.

Mrs. A. W. Dunford and son, of North Plainfield, start to-day on a short visit to their relatives in New York, returning about Saturday.

Captain Henry Erben, late Commander of the U. S. Schoolship St. Mary's, now Commander of the Portsmouth Navy Yard, was in town yesterday for the first time in ten years.

THE P. S. C.

At their meeting Thursday evening unanimously adopted the following resolutions:

Resolved, That the Reform Club of Plainfield hereby reaffirms its determination to maintain connection with partisan politics, but desiring that the cause of sobriety may be advanced within this city, deems it appropriate at this time to nominate and recommend to each member of the club, when exercising the rights and privileges of a citizen at the municipal election, *to support only such candidates*, irrespective of their political views, as are known to be temperance men, and in favor of the prohibition of the sale of liquor in the city of Plainfield.

PRESS GLEANINGS.

Black, the novelist, has for a dinner bell a cow bell from the Roman Campana.

Liszt is now in better health and doing more work than for several years past.

General Lew Wallace says that when he retires from the Ministry to Turkey he will never accept another Government office.

M. Sardou, when a student, was "so thin in appearance that it made one shiver to look at him." Nowadays he is fat, saucy and clad in purple.

Rev. Henry Pahtahquahong Chase, a chief of the Ojibway tribe of Indians, and a regularly ordained minister of the Church of England, is a newly arrived lion in Old London.

There was a case in the Bankruptcy Court in London a few days ago in which a banker's clerk, with a salary of £100 a year, had run up a bill of £51 for flowers for his buttonhole.

A woman whose son had been ruined by dissipation, was fined $2 in Hamilton, Ont., the other day, with the alternative of ten days in jail, because she knelt before a saloon and asked God to curse the liquor traffic.

A deep cave has been found to exist under the town of Blanksteen, Iowa, by a farmer who was sinking an artesian well. Three unsuccessful attempts were made to sink the well, but each time the drill sank into the cave.

The price of natural gas has been reduced in Pittsburg from forty to thirty cents per 1,000 feet, with a rebate of ten cents for prompt payment. This reduction is said to make the cost about equal to the cheapest coal that can be bought.

The Moscow Gazette remarks that seclusion having reached as high as Lieutenant Colonels it will not stop there, but we must be prepared for still more surprising revelations; while the Viedomosti believes that the canker of Nihilism has now eaten through every class of society, private and official.

Two Frenchmen, the brothers Ferre, have invented a new kind of harp, made entirely of wood. Instead of strings the inventors use strips made of American fir. The sound is produced, as in the ordinary harp, by the contact of the fingers, but the player wears leather gloves covered with resin. The tone of the instrument is said by Le Menestrat to be of remarkable purity.

A youthful negro in a Georgia hamlet found an old bombshell, and tried to break it open with an axe. A local paper remarks that "his end was plain."

In the Montana cattle towns, a newspaper, a shave and a glass of whiskey all cost the same price, namely, twenty-five cents.

HENDRICKS DINED.

HE DOESN'T WANT TO MAKE A SPEECH BUT HAS TO.

A Reminiscence of a Democratic Senator from New Jersey Several Years Ago.

He Denies There is a Misunderstanding Between Him and Cleveland.

NEWARK, Nov. 24.—Kinsley's restaurant wore a festive aspect last night as a number of gentlemen in dress suits, badges, and boutonnieres sat down to an elaborate dinner given in honor of Vice President-elect Thomas A. Hendricks. The Indiana statesman himself occupied the head of the table, flushed and good-tempered, while at his right was Gen. Leon Abbott, of New Jersey.

"I thought I should make no more speeches after my Brooklyn address," said Mr. Hendricks, with a smile, at the period when the wine was being circulated. It seems quite impossible for me to leave this banquet room without expressing to these gentlemen something of the feelings I feel in meeting them. This occasion is one of more than ordinary interest to me. I meet the gentlemen of a great state—gentlemen that have made it to-day what the genius of her policy and her fortunes. I recollect once seeing a young man, in early life, enter the United States senate, and he came to me when he left it a much excluded. It was my privilege as a Democrat to defend his rights and the rights of the great state of New Jersey, and in meeting them I meet him here to-night, in the person of Senator Stockton, I feel to be in a very great honor. The gallant gowern g Delaware as the man who forced everything ahead of him in the campaign of last year You know, of course, the result, and that you have a leader whom you can safely follow, and that is saying a great deal. I am much gratified to join Indiana and New Jersey in a toast upon this occasion."

Gov. Leon Abbott, in responding to the toast "Grover Cleveland," said the. it meant the d feat of the Republican party, attributable alone to the Democracy,

WHAT CONGRESS WILL DO.

It Will Probably Pass Only the Appropriation Bills.

WASHINGTON, Nov. 23.—Congress will meet one week from to-day. There is a strong probability that it will do very little of importance the coming session beyond passing the necessary appropriation bills. It will be practically a two months' session. Congress does no little work in December in ordinary times that it is hardly worth while to call it an extra session on that account. This time there will be a large exodus for New Orleans about the 15th, special trains having been provided and a free ride guaranteed to the opening ceremonies of the World's fair. Those who remain at their posts may whack away at the calendars, which are loaded to the muzzle with Bills. The new calendars for Dec. 1 have been printed. They consist together of nearly 100 pages. There are about 1,300 bills now before the house in various stages of incompleteness. If congress met to-morrow and introduced no new business it could not act on half of these measures. They are divided as follows: In committees of the whole, 376; on the house calendar, 155; private calendar, 432; senate bills on second or third reading, 345 and 47 others reported from the calendars and disposed of, special orders, privileged reports and business on the speaker's table. With this formidable array to start on it will be readily seen that new measures yet to be introduced will stand a very poor show of a fair consideration.

Her Bustle Made Her Blush.

CLEVELAND, Nov. 23.—As the City hall elevator was on its downward trip it left one of the passengers at the second landing together in midair. A crashing of the elevator lamp brought many persons from the adjoining offices, who were horrified to see a young lady hanging by her dress to the spikes of the railing which guards the elevator opening. She was quickly lifted over the railing. She had stood just inside the railing with her back to the door, and while it was coming down the air inflated her clothes and the short spikes caught her bustle and dress. The opening at the top of the elevator allowed it to pass down without striking her, leaving her suspended. The conductor was afraid to back up for fear that he would crush her against the woodwork. Had it been an old fashioned elevator the top of the concern going down would have crushed her before it could have been stopped. She went away blushing, her bustle having been replaced where bustles ought to be.

Politics Make a Minister Resign.

NEW HAVEN, Nov. 23.—Rev. Thomas R. Bacon read a letter from the pulpit resigning his pastorate of Dwight place (Congregational) church. In speaking of the matter Mr. Beacon said that his reasons for resigning are the very evident manifestations of dislike and displeasure with his political position in the late campaign. He was prominent in the Independent Republican movement, and his support of the Democratic candidate for president was the subject of much controversy in the church at the time. Mr. Bacon resigned last spring, but withdrew the resignation at the request of a large majority of his parishioners. As to his plans for the future he does not speak, but says he will not remain in New Haven.

Female Suffrage Popular in Washington Territory.

WASHINGTON, Nov. 24.—Watson Squire, the governor of Washington Territory, states in his annual report, just received by the secretary of the interior that the law allowing women to vote in the territory, accompanied as it is with the provision making them liable to jury duty, while questioned by some, meets with the approval of a majority of the territory. He said that the women themselves are strongly in favor of continuing the law, and that he finds the operation of the law attended with no unfavorable results to the welfare of the people.

New Jersey's Senate Republican.

SALEM, N. J., Nov. 23.—The recount of the senatorial votes of Salem county, upon which the complexion of the state senate depends has commenced. All the township had been recounted at adjournment, with the exception of Salem city. Errors in favor of both candidates have been discovered, but so evenly divided that there is little doubt of the election of Wyatt Mills, the Republican candidate, by about 13 majority. His election will give the Republicans a majority of two in the senate and 14 on joint ballot.

Did She Die in a Trance?

CORTLAND, Nov. 25.—Many particulars have reached here concerning a sensation that is causing excitement at Gambrier, Ohio. For some time past Sarah Walker, of that city, has been under treatment of Dr. George Burres, a spiritualistic physician. Mrs. Walker, it now appears, died while under the influence of the physician. It was given out that she was in a trance, but it is now announced that she had been dead since Wednesday. The coroner is investigating and the woman's friends are terribly excited.

The Wilson Sewing Machine Company's Troubles.

NEW HAVEN, Ct., Nov. 25.—In the superior court application was made by parties representing over two-thirds of the capital stock of $300,000 of the Wilson Sewing Machine company, of Wallingford, Ct., for the appointment of a receiver. There being no opposition to the application the court appointed Gordon W. Hall receiver of the company and authorized him to go forward with the business.

If True, Strange.

LINCOLN, Ill., Nov. 25.—It is reported in this city by telegraph that Q. A. Carpenter was shot and killed at Blunt, Dak., on Saturday, but the details are not given. Carpenter will be remembered as the man who was charged with the murder of Zora Burns, in this city on October 14, 1883, and was compelled to leave here by the indignant citizens, after his trial and acquittal at Petersburg, Ill.

Big Works Destroyed.

OIL CITY, Pa., Nov. 25.—News has just been received of the destruction by fire Friday night of the extract works at Kelliteville, Forest county, owned by Kellett & Co., of Boston. The works did an immense business extracting the juice from hemlock bark for tanning. Loss to building and machinery $35,000; insurance, $15,000.

For Mayor of Boston.

BOSTON, Nov. 25.—The Republican city convention renominated Gen. A. P. Martin for mayor with but few dissenting voices. Mayor Martin is a Democrat. Ex-Alderman Hugh O'Brien, who was defeated by Martin last year, is almost sure of the Democratic nomination.

German Degrees for Stanley.

BERLIN, Nov. 25.—The universities at Halle and Berlin have both conferred the degree of doctor of philosophy upon Mr. Henry M. Stanley.

To Regicide a Murderer.

TROY, Nov. 23.—J. Horace Jones, who murdered his wife on July 8, has been sentenced to be hanged on Friday, January 6.

A NEW PAVEMENT.
The undersigned has secured the exclusive agency for the sale of the
Diebold Patent Iron Stone,
which for elegance and durability, is unsurpassed, and in price will compare favorably with any other pavement now in use. It is the most beautiful pavement known for walks for yards, gutter stones, floor tiling and street blocks. Also used to build fire and burglar proof vaults; and for building purposes generally. The pavement blocks have many striking peculiarities—They show no perceptible wear; are non-conductors of heat and cold, as well as all kinds of moisture. When dampness accumulates on the ordinary brick, the pavement remains perfectly free from it. These Blocks are cut from the solid iron Stone and are the best of substitutes for cleaned granite. At Warner's Fancy Store, opposite Robinson Music Hall. For further particulars call on or address

The Sun.
THE SUN is, and will continue to be, a newspaper which tells the truth without fear of consequences, which gets at the facts, no matter how much the process costs, which presents the news of all the world without waste of words and in the most condensable shape, which is working with all its heart for the cause of honest government, and which therefore believes that the Republican party must go, and must go in this year of our Lord, 1884.
About sixty million copies of THE SUN have gone out of our establishment during the passed twelve months.
If you were to paste end to end all the columns of THE SUN printed and sold last year you would get a continuous strip of interesting information, common sense wisdom, sound doctrine, and fun not long enough to reach from Printing House square to the top of Mount Copernicus in the moon, then back to Printing House square, and three quarters of the way back to the moon again.
But THE SUN is written for the inhabitants of the earth; this same strip of intelligence would girdle the globe twenty-seven or twenty-eight times.
If every buyer of THE SUN during the passed year had spent only one hour over it, and if his wife or his grandfather has spent another hour, the newspaper in 1883 has afforded the human race thirteen thousand years of steady reading night and day.
It is only by little calculations like these that you can form any idea of the obvelousness of the most popular of American newspapers, or of its influence on the opinions and actions of American men and women.
If you know THE SUN you like it already, and you will read it with accustomed diligence and profit during what is sure to be the most interesting year in its history. If you do not yet know THE SUN, it is high time to get into the sunshine.
Terms to Mail Subscribers.
DAILY—50 cents a month, $6 a year, with Sunday edition $7.
SUNDAY—Eight pages. This edition furnishes the current news of the world, special articles of exceptional interest to everybody, and literary matter of rare borders of the highest merit. ONE DOLLAR a year.
WEEKLY—ONE DOLLAR a year. Eight pages of the best matter of the daily issues; an agricultural department conducted with great care; full market reports, and literary, scientific, and domestic intelligence make THE SUN especially adapted to the wants of the intelligent household. To clubs of ten with $10, an extra copy free.
Address THE SUN, New York City.

[Philadelphia Cor. Chicago Tribune.]

"Ah, I do it to your Philadelphians very much, you know, because, ah, because you are so English, don't you know."

For this compliment I, on behalf of the assembled Quakers of this town, was blushingly grateful. The speaker indeed was no less a figure than Earl Rosse, not only a British peer, but also the son of his father and the owner of the largest telescope in the world. He is Mr. George William Childs' latest star guest.

What was meant as a compliment to Philadelphia by Earl Rosse followed a bantering disclaimer as to the qualities of the Quaker city's society. Everything, to Lord Rosse's mind, was summed up in the two words "so English." And, after all, they express the thought and the condition about as well as any other words could. Philadelphia is probably the most Anglican of all the cities in the United States—Anglican in the temperament, the mode of thought, the prejudices, the steadfastness, and the predominance of its people. There is no American society in which that august being, a grandfather, is so devoutly worshipped. I have in mind at this instant a gentleman who is counted by the most exclusive people outside of Philadelphia, and is a welcome guest in the best four as in London and Paris, and yet in this, his own town, yet next to never most him out except at the parties. And I hold that one who is asked to gatherings of gentlemen and overlooked when general entertainments are arranged for is treated with contempt.

Why is this gentleman, a member of a noble profession, a witty, cultured and honorable gentleman and you, treated so? The answer is simple enough. His father is known to have kept a little shop in the long ago. London and Paris see no reason in that to shut their doors against so much brightness and cultivation, but Philadelphia, with its essentially English notion of caste without the English leaven of sound common sense, insists for that reason that its ladies shall not publicly receive one of its most distinguished and most honorable citizens. But it is the ladies, I suppose, who want it so, though it is so narrow and provincial.

There is another quality that Philadelphia has that is also provincial, but it is a good quality. It is the double quality, so to speak, of conservativeness and thrift. Philadelphia may grow wealthy slowly, but once rich they remain rich. Apropos of that, here is a little story: A clerk at a fashionable hotel at Long Branch was telling, one night last summer, of a number of New York men who were at the hotel the season before, and lived in their day like princes, but did not return. "They all busted up last winter," the clerk added, "and I'll stake my reputation as a prophet that just as many who are here this summer will bust up this coming winter, and other men will be doing the grand in their places here next summer."

"Perhaps that crowd over there will go under," said one of his listeners, pointing to a group of well-dressed and sleek-looking old boys quietly smoking and chatting on the piazza.

"O! no," replied the clerk, "they are Philadelphia men. They have been coming here for years, and will continue to come until they die. Philadelphians never burst up."

That was a little strong, perhaps, but it contained the rigid idea. These old codgers make little noise, but O my, the barrels of dollars they get and freeze tight to! This noiseless sharp sense and far-seeing prudence are just as clearly shown in the direction of Philadelphia as in the management of business affairs. The hedge that surrounds an attractive and young Philadelphia girl is a cautious fence. It is so done as not to fall at times that the most agile gallant despairs of getting over or through it.

The result is apparent. While society all about us is rising up and scandalized by elopements and mesalliances, life in this dear old Quaker town flows on as placidly as a streamlet in summertime. Pretty girls fall in love and marry, like the world-at-large, and sensible creatures that they are, they give their hearts and hands to men in their own set, precisely as satisfied, and love is supported by a big dower. The danger of having handsome coachmen hanging round was not unmeet at. Prudent mammas know that things of that sort are like the cholera—they come rarely; but when they get a start they spread rapidly, and are generally fatal. The pedlar was met in boarding houses there are young and giddy girls by finding some excuse for dismissing the youthful and good-looking servants and planting on the staid aged and homely white men or elderly blacks. It was never before considered just turn here to have a negro-wear case's livery. From the immense number of shiny black faces that affect to lean sedate behind splendid horses just now it might be imagined that it would be a solecism to have anything but a black coachman.

Quail and Wildcat.

Speaking of the spending of the quail season in California, the San Francisco Bulletin says: "They are now so abundant that the ing the roadways. While rewards are offered by farmers in southern counties for killing this bird which destroys much grain, the Alameda and Contra Costa farmers say the quail is useful to them. It attacks their grain only in the milky state, and chiefly subsists upon insects. Their destruction of ants is of incalculable importance. The quail's great foe is the wildcat. The latter animal is prolific in the counties named. A quail nesting will cover fifteen to twenty eggs, and nearly every egg will hatch. They nest once a year, and during such periods the male is a most pugnacious defender of the mother and young. A man may almost strike him with a stick. The wily wildcat, as large as four ordinary cats, will attack Mr. Himself out and put out his tongue; the male quail will approach and peck it, whereat the cat seizes his tormentor prey."

He Pitied Him.

[Detroit Free Press.]

The other day an old horse being driven along High street, before a wagon loaded with dirt fell down, and instead of being at all concerned about it the negro driver got a rest for the small of his back and filled his pipe for a smoke. Several pedestrians halted, and one finally called out:

"Why don't you help that horse up?"

"Kase I'se listed at him befo', an' I know I can't rise one side o' him."

"But I should think you'd pity him."

"Oh, I does, boss—I sartinly does. If I didn't, I wouldn't set back an' keep him company when I kin airs 61 a day."

Boston Journal: It is a significant fact that the eastern colleges which favor scientific education instead of classical have reported the greatest gain in the number of pupils.

Rescued by the Dog.

Arkansaw Traveller.

"Yes, this is a very old dog," said a spectator to a man who took an active part in the canine harvest, "and we should hate very much to have him caught on the street and locked up. I am very much attached to him, for I used to carry him in my arms when he was a little puppy." "Do you say, mine, that he is a very old dog, and that you carried him—" "Oh," she broke in, recollecting that she had compromised herself, "I mean that when I was a child and when I was a little—I mean that mother made—go on away from here or I'll set the dog on you."

The Campaign Liar at New Work.

[Burlington Free Press.]

A Michigan fisherman recently hooked a pickerel that was found to contain two pickerel of nearly equal size. If anybody wants to nail this lie we will furnish the spike. Our arm is so tired that we can't do it.

Advice for Thanksgiving Day.

Go not too heavy on the turkey during the dinner, or he may retaliate in thy dreams.

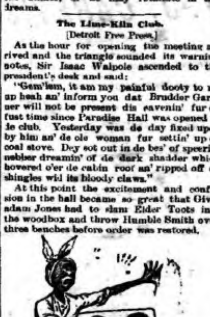
The Lime-Kiln Club.

[Detroit Free Press.]

As the hour for opening the meeting arrived and the triangle sounded its warning notes, Sir Isaac Walpole ascended to the president's desk and said:

"Gem'lem, it am my painful dooty to ris up hush an' inform you dat Brudder Gard ner will not be present at de meetin' fur de fust time since Paradise Hall was opened to de club. Yesterday was de day fixed upon by him an' de ole woman fur settin' up de coal stove. Dey got out in de bes' of sperrits nobber dreamin' of de dark shadder which hovered o'er de cabin roof an' ripped off de shingles wid its bloody claws."

At this point the excitement and confusion in the hall became so great that Givadam Jones had to slam Elder Toots into the woodbox and throw Hamble Smith over three benches before order was restored.



De ole woman's strength gin out.

"Our beloved President had sprained his back and busted his suspenders," continued Sir Isaac, "but was still full of de feelin' dat he would conker or die, when, at a critical minit, de ole woman's strength gin out an' de hull weight of a stove weighin' about six tons fell upon Brudder Gardner. When de ruins hayd been got him out from under dat mass of iron it was speechless an' sanguine, an' it was nigh upon an hour befo' he came to an' axed to see his dog. Seben doctors hav surrounded de cabin ebber since, an' our president has so fur recovered dat he kin tell de difference between chopped cabbage an' clean chowder. His orders am fur me to occupy de chair an' do de bes' I kin under de sarcumstances."

RESOLVED.

Waydown Bebee offered the following resolutions:

"*Resolved*, Dat we sympathize wid our beloved president to de fullest extent of de law, an' dat his absence to-night am deemed an irreparible loss to de entire cushun."

The resolution was unanimously adopted, and while the vote was being taken many of the members were seen to shed tears.

Feeding a Conscientious Conductor.

[Cincinnati Times-Star.]

Conductor Allbright runs a train from Cincinnati to Washington. Shortly after leaving the city, about a week ago, a tall, sickly-looking man approached him and said: "Please wake me up when we get to Glen Station. Allbright promised to, but when Glen Station was reached he was busy and forgot to wake the fellow. When about five miles on the other side of the station, Allbright remembered the promise, and, after indulging in a very little emphatic English, handed the train to Glen Station, and, walking into the coach where the man was sleeping, said:

"Here we are, ye Glen Station."

He got up, rubbed his eyes and answered: "I am very much obliged to you. I wanted to know when I got there, so I could take my medicine."

Presently he produced Allbright from hand bag in his indignation that day.

BILL ARP'S LETTER.

He Adds Several Pertinent Comments to the Rev. Talmage's Sermon.

[Atlanta Constitution.]

Dr. Haygood preached a sermon at our town not long ago, and with an unusual degree of timidity I will venture a gentle hint to a father to lay up money for his children. "For many long years," said he, "I have been an executor of the boys of this land. I have loved them, counseled them, and tried to guide them by precept and example, and I say now with solemn conviction, that there is no danger, no peril, no temptation so fatal to youth as riches. Many of our young men in college as beneficiaries; many come whose parents are toiling and struggling to give them an education, and they come poor and are rich, and their children never know a want. It is this last class only that have ever given us trouble or anxiety. From this class all the ungodly come, and not long ago we had to expel one of them who was only 10 years old for being a habitual drunkard. I keep a roll of our graduates and when a man dies I turn to your after they leave us, and it is only this class who come to grief and make up a record either of indolence or of shame. O, come there are many noble exceptions and I only allude to the contrast in general."

This was the substance of the doctor's declaration, and I wish every parent in the land could have heard it, and realized the solemn emphasis with which he said it, for Dr. Haygood knows. He has opportunity to know. Poor boys make the best citizens. They make the best men. They work and toil for an honest living. Riches are beset with many perils. A man can pile up and keep on piling if he wants to, but let him look out for breakers.

Not long ago I passed by a princely mansion in a large city, and I asked my friend what had become of the children of the man and he said well he didn't know but two. The son is a genteel vagabond who loafs around town and the daughter married a gambler who neglects her, and that's what comes of rich old man. So, after all, there is some good in poverty; some comfort; some security for our children. Not long ago I asked a wealthy old gentleman about his children and how they were and what they were doing, and he answered with pride about his oldest boys and said they were sober and steady and at work—and then he said, "but these boys were born when I was poor, very poor, and had to work hard for a living and as they grew up they had to work too and acquired habits of industry and economy, but our two youngest came to us after I had got well off and they never worked any, and they give me a great deal of trouble and anxiety. I am sorry I've got rich."

That is the way of it exactly. The perils of riches.

But still a fortune gained honestly in the pursuit of an honest calling is a good thing, and many men manage it aright and manage their children too, and I am like every body else, I suppose, I'm willing to risk it and take the chances. It is no sin to have it, but every man who is hunting for it ought to be forewarned and forearmed and bring up his children on proper principles. "Get acquainted with them." I heard a rich man at Anniston say, "I am tired of work and I must quit. I have got money enough, but it looks like I can't stop. I want to stop and get acquainted with my children."

Well that is right. A man ought to know his children and they ought to know him. He ought to take time to talk to them and tell them stories about what he did when he was a little boy, and he ought to frolic with them and all have a good family time together. That beats money all to pieces and even if he has got a big pile for them, they won't be waiting for the old man to die.

An Undertaker's Swindle.

[New York Commercial-Advertiser.]

It very often occurs during the summer season that young children die from the effects of the heat. The parents have no plat in any cemetery and are not able to buy one, so they are compelled to leave their work to accompany their child's body to the grave. The law says that a burial must take place outside of the city limits, and so the parents go to an undertaker for assistance. He consents to buy a grave and bury the child in it for $15 or $20. By hard pinching the family manages to scrape together the sum. After the funeral service he takes the body to his shop in a neat coffin, and there transfers it to a deal box, and by something which he terms a pull with one of the minor officers of the department of charities and corrections, has it taken to the potter's field at a cost of perhaps $6. He pockets the difference. Those who in search of the child desire to visit their dead the undertaker indicates a grave in some exclusive part of Cypress Hills, and they waste their money and sympathy. This thing is done daily, and it is owned by the authorities.

Gen. Sheridan and McCullough.

[Enquirer.]

Gen. Phil Sheridan has been for some years one of McCullough's intimates. He detected three years ago that the life the tragedian was leading had affected his brain. Finding it impossible for the latter to avoid temptation, the busy sabreur urged him to flee from his fair foes and take refuge in the wilds of the west, where the star routes made the inside appointments fat, the scented billets doux might not reach him, or if they did would have lost all their perfume by the time they came to hand. A party was made up to explore the Yellowstone region, with the general at its head and with McCullough as the guest. He roughed it with the soldiers for two months, and came back ruddy and robust, but civilization took him up again and made him the wreck he is to-day.

An Interrupted Banquet.

[Texas Siftings.]

"Jes fill yerse'f up, honey," said an Austin colored cook to a big strapping negro man she was entertaining in the kitchen. "Dar's danger ob yer bein' disturbed. De white ooman in de house am down in bed, an' de doctor am up in de nuss'ry dar till mawnin'. Take some mo' gravy, honey, and hep yerse'f to some meah on the pie.

"And at this point the lady of the house inserted her head through the open door an said:

"This is a nice state of affairs, Matilda. You can pack up and go."

"Nothin' you mine, I'll tell the doctor you didn't stay in bed as he tole you."

She Would Help.

[Heidelberger Journal.]

Husband—Hullo, dear, as I was passing, though our garden I saw some asparagus ready for cooking; perhaps you would like to go and gather the first fruit of the season yourself? Young wife (anxious to conceal her ignorance in the vegetable department)—I tell you what, Adolphus, you will go to, other, you shall pluck it and I will hold the ladder.

Provident Pat.

[Boston Globe.]

"Well, Patrick, how much have you got laid up against a rainy day?"

"An owld umbrilly in the attic, begorra, an' that's enough for a workin' man."

Affluence may be defined as 10 cents a day over and above a person's expenditures.

Scientific American

ESTABLISHED 1845.

The most popular Weekly newspaper of Science, Industry, Inventions, Engineering, Mechanics, Chemistry, Electricity, Natural History, Agriculture, Medicine, Hygiene, Meteorology, Astronomy, Geology, Microscopy, Pneumatics, Aeronautics, Navigation, Photography, Architecture, Building, Sanitary Engineering, Household Economy, Textile Industries, Mining, Metallurgy, Military Science, Ordnance, Railroads, Steam Engineering, Marine Engineering, Naval Architecture, Shipbuilding, Boat Building, Yachting, Fishing, Fish Culture, Natural Resources of the United States, Patent Office Decisions, Trade Marks, Copyrights, Legal Decisions affecting Inventions, Manufactures, Trades, Professions, Home Improvements, Social Economy, Useful Information, Recipes, Notes and Queries, Personal Mention, Obituary, Literature, Publications, Etc.

Every number contains Original Contributions from practical writers, and is profusely illustrated with Engravings, Working Drawings and Photographic Prints, representing the latest Inventions, Discoveries, Engineering Works, Architectural Designs, Mechanical Movements, Novelties in Manufactures, Agriculture, Horticulture, Medicine, Social Economy, Sanitary Improvements, Natural Phenomena, Meteorological Charts, Astronomical Phenomena, Etc.

Terms, $3.20 a year, $1.60 six months, including postage. Discount to Agents. Sold by all newsdealers.

PATENTS. In connection with the Scientific American, Messrs. Munn & Co. are Solicitors of American and Foreign Patents, have had 35 years' experience, and now have the largest establishment in the world. Patents are obtained on the best terms. A special notice is made in the Scientific American of all inventions patented through this Agency, with the name and residence of the patentee. By the immense circulation thus given, public attention is directed to the merits of the new patent, and sales or introduction often effected. Any person who has made a new discovery or invention can ascertain, free of charge, whether a patent can probably be obtained by writing to the undersigned. We also send our Hand Book about the Patent Laws, Patents, Caveats, Trade Marks, Copyrights, their costs, and how procured, with hints for procuring advances on inventions. Address for the paper, or concerning Patents, MUNN & CO., Office Scientific American, 261 Broadway, New York.

Consumption can be Cured!

This fact has been demonstrated in more than

TEN THOUSAND CASES by

DR. S. D. HOWE,

The Great Consumption Doctor of New York,
PROPRIETOR OF THE

Arabian Medicines,

Celebrated throughout the World for their remarkable Cures.

Dr. Howe's Arabian Milk Cure.
Dr. Howe's Arabian Tonic.
Dr. Howe's Arabian Liver Pills.

The Only Medicines that have ever been known to positively cure Consumption.

TESTIMONY
Of the Hon. Jos. E. Cary, Judge of the Superior Court, Chicago, Ill.

CHICAGO, Dec. 14th, 1876.

DR. S. D. HOWE,

DEAR SIR—People use to send my grateful testimony to the utmost of utterance in the virtues of your highly celebrated Arabian remedies. For a long time my wife was seriously affected with hacking cough, oppressed breathing, soreness of the chest, and constant acute pains in the lower portion of the right lung and under the shoulder blade. Her sufferings were intense, and she became extremely nervous and sore with pain. Her disease was pronounced consumption by the physicians of Chicago and other cities, where prescriptions had been taken without benefit. When you visited Chicago in January last, we called on you, having very little hope of deriving help from your treatment. We were inspired with hope by the skillful manner in which your thorough examination was conducted, and the satisfactory explanation with which you closed your diagnosis. My wife determined to take your medicines in accordance with your plain and practical directions. She began to use the Arabian Milk-Cure and Arabian Tonic. Their beneficial effect at once became manifest—the cough loosened and soon ceased, respiration became easy, the soreness of the chest was relieved and all pain removed, she began to gain in flesh and improve in strength and appearance. I will believe that your medicines and skillful advice have saved the life of my wife. She unites with me in this grateful tribute to the virtues of your remedies.

Very respectfully yours,
JOSEPH E. GARY.

The above letter is only one among thousands received from all parts of the United States.

—There will be a union service at Westfield to-morrow in the Baptist Church.

—There was one new name added yesterday to the registered list of voters in the Second Ward.

—Performances at the Music Hall attract many people from out of town, some coming from as far as Elizabeth.

—"Uneasy rests the head that wears" a nomination, and don't know whether the nominee will get left.

—On account of to-morrow being Thanksgiving, the regular Thursday evening meeting at Reform Club Hall will be omitted.

—The anniversary exercises of the Children's Home will be held in the Crescent Avenue Church on Thursday evening, Dec. 4.

—There were six names added to the registered list of voters in the Fourth Ward yesterday, thus making the entire number six hundred, the limit allowed by law for one polling district.

—Lewis Wright, janitor of Alert Hose Co., was attacked while in the Hose house yesterday with hemorrhage of the lungs and taken to the hospital by Second Assistant Chief Saltzman and Foreland Stover.

—A thief made way with some boots, clothing and other articles at Panwood a few days ago. A warrant has been issued for the arrest of the suspected party, and he will probably be brought to justice.

—A wedding ring and a silver spoon were stolen from a room in Mr. Armstrong's residence at Evona on Saturday. A servant is suspected to be the guilty party, and a warrant has been issued by Justice Nash for her arrest.

—The Boards of Registry of the various wards met yesterday, and from seven o'clock in the morning until eight in the evening the members tried their best to kill time. There was very little business to occupy their attention.

—There have been several complaints made before Justices of the Peace recently of men accosting ladies after dark. One such case came up before Justice Nash recently. The man said that he was acquainted with the lady, and did it in a joke. Thereupon she withdrew the complaint.

—The notorious Margaret Bunworth filed a complaint recently before Justice Nash against Peter Schneiderwind for assault and battery. Margaret exhibited as direct evidences of the assault a blackened eye and a bunged up appearance in general. Schneiderwind was arrested on Monday evening and brought before the Justice yesterday, but the complainant failed to appear, and he was discharged.

They Say

That Ex-Mayor Randolph may be nominated to-night by the Democrats assembled under the wams of a meeting of citizens.

That Mr. Randolph don't hanker after the Mayoralty, because it is a bothersome, thankless office.

That Mr. Randolph would like to succeed Mr. Kaiser as School Trustee.

That Mr. Titsworth will make a good city Treasurer, if elected.

That the Reform Club favors Councilman Marsh the Republican nominee for Mayor.

That the Reform Club thinks well of ex-Mayor Randolph also.

That the Reform Club will probably bolt the Republican nominees for councilmen, unless they sign a document at the request of a committee of five, selected from both parties, committing themselves unqualifiedly against licensing saloons.

That Judge Wadsworth's friends are suggesting that he be nominated at the candidate for Mayor on the citizens' ticket.

That there are a number of schemes afoot to delude the general public by the nominations.

That it is safe to say that the people of Plainfield are not such fools as the schemers think.

That we will know more to-morrow.

THE REPUBLICAN CITY CONVENTION.

Councilman Frank E. Marsh Nominated for Mayor.—The Other Candidates.

The Republican city convention met in Association Hall on Park avenue last evening, and was called to order by W. Rockhill Potts, who on motion was made permanent chairman. James C. Pope was elected secretary.

On the call for nominations for mayor, J. H. Coward named Wm. McD. Coriell, Frank Green named W. Rockhill Potts, and John M. Whitson named Frank E. Marsh. Mr. Potts declined in a neat speech. The ballot was taken by wards and gave Coriell fourteen, Marsh fourteen and two blanks. Another ballot was immediately taken, resulting in giving Coriell thirteen, Marsh fifteen and two blanks. On the third ballot Coriell received twelve, Marsh seventeen and one blank. The nomination of Frank E. Marsh for mayor was then made unanimous.

On the call for nominations for Assessor, the name of the present incumbent, J. A. Hubbard, was the only one presented, and he was nominated by acclamation.

P. P. Dumont and John Johnson were presented for the nomination for collector. On the ballot Dumont received sixteen votes and Johnson fourteen. The nomination of Dumont was made unanimous.

The only name presented for the treasurership was Alexander Titsworth, and he was nominated by acclamation.

For Chosen Freeholders, A. Vanderbeek, J. F. Hubbard and R. Simpson were named. The ballot gave Vanderbeek twenty, Hubbard twenty-four and Simpson fifteen. Vanderbeek and Hubbard were declared the nominees.

D. MacDonald and M. Vermeule were nominated by acclamation for Commissioners of Appeal.

For School Trustee, Jacob Kirkner, J. Evarts Tracy and L. V. F. Randolph were named. Mr. Kirkner declined in a neat speech, expressing his thanks for past favors, and seconding the nomination of Tracy. David E. Titsworth spoke against the nomination of Randolph on the ground that he had bolted the Republican ticket at the last election. This speech was received with great applause. The ballot gave Tracy twenty votes and Randolph ten.

Albro Lyons moved that the chair appoint a committee to inform Mr. Marsh of his nomination. The chair appointed as such committee Albro Lyons, John H. French and D. E. Titsworth.

The subject of the terms of councilmen-at-large, and the possibility of the Democrats making nominations for such positions, then came up for discussion. It was finally decided to leave the matter of making nominations for councilmen-at-large, in the event of the Democrats doing so, and also of filling vacancies to a committee consisting of the chairman and one member from each ward. The following were appointed: First Ward—J. B. Coward; Second Ward—O. T. Waring; Third Ward—J. M. Whitson; Fourth Ward—W. R. Codington.

After waiting about half an hour for the committee to bring Mr. Marsh before the convention, the delegates adjourned.

The dropping out of a number of candidates in the race for the mayoralty nomination is accounted for in various ways. President Coriell, of the Common Council resigned in favor of his father, Wm. McD. Coriell, and ex-Councilman Washington Lithgow, who would probably have been nominated on the first ballot had he consented to become a candidate, refused to allow the use of his name, as he could not be in the city all the time, as he thought a mayor should be.

The Opera To-night.

There is no more attractive form of entertainment than comic opera when properly presented. Its bright sparkling music, piquant dialogue, brisk action, handsome scenery and elegant costumes render it peculiarly fascinating.

The Wilbur Opera Company is said by the press from which we have quoted largely during the week, to be unquestionably the best company ever organized. The Drama says: "Susie Kirwin, the prima donna, is one of the most beautiful and accomplished artists that ever appeared in comic opera. She possesses a sprightliness and vivacity that invest any role she assumes with an irresistible charm." "Olivette" is Miss Kirwin's favorite role. The Company bring their own excellent orchestra. Music Hall should be filled to-night.

Personal.

Mr. Charles R. Flint and family of New York are stopping at Hotel Netherwood. Mr. Flint is the partner of Mayor Grace of that city.

—The annual meeting for the choice of officers of the Children's Home Association will be held on Wednesday afternoon, Dec. 3, at three o'clock, in the Y. M. C. A. Hall. Members of the Association and all interested are invited to be present.

THE MUHLENBERG HOSPITAL FAIR.

Receipts About $2,000.

A few days ago we presented to our readers a description of the Muhlenberg Hospital, with a view to directing especial attention to the noble charity to which a number of Christian ladies and gentlemen of this city had interested themselves, and for the benefit of which a fair was then being held at Reform Hall, of which more anon.

We present to-day a picture of the building that our readers may see at a glance how admirably it is adapted to the purposes for which it was erected. The Hospital is located on the extreme east of West Third street on the Westerly side, a short distance south of Plainfield avenue on a lot 120 feet frontage and extending backward 220 feet, the locality being unsurpassed for healthfulness. As we have already given a full description thereof we will now only give some facts not already presented.

The founding of a hospital in Plainfield was first suggested by Dr. Charles A. Hart, and owes its existence primarily to his well-directed and painstaking efforts. The mere incorporation of the hospital was easy: the succeeding steps, resulting in the present well-equipped establishment, taken amid many discouragements and disappointments, were difficult.

The purpose of the "Muhlenberg Hospital," which is the legal name of the Association, is stated in the report just published to be "the care, cure and nurture of the sick and injured persons."

There are nineteen Governors for the institution, and these, constituting the Board of Governors, held their first meeting July 17, 1877.

The building was carefully planned, under medical advice, with a view to secure the best arrangement and advantages for the purposes sought while the circumstances of the case would admit, and was erected under the supervision of Charles R. Smith, of Plainfield, whose gratuitous services as architect were highly appreciated. It is heated by steam, and is well ventilated; its male and female wards, located respectively at opposite ends of the building, are large and cheery, and separate rooms are provided for operations, and for patients not in condition to be advantageously treated and cared for in the wards.

The Hospital is entirely unsectarian.

"The land on which the building stands belongs to the hospital, and is free from incumbrance. The building, erected and furnished at a cost of nearly $7,000, is entirely paid for, moneys for this purpose having been raised in part by the Ladies' Auxiliary Board, in part by fairs, excursions and entertainments of different kinds, and in part by individual contributions. During the past year, however, steam-heating apparatus has been introduced, and certain sanitary arrangements perfected, which have involved an expense larger than the means at the command of the hospital have been able to meet, and it is now unfortunately in debt to an amount somewhat exceeding one thousand dollars. It is hoped that through the gifts of a kind and sympathizing public this obligation may be soon discharged."

The annual expenses of the hospital are considerable, and are likely to increase as its advantages become better known and its usefulness more extended. The services of the medical staff are entirely gratuitous, but the proper administration of the affairs of the hospital requires the constant attendance and care of a superintendent, and skilled nurses, and of a man and other servants, who must be lodged and fed in the hospital building, and whose salaries and wages must be paid; and when to these expenses are added the cost of fuel, lights, medicines, and the board of patients, and the other incidental expenses far too numerous to be mentioned in detail, no one will be surprised to learn that from $2,000 to $3,000 must be provided to meet the aggregate yearly expenses. Of this aggregate expense it may, perhaps, be fairly estimated that one-fourth must be derived from other sources. How derived, has been a subject of earnest and anxious consideration by the board of governors.

Connected with the Hospital is a ladies Auxiliary Board, and this was under the auspices of this Board that the recent fair was held. The proceeds from the fair are about $2,000, of which $1,800 was on Monday paid to the Treasurer, Mr. Charles Shipper.

The active members of the Ladies' Auxiliary Board, are as follows:

Active Members.—Mrs. Frank S. Wells, Mrs. August Saltzman, Mrs. Samuel Huntington, Mrs. T. H. Tomlinson, Miss Mamie H. R. Cock, Miss Mary Haviland, Miss Mary E. Tweedy, Mrs. William E. Lowe, Mrs. John M. Whitson, Mrs. J. Evarts Tracy, Mrs. William Taylor, Mrs. Harvey D. Burlingham, Miss Emilie Bohlpier, Mrs. William B. Outten, Mrs. Theodore Honegger, Mrs. John L. Sewenson, Mrs. Gilford Mayer, Miss John H. Cuthbert, Mrs. Eric N. Erickson, Mrs. Charles G. Crawford, Mrs. M. E. Sedgerton, Mrs. Van Rose Talmage, Mrs. A. Edward Faber, Mrs. Rowland Cox.

Associate Members—Mrs. John Taylor Johnston, Mrs. Lambert Heyniger, Mrs. Ferdinand Bathman, Mrs. Charles K. Francis, Mrs. Charles Potter, Jr., Mrs. Martin L. Cooley, Mrs. James W. Jackson, Miss Elvira R. Runyon, Miss Kate E. Collins, Mrs. William Thompson.

Officers—Mrs. Frank S. Wells, President, Mrs. Samuel Huntington, Vice-President, Mrs. T. H. Tomlinson, Secretary, Mrs. Harvey D. Burlingham, Treasurer.

All the foregoing ladies took active part in the fair, and were assisted by many other ladies of Plainfield, in making the affair such a grand success, including Mrs. Anderson, Mrs. M. L. Cooley, Mrs. S. A. Potter, Mrs. Samuel McCutchen, Mrs. Chas. McCutchen, Mrs. Mason W. Tyler, Mrs. W. R. Potts, Mrs. Stover, Miss Barberger, Miss Cadmus, Miss Tracy, Miss Potter, Miss Gussie Runyon, and the Misses Sniffen.

The "Ladies' Auxiliary Board desire to express their gratitude to the many who have so cheerfully added them in the fair and build for the benefit of the Muhlenberg Hospital, and take great pleasure in announcing to the citizens of Plainfield, that it has proved a success, they having been enabled to place eighteen hundred dollars into the hands of the Board of Governors, after a balance which the Treasurer will report hereafter.

Through the liberality of friends in the good cause, our expenses have been very light, and we would especially mention the generous use of rooms of the Reform Club, also to the Crescent Avenue Church, and the little girls who worked like busy bees when needed, to Mrs. Dr. Ayres, Bridget Shay, Louise Bonnell, May Cabeen, the Misses Miller and the Methodist Episcopal Church and gentlemen who assisted in any manner either by labor, presence or money. We would express our heartfelt thanks and trust that the three of all gifts will come each heart in abundant measure, as it has to us and in the performance of the work of our Saviour. Inasmuch as ye have done it unto the least of these, my brethren, ye have done it unto me.

By order of the Board,
MRS. T. H. TOMLINSON, Sec.

Events To-morrow.

The First Baptist Church, the Park Avenue Baptist Church, the First Presbyterian Church, the Crescent Avenue Presbyterian Church and the Methodist Episcopal Church will hold union services at the First Baptist Church in the morning at eleven o'clock. The Rev. William R. Richards, of the Crescent Avenue Church, will deliver the sermon.

Services will be held in the Trinity Reformed Church in the morning at eleven o'clock. The pastor, Rev. A. V. V. Raymond, will deliver a sermon.

There will be a matinee performance at the Casino, when Prof. George S. Hart, of Philadelphia, will give an exhibition on the Columbia bicycle. He will also appear in the evening.

In the evening the Dudley Buck Quartette and Madame Alberti, elocutionist, will appear at the Music Hall, in the Y. M. C. A. course of entertainments.

The Democratic City Convention.

The delegates elected from the various wards to the Democratic city convention met at eight o'clock last evening in the rooms of the Democratic Association on East Front street. The convention organized by the election of James E. Martine, of the Second ward, as chairman, and Walter L. Heiskell, of the First ward, as secretary. The convention then took a recess for an hour, and then re-assembling adjourned to meet this evening at eight o'clock at the same place.

A Comparison.

To see Olivette in New York by the Wilbur Opera Company would cost a Plainfield citizen as follows:

Car fare to New York and back,	$1.10
Elevated road to and from theatre,	20
Supper,	50
Orchestra ticket,	1.50
	$3.30

The above is a minimum for any single gentleman who takes a choice seat, and with a lady many extras are to be added, and the hour of retiring to bed is two a. m.

Contrast: In Plainfield $1 is the maximum. Hour of retiring 11:00 p. m.

Business Cards.

THE PLAINFIELD ART SCHOOL will be open every evening till nine o'clock Monday and Friday evenings to receive applications for membership in an art class. A class has been formed for instruction in free hand, architectural and mechanical drawing, in pen, pencil and crayon, the day school class for beauty in oil and water colors to continue as usual.

Rates for school, $12 per quarter of twenty-four lessons. Rates for evening class, $15 per quarter of twenty-four lessons. Terms for private lessons, $1 in advance.

A discount will be made in public school teachers in actual service.

ALBERT H. JOHNSON,
Studio, No. 3 East Front street.

Ladies desiring to become proficient in drawing and painting, and pupils of the public schools, generally will be pleased with the system of instruction at this studio, evidences of the success of which may be seen by the progress of present pupils during the first quarter.

T. E. MAZELL, TEACHER OF MUSIC, East Sixth street, cor. Franklin, Plainfield. Reading vocal music a specialty. Also gives either private or in small classes. Correct and thorough elementary instruction upon violin. Also Hilborne Tenney Roosevelt's Method. A Monday evening class of mixed voices is now forming for the study of singing and sight reading. Terms for course of twenty lessons, gentlemen $3, ladies $2 in advance. Lessons may be arranged at Mellor & Hall's store or Mr. Hazell's residence. 11-15-1-22

DR. ROBT. W. ANDERSON, DENTIST, 13 East Front street, over Grifen's Hardware Store, Rooms 2 and 3. Gas administered. Office hours from 9 till 3. 11-11-22

OPERA GLASSES TO HIRE at Collyer's, Park avenue and the lobby of the Music Hall. 25 cents for an evening. 18-tf-1

A LADY WITHOUT CHILDREN offers a happy home and conscientious care to a few well-bred children. Address, Mrs. Dr. Hall, Plainfield. Terms moderate. Address K. Box 106, Plainfield, N. J. 10-6-22

DR. T. S. DAVIS,
HOMŒOPATHIC PHYSICIAN,
Office 35 Broadway, near 5th st., Plainfield, N. J.
Office hours—7 to 9 a. m., 1 to 3 p. m., 5 to 8 p. m.

F. A. DUNHAM,
Civil Engineer and Surveyor, Conard's Building.
Civil Engineer and Surveyor. Having had twelve years experience in city surveying in Boston, feels he is prepared to do anything in his line with accuracy and despatch. 3-27-22

DR. E. W. MEDGES,
Physician and Surgeon, 77 West Front street, corner Central avenue, Plainfield, N. J. Office hours, 8:30 a. m., 1:30 and 6 to 8 p. m. 3-20-1

PIANO LESSONS—MISS NETTIE MATTISON is now prepared to give piano instruction either at her own residence or at the residence of her pupils. Miss N. T. Mattison graduate of Hazel Mathewson, and is a teacher. P. O. Box, 1581.

Special Notices.

A REHEARSAL AND BUSINESS MEETING of the Club Choristers is to be held at the residence of President Dunham at 7:45 this evening. A full attendance is requested. Wm. Hardy, Sec.

FOR SALE CHEAP
Coupe Hackney, cutter-rockaway, three pony phaetons and one horse, all second hand and in good order. Will be sold cheap, to make room for freight. At L. M. French's carriage manufactory on Somerset street. 9-tf-22

THE P. R. C.
At their meeting Thursday evening unanimously adopted the following:

Resolved, That the Reform Club of Plainfield hereby reaffirms its non-connection as an organization with national politics, but desiring that the cause of sobriety may be advanced within this city, deems it expedient and advisable to earnestly recommend to each member of the club, when exercising the voting privileges at a citizen at the municipal election, to support only such candidates, irrespective of their political name, as we know to be temperance men, and in favor of the prohibition of the sale or liquor in the city of Plainfield.

FRANK W. DOREY, Sec.

Cent-a-word Corner.

NETHERWOOD, To let, a suite of rooms suitable for gentlemen with first-class board, rent $30. Mrs. E. F. Mason, South avenue. 11-26-1

WEDNESDAY, NOVEMBER 26, 1884.

Incidents of Sir Moses Montefiore are more numerous even than the years of his life. Here is the latest: He was applied to for charity by a man whom he had helped again and again. "It is no use doing any thing for the fellow," he was told by those about him. "The man is no good. He is not worth helping." To which Sir Moses made reply: "In that case I shall help him decidedly, for if I don't I am sure that nobody else will."

An understanding has been arrived at between France and Switzerland for the construction of a tunnel through the Simplon. The Paris, Lyons, and the Mediterranean Railway Company has been instructed to make a project to be submitted to the three interested—namely, France, Italy, Switzerland—and to furnish an estimate of the amount at which it would itself undertake the achievement of the tunnel on condition of a grant from each of these three States.

About nine years before the discovery of the silver mines of the Comstock a band of about ten Washoes, on horseback, stole their way over into the Cosmo Mountains, where was situated one of the finest orchards of nut-pine in the whole country, and set fire to the trees, escaping into their own territory. Near Washeeshey were badly whipped. In the treaty that followed it was stipulated that back more should a Washoe appear on horseback never that, should he appear on Piute soil mounted, any Piute could dismount him and take his pony.

The effect of cocoaine, the new anæsthetic, upon the eye, is to produce insensibility to pain. A drop is put on the eye-ball, and within a short time the surgeon is able to perform, without hurting the patient, what would otherwise be the most agonizing operation. The drug has been "concred," and the small quantity in the country is held at $6,000 per pound.

The sudden appearance and subsequent disappearance of a volcanic island off the coast of Iceland, reminds us that there are natural wonders going on around us which cannot well be equaled in the pages of romance. The island had the shape of a flat-topped cone rounded on the top. It rose from the sea about twenty miles from the mainland. Last century, a similiar phenomenon presented itself near the same place; but that island too had only a brief existence. It is not surprising that such structures should in the course of time be demolished by the action of the waves, for these islands mostly consist of very loose materials, such as slag, ashes, and pumice-stone, which are readily acted upon by the sea. The disappearance of the island may, however, be due to other influences than that of the sea.

LEVIED ON SPIRITUALISTS.

The Curiously Taken Pictures to Satisfy the Spirits—Her Husband Willing to Have Her Dying but Makes no Move to Help Her.

WESTFIELD, Mass., Nov. 22.—On a lonely road winding around Mt. Tekoa, in the town of Montgomery, some six miles northwest of this, stands a weather-beaten farmhouse of the dreary type so familiar to travelers of late years over the western Massachusetts hill.

In that house was enacted last week a tragedy that has had its sequel a few yearsago at Pocasset in the killing of his little daughter by the religious fanatic Freeman.

There, with no neighbors nearer than a mile, have lived for many years Isaac E. Bronson and his wife. The husband, aged about 50, and his wife, some ten years or more younger, have dwelt happily together and had a family of seven sons and daughters, the eldest being about 21 and the youngest about two weeks.

Their home has been a focal point for the favorite resort for believers in spiritualism in this section of Montgomery, Worthington, Huntington and other farming hamlets ground 40 st, and not only were the Bronson family firm in the faith, but the husband and father is an elder and exponent among this sect.

Mrs. Bronson was a woman of energy, but thoroughly inoculated with spiritualism and its practices. One evening last week, after the husband had gone to bed, she came into his room and asked him if he would feel very bad if her spirit would go out of its mortal frame and only to with him on the following day, only from the spirit land. He told her he would not grieve it it was the will of God. Then, as calmly as if announcing her intention to sleep, that she was desiring to be rid of the burdens and pains of the body, she had swallowed two spoonfuls of Paris green, and in a few hours her spirit would depart to return often to him from the spirit world.

She asked him to watch by her till her spirit had flown and all the long hours of the night he kept faithful vigil by the bedside of the woman he loved, watching the spark of life flicker fainter and fainter. At times they were sharply driven tears from his eyes, but he called none of the family. At nearest daybreak, without awakening the children, he went to the house of his nearest neighbors, who are spiritualists, and rousing them up, told the woman of the house of the condition of his wife and the necessity for her to hasten at once to witness "the departure of the spirit." When Bronson's house was reached the visitor quickly aroused the children and medical assistance was summoned, but before the physician could get there Mrs. Bronson was dead.

The husband unhesitatingly told the story of his wife's death in reply to questioners, with no more signs of sorrow on his expression less face or in his calm grey eyes than if the matter had been an every day occurrence.

When asked why he did not endeavor to save her life his reply was:

"Her spirit was her own; she had a right to release it from the body with none to prevent."

He was indirectly told that people might hold him responsible for his wife's death, but to such allusions he dreamily replied:

"Her spirit was her own."

Finally it was plainly said to him that some might think he administered the fatal draught to his wife. He turned to be a straightened his long, gaunt body to full height and for an instant there flashed across his face a ghastly pallor and into his eyes a sudden gleam of indignation with a calm voice and stoical manner he answered:

"If they think that I wish they would hang me at once."

The authorities of the town of Montgomery, within whose boundary lines the tragedy occurred, were naturally much exercised to know what course to pursue in the matter, but finally decided to do nothing save to call upon the medical examiner of the district, who, after making the usual examination, issued a permit for burial.

It was a wild, weird scene, the funeral on that secluded mountain side—the calm-visaged husband and father, surrounded by his children and spiritual followers, paying the last sad rites to the devotal wife and mother. But tears were few if any, for the choicest sentiment seemed to feel that no cause was there for sorrow, but rather for joy, that another spirit had burst its bonds and gone to the bars of rest.

Not among an "ignorant foreign element," that is fast taking possession of abandoned farms on the mountain slopes of these western counties, and converting them into prolitive homes did this tragedy occur, but among those whose whole lives have been spent amidst New England civilization and culture.

If one would seek an atmosphere of narrow-minded fanaticism, nowhere better could it be found than in these isolated farming hamlets of western Massachusetts.

With few neighbors and fewer pleasures, the minds of the soil tillers become warped and dwarfed, and the doctrine of "isms" are gladly welcomed by some, while others seek relief in opium against which the country doctors have their hardest fights, and which they say is a fast growing evil that cannot successfully combat. Sad indeed is the decadence of the "Hill town" farming communities even among the most favored of the progressive elements to the larger towns and cities and by the lack of social pleasures.

Riotous Italian Laborers in Jail.

WILMINGTON, Nov. 23.—The Italian laborers, who engaged in the riot at Newark, were brought to this city last night and are either one of the car stood officers with shot guns and pistols, ready for action. The wounded made in the passenger car. The sight of 60 Italians carrying trunks, bedding and household goods through the streets, escorted by armed men, created much excitement. The prisoners, 60 of the 100, caused Christopher, was among those captured. The men were arraigned before the city court at once and evidence taken as to the participation of each. The three men captured had their heads swathed in bandages, and presented a pitiable appearance. The large court room was crowded, and the proceedings were slow, inasmuch as everything had to be done through an interpreter. Three were held in $1,000 for assault with intent to kill, and the rest held in $500 for riotous conduct. Being unable to secure bail, the whole party were taken to New Castle jail by special train in charge of Sheriff Ford and deputies to await trial.

The Carlington-Mason Fight.

WASHINGTON, Nov. 26.—It is stated by friends of Lieut. Carlington that if Gen. Mason insists upon his demand for a court martial to inquire into the loss of the Proteus, he will not be opposed, but rather aided by Lieut. Carlington himself. The friends of the Lieutenant say that he was a mere subordinate, and if a court martial is ordered they will endeavor to have its scope extended so as to cover all the expeditions sent out to release the Greely party.

LEVIED ON SPIRITUALISTS.

The Curiously Taken Pictures to Satisfy the Spirits—Her Husband Willing to Have Her Dying but Makes no Move to Help Her.

WESTFIELD, Mass., Nov. 22.—On a lonely road winding around Mt. Tekoa, in the town of Montgomery, some six miles northwest of this, stands a weather-beaten farmhouse of the dreary type so familiar to travelers of late years over the western Massachusetts hill.

In that house was enacted last week a tragedy that had its sequel a few yearsago at Pocasset in the killing of his little daughter by the religious fanatic Freeman.

There, with no neighbors nearer than a mile, have lived for many years Isaac E. Bronson and his wife. The husband, aged about 50, and his wife, some ten years or more younger, have dwelt happily together and had a family of seven sons and daughters, the eldest being about 21 and the youngest about two weeks.

Their home has been a focal point for the favorite resort for believers in spiritualism in this section of Montgomery, Worthington, Huntington and other farming hamlets ground 40 st, and not only were the Bronson family firm in the faith, but the husband and father is an elder and exponent among this sect.

Mrs. Bronson was a woman of energy, but thoroughly inoculated with spiritualism and its practices. One evening last week, after the husband had gone to bed, she came into his room and asked him if he would feel very bad if her spirit would go out of its mortal frame and only to with him on the following day, only from the spirit land. He told her he would not grieve it it was the will of God. Then, as calmly as if announcing her intention to sleep, that she was desiring to be rid of the burdens and pains of the body, she had swallowed two spoonfuls of Paris green, and in a few hours her spirit would depart to return often to him from the spirit world.

She asked him to watch by her till her spirit had flown and all the long hours of the night he kept faithful vigil by the bedside of the woman he loved, watching the spark of life flicker fainter and fainter. At times they were sharply driven tears from his eyes, but he called none of the family. At nearest daybreak, without awakening the children, he went to the house of his nearest neighbors, who are spiritualists, and rousing them up, told the woman of the house of the condition of his wife and the necessity for her to hasten at once to witness "the departure of the spirit." When Bronson's house was reached the visitor quickly aroused the children and medical assistance was summoned, but before the physician could get there Mrs. Bronson was dead.

The husband unhesitatingly told the story of his wife's death in reply to questioners, with no more signs of sorrow on his expression less face or in his calm grey eyes than if the matter had been an every day occurrence.

When asked why he did not endeavor to save her life his reply was:

"Her spirit was her own; she had a right to release it from the body with none to prevent."

He was indirectly told that people might hold him responsible for his wife's death, but to such allusions he dreamily replied:

"Her spirit was her own."

Finally it was plainly said to him that some might think he administered the fatal draught to his wife. He turned to be a straightened his long, gaunt body to full height and for an instant there flashed across his face a ghastly pallor and into his eyes a sudden gleam of indignation with a calm voice and stoical manner he answered:

"If they think that I wish they would hang me at once."

The authorities of the town of Montgomery, within whose boundary lines the tragedy occurred, were naturally much exercised to know what course to pursue in the matter, but finally decided to do nothing save to call upon the medical examiner of the district, who, after making the usual examination, issued a permit for burial.

It was a wild, weird scene, the funeral on that secluded mountain side—the calm-visaged husband and father, surrounded by his children and spiritual followers, paying the last sad rites to the devotal wife and mother. But tears were few if any, for the choicest sentiment seemed to feel that no cause was there for sorrow, but rather for joy, that another spirit had burst its bonds and gone to the bars of rest.

Not among an "ignorant foreign element," that is fast taking possession of abandoned farms on the mountain slopes of these western counties, and converting them into prolitive homes did this tragedy occur, but among those whose whole lives have been spent amidst New England civilization and culture.

If one would seek an atmosphere of narrow-minded fanaticism, nowhere better could it be found than in these isolated farming hamlets of western Massachusetts.

With few neighbors and fewer pleasures, the minds of the soil tillers become warped and dwarfed, and the doctrine of "isms" are gladly welcomed by some, while others seek relief in opium against which the country doctors have their hardest fights, and which they say is a fast growing evil that cannot successfully combat. Sad indeed is the decadence of the "Hill town" farming communities even among the most favored of the progressive elements to the larger towns and cities and by the lack of social pleasures.

Riotous Italian Laborers in Jail.

WILMINGTON, Nov. 23.—The Italian laborers, who engaged in the riot at Newark, were brought to this city last night and are either one of the car stood officers with shot guns and pistols, ready for action. The wounded made in the passenger car. The sight of 60 Italians carrying trunks, bedding and household goods through the streets, escorted by armed men, created much excitement. The prisoners, 60 of the 100, caused Christopher, was among those captured. The men were arraigned before the city court at once and evidence taken as to the participation of each. The three men captured had their heads swathed in bandages, and presented a pitiable appearance. The large court room was crowded, and the proceedings were slow, inasmuch as everything had to be done through an interpreter. Three were held in $1,000 for assault with intent to kill, and the rest held in $500 for riotous conduct. Being unable to secure bail, the whole party were taken to New Castle jail by special train in charge of Sheriff Ford and deputies to await trial.

The Carlington-Mason Fight.

WASHINGTON, Nov. 26.—It is stated by friends of Lieut. Carlington that if Gen. Mason insists upon his demand for a court martial to inquire into the loss of the Proteus, he will not be opposed, but rather aided by Lieut. Carlington himself. The friends of the Lieutenant say that he was a mere subordinate, and if a court martial is ordered they will endeavor to have its scope extended so as to cover all the expeditions sent out to release the Greely party.

A HUSBAND WHO NEEDS CAGING.

In a Fit of Ill Temper He Shoots His Wife and Two Children.

HOOKELLEVILLE, N. Y., Nov. 23.—George Quackenbush is a prominent citizen of the town of Savannah county. He has the reputation of being very passionate and vindictive. One day in May last some cattle of a neighbor got into the lot into one of Quackenbush's fields. He took his shotgun and started out, swearing that he would kill the cattle. His wife followed him into the yard and protested against his shooting their neighbor's cattle. This angered him, and he told his wife that unless she returned to the house and attended to her own affairs he would shoot her. Their two little children, one a 6-year-old girl and the other a boy 3 years old, had followed their mother out of the house, and clung to her dress when she left the dress. Mrs. Quackenbush said to her husband that she did not believe he would do such a shocking thing as this. He drew his gun to his shoulder and fired at her. For this act of the charge, which was fine shot, lodged in Mrs. Quackenbush's side, hips and leg. The remainder of the charge of shot entered the face, neck and arms. The little boy was shot in the face. The mother and little girl were seriously hurt. Both received fine shot charges in the face. Quackenbush was lodged in jail at Lyons and was convicted on Saturday of attempting to murder his wife and two children. He has been sentenced to a term of six months' imprisonment in Auburn prison.

The Advantages of Cremation.

LANCASTER, Pa., Nov. 26.—The second crematorium completed in the United States was dedicated here, and the body of Christian Hoffman, a wealthy resident, was cremated. The ceremony opened with prayer, after which the building was formally delivered to the society by Dr. M. L. Davis, chairman of the building committee. In handing over the building Dr. Davis referred to the importance of cremation, and the evils and disease-breeding dangers from crowded churchyards. He also pointed out a newly discovered source of danger from the gastings of earth worms. These in graveyards, speaking generally, contain germs of the specific germs which propogate the disease known as splenic fever. Recentscientific discoveries had shown that the soil of communities in which were buried victims of yellow fever was alive with organisms, identical with those found in the vomit and blood of persons who had died of the disease.

The Cold Wave Dies in Florida.

NEW YORK, Nov. 26.—The coldest two places in North America from which the Signal Service Bureau has yet received a report yesterday are Mount Washington, where the temperature was 16 degrees below zero, and Fort Garry, Manitoba, where it was 9 below. In the city the temperature was 13 degrees above at 7 A. M., and at 10 A. M. registered 26 degrees. At Buffalo the temperature was 20 degrees, as it was also gladly welcomed by some, while others seek relief in opium against which the country doctors have their hardest fights, and which they say is a fast growing evil that cannot successfully combat. Sad indeed is the decadence of the "Hill town" farming communities even among the most favored of the progressive elements to the larger towns and cities and by the lack of social pleasures.

Riotous Italian Laborers in Jail.

WILMINGTON, Nov. 23.—The Italian laborers, who engaged in the riot at Newark, were brought to this city last night and are either one of the car stood officers with shot guns and pistols, ready for action. The wounded made in the passenger car. The sight of 60 Italians carrying trunks, bedding and household goods through the streets, escorted by armed men, created much excitement. The prisoners, 60 of the 100, caused Christopher, was among those captured. The men were arraigned before the city court at once and evidence taken as to the participation of each. The three men captured had their heads swathed in bandages, and presented a pitiable appearance. The large court room was crowded, and the proceedings were slow, inasmuch as everything had to be done through an interpreter. Three were held in $1,000 for assault with intent to kill, and the rest held in $500 for riotous conduct. Being unable to secure bail, the whole party were taken to New Castle jail by special train in charge of Sheriff Ford and deputies to await trial.

The Carlington-Mason Fight.

WASHINGTON, Nov. 26.—It is stated by friends of Lieut. Carlington that if Gen. Mason insists upon his demand for a court martial to inquire into the loss of the Proteus, he will not be opposed, but rather aided by Lieut. Carlington himself. The friends of the Lieutenant say that he was a mere subordinate, and if a court martial is ordered they will endeavor to have its scope extended so as to cover all the expeditions sent out to release the Greely party.

ELECTION BET.

How a Well-Known Lady Was Charged It in Boston.

Peanuts Sold at $20 Per Bag on the Common—Interesting Affair—A Very Profitable Business Done Once Before in Pleasant's Time.

BOSTON, Nov. 26.—There appeared on the Tremont street mall of the Common, near Park street, before 9 o'clock, a small stand with a bag of peanuts in front of it filled with peanuts. Upon a blackboard was the following a sign. "Paying an election bet." Promptly on the stroke of 9 a well-dressed lady took her stand behind the improvised counter, hung up a notice, "Peanuts 20 cents a bag," and began doing a lively business with the large crowd that collected. One of the first customers was her: "What sort of peanuts are you selling?"

"Cleveland peanuts," she replied. "I wagered $20 against $20 that Gov. Cleveland would have 10,000 plurality in New York state. Another condition was that I should make the $50 selling peanuts on the Common from 9 o'clock in the morning until 9 o'clock at night, and should not eat or drink during that time."

The Cleveland peanut vender is Mrs. John Mathews, who is pretty well known in Boston. She is about 40 years of age, stout and quite distinguished in appearance. Her hair is snow white, and she wears the most of it in a peculiar style on top of her head. Her eyes are dark, and she wears a large cameo brooch in fastening the white lace collar around her neck, and a pair of black bowed eyeglasses hung upon her breast. She was a lively old lady, but wore no outer garment; neither did she at any time leave her post behind the counter. Truth was so brisk that she had to get the assistance of a gentleman and two ladies most of the time to assist either in making change or in putting the peanuts in bags. She worked

THE RAILROAD WAR.

A Meeting of the Agents Which Led to No Results.

CHICAGO, Nov. 26.—Thirty-five general passenger and ticket agents of the various roads between the western terminal of the trunk lines and the Missouri river, were in session at the Grand Pacific hotel with a view to the reestablishment of rates which were once have been made. E. A. Ford, of the Pennsylvania, was elected chairman, and J. M. Hall secretary. The dividing point between the eastern and western roads is Buffalo. The present meeting has nothing to do with affairs east of that point, and as to the intermediate territory between Buffalo and Chicago everything depends on the arrangements to be made between roads running west out of Chicago. No road west of Buffalo and east of Chicago has done more during the progress of the war than to protect its own interests by making through rates to the Missouri river from such points as Buffalo, Toledo and Cleveland as would induce passengers to purchase through tickets instead of getting off at Chicago to take advantage of the cut from there on. It was said that at this meeting no means at the command of the representatives present would be spared to effect a general restoration of western rates. During the session nothing was done save to discuss generally the situation and to appoint a committee to draw up a plan whereby the object of the meeting could be best subserved.

Nothing definite could be learned of the proceedings after reassembling, but it is generally understood that no agreement was reached and the meeting adjourned sine die.

The Jersey Central's Dividend.

PHILADELPHIA, Nov. 26.—It is stated semi-officially that arrangements have been made by the leading railroad managers by which Pennsylvania has been induced to pay a dividend on the New Jersey Central stock equal to three per cent. per annum on Dec. 1, in lieu of the regular six per cent. dividend. This the stockholders of the Jersey Central, it is stated, will be asked to accept, and the Reading people believe the request will not be in vain. Reconfirmation of the assertion could be obtained at the Reading company's office, all the officials who would have authority to speak being out of town attending the Directors suit proceedings at Trenton. Where the money is to come from is still veiled in mystery.

Trial of a Notorious Bigamist.

TOLEDO, Nov. 26.—The case of the state against Charles Newbold, alias Sir Charles Neville, indicted for bigamy, was called in the common pleas court. Defendant, it will be remembered, while in the employ of C. J. Whitney, of Detroit, as a coachman, induced Mr. Whitney's daughter Lillian to run away with him. This was in April last. They came to Toledo and were married by a justice. Early in May their whereabouts were discovered, and Neville was arrested on the charge of bigamy. He has since been in jail here. Counsel for defendant asked that the case be postponed, as they were not ready for trial. The prosecution strongly objected to a postponement.

Texas Vengeance on a Defaulting Cashier.

MONMOUTH, Ill., Nov. 26.—As A. T. O. Hubbard, the defaulting cashier of the First National bank, was leaving the court house and had proceeded but a few rods, H. R. Thompson, a man from Texas, who has sustained heavy losses by the failure of the bank, stepped from the corner of a building and fired five shots in rapid succession at Hubbard, but each shot missed him. Hubbard threw up his hands, but finally became self-possessed enough to draw his revolver. Thompson was immediately arrested and lodged in jail.

A Sensational Story Denied.

NEW YORK, Nov. 26.—The following telegram from Boston has been received here: "The story published in to-day's New York papers that The Knights of Honor Reporter has charged R. J. Breckenridge, of Louisville, Ky., with stealing $100,000 is false. He has got about that amount in his hands which he refuses to pay over to the new supreme treasurer, and the case is in court. Upon these facts, we presume, the story has been started. We have had no intimation of a libel suit in the matter being commenced against us.

"Publisher Knights of Honor Reporter."

Trying to Suppress Polygamy.

WASHINGTON, Nov. 26.—The report of the Utah commission has been handed to the president. The operation of the laws against polygamy in that territory are shown to be only partially successful. One reason given to account for this is, perjury by mormons in cases brought against persons of their own faith. The commission present recommendations looking to the efficient execution of the anti-polygamy laws.

They Evidently Like a Strike.

TAUNTON, Mass., Nov. 26.—The weavers at the Whittenton mills, who struck Monday and returned to work yesterday morning, again went out at noon against the advice of the older weavers. The management threatens to close the entire mill if the weavers do not return to work. This will throw 1,200 out of employment.

Suicide by Kerosene.

TROY, Nov. 26.—Mrs. Harriet Defreest was found fatally burned in her bedroom on the third floor of the building corner of Fifth and Congress streets. She could not speak, and it is supposed that she intended the flames. It is believed that she committed suicide by covering her garments with kerosene and then setting them on fire.

A Banquet to the G. A. R.'s Commanders.

LEWISTON, Me., Nov. 26.—G. A. R. Commander in Chief John S. Kountz was tendered a grand reception here by local and visiting posts. A banquet was given at the Lyceum and a meeting in the City Hall was attended by 3,000 persons. Among the distinguished speakers were ex-Gov. Garcelon, ex-Gov. Frye and Congressman Dingley.

Colored Duelists Arrested.

LYNCHBURG, Nov. 26.—Hezekiah Armond was arrested here on a charge of sending a challenge to Tate Brown for a duel. The information was given to the police by Tattar's wife, and the would-be duelists were put under bonds. All the parties are colored.

Two Deaths from Lightning.

FORT PERASANT, W. Va., Nov. 26.—During a severe storm lightning struck the house of Joseph Shirley, on College creek, instantly killing Mrs. Shirely and a daughter 15 years of age.

Woman Suffrage in New Hampshire.

MANCHESTER, Va., Nov. 26.—In this legislature a bill giving women paying taxes the right to vote in municipal and town elections was defeated by 113 to 99.

Mayor for the Eighteenth Time.

PROVIDENCE, Nov. 26.—Thomas A. Doyle, republican, was elected mayor for the 18th time by 1,966 majority over Charles R. Lowe, Democrat.

A NEW PAVEMENT.
The undersigned has secured the exclusive agency for the sale of the
Diebold Patent Iron Stone,
which for elegance and durability, is unsurpassed, and in price will compare favorably with any other pavement now in use. It is the most beautiful pavement known for walks and yards, gutter stones, door sills, and stone blocks. Also used to build fire and burglar proof vaults; and for building purposes generally. These pavement blocks have many striking peculiarities. They are so perceptible vapor; are nonconductors; repel ice and snow, as well as all kinds of moisture. When dampened corresponds on the ordinary brick, the material remains perfectly free from it. These Stones are used for the molten Iron Slag and are the hardest of substances. Specimens on exhibition at Warner's Paper Store, opposite Stillman Music Hall. For further particulars call on or address

TABLE SCENES.

A Chat with a Waitress in a Cheap Restaurant.

Different Classes of Customers at Different Times During the Twenty-Four Hours—Likes and Dislikes.

[Cincinnati Enquirer.]

There is a large class of people in the city who prefer to eat where and when they please, and order what they want, than to depend upon the tiresome table of boarding-houses. They rent a furnished room in which to sleep, and take their meals where fancy dictates and their pocket-books will permit. Few students or clerks or Bohemians who buy twenty-one meals a week can afford to pay 50 cents each for them, or even half of that amount; consequently they seek cheaper places where food isn't so tempting, but perhaps as wholesome is served to them. Some of the more popular places are open day and night and feed more than 2,000 persons during every twenty-four hours. A person going into these eating rooms to look about him and study his table companion than to eat will find men to amuse and interest even the superficial observer.

Such places are patronized by entirely different classes of customers at different times during the twenty-forty hours. In the morning the trade is composed chiefly of students and those Bohemians who live in an itinerant sort of a way. At noon business men, clerks, shopgirls and a variety of working people throng the tables for their midday lunch. At the supper hour those who were in for breakfast, and who were not particularly noticed in the crowd at noon, return. From 8 o'clock on until midnight trade is not usually very brisk and is composed chiefly of hungry people who have been to some place of amusement, travelers just arrived in the city, young fellows and their girls, and any other persons who for some reason are inclined to eat at an irregular time. About midnight business becomes quite brisk. Night workers come in for their lunch, and again the class of customers changes. There are printers, reporters, bakers, gamblers and sporting people of all kinds, together with the fast young men who have been on a hurrah and who a bite to eat before sneaking home to tell fond parents that they have been to a church social, or calling on Miss ——, of Price Hill. "We missed the last car, you know, and had to walk in."

"You meet with a great variety of appetites," said the reporter to an intelligent looking waitress.

"Yes," was the reply, "all people have their likes and dislikes, and it is quite probable that they will show their weakness wh n they come into a place like this. You can have no idea of the annoyances we are put to by exacting and unsatisfied customers. I would want no better test of a gentleman than the way in which he orders a meal. Table manners always disclose unfavorable traits of character which under other circumstances would not be easily discerned. When here by themselves they feel under no social restraint, and the way in which they abuse us poor girls is awful. If they only knew it, they could get more and better food by mixing a little politeness with their orders than by commanding us to bring this and that in a dictatorial and insulting way. If a man is crabbed, cross, and bent on finding fault, I just try to bring him the poorest meal I can, and delight in his fussing. The meanest, most niggardly people, always want twice as much for their money as decent folks. They come here, and with 10 or 15 cents expect to get a 50 cent meal. They are so unreasonable that they make the girls mad, and you can't blame us if we slam the dishes about a little bit."

"But it is not economy that causes them to act so?"

"Not much. The people who are best able to pay are usually the ones who cause us the most trouble. The economical ones are usually waited upon. They have generally made up their minds as to what they will order before they come in, and when that is brought them they are satisfied.

"With a certain class of our customers the main object is to satisfy the appetite at the least possible cost. With this in view, their orders almost always consist of rolls and coffee, or soup, or beans and stew. Such things are cheap and have considerable bulk. To show what some people will do: We have a customer who buys buns at a bakery for a cent each and brings them here to eat with his coffee. In this way he gets his coffee and five buns for 10 cents, whereas we only give him three rolls for 5 cents. He is two sheet each time, but it takes check."

"Who are your most troublesome customers?"

"Of course, the fault-finders are trouble-some, but we girls despise most a certain class of young fellows who, swelled up with conceit, come in here to make a mash. They, of course, think we are irresistible, and annoy us by talking to us and endeavoring to make engagements with us."

"Do you ever have any serious trouble with customers?"

"Once in a while we are compelled to complain to the proprietor, and then the contented customer is invited to leave. A good many come in and order when they have no money, but that is no concern of ours. The cash-ier looks after that."

A Successful Collector.

[Chicago Times.]

A certain collector in Syracuse must need a packet pair of pantaloons, judging from his plan of operations. When a man persistently declines to pay he is called upon by this collector, who wears a very tall hat, on which is displayed in gilt letters: "Commercial Agency; Collector of Hard Accounts." He calls every day until some arrangement is made satisfactory to both parties, or until the debt is paid. The collector's daily call soon attract the attention of people, and his business is fully defined on his hat. The scheme is said to work first rate.

Her Unhappy Grandfather.

[Buffalo Commercial.]

A lady—a French lady—is showing a visitor the family portraits in the picture gallery.

"That officer there in the uniform," she says, "was my great-great-grandfather. He was so brave as a lion, but one of the most unfortunate of men—he never showed a battle in which he did not have an arm or leg carried away."

Then she adds pensively: "He took part in twenty-four engagements."

Conversation.

[Lilian Whiting.]

Conversation is, after all, an affair of magnalisms and of spiritual gravitations, and unless the springs are touched there is no spontaneous expression. Conversation may be manufactured, it is true, but it has a ring of unreality that deceives no one. You talk, it may be, as a matter of self-defense, with an instinct of self-preservation, but because you have anything to say. Silence is torture, unless it is the silence of mutual rapport, when it may be ecstasy, instead.

Marriage in Wyoming.

[Cheyenne Sun, 27th Ult.]

There are a good many singular incidents connected with the administration of matrimony, especially if it is dealt out by a Justice of the peace in a young territory. During eight years in my official capacity as general agent for substantial justice and durable wedlock I was called upon a great many times to tackle out my blessing at so much per idea. Whenever I was called to go, I cheerfully put on my overcoat and went.

I married people in the light and in the dark of the moon, in the office and home, on horseback and a foot, young and old, tender and tough. I married them all. Forwent was inquisitive beyond what the statute required, and I never had any one come back to me or complain. It always seemed to give satisfaction.

The ceremony wasn't very imposing, though. I used to think sometimes that the groom was imposing—on the bride. (This is a little epigramatic, I have quite a number of this style which I am keeping for the holidays.)

We never had much of the orange blossom and swallow-tail coat business in my studio. I generally invited the couple to sit on the wood-box till I got through with the simple drunks, and then we would call in the marshal and the janitor as witnesses and proceed.

"I Like Thanksgiving."

AND SO DO THE DOCTORS.

Getting Judgment About a Horse.

[New York Mercury.]

The father of a young amateur horse doctor, who was a clergyman in a New England town, had been made a present of a horse by his parish. The parson was greatly delighted. The people had paid a good price for the horse, and the old gentleman was anxious to have the judgment of his son on the animal. Taking him into the stable, he asked the youth to look him over, which he did carefully, shaking his head at every examination. At last he said: "Father, the poor horse doesn't amount to much."

"Why, my son, the horse is quite as good an animal as the one on which our Master rode when on earth."

As he said this the young man had just finished examining the horse's mouth in order to determine his age. The old man repeated his sentence: "Just as good a horse as the one our Master rode into Jerusalem."

"Father," said the youth, "it's the same one!"

Opening of the London Ball Season.

[London Judy.]

THE CHINESE GORDON COSTUME.

An Honest Court.

[Texas Sittings.]

Housekeeper: Look out for fraud. If he gives you eleven eggs for a dozen, contest the election and demand an honest count.

Jane: But suppose he makes a mistake and gives me thirteen eggs instead of a dozen?

Housekeeper: Then claim everything, and don't let him go behind the returns.

Merchant Traveler: A man will walk five miles in a political procession carrying a torch, and feel good over it, but it makes him tired for a week to walk five blocks and carry a letter to the postoffice for his wife.

City and Country Specimens of the Same Breed.

[Puck.]

City Sponge: "What kind of an animal is that, anyhow?"

Farmer: "Gosh, you ought to know; it's a hog!"

A Mormon Flirtation.

[San Francisco Argonaut.]

"My dear," said a Mormon wife to her husband, "I should think that you would be ashamed of yourself flirting with that Miss B., as you did to-day."

"Flirting with her!" he replied in astonishment. "Why, we have been engaged for more than three months. It's all over town."

"Oh, I beg your pardon," said his wife, indifferently. "If you are engaged it is her I suppose it is all right. When does the happy event occur?"

Arkansaw Traveler: An Ohio editor who attempted to speak the truth for a day was served by his shrift. The deed is not ordinarily a matter of grave. This shows the excellent influence of a newspaper office.

BATTLE SANTO.

Of plain sound sense, He's current coin is made;
With that we drive the most contented trade.
—[Young.

But the good deed, through the ages
Living in history pages,
Brighter grows and glorified,
Uncrossed by moth or rust.
—[Longfellow.

Sermons be heard, yet not so many
As left no time to practice any;
He heard them with delight, and then
His practice preached them o'er again.
—[Crashaw.

Make me as one that casteth not by day
A deeper shadow, but reflects my ray
One little beam, loved, warmed and golden, caught
From the bright sun that lights our daily way.
—[J. P. Boynton.

Oh! I starry along on an even keel!
My brain is whirling, my senses reel;
I shiver my timbers and clew my sail
And hang at the yard-arm for the gale,
And take a rest in the dolphin's tail.
I leave my limbs in the water there,
And have the monsters with antics rare
And yank the yellow ones out by the hair.
—[St. Paul Day.

Old 97 Will Hunt a 'Possum.

[Georgia Cracker.]

Old 97 deposited the morning mail on the desk and set down to rest a few minutes. Presently he asked:

"De legislatur am gwine ter meet hyer pooty soon' ain't hit?"

"Yes, a couple of weeks from now."

"Well, you reckin' you'll hab enny 'fluence wid hit?"

"I don't know—why?"

"'Kase I want a law fixed up! Ez I gum long fum home dis mo'nin' I seed 'possum splayed round on de mariek stan's, an' fokes wuz actooly buyin' 'em! Now, what I want is a law ter stop dis hoah 'struckdum ob 'possums tell de Lawd gibs de sine ter shoulder 'e'bon an' hang-axes."

"Well, what is that?"

"Dat's w'en de fros' falls an' de 'simmon crap 'gins ter wrinkle! No 'possum ain't fitten to eat 'cept he's had er hull or good ripe 'simmons, an' hits jes' ravishin' natur' ter 'low fokes ter git mongst 'em 'fore dat time."

"You are right about that."

"I knows I is, but dem ole niggers is different altchernate fum what dey wuz 'fore de war. Den dey had plenty fer eat at home, an' only went arter 'possums fer de pie-nic fun dat 'twuz in. But now! dat little dog 'roun' de wood. Who gwine arter sumpin' an' we ain't gwine ter cum back empty handed! Fer feelin' so jubes bout fetchin' ennything wid my vote dat day dat I'm bold out ter ask er 'possum enywhow 'fore de night's gone. When yer see me comin' de nuix' mornin', yo' kin bet dat I'se got er 'possum naughty nuther on de ends ob my suspen's, an' I'll pee yer ter yer ter peek er taters dat day, hees."

The Modern Shakespeare.

[Yonkers Gazette.]

"A chilly evening this, Andromeda?"

"And quite in keeping with thy wooing, sirrah."

"So, ho! Now blows the wind in troublous quarters, quotha! From what new quiver of thy mind's caprice did'st pluck this arrow of suspicion, maid?"

"Prate none, Sir Agaily! If thou are stabbed, 'tis with an icicle of thine own creation."

"My uncancerni Great Socrates forbid! In all the scroll of me iniquities there is no item that will semblance that."

"Yet such is wen the later accentation of thy lips. There was a time when thou did'st kiss as thou would'st drain the fountain of the heart, but recent pressure of thy dainty lips are light, as a nerved shred of thistle-down."

"Ha, ha! here's freshness for thee. Dost thou know—"

"Aye! Well I know by that thou lov'st me not. The devotee at love's ecstatic shrine is e not the portal of his idol's breath as it t'were there the small-pox bred its germs. The lips that sue for nectar o' the heart doth waste time linger at the precious mine, and only spinsters, lovelies grown and sere, or toothless churls with souls o'er given to gold, do such a wasting Romeo do like."

"Be all the comely cousins of Cupid, I like that well! Me little dory fancies not this touching. Joy! thou wert a fool to think do shallow seem as flakes of ice that blast at winter's birth. Enough, sweet angel, but another day and this same gum-ball that hat tanned me soft will leave no trace of its retaining power, and then I'll fatten on thy ruby lips as one who knew no other fount of sustenance. Nay, an' thou cravest kisses—kisses with gravel mixt in their watery—and taste of heaven just a cliff beyond. I'll give thee such till thou dost think the god of love hath given thee bon-bons for thy nourishment, and backed thy mouth with pyramids of jam."

Rum Bestowed Innocuous.

[Chicago Tribune.]

The London Standard of Oct. 9 suggests a possible compromise of the Liquor controversies. It is as follows:

It is seriously announced that the chief stimulant to be served out to our men during the coming Nile expedition will be a kind of rum which, like Bass's pale ale, contains its alcoholic properties. As, however, no paraphrase of the report could convey its meaning better than the words of the reporter, they shall be given in extenso as follows: "The chief stimulant for ordinary use among the men engaged in the Nile flotilla will be rum, which is being sent out in large quantities from the Royal victualling yard at Deptford, where, by a special process, the heavy portion of the alcohol is got rid of and that of light specific gravity is retained, thereby rendering the rum lighter and exhilarating instead of stupefying and intoxicating. The scientific treatment to which the rum is subjected not only removes the heavy spirit, all its irritating properties and renders the troops who drink it cheerful without being excited and quarrelsome."

If this be indeed a reformation accomplished and it is manifestly published in good faith as an ordinary item of news—then the chemist attached to the Royal victualing yard deserves a statue. A discovery which should earn for him the undying gratitude of mankind. If it be true that he has invented rum in this manner his process should apply to all spirits, and all malt liquors from imperial Tokay to table beer. It has will science not do to alter and transform the very nature of the earth, the joys and griefs of an elder world, and the manners and customs of antiquity?

The Battlefield, a restaurant at Reeson, has had a continuous existence of seven centuries. It is the oldest restaurant in Christendom.

The eight-page issue of The Brooklyn Eagle is said to be the largest single sheet of news paper to be found in the mail-bag nowadays.

THE EVENING NEWS.

Vol. 1, No. 184. PLAINFIELD, N. J., FRIDAY, NOVEMBER 28, 1884. Price Two Cents

Consumption can be Cured!

This fact has been demonstrated in more than]

THE THOUSANDS CASES by

DR. S. D. HOWE,

The Great Consumption Doctor of New York, PROPRIETOR OF THE

Arabian Medicines,

Celebrated throughout the World for their remarkable Cures.

Dr. Howe's Arabian Milk Cure.
Dr. Howe's Arabian Tonic,
Dr. Howe's Arabian Liver Pills.

The Only Medicines that have ever been known to positively cure Consumption.

TESTIMONY

Of the Hon. Jos. E. Gary, Judge of the Superior Court, Chicago, Ill.

CHICAGO, Dec. 14th, 1876.

DR. S. D. HOWE,

DEAR SIR:—Permit me to add my grateful testimony to the many of witnesses to the virtues of your justly celebrated Arabian Remedies. For a long time my wife was seriously afflicted with hacking cough, depressed breathing, weakness of the lungs, and other most acute pains in the lower portion of the right lung and under the shoulder blade. Her suffering was intense, and she became extremely nervous and prostrated. Her disease was pronounced consumption by the physicians of Chicago, and often tried, whose prescriptions had been taken without benefit. When in your visit to this city, you left with me for use on you, having very little hope of deriving help from your treatment. We were inspired with hope by the skillful manner in which your thorough examination was conducted, and the positive assurance with which you stated your diagnosis. My wife determined to take your medicines in accordance with your plan of treatment. She began to use the Arabian Milk-Cure and Arabian Tonic. Their beneficial effect at once became manifest—the cough loosened and soon ceased, respiration became easy, the soreness of the chest was relieved and all pain removed, the hopper to gain in flesh and improve in strength and spirits. Before she had taken your medicines according to printed advice I loved your life as I do my wife. She unites with me in the grateful tribute to the merits of your remedies.

Very respectfully yours,
JOSEPH E. GARY.

The above letter is only one among thousands received from all parts of the United States.

Bottle of Milk Cure & Tonic, each $1 per Bottle.

PILLS, 25 Cents per Box.

Sold by G. A. BUTLER, Druggist.
Sole Agent for Plainfield.

Dr. S. D. HOWE, Proprietor, New York.

DR. S. D. HOWE'S

Arabian Tonic Blood Purifier

differs from all other preparations in its immediate action upon the

LIVER, KIDNEYS AND BLOOD.

Composed of the choicest Herbs, Roots and Extracts, such as Stillingia, Yellow Dock, Sarsaparilla, Prickly Ash, Cascara, Dandelion, Pimples on the Face, Sores, Carbuncles, Scrofula, and all diseases arising from an impure state of the Blood, Malarial Fevers, etc.

For NERVOUS DEBILITY, LOST VITALITY, URINARY DISEASES, and BROKEN DOWN CONSTITUTIONS, I challenge the 19th century to produce its equal.

Every Bottle is Worth its Weight in Gold.

Price $1.00 per Bottle.

DR. S. D. HOWE'S

Signal Office Prediction.

Generally cloudy weather and rain, southerly winds becoming variable, slight changes in temperature.

Chronological Events.

Dr. Watts died 1748.

JOTTINGS.

—Mrs. Mary Woodbridge, an eloquent temperance speaker of national reputation, will deliver an address in the First Baptist Church on Sunday evening, Dec. 14.

—An adjourned meeting of the Commissioners of Appeal will be held in the Council Chamber on Thursday, Dec. 4, at two p. m.

—At 6:30 a. m. yesterday the thermometer at the Hotel Netherwood registered 25 degrees. On Tuesday at the same hour it registered 32 degrees.

—Yesterday morning Mr. L. Frazee paid an election bet by wheeling Mr. John Bowman through some of the principal streets of this city in a wheelbarrow.

—Sale of seats for Standard Theatre Company of New York in "Claire and the Forge Master," which is to be given at Music Hall next Tuesday, begins to-morrow.

—An "impromptu" was held yesterday in French's oil-shing store by a number of citizens interested in the temperance cause, and a call has been issued as published in our advertising columns.

—A Committee of Five has been appointed to ascertain the sentiments of the present nominees on both tickets for Council, in regard to the license question, to report at the anti-license meeting elsewhere announced.

—Proprietor Woodruff, of the Hotel Netherwood, provides a dancing master, Prof. Welch, of Brooklyn, to instruct the children of the hotel in the art of dancing, every Monday evening from eight to nine o'clock. Dance music is furnished for the guests after nine.

—At a meeting of the Executive Committee of the Democratic County Committee, held in Mound Brook recently it was resolved to carry forward the work with renewed effort, and after filling up the committee of the Township the meeting adjourned to meet in Somerville the second week in January, 1885.

—Engine Co., No. 1, took their apparatus out for a work yesterday. At the well on the corner of Front and Somerset streets, the engine threw one hundred and eighty-two feet of water through one hundred and fifty feet of hose. At the Putnam avenue well, water was thrown one hundred and ninety-four feet, through the same amount of hose.

—The Classis of Raritan will hold a conference in the Reformed Church of Pompton on Tuesday, December 2. Rev. R. V. D. Wyckoff, of Readington, will deliver an address at 2:30 p. m., on "The Prayer Meeting," and Rev. F. M. Doolittle, of North Branch, at 7 o'clock, on "The Unity of the Church." Brief addresses on the above subjects will be made by others. A cordial invitation is extended to other churches to participate in the exercises.

The "Times" Changes Owners.

It appears from an announcement in the Central Times of this week that the proprietorship of that paper has passed from the hands of Runyon and Leonard, the former publishers, into those of a stock company. The following is the certificate of incorporation:

This is to certify that we, John C Runyon, William J. Leonard and Lewis V. F. Randolph all of the City of Plainfield, Union County, have this day associated ourselves into a company under and by virtue of the provisions of an act of the Legislature of New Jersey entitled "An Act concerning Corporations," approved April 7, 1875, and the supplement supplemental thereto, for the purposes hereinafter mentioned and to that end we do by this our certificate set forth.

First. That the name which we have assumed to designate such company and to be used in its business is the Times Printing and Publishing Company of Plainfield, New Jersey.

Second. That the place in this State where the business of such Company is to be conducted is the city of Plainfield, Union County, New Jersey, and the objects for which said company is formed are the printing, publishing and vending of newspapers or other publications and dealing in the art of general and job printing and publishing business in all its branches.

Third. That the total amount of the capital stock of said company is nine thousand dollars, the number of shares into which the same is divided is one hundred and eighty and the par value of each share is fifty dollars. That the amount of stock with which said company will commence business is nine thousand dollars which is divided into one hundred and eighty shares of a par value of fifty dollars each.

Fourth. The names and residences of the stockholders and the number of shares held by each are as follows, to wit:

John C. Runyon, Plainfield, New Jersey, forty-five shares, W. J. Leonard, Plainfield, New Jersey, forty-five shares, and Lewis V. F. Randolph, Plainfield, New Jersey, ninety shares.

Fifth. The period at which said Company shall commence is the first day of November A. D. 1884, and the period at which it shall terminate is the eleventh day of November A. D. 1904.

In witness whereof we have hereunto set our hands and seals the tenth day of November A. D. eighteen hundred and eighty-four.

JOHN C. RUNYON, [L. S.]
WILLIAM J. LEONARD, [L. S.]
L. V. F. RANDOLPH. [L. S.]

Witness,
F. E. MARSH.

The Democratic Citizens' Convention.

The adjourned Democratic city convention met on Wednesday evening in the room over Abell's drug store, on the corner of Front street. Acting under the resolutions passed at the several ward primaries, the delegates proceeded to form a citizens' ticket. The following nominations were made by acclamation:

For Mayor.....George Rockefellow
For Collector.....John Johnson
For Treasurer.....Jeremiah Van Winkle
For School Trustee.....Louis F. Wadsworth
For Chosen Freeholders...Augustus Schramm
.....J. Frank Hubbard

For Assessor three persons were named, W. R. Gardner, James O'Neil and Joseph A. Hubbard. The ballot gave Gardner thirteen, O'Neil six and Hubbard three. W. R. Gardner was declared the nominee.

For Commissioners of Appeal, J. G. Cadmus, Jeremiah Manning, Rodolphus MacDonald and William H. Voorhees were named. Cadmus received sixteen votes, Manning fifteen, MacDonald six, Voorhees twenty and three scattering. Cadmus, Manning and Voorhees were declared the nominees.

A committee, consisting of one member from each ward together with the chairman, was appointed to fill vacancies. The committee consists of Vincent Frazee, of the First Ward, Louis Stover, of the Second Ward, W. J. Tobin, of the Third Ward, James O'Neil, of the Fourth Ward, and the chairman, Jacob R. Martine.

The convention then adjourned.

A Fact or Two About Horse Clipping.

("THE RAMBLER.")

There is an idea among some people, that to clip a horse is to subject him needlessly to cold and is of no benefit physically. That this is a mistake, the "Rambler" discovered during a conversation on the subject, with a well-known horse-clipper of this city.

As unclipped horses travel profusely with the slightest exertion, which weakens him and saps his strength. Besides, a horse with a long coat is much harder to keep clean, and "cleanliness being next to godliness" it may apply in the case of a horse as well as to the human.

A rotary power machine is most universally used and in appearance resembles the arrangement a dentist uses for drilling teeth, with a slight suggestion of sewing machine; but the "clipper" the machine and generally known by clipping. It is pleasing to note that this happens but rarely.

There is another danger connected with the work, which is no doubt quite a serious one, and that is the action of the animals when the horse bites on the human body.

The operation is performed by passing the fingers and other exposed places gradually work themselves into the system. Every now and then the skin around the finger nail has to be cut and the hairs drawn out. Sometimes the hair gets in the eye, but the constant moving of the eyeball causes them to work out, without producing any serious effect.

After all, horse-clipping is perhaps more fun to watch (provided one's position is secure) than to engage in.

Important to Sportsmen.

Some persons think that the sign boards forbidding hunting, fishing, nut gathering or trespassing upon private lands are of but little account, that they may be disregarded with impunity. This is a mistake, as the law makes it an act of trespass, to go upon cultivated or enclosed land for any purpose without permission of the owner, even if there is no sign-board, and the owner is entitled to recover actual damages for such trespass. Where the sign-boards are properly erected, any person who trespasses upon lands so guarded, is not only liable to pay the actual damages, but also a penalty not exceeding $25. If, however, the land owner wishes to avail himself of the provisions of the law, it must make his sign-board not less than a foot square to every fifty acres of land, upon the lot line, upon the shore or banks of the lake, stream or pond which it is intended to protect, or in a conspicuous place upon the grounds that are to be protected. Any person so doing, or who shall destroys such a sign-board, is guilty of a misdemeanor and liable to a penalty of $25.

Some Pertinent Inquiries.

EDITOR EVENING NEWS:—As a citizen and as one being thoroughly interested in the prosperity of our beautiful city, I should like to ask, through the columns of your valuable paper, a few questions, which naturally suggest themselves in view of the approaching city election.

Why does not Collector Johnson make levies, as directed by the Common Council, both this year and last?

If the Collector of taxes makes no levies and only acts as Receiver of Taxes, how long will it be before half the people neglect to pay taxes?

Is it not evident to all that the delinquent tax list must increase if no effort is made to collect the taxes. If the taxes are not collected promptly, the city will have to go without lights, police and other necessary adjuncts to running a city properly, as has been partially demonstrated, which will come to the grievous condition of Railway and Elizabeth.

ONE OF MANY CITIZENS.

A Card of Thanks.

The Board of Governors of Muhlenberg Hospital at a recent meeting passed the following resolutions:

Resolved, That the Board of Governors of Muhlenberg Hospital desire to express, and put on record their appreciation of the citizens of Plainfield for the kindness shown by them to the Board and the other ladies who have from time to time visited this institution, and especially for their recent very successful endeavors to raise money for the use of the Hospital by a fair and festival.

Resolved, That the Secretary be directed to communicate the foregoing resolutions to the Ladies' Auxiliary Board, and to furnish copies thereof to the city press for publication.

Councilman Marsh's Letter of Acceptance.

Councilman Frank E. Marsh in the following letter accepts the Republican nomination for mayor:

To W. R. Pope, Esq., and the other members of the City Republican Committee of Plainfield:

GENTLEMEN—The notice of my nomination by the convention as their candidate for mayor of the city of Plainfield has just reached me. To say that I feel highly gratified at the confidence manifested in me by my fellow-townsmen would be the merest truism. I regret that, through a misapprehending, I was unable to appear before the convention in person to express my thanks.

I hold it an honor to be called to be a standard bearer of that party which has always been found on the side of the people, and which, I believe, is destined for many years to come to lead in the van of progress and civilization.

Our city sits de-surrivaled. Its fame for beauty, good order, sobriety, health and financial prosperity has gone abroad, and we justly feel proud of it. To maintain the position it now occupies should be the aim of all good citizens.

I regard it as the chief magistrate of our city can do much to further the cause of good government and preserve the honor and dignity of our position. Should my nomination be ratified by an election, I shall endeavor to administer the office impartially to enforce our laws and ordinances.

And, above all, it behooves us in these times of threatened pestilence and danger, to pay special attention to the sanitary condition of the city, and without fear or favor to enforce the same. We have many lessons to learn, and to enact such further laws as may be necessary to furnish protection to the lives of our citizens.

Our city is rapidly growing, and we can and do offer to people seeking for home's attractions and inducements of which no other city of its size can boast. Our present policy of street improvements opens a field in the right direction, and should be wisely and economically followed up. But at all times in the future, as in the past, I shall look to the interests of the taxpayers and to the amount of our resources. Any other financial policy would be unbusinesslike, and in the end disastrous.

The good citizen will cheerfully bear his legitimate share of municipal taxation, but the man who is not a good citizen and does not should be compelled to. No citizen, by any subterfuge or connivance of any party, should be allowed to violate any of our laws or ordinances; and such action of the municipal authorities as shall tend to a rigid, impartial and honest performance of his duty.

Tendering my thanks for the honor conferred, and soliciting the support of my fellow-citizens to see that it be not an empty one.

FRANCIS E. MARSH.

NOV. 26, 1884.

Thanksgiving Entertainments.

"Olivette," Thanksgiving Eve, at the Music Hall, attracted an audience of about five hundred persons, whose frequent applause indicated that they were well pleased with the performance.

The Plainfield Rowing Club gave an evening entertainment in their rooms, corner of Park and North avenues, Thanksgiving Eve, which included dancing and was well patronized by the members of the club.

The Thanksgiving Day matinee drew a good crowd to the rink at two o'clock. All the desirable seats in the house were occupied, and especially noticeable were the number of children on the floor. The crowd was so great that it was with difficulty that one could skate around. George S. Hart, of Philadelphia, gave an exhibition on the Columbia bicycle, which was not up to the standard of Casino performances. In the evening the rink was again filled and the exhibition repeated.

A large crowd assembled at St. Mary's Hall last evening, the occasion being a social hop for the benefit of the young ladies and gentlemen who assisted during the fair. The music was furnished by Prof. Cahill. Refreshments were also served.

The Y. M. C. A. entertainment at the Music Hall attracted a large number, who were manifestly well pleased with the excellent rendering of the following

PROGRAMME.

PART I.

To Sol ques Asinus.....Verdi
Mrs. Grant, Mr. Ritter and Mr. Bowen.
Vocal March.....Sprague
Dudley Buck Quartet.
Reading—"Flyin' Jim's Last Leap".....Banks
Mr. Grant.
To Sevilla".....Dessauer
Mrs. R. J. .....
"The Three Singers".....Tours
Piano Solo, "Liebestraume".....Hans Seiling
Mr. John H. Brewer.
Twilight.....D. Buck
Dudley Buck Quartet.

PART II.

"O Gladsome Light".....D. Buck

I. Wandering Re-ding.....St. Monica's
Mr. Bowen.
Reading—"Lasca".....Degroe
Rose. Alberti.....
A Feathjin's Dream.....MacKenzie
Dudley Buck Quartet.
Venetian Boat Song.....Blumenthal
Mrs. Grant and Mrs. Draper.
Good Night.....Buck
Dudley Buck Quartet.

Marriage Ceremony Yesterday.

Mr. Ely Odell and Miss Mary D. Pendleton were united in marriage yesterday afternoon by the Rev. A. H. Tuttle, of the Methodist Episcopal Church. A reception followed in the evening. The Hickory Club Orchestra, of which Mr. Odell is a member, was present and rendered a choice selection of music. Odell presented the couple, as a token of their respect, a very handsome tea-service and napkin rings. A very pleasant time was enjoyed by all present.

Personal.

—Mr. Thomas Keller, Mr. Walter Bass and Mr. C. C. Moore, with some New York friends, have gone for a few days' shooting to Hampton.

Miss Bailey, who has been visiting with her sister on East Front street during the past week, started for her home in Philadelphia, to-day.

Mr. George Todd and family, of Central avenue, have departed for Florida where they are to pass the winter.

Thanksgiving Services.

A union service of a number of the churches was held in the First Baptist church yesterday morning at eleven o'clock. The sermon was delivered by Rev. Wm. H. Richardson, of the Crescent Avenue Presbyterian church. The text chosen was from Luke, 9:18.

The Trinity Reformed church had special services in the morning, as did also the Holy Cross Church and Grace Church.

The City Court.

John Tears stepped off at the depot in this city on his way to Newark and became over demonstrative. Special Officer Heath arrested him, and Mayor Maxson this morning, in view of its being his first offense, dismissed him with a reprimand, bidding him "go and sin no more."

William Schaefer, William Osborne and Lewis Ackerman, arrested by Officer Kelly for disturbing a meeting in Lincoln Hall, were fined ten dollars each or twenty days in the county jail by Mayor Maxson this morning. Two of them paid their fine and the third is hunting his up.

Patrick Moran, arrested by Officer Flanegan for making a disturbance in the vicinity of Plainfield avenue, was this morning fined ten dollars by Mayor Maxson.

Mr. George Rockfellow Accepts.

There seeming to be some doubt as to whether Mr. George W. Rockfellow would accept the nomination for Mayor tendered him by the Democratic Citizens' Convention on Wednesday evening, a NEWS reporter sought Mr. Rockfellow at his place of business this morning to ascertain the truth in the matter. In answer to inquiries Mr. Rockfellow stated that it might be said that he would accept the nomination, and that his letter of acceptance would be ready for publication in a short time.

—The Elizabeth papers complain that first-class theatrical troupes are passing that city by, on account of the poor theatre there.

A Dreadful Disease.

Rond, pomier and profit thereby. Kemp's Balsam for the throat and lungs is conceded by all who have given it a fair trial to be the most reliable as a complete throat and lung healer. All persons afflicted with that dreadful disease, Consumption, should at once openly rolled and in a majority of cases a permanent cure. The proprietor has no in the city of Plainfield. Every person Park avenue to refund the money to any party who has taken three-fourths of a bottle without relief. Price 50 cents and $1. Trial size free.

Special Notices.

TO WHOM IT MAY CONCERN.

This is to certify that the Plainfield Cornet Band is now prepared to furnish the musicians now playing at the Casino Rink. The band have returned to their old quarters, in the rooms above of the hotel from January 1st, 1885. The proprietor of the hotel will be the same as heretofore and all orders left with the Manager, M. M. Gutterson, or Wm. Frank Brown, will receive the prompt and perfect attention, is always due.

A. A. LISTER, Sec.

THE P. L. C.

At their meeting Thursday evening unanimously accepted the following:

Resolved, That the Rowing Club of Plainfield hereby tenders its non-competitive annual organization to the Plainfield Athletic Club, and that the name of said club may be advanced within the city, known as a permanent member of the club, when exercising the voting privileges of a citizen at the municipal elections, and that we hereby pledge to the officers of said club our hearty co-operation in all matters pertaining to the welfare of the club.

Business Cards.

THURSDAY, NOVEMBER 13, 1884.

SOME of the dwarf race of men reported by several travelers as dwellers in equatorial Africa are now at the Royal Aquarium, London, to which anthologists are invited for studying this remarkable people. The tallest of the dwarfs is only four feet and a half in height, and he professes to be a giant among his people.

IT has been noticed that people of different nationalities usually have different ways of considering suicide. The German invariably shoots or drowns himself, and the Frenchman cuts his throat with a knife or razor. The American takes poison or blows out his brains with a revolver. There are more suicides in summer than in winter.

NICHOLAS ANCHORENA, who died two months since at Buenos Ayres, was probably the richest farmer in the world. His estimators report his rural estates as follows: Land 1,250,000 square miles; cows 152,000; sheep 210,000. He also owns much house property in Buenos Ayres, and his assests have been valued at £2,400,000. He inherited £600,000 from his father thirty years ago.

THE little town of St. Andreasberg, the centre of the canary-bird trade in the mountains of the Upper Harts, is sorely stricken, upward of 100 of the inhabitants being down with trichinosis, and new cases added daily. An official investigation is being made to discover the origin of the disease.

THERE is some excitement among the musical journals of Europe over the alleged discovery of an hitherto unknown symphony by Mendelssohn. From the description printed it would appear to be one of the works of the composer's boyhood which has been catalogued, but had dropped temporarily out of notice.

A WONDERFUL engineering exploit is proposed in Italy, where they talk of throwing a bridge over the Straits of Messina that separates Sicily from Italy. A place where the channel is two and a half miles wide and 361 feet deep is selected. Two piers will support a viaduct of steel rails to a heighth of 328 feet above the water.

AN interesting feature of the World's Exposition at New Orleans will be a united encampment of veterans of the war, embracing the soldiers of the Union and Confederate armies. The Board of Managers of the Exposition have voted $10,000 for this purpose, and 1,000 tents will be constructed for the free accommodation of the veterans.

GRAPE-WATER ice is in season, and is delicious. Take the juice of four lemons, half pint of water, one pint of sugar, two glasses of grape juice; mix these well, strain and freeze.

THE MASTER MYSTERY

SUCCESSFULLY CELEBRATED THROUGHOUT THE COUNTRY

Officially Received by the Catholic Church—The President's Observance. Sports in New York—Beecher's Sermon—Has a Plainfield Allusion.

BALTIMORE, Nov. 28.—Special services of thanksgiving were held and a thanksgiving sermon was preached at the cathedral in addition to the regular pontifical mass, which was celebrated at 10 o'clock yesterday morning since the opening of the council. Heretofore the day set apart as a legal holiday by the president of the United States, for the purpose of giving thanks to God for his many blessings to mankind, has not been observed by the Catholic church. The fact that special services were held and a sermon on thanksgiving preached in the presence of the heads of the church in the United States, is regarded as indicative of action having been taken by the plenary council of the subject of the Thanksgiving day as appointed by the chief magistrate of the United States, and that such action has favored the recognition by the church at that day as a church holiday.

The prelates were robed only in their black cassocks, and not in their copes. The solemn session of the council was held subsequent to the mass, as is usual. The mass was sung by Archbishop Ramsay, of Sussex St. The sermon was preached by Bishop Spaulding, of Peoria, Ill. His text was, "Let all the nations praise the Lord, and all the people glorify Him." The annual Thanksgiving custom has not apart one day in the year to give general thanks unto God for his blessings and goodness bestowed upon the children of men.

The fathers of the third plenary council in concert with the faithful and Christian people of this great country have recognized and do cordially join with the Bishops in a solemn way by the people of the Catholic faith. The appeal of the civil authorities responds all the more to the heart and raises their thoughts to God and bring to mind the great blessing He showers on the country. This call we gladly welcome. We should more than ever be diligent in the use of this occasion, after enjoying the innumerable blessings that God has in his infinite mercy showered upon us. Also in beautiful, even unto the provident, Sunday in the Catholics, and especially those of us who are Americans, should never show a lack of gratitude to Him, who in our country, hold the lives of free men, and enjoy many other blessings not granted to our brothers in other lands. We are a part of the great people of the United States, and feel that whatever party is got or the other. We have seen struggles long and bloody, but the Catholics of other nations came to our aid and brought us help of our troubles, and the bountifulness is ever before us. His loving kindness and mercy is ever shining upon us, and by His power and that gold is furnished and brings forth the fruit and harvests.

This glorious country offers freedom to all. Nowhere on this earth has the Catholic church greater liberty, and her progress is such a good home as in the American republic. We also have good cause to rejoice in the church's growth and prosperity. On the 6th day of May last there were 6,000,000 people in this country, and to-day there are 22,000,000 protected by the most stable government on earth. Where is the like? Where did ever and remember that we are so prosperous, we should be truly thankful. Here man find what wants them abundantly, and the church enjoys the fullest protection of the interests of the church. But in this country there is one thing we want—we have wealth, freedom of conscience, and no people have more, but we want the spirit of faith we need. Above all things we must keep an eye on the morals of the country we love; we must be loyal to the constitution and in a moral and virtuous manner; we must teach them to be temperate in all things. The church urges her children to be obedient and to obey the laws. We respect the laws given them by a free country.

VARIOUS SPORTS IN NEW YORK.

NEW YORK, Nov. 28.—It was estimated that until 3 P. M. 50,000 persons went to the Polo grounds to witness the two ball game between the Princeton and Yale football teams. The game was a fine display of scientific football playing, but there seemed to be general dissatisfaction at the decisions of the referee, Mr. Appleton. That gentleman seemed to get "rattled," and his decisions and rescinded them in the same breath.

After some splendid play on both sides the first half of the game closed with a score of six to four in favor of Yale. After an interval the men set to work again and played until dark, when the game was stopped, and the referee astonished everyone by stating that he reserved his decision. The referee said that Yale was victorious, but that on account of the darkness he was unable to declare it a draw. This is a most unusual decision.

Yale was a big crowd at the Brooklyn Driving Park at Parkville, L. I., to witness the trotting and running race. The betting was very spirited. The first race was a match between Mollie Sprague and Mr. Cromwell's mate and J. McCrimm's Waste Gowan and mate. It was won by the former; best time, 2.45¾. The second was a match between Mr. Thorne's Lindell and Mr. Cromwell's Mollie Sprague, won easily by Lizzie T.; 2.56¾. The third was a running match, half-mile heats, best two in three, but was not finished on account of darkness.

A number of spectators were present at the Washington park grounds, in Brooklyn, when a game of ball was played between representatives of New York and Brooklyn. Only seven innings were played on account of darkness. The score stood 6 to 4.

There were fully 1,000 people present at the Metropolitan park to witness the football match between the Pennsylvania and Wesleyan college teams. The game was hotly contested throughout, the Quaker City players eventually winning by a score of 16 points to 4.

The university of Pennsylvania and the Williamsburg Athletic club played a match at lacrosse on the Polo grounds. There was a large crowd of spectators and after some interesting play the William burg club won by a score of 3 to 1. The Pennsylvanian men played well for first training.

A KILLING OF CUBS.

NEW YORK, Nov. 24.—While the family of Mr. J. aspa Edwards, a retired philanthropist, were spending Thanksgiving at No. 218 West Forty-second street, after dinner a cub between Mr. Edwards and one of his sons, named Charles. After a heated discussion the boys drew a knife and attempted to stab his sister. Another son, named Harry, of No. 116 Perry street, Newark, tried to interfere and as he got between the fighting boys received a knife thrust in the left breast and died. The ball struck Harry near the right eye, inflicting a fatal wound. Mr. Edwards, who is very deaf, was charged with the killing, but was discharged after a hearing, and Charles, who had been the cause of the trouble, escaped.

A DEADLY DUEL.

NEW YORK, Nov. 26.—Matthew was given as most of the shooting, and were hastily attended. During the morning hours the

Last Thing in New Orleans.

Beecher on Thanksgiving.

Has a Plainfield Allusion.

Beecher's Sermon.

WASHINGTON, Nov. 28.—Thanksgiving day was generally observed here. Business was entirely suspended and all the government departments were closed during the entire day. Religious services were held in the various churches in the morning. The attendance was very large. No references to current politics were made. President Arthur attended divine services at St. John's Episcopal church and spent the remainder of the day at the Soldiers' home, where he ate his Thanksgiving dinner with his daughter and a few friends. In the afternoon the fire at the navy yard, corner of principal streets, as is its custom, and made a fine display. On the whole the day passed very quietly.

POLITICS AND THANKSGIVING IN THE OLD DOMINION.

RICHMOND, Nov. 28.—The Union Democratic club, of Richmond, gave a Cleveland and Hendricks Thanksgiving supper last night, at which an English plum pudding weighing 219 pounds was cut, each pound representing an electoral vote for Cleveland and Hendricks. The figurings of cutting it soon is representing the electoral vote of Virginia, the same to be sent to Grover Cleveland in a beautifully painted box, was brought to E. Caldwell's for $15. Mr. Hasker, who cooked the pudding in a bagshead of water heated by coils of steam pipe, is an Englishman, and in the same manner prepared the pudding which blew up the Confederate frenchad Merrimac. Thanksgiving day has been generally observed here, hardly any offices being closed and religious services being held in most of the churches.

BEECHER INTROPUCES POLITICS.

NEW YORK, Nov. 27.—The Rev. Ward Beecher, in his Thanksgiving sermon, touched upon the political situation of the day. He expressed his gratification at having lived to see the condition of affairs existing the election of Mr. Cleveland. His efforts in this direction, he said, had been impeded in a certain degree by the action of public duty which had led him in former years to oppose slavery at the risk of great detriment to his own interests.

GENERAL PROSPERITY IN THE SOUTH

WASHINGTON, Nov. 28.—Dispatches received from points in the south state that Thanksgiving day was more universally observed in that section than ever before. Many of the observances were of a semi-political character; general rejoicing over Cleveland's election being mingled with thanks for the general prosperity of the country.

IN BERLIN.

BERLIN, Nov. 28.—The American colony here celebrated Thanksgiving day more generally than ever before. In the evening Mr. Kasson and the American delegates to the Congo conference and their colleagues were present at a banquet given in honor of the day. The customary toasts were given and responded to.

MISS ANDERSON AND GOV. CLEVELAND

Two English Papers of Interest to Americans.

LONDON, Nov. 28.—There are two articles in the December number of The Nineteenth Century which possess considerable interest for Americans. The first is by "Owen Meredith" (Lora Lytton) and is a warm defense of Miss Mary Anderson's impersonation of Juliet. The second is by Oscar Browning, a critician which her performance has involved has been carping, unthoughtful and unjust. He considers that her acting of the part is "conventional and artificial," and is sometimes profoundly touching. Miss Ellen Terry, he thinks, is superior to Miss Anderson in the latter respect. Mr. Browning scattered through the drama, but in other respects the English actress is inferior to the American. He admits, however, that Miss Anderson is not always at her best.

The second article is by Mr. William Henry Haibert, formerly editor of the New York World, and treats of the Democratic victory in the American presidential election. The writer speaks of the presidential-elect in terms of warm appreciation, and thinks many points in his career and character when are similar to those of Abraham Lincoln. Mr. Hurlbert concludes by saying that the inexhaustible vitality of the Democratic party furnishes the strongest guaranty of the permanence of the United States, both as an indissoluble union and as indestructible states.

She Killed Her Trudnow.

LONDON, Nov. 28.—All Paris is excited over the trial of Mme. Vilmain, which has been enacted even in that centre of sensations for many years. The victim of the tragedy is M. Morin, an attorney, who was killed by a shot in the temple, while Mme. Hugues entered the court room quickly, sought out M. Morin, and shot him dead. Mme. Hugues is a beautiful young wife of M. Clovis Hugues, a prominent radical member of the chamber of deputies. M. Morin had grossly slandered Mme. Hugues, circulating reports of her with infidelity to her marriage vows under most disgusting circumstances. There are many facts, which make his story unbelievable, but the general opinion is that the slander was the mean revenge of a repulsed admirer. Public sympathy is entirely with Mme. Hugues, and it is considered impossible that she can ever be convicted of murder by a jury of Frenchmen.

He Had Lots of Nerve.

WILLIAMSBURG, Ky., Nov. 26.—At Jellico, Tuesday night, on the line between Kentucky and Tennessee, Frank Baker, the most noted desperado in East Tennessee, was fatally cut. Baker had been on a spree, attended several citizens, and finally terrorized Robert O'Reilly's store, where he assaulted Mrs. O'Reilly. O'Reilly ejected Baker, an hour later Baker entered a store, saying he had been cut. On examination it was found some one had planted a bullet in his breast, allowing his intestines to protrude. The wounded man walked several hundred yards holding his bowels in his hands. Baker's recover. No one seems to know who stabbed him.

A KILLING OF CUBS.

PITTSBURG, Nov. 28.—The firm of Oliver Bros. & Phillips, manufacturers of tinned iron, have ordered a general reduction of wages in all departments of ten per cent. to take effect on Dec. 1. The firm employ about 1,000 men, or all those who are not members of the Amalgamated association. The men have issued a circular next to the effect that the reduction had been made without their consent, but that they probable that a strike may occur.

A Dog Fight for Money Stakes.

NEW YORK, Nov. 28.—About 50 sporting men assembled in a well-known sporting house yesterday to witness a dog fight between Tom Hyer, of Jersey City, and Jack Dempsey, of New York, for $100 a side. The fight was for 200 pounds, and the battle was to take place in front of Dempsey. They fought for 30 minutes, when Hyer's dog was declared the victor, and Dempsey's dog was carried off in a dying state and the several men agreed to forfeit

HOW HE STRUCK OIL

MEDDLING WHICH OPENED THE RIGHT PATH TO FORTUNE.

The Death of Abraham Lincoln a Strange Chapter in the History of Oil Regions—A Spirit Interposes.

OLEAN, N. Y., Nov. 28.—Abraham James, whose chance discovery of the once famous Pleasantville oil field in 1868 is among the many curious reminiscences of the Pennsylvania petroleum country, died in Portland, Oregon, aged 71. James comes to the oil region in the early days of the excitement on Oil creek. He was an old prospector, a Spiritualist and an amateur conjurer. His remarkable performances as a medium throughout the oil regions covered a long leading operators to a belief in Spiritualism. James, however, just managed to dabble a little in oil and oil lands.

One day in the summer of 1868 he took his last operation in a few of the men who had become Spiritualists, and told them that a spirit had revealed to him the existence of a vast deposit of petroleum in a locality where no one had as yet thought of searching for it. He said that he had been stopped in the road by the spirit, which took him from his wagon and conducted him like magic across fields and through forests to a wild spot in the vicinity of Pleasantville, where they rested. Presently the earth opened, and at its mouse cavern yawned before them. The medium James was led by the spirit. They journeyed down into the earth a long distance, and finally James was brought to the margin of a lake of petroleum of unknown extent. Speechless with amusement, James gazed on this apparently boundless store of wealth a few minutes, when the spirit led him back to the surface of the earth. The cavern closed and the spirit vanished. James related the news to those whom he confided this marvelous intelligence to the great deposit had been revealed to him by the spirit in order that the faithful might benefit by the knowledge. He exhorted them to lose no time in furnishing the means to develop the new territory thus placed within their reach. The necessary capital was forthcoming at once, and James was appointed superintendent. He put down a well on the spot where he said the spirit had led him into the cavern, and at the depth of 870 feet the drill struck a rich oil-bearing sand and a flow of oil followed as the result. A well of that size was an unusual one then and the strike set the entire oil country wild.

In a short time Pleasantville was surrounded with wells which were producing more oil than all the old districts, and in new territory was discovered oil field to the world, The James combination put down five wells on their tract, every one of which was a big producer. Oil was then selling for more than $8 a barrel, and although the life of this new field was comparatively short, the operators all made fortunes. James left the oil country across the Pleasantville field became exhausted, worth half a million dollars. He never came east, and it is said that he lost his money by unfortunate investments on the Pacific coast. The Spiritualists never lost their faith in James' story of the supernatural discovery of the petroleum fields. They believed that his knowledge of geology had led him to believe from the character of the country about Pleasantville that petroleum undoubtedly existed there, and did not doubt the truth of the story of the spiritual revelation to induce moneyed believers in the doctrine to furnish the means to test his theory.

Two Children Killed.

MACKESPORT, Pa., Nov. 28.—A shocking accident occurred at Coal Hill station, Redstone, which resulted in the death of two children named Kennedy. Meeting by chance, they started to walk down the railroad track of the Baltimore and Ohio railroad, and on hearing an engine whistle they immediately stepped on the west bound track. Both children were cut off at once. The engine, running at a rate of 30 miles an hour, was running backwards without a headlight. The children were both street and Kennedy some distance from the track, the girl being instantly killed. The boy lived two hours. Both the victims were 17 years of age. Though of the same name they have no relation to each other.

Jay Gould's Great Deal.

MILWAUKEE, Nov. 26.—Several gangs of men are at work constructing the new Baltimore and Ohio telegraph line between Chicago and Milwaukee. Work has been in progress about two weeks, and unless the weather continues so cold that the men cannot work a connection will be made with Milwaukee in about four weeks. As soon as the Milwaukee line is completed several gangs of men will begin work at different points between Milwaukee and St. Paul and it is confidently expected that an office will be opened in the latter city by April 1 next.

Looking After the Newsboys.

BOSTON, Nov. 28.—The Bell Telephone company, which entertained the newsboys of Boston Tuesday evening, extends their hospitality last evening to the newsboys of Brookline, and will have a supper prepared for them from 7 to 10 P. M. Besides the hot supper the regular Thanksgiving dinner will be given by friends of the newsboys at the residence of Mayor Green. All the hotels have promised their customary liberal contributions of good things for the table, and it is expected a larger number will partake than ever.

Meant the Verdict Without Pinching.

CHICAGO, Nov. 28.—In the case of James Sullivan, the sailor, on trial for killing John Tamney, a saloon keeper, the jury after being out two hours returned a verdict of guilty of murder in the first degree. The prisoner received the verdict without flinching. Sentence deferred.

Arrest of Viennese Socialists.

VIENNA, Nov. 28.—The police have discovered the existence of a Socialist society, whose ramifications extend throughout the whole empire. Several arrests of its members have been made.

Repairing the New Cable.

LONDON, Nov. 28.—The cable steamer Faraday has picked up the broken Mackay-Bennett cable and is repairing it. The operation is favored by calm weather.

CONDENSED NEWS.

Mme. Aldrud will sail for New York in December.

Oregon's official vote: Hoford, 35,032; Cleveland, 34,662; Butler, 2,774; St. John, 1,047; Streeter, 1,000.

The Nationalists of Ireland have decided to contest the next election with two candidates, Mr. Parnell being one.

The Mexican commission to the world's exposition, consisting of Gen. Diaz, Gen. Ramirez, military band, has arrived in New Orleans.

Two French lads of Brattleboro, Vt., aged 9 and 11 years, were sentenced on Tuesday to the state reform school until they are 21 for setting fire to factories, obstructions on the railway and engine and train.

A Grand Jollification.

The Chicago Democratic Club Parades in Honor of the Verdict.

CHICAGO, Nov. 28.—It appears certain that the action of the Federal grand jury in going behind the returns and ascertaining the political complexion of the members of the Federal grand jury of 1888 made by Lyman Trumbull, Democratic marshal of the district, and Democratic United States Attorney Tuthill, will not be allowed to pass unnoticed. The Democratic central committee, aside from the fact that every member of the Federal grand jury that took any part in vindicating the state laws by finding that ballot box stuffing have been prosecuted to the county grand jury, and an indictment against each one of the 18 will be asked for. Yes, and we will try to have Judge Gresham and United States District Attorney Tuthill indicted too. If we cannot reach them in this way, we can in some other, and we will do it.

Several prominent local Democrats had a conference with Congressman Springer, and it is reported that on the assembling of congress he will move for the appointment of a committee to investigate the election in the Sixth senatorial district, and the legal proceedings, which resulted from it. The indictment against the three judges, Peter Ranseborough, Dr. Simon Tranmer and Isaac F. Shields, and against the two clerks E. D. Kelly and M. Sullivan has not yet been presented to the courts, but each of them have been held to bail in the sum of $2,500 each. The state canvassing board meeting at Springfield is expected to decide whether a certificate of election shall be issued to Loman or Brand. Whatever the decision, however, it will have no effect on the commenced criminal proceedings in this city.

KNIGHTS OF HUMANITY.

Work of the Gallant Life Saving Service for the Past Year.

WASHINGTON, Nov. 28.—Superintendent *Kimball in his* annual report just completed, presents the best record ever achieved by the Life Saving service. There were on January 1, 1891, stations 156 on the Atlantic, 7 on the Pacific and 13 on the Lake coasts. The result of all the efforts in the saving of life service during the year, may be summarized as follows: Number of disasters, 429; lives at risk, 4,412; lives lost, 30; value of property involved, $10,007,925; value of property saved, $9,761,554.

Since the introduction of Life Saving stations, 13 years, service has been rendered in 2,547 disasters, where property valued at $87,899,000 was involved, of which $81,400,000 were saved. In these disasters the lives of 22,337 persons were in peril, and all but 446 were saved. This statement includes 188 lives lost at the wrecks of the Huron and Metropolis, which in strict justice are not chargeable to the life saving service.

During the past year telephonic communication has been established between 29 stations on the New Jersey coast. This means of communication has already been of great advantage, as it enables the service to speedily muster a number of crews abreast of any shipwreck, and steps are being taken to connect many more stations by telephone. The splendid discipline of the corps Superintendent Kimball attributes mainly to the fact that it is composed of men selected entirely on grounds of professional qualification, the policy of keeping the service entirely exempt from political influence has been steadily maintained.

A Fashionable Wedding.

MILWAUKEE, Nov. 28.—Edward J. Cudahy, of Phil Armour's Chicago house and brother of the noted Patrick Cudahy, a speculator of that name, was married at St. John's Cath dral to Miss Julia Murphy, besides being crowded with the elite of Chicago and Milwaukee society. It is said that Mr. Armour's wedding present was a check for $10,000. Mrs. Cudahy is one of the most prominent musical amateurs in Milwaukee and received her musical education in Europe for the purpose of leading a professional life. This intention she has now abandoned.

Arrest of Hocking Valley Incendiaries

COLUMBUS, Nov. 28.—It is stated that a warrant is out for the arrest of a man who participated in the incendiarism on the Straitsville road, Nov. 5, and who, reliable information says, will also make a confession and give the names of the greater part of 150 persons who took part in the affair. The man in listed are only charged with the attack on Murray City. If these arrests are successful, as expected, the parties will be tried under United States law.

Election Hotters to be Punished.

ANDERSON, Ind., Nov. 28.—Judge Mahlon in charging the grand jury called attention to the laws relating to the betting on elections, and instructed them that indictments should be found against every person guilty of wagering money on the result of an election. The charge has caused no little excitement, and it is rumored that if indictments are returned some prominent citizens will be prosecuted.

The Congo Question.

BERLIN, Nov. 28.—The West African conference adopted the suggestions of the committee as to the boundaries of the Congo basin and the rules to govern trade in the region. These recommendations have already been reported. The principal are that the mouth of the river be undervised to include the coast from the river Logo on the south to the river Kamma on the north, and that trade shall be free to all comers within the Congo region.

The Work of Incendiaries.

HENDERSONVILLE, Ky., Nov. 28.—James G. Graves, W. J. Arnold and John Hughes, three farmers, living in the western portion of this county, had their large tobacco barns fired by incendiaries. The insurance on the barns and contents is very light. The barns were not a mile apart. The farmers and insurance men are greatly alarmed.

Hanged for Being Drunk.

LITTLE ROCK, Ark., Nov. 28.—Frank Quarg, colored, who murdered Charles Watson, in Argenta, opposite Little Rock, in September, was hanged at noon. He acknowledged stabbing Watson, but pleaded drunkenness and denied intending to kill him.

Fanny Elsler Dead.

VIENNA, Nov. 28.—Fanny Elsler, the once famous dancer, is dead. She was born in this city in 1811.

Mme. Elsler was unconscious for three days preceding her death. She had been ailing since Oct. 1.

The Dangerous Variety Actress.

CHARLESTON, Ill., Nov. 28.—Wiley D. Clingan, clerk in the auditor's office of the Indiana, Bloomington & Western railway, has been arrested on a charge of embezzling about $3,000. It is said he has been short of the money during the last few months and spent it upon variety actresses.

To Help the Stricken People.

WASHINGTON, Nov. 28.—Dr. J. S. Hubbell, special field agent of the Red Cross association, has been commissioned by Washington to investigate the alleged distress in the cotton stricken districts, and to afford relief where needed.

24 North Ave.,
Plainfield, N. J.
Telephone, No. 50. 6-24-19

A NEW PAVEMENT.
The undersigned has secured the exclusive agency for the sale of the
Diebold Patent Iron Stone,
whichfor elegance and durability, is unsurpassed, and in price will compare favorably with any other pavement now in use. It is the most powerful preventive of water and is a perfect gutter stone, floor tiling and street blocks. Also used to build fire and burglar proof vaults, and for building purposes generally. These pavement blocks have many striking peculiarities. They have no perceptible wear; are non-conductors; repel sun and snow, as well as all kinds of moisture. Water absorbed in the pores on the ordinary brick, thus assisted remains perfectly free from it. These blocks are one 1 1-2 the inches iron thing and are the hardest of substances. For views of the pavement in Newark's Penny Street, opposite Military Music Hall. For further particulars call on or address
W. H. WARNER,
32 1-2 West Front street, Plainfield, N. J.

HAIL COLUMBIA!

The Gracious Compliments of an English Actor.

Glimpses of the Country and Fools of the People—Impertinent Large Cities and Wonderful Bridges.

[William Terriss in St. Stephens' Review.]

You have asked me to give my impressions of the states, and, so far as I can, I gladly accede to your request. Naturally I regarded the inhabitants through the actor's spectacles, and if my lens did not play me tricks, I consider that Americans are as a play-going race fonder, far fonder, of all that pertains to the drama than we are over here. They are quicker at catching points. There is an earnest spontaneity about their applause which spells REAL in big capitals, and the actor needs to have a sluggish liver indeed who is not stirred to something like reciprocity when an American audience "rises" at him.

I found the American race one of the most hospitable and free-hearted sections of the world's teeming millions I have ever met, and as I have explored a good many sections of our globe during the last twenty years, I am able to draw contrasts from experience. They are warm-hearted and impulsive, and I can conceive of no finer pleasure excursion than one—at least in private society—than a short playing tour from New York to San Francisco. The broad, burly arms of Uncle Sam's Bohemians are held out, and there are hand-grips and pleasant greetings from jolly good, albeit rough "humans" you have never met before, but who must all be boys. The large class of society eagerly welcomes you, makes much of you, and, what is better than all else, you feel that it is not the fleeting excitement which has surrounded you, and the wish to make a fellow feel at home three thousand odd miles away from his own hearthings. Personally, I take this opportunity of saying that the thought I let, of expressing my sense of gratitude to the whole American public for the manner in which they received me, and I hope I shall not be accused of doing it in any other spirit than that of sincerity.

As one travels through the states the immensity of the country impresses. In Great Britain, the run from Aberdeen to Euston makes one begin to feel that the right little, right little island is a bit of a misnomer after all; that the "little" is not a definitive that could with safety be omitted, but in the states the distances are appalling. Of course one knows the actual linear measurement in miles and furlongs between New York and Chicago, but try the journey, and the feeling of space begins to grow on one until the mind can occupy itself with little else. Every man should love his native land and feel proud of it, but the American does more, he revels in the vastness of his; and no one who has traversed it can wonder at the beastfulness which sometimes makes a full-blooded Yankee believe that the world begins at Manhattan and ends at the port of Monterey. I passed through a great many large towns whose names are never or seldom heard of over here, yet whose dimensions from the railway suggested places as large as Bristol or Aberdeen. Scotland and this is a point which I defy any average Englishman to miss noting with surprise.

Again, the comfortableness of the American in himself and his country, but particularly in himself, is a feature which is bound to attract the most unobservant mind. A slight incident which I related repeatedly will serve to illustrate my meaning. I saw a lad of about 12 or 14 complacently driving a high-spirited animal along the public highway, and the confidence of the boy, with all the zingfroid of a wagoner jogging along a Scottish turnpike at three. In England such furious driving is confined to butcher's boys in London and suburban thoroughfares, when the policeman is conveniently absent. In the states it seems the rule. The exhilarating feels, and are something astounding to whom. One is absolutely lost in wonderment when contemplating the Brooklyn bridge, those gigantic strings which support the largest span at St. Louis, the truly marvelous bridges across Niagara and the monster hotels every where, which surpass the largest caravanseries of fairyland. We think a good deal of Richmond and Windsor parks—at least I do—but after seeing several lovely specimens of Yankee parks (one of which I thought of exploring and walking through, until I found it was ninety-five miles in circumference Windsor and Richmond suffer considerably, though their trees and glades have yet to be beaten out west.

The greatest characteristics of the nation speak out in every city, street and sidewalk. Nothing is old—all is new, all fresh, delightfully fresh—like spring. Can I put the case more forcibly? Everything they do is great; their chief trait—a trait I admire, like all people who possess it, but little of it—energy. Their perseverance is a national characteristic, one of their strongest points, and they are proud of it. Their perseverance that one hundred years ago gained them their independence and which again two decades since stamped out the blot of their encroachment of liberty at the cost of a terrible war for duration and obstinacy recalls the Punic campaigns of classic lore, is as rampant as ever. It is that very perseverance which will one day make them one of the greatest, if not the greatest, power in the world. (I really think I must have borrowed some of their perseverance, as I have written no brevity.) I may add that, finally, I shall not rest satisfied till I have once again visited my friends in their new world.

Timely Caution to the Public.

[Chicago Herald.]

In some Texas towns alarm of fire is given by the citizens in the vicinity shooting off their pistols, when loads the Beaumont Enterprise in remark: "When a fire alarm is sounded, will our fellow-citizens try to remember and fire their pistol bullets into the air? It does positively disgust us on Monday night, and the wonder is that no one was shot. We know of one house from the walls of which two bullets were picked out next morning."

Poet in Chains.

[Felix L. Oswald.]

Few fatalities are entirely out of fun, but the enormous price of wood has led to the invention of cheaper substitutes. In Canton and Shanghai, for instance, the poorer classes subsist on "ground sea-grass, dried and intermingled with animal fat, probably small-fry. A cubic foot of this compound can be bought for a few cents, and will cook a dozen hungry consumers' stomachs, will cook a dozen dinners.

Mad Always Given Satisfaction.

[New York Sun.]

A woman who had buried three husbands was inconsolable over the loss of the fourth. It was necessary to order the funeral preparations and to see to the safety of the body for a few days. She asked if the body could be embalmed so as to retain its natural color.

"I see Mr. Nordell," the undertaker said to a friend, "my undertaker for a dozen years has undertaken given the best of satisfaction."

Miss Taylorcee—Why, Jane! What in the world are you doing?

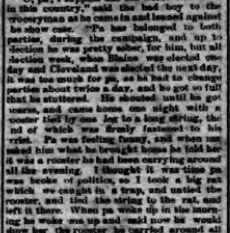
Jane (who has been unpacking Sir Hubert to Taylorcee (1000), just arrived).—Faith, Miss, you said it was to be set up in the library, and I can't make nothing out of it, only I never see such a stove before; it's all pipe.

The Election Decorations the Bad Boy's Pa.

[Peck's Sun.]

"O, pa; I suppose has the worst headache in this country," said the bad boy to the overpraised as he came in and leaned against the door case.

"Pa has belonged to both parties, during the campaign, and up to election he was pretty sober, for him, but all last night, when Hughes was elected one day and Cleveland was elected the next day, it was too much for pa, as he had to change parties about two days, and he got so full that he stuttered. He shouted until he got hoarse, and came home one night with a rooster tied by one leg to a long string, the end of which was firmly attached to his wrist. Pa was feeling funny, and when ma asked him what he brought home he told her it was a rooster he had been carry ing around all day long, trying to get it to crow, as pa was broke in politics, so I took a big rat which we caught in a trap, and untied the rooster, and tied the string to the rat, and left it there. When pa woke up in the morning he woke ma up and said now he would show her the rooster he carried around all night, and took hold of the string and pulled, and said: 'Come up here, chicky,' and he pulled the rat right up on the bed. Well, we'd a dide to see pa look at that rat, and

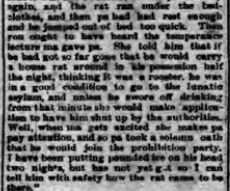


"You'd a dide to see pa look at that rat."

I know you'll have dide to see ma get scared. She made one jump and landed on the bureau, and yelled nine kinds of murder. I'm looked at the rat sort of suspicious, and rolled over, and looked the other way, and when he was satisfy himself that it was not a rooster, so he pulled it up again, and the rat ran under the bed. Pa chased them through and he jumped out of bed too quick. Then pa ought to have heard the temperance lecture ma gave pa. She told him that if he had got so far gone that he would carry a house rat around in his possession half the night, thinking it was a rooster, he was in a good condition to go to the lunatic asylum, and unless he swore off drinking from that minute she would make application to have him shut up by the authorities. Well, when pa gets scared she makes pa pay attention, and so pa took a solemn oath that he would join the prohibition party. I have been putting pounded tea on his head two nights, but he has not got so he can tell him with safety how the rat came to be there."

A Fortune Gift.

[Puck.]



This is the season when the good wife presents her hubby with an elaborate smoking jacket as an inducement for him to remain at home evenings.

That Telephone Girl Again.

[Oil City Blizzard.]

The girl had been going a long time when somebody called. Looking at the switchboard she observed that Lill was down. Instead of ringing the plug to her ear, she softly replied: "Hello! What do you want?"

"Dr. Highflyer No. 2222."

"Hello, doctor! My wife is not very well to-night. She has a severe pain in the back of her neck, and complains of a sort of roseate to the abdomen."

"Got anything, I guess."

"I think so. What shall I do for her?"

Here the wicked telephone girl switched on a musical selection by ringing the owner of a sawmill what he thought ailed his boiler, and the answer to Doddodie's question was as follows:

"I think she's covered with scales inside about an inch thick. Let her cool down during the night, and before she fires up in the morning make a hammer and pound her on the head all over. Then put a hoop and stitch it on the fire ring and water-cut. I wouldn't be surprised if she is full of wood, however, and if so you can get through. Or her up with cold water and build a good fire under her, and if she don't get her mouth to steam well in half an hour, I'll eat hay."

The result is that No. 1111 does not now speak to No. 2222 and Dr. Highflyer has had the telephone taken out of his house.

Notice.

Notice is hereby given that an advertisement in the paper of this date has been inserted by the undersigned, and that the same is true and correct in every particular, and that the undersigned will not be responsible for any debts contracted by any person other than himself after this date.

Witness my hand and seal this 1st day of April, 1884.

JOHN SMITH. [SEAL.]

Witness: JAMES BROWN.

Pawnbroker at Breakfast.

[Cincinnati Commercial Gazette.]

Billiard tables are becoming a source of considerable profit to the owners. It is not easy to be out of work or out of money long. The men of these days readily negotiate families, and close hearts of the hardest will easily yield to the touch of a counterfeit that will pass for a note over the door. Two days and a half table that is usually bought.

One thing that private tables is effecting is that ladies are beginning to learn to play, and so much with their brothers or sisters or friends. Many a young lady who now often have a rather lonely time of it during the day, and a billiard table is a novelty to which they take naturally. Few of them grow expert at it, though, but they can and may develop into a player who surprises her brother, or whoever it may be, when a bet happens to be played off.

It seems to be a regular mania and extends down to the servants, who peep through the open door or linger accidently on the staircase to see how the ladies play inside. Only the other day Orange street family was astonished when she returned from a series of afternoon calls, which she had found everybody out, to come home and open up stairs to her drawing-room without ringing. On the landing she heard murmurs and smothered applause in the billiard-room. The door was open and she looked in and looked in. The cook, a ruddy Irish girl, and the chambermaid, a stout German, who could hardly speak English, were wrapped up in the game and had a table to themselves, and ones, who waited on the table, attended the door bell, and blacked shoes, acted as scorer. Bridget was slightly about, 29 to 27, but Gretchen was in the lead by 40 and from the intense expression on the colored newspaper's face she was going up ahead. After a rub of four she stopped and the mistress stepped in. In five minutes more the servants had been employing their leisure time.

The chief trouble with keeping a private table especially when beginners do most of the playing, is the babbling to have cloth torn and the cues and balls damaged. Repairing torn cloth is a mean and costly job, and a table with many jumps and gouges in it ceases to be a pleasure to play on. Every, or any other kind of ball, when it stand being rolled around the floor, and the leather of the cues is not near proof enough not to play out when used for a long stick.

For pool tables are the worst for damage. Billiard tables only abused, and pool for drinks is not known, though pool without drinks is perhaps as rare. The whole change from playing in a public saloon is in keeping with the tendencies of the present time to be exclusive.

A Queer Counting Place.

[St. Nicholas.]

Cuzco, the ancient capital of the old Incas empire of Peru, is situated high up among the Andes at a point so elevated that, although under the tropics, it has the climate and productions of a temperate region. It still has many remains of Inca architecture, distinguished for its massiveness, which are likely to endure for centuries to come. On a hill, overlooking the city, are the remains of the great Inca fortress of the Sac-sa-hue-man, in the storming of which Juan Pizarro, the brother of the conqueror, lost his life on the side. The fortress was built of gigantic stones, or rather rocks, and their great size and the accuracy with which they are fitted together excited all who see them.

In front of this fortress is a curious, doughshaped mass of rock, called the Rock-de-doyo, or sacrificial stone. The surface, which is not "smooth rock," because its convex surface is grooved, as if the rock had been squeezed up while it is plastic state between irregularly parallel grooves, which run in different directions. A mass of dough, forced up under the outspread hands, would give something of the same appearance in miniature. But the hollows of the grooves on the Peruvian hill are smooth and glossy. It is said in the old chronicles and traditions that the Inca youth, long years ago, amused themselves by sliding, or sledding, through these polished grooves on festival days and holi-days, and this custom is still practiced by the modern youth of Cuzco.

There is no sled now, and it is a great one, too, which those boys possess over the northern boys, who live in the land of ice and snow, and that is the necessary for them to roll up a long and slippery hill, dragging after them their heavy sleds, which grow heavier with every step they take, so that the longer they ride the more work it is to get back to the starting-place. The Cuzco boy sits down at the top of the rock in one of the grooves, and, with a slight start, sends his body with all its weight, which, until he reaches the bottom, landing in a soft bed of earth; then he pitch himself up, runs around to an easy place of ascent, and is up again in a minute to repeat his ride.

Rules for Weather Forecasts.

[Nebraska Farmer.]

1. When the temperature falls suddenly there is a storm forming north of you.

2. When the temperature rises suddenly there is a storm forming north of you.

3. The wind always blows from a region of fair weather to a region where a storm is forming.

4. When cirrus clouds are moving rapidly from the north to northeast, there will be rain inside of twenty-four hours, no matter how cold it is.

5. When the cirrus clouds are moving rapidly from the south or southwest, there will be a cold storm coming on to-morrow, if in summer, and if it be the winter there will be a snowstorm.

6. The wind always blows in a circle around a storm, and if you face from the north the heaviest rain is east of you; if it blows from the south the heaviest rain is west of you; if it blows from the east the heaviest rain is south of you; if it blows from the west the heaviest rain is north.

9. The wind never blows unless rain or snow is falling within a thousand miles of you.

10. Whenever heavy white frost occurs, a storm is forming within 1,000 miles north or north-west of you.

She Is Executing Pads.

[N. Y. H. to Chicago Tribune.]

Noticing that you have a lady bookkeeper, allow me to call your attention to a new invention for an "office pad" for cross ruler and notice lately. The object is to have a pad of paper small enough to carry, and then let the leaves fall outward. Here is the article just as received:

Mister P. H.: I want the job my father is now in. I have been out of work for a long time, and have used every thing I have to get one, and I have not got it yet. I have been to see about it, and I would like to get it very much. I am a first class penman, and can keep books. My father is going to get the place and is learning [illegible]

Don't Buy Your Shoulders BUT INVESTIGATE!

Investigation is one of the wonders of the modern age, but paying prejudices, either in its own state or anywhere else, is not.

Consumption can be Cured!

This fact has been demonstrated in more than

THE THOUSAND CASES by

DR. S. D. HOWE,

The Great Consumption Doctor of New York, INVENTOR OF THE

Arabian Medicines,

Celebrated throughout the World for their remarkable Cures.

Dr. Howe's Arabian Milk Cure.
Dr. Howe's Arabian Tonic.
Dr. Howe's Arabian Liver Pills.

The Only Medicines that have ever been known to positively cure Consumption.

TESTIMONY

Of the Hon. Jas. R. Carr, Judge of the Superior Court, Chicago, Ill.

CHICAGO, Dec. 14th, 1876.

DR. S. D. HOWE,

DEAR SIR:—Permit me to add my powerful testimony to the many others in the columns of your valuable medicines. My wife was taken down with a severe cough, which was so severe that she was severely afflicted with hacking cough, especially on the approach of cold weather. She had spent nearly all the winter months of the right lung and the upper portion of the right lung was badly affected with bleeding. Her sufferings were intense, her nights extremely nervous and restless. She had become emaciated considerably down by the physicians of Chicago and other cities, whose prescriptions I have taken without benefit. I was induced to call on Dr. Howe, at 21 W. Front st. Plainfield, N. J., and after using your medicines as you directed, very little hope of ever being help by the medical science in which your thorough examination, which you placed your diagnosis, by which you placed your diagnosis, by which you pronounced her case incurable, and gave her up to die. I was induced to call on Dr. Howe, in regard to the Arabian Milk-Cure and Arabian Tonic, which I did, and after a short consultation with Dr. Howe, he gave me a course of treatment, which I followed out to the letter, and in a few weeks she was restored to health, and all pain removed, she began to gain in flesh rapidly, and strength and her cough and nervousness entirely ceased, and I am happy to say that she is now in the enjoyment of good health, and I attribute it entirely to the use of your medicines. I have spoken of the wonderful cure of my wife to many friends in the vicinity of my residence, and have induced several of them to call on Dr. Howe, and they have been cured of Consumption, Asthma, Bronchitis, Chronic Sore Throat, Catarrh, and Liver Complaint, and many other diseases. Very respectfully,

JOSEPH T. GARY.

The above letter is only one among thousands received from all parts of the United States.

Asthma Milk Cure & Tonic, each $1 per Bottle.

PILLS, 25 Cents per Box.

Sold by C. A. BEEBLER, Druggist.
Sole Agent for Plainfield.
Dr. S. D. HOWE, Proprietor, New York.

DR. S. D. HOWE'S

Arabian Tonic Blood Purifier

differs from all other preparations in its immediate action upon the

LIVER, KIDNEYS AND BLOOD.

Cures Scrofula, Blood Poisons, Boils, Rheumatism, Sores and all other Blood, Skin and Kidney Diseases, Consumption, Pimples on the Face, Sore Throat, Ulcers, Tetter, and all diseases arising from an impure state of the Blood, Malarial Fevers, etc.

FOR NERVOUS DEBILITY, LOST VITALITY, URINARY DISEASES, and BROKEN DOWN CONSTITUTIONS, I challenge the 19th Century to produce its equal.

Every Bottle is Worth its Weight in Gold.
Price $1.00 per bottle.

DR. S. D. HOWE'S

Arabian Milk Cure,

Is the only Medicine of the Kind in the World. A Substitute for Cod Liver Oil.

Cures Consumption, Coughs, Colds, Sore Throat, Bronchitis, Hoarseness, Whooping Cough, and all Throat and Lung Troubles, leading to Consumption. Price $1.00 per bottle.

DR. S. D. HOWE'S

Arabian Liver Pills

Cure Biliousness, Jaundice, Sick Headache, Chills and Fever, Constipation, etc. Price 25 cents per box.

JOTTINGS.

—Anti-license men meet to-night.

—Some burning brush on the Netherwood hills came near being the cause of an alarm of fire last evening.

—A new post office has been established at Granville, Monmouth county, and named Keansburg, in honor of Congressman John Kean, Jr., of this district.

—The new Cecil-on Cornet Band discourse some fine music. Thanksgiving Day in particular the program was very good. The band is under the management of Mr. G. M. Stevens, of Rhode Island, N. Y.

—Garrett & Co. display more than their usual good taste in the attraction of the ele gant stock of holiday goods, which they offer to the public this year. Their advertisement may be found in another column.

—After the Y. M. C. A. entertainment Thanksgiving the ladies and gentlemen who participated in the affair, by request, sat down to Dixon's, and appeared much pleased with the enthusiastic reception they were accorded by the audience.

—The floral decorations on the stage at Bellman Music Hall Thanksgiving evening, were contributed by Mr. L. J. Denion, of this city, and their appropriateness was the subject of much favorable comment.

Concerning the Money Election.

In an article in this week's issue the Constitutionalist questions the sincerity of the Common Council in ordering a special money election to be held on Tuesday at the time of the regular city election. In order to put the facts in the case, the NEWS this a.m. made inquiries of Chairman Dumont, of the Street Committee, and in reply has received the following letter:

"In reply to your question as to the appropriation of the $5,000 to the improvement of Plainfield are asked to vote on Tuesday next.

At the regular meeting of the Common Council held Oct. 6, 1884, at which all members of the Council were present, the following resolution was offered by the Mayor, and duly adopted:

"Resolved, The best interests of the city demand that the repairs and improvements of streets with crushed stone should be continued, for which the Fund provided will be wholly inadequate. Then follows the legal notice as required by the charter, ordering the Clerk to give notice that a meeting of the Common Council to be held on the 21 of December next, the sum of $5,000 is voted to be raised by tax for the amount of said special tax be appropriated to the improvement and repairs of the streets.

Of the $5,000 now voted for these resolutions, seven or a majority of the Council will hold others, and others may be realized, which I think will be the expenditures of the sum if voted for improvement and repairs of the streets and for no other purpose.

F. R. DUMONT,
Chairman Com. on Streets.

Sunday Services.

The Reform Club meeting in the evening at Reform Hall will be conducted by Rev. Dr. Ketcham, C. B. Corwin, W. H. Sampson, Chauncy Schaffer, the Rev. Mr. Cleaver and W. R. Codington.

Interesting Gospel Temperance services will be held as usual in Reform Hall at four o'clock p. m. After the opening exercises the meeting will be given to voluntary and personal testimonials of God's power to save sinners each. Christian workers of all denominations are invited to be present and assist in the good work. All are welcome and especially strangers.

The Salvation Army in Town.

Scout Planner of the Salvation Army is in town to-day making arrangements for the landing of the troops here. The army will rendezvous in Manning's Hall on Front street for the present, and will open fire this evening by an open air fusillade. The army claims to have captured half a million of drunkards during the past year and four and a half millions during nineteen years and enrolled them in the ranks.

Union County Farmers' Club.

On Thursday, December 4th, the Union County Farmers' Club will hold a meeting at the Court House, Elizabeth. There is to be a good, fat, fat discussion, each one of course being the club name, and formal notice of that will time have to be made in order to act upon it at the annual meeting in January. At the last meeting of the club there were only five members present.

Personal.

P. W. Cooper, bank-teller at Schuyler, Baldwin, Tuomey & Co., returned to-day from his two weeks' vacation, having spent a very pleasant time through New York and Connecticut.

Miss Albert, who resided at the Y. M. C. A. during the past summer, is spending Thanksgiving greeting at Middle Haddam, Conn., and Miss Albert is now in Plainfield. Miss Albert is a graduate of Mt. Holyoke College, and is a daughter of Mr. C. A. Albert, and a sister of Miss Rose G. Albert, both of whom are well known in this city. Miss Albert is to depart next week again for Plainfield and home.

A WHITEFIELD SENSATION.

Strange Happenings to the Hetfield Family.

H. J. Hetfield, of, live in North Westfield, otherwise known as Muggleville. He is a carpenter, and leaves the farm in charge of his wife and son. His daughter Hattie, eleven years old, and niece Lillie Holmes, three years old, during the past few weeks have been found at different times bound hands and feet, gagged, stripped partly naked, nearly smothered under feather beds and almost drowned in cisterns. And all this has been done in broad daylight. Although a watch has been kept on the house while these things were done, nobody has been caught perpetrating the outrages.

Mrs. Holmes and the two children are usually alone in the day time, and it is at such times the children have been abused. Hattie said to a reporter that the first attack was made upon her in the garden, where some one grasped her around the body, threw a cloth over her eyes and mouth, filled her ears with mud and then carried her behind the barn, where she was found tied down by her brother. Her clothing was nearly torn from her body. She was the hands of her assailant and by these she judges it was a man. Two days afterwards Mrs. Holmes found Lillie in a rain-water barrel, bound with a rope and a gag in her mouth.

William F. Holmes and his brother, Henry, who are stonecutters in Milburn, built undertook to hunt down the perpetrators of the outrage. One day while sitting on the porch with Mrs. Holmes, they heard a noise in the kitchen as if some one was inside. Upon entering the room they found Hattie tied by the neck in the kitchen so that her toes just touched the floor. A splinter of firewood was tightly clasped on her tongue. Immediately she two children were found gagged and bound on the lower floor of the house, and the cellar had been poured upon them. They said a woman with a black veil, black dress and very big hands had choked them and then committed the outrage. A few days ago Mrs. Holmes went to the barn and to her relief found the girls locked within. They said a woman had been there and had

SUNDAY, NOVEMBER 23, 1884.

A small piece of soap at stated intervals is recommended by a Berlin physician as a better remedy for dyspepsia and sour stomach than soda, magnesia or lime water.

What is called or sold as French kid is made in the United States; that is, ninety one-hundredths of it. The genuine article is scarce and high. One New York firm has a monopoly of it.

The Marquis of Camden, now twelve years old, asked the Court of Chancery the other day to increase his allowance of $10,000 a year to $40,000, on the ground that the former was not enough to keep up his estate of Bayham Court.

M. Chasrot describes as historical patient who slept uninterruptedly for fifty-four days. The cause of a gong beaten violently at her bedside was superceived, yet she was able to eat and drink, and all the functions connected with nutrition were performed without difficulty. The awakening was spontaneous and found the patient in good health. She did not know she had been unconscious for nearly eight weeks.

Some of the Scientific papers are publishing an item to the effect that we are indebted to Pompeii for the canned fruit industry. It appears soon after the excavation a party of Americans found some jars of preserved figs in the pantry of a less covered house. The contents were found to be good, and during the next year fruit canning was introduced in the United States.

A tedious examination into the causes of bad odor of the drinking water in the city of Manchester, England, led to the discovery of an unusually large quantity of human ear pool mails. These little animals have spawned so profusely as to make the water very disagreeable, indeed. The city taxpayers are now delighted to know that the foul water was not necessary, and that all they have to do is to supply the reservoirs with a few hundred good sized fish who will enjoy pond snail spawn as a diet.

Stammering, as many sufferers have found, may sometimes be got rid of in a simple way. A correspondent writes to the Boston Transcript: "I cured myself of an annoying habit of stammering by inhaling a deep breath between every few words, and by never allowing myself to speak unless the lungs were fully inflated? A little careful attention soon made the practice a habit, and now I never stammer unless much excited."

The train of load lying between Parsons station, on the old Amboy railroad, and the Delaware river, on the outskirts of Camden, and which has been mentioned as a suitable depot for a public park, has been purchased by Alfred Cramer from Leonard Hooper. It has been used for the building last 2—— suburban homes. There are

CLEVER STEVE ELKINS.

HE LOOKED INTO FERDINAND WARD'S SAFE IN THE NICK OF TIME.

All the Good Securities Selected and the Poor Ones Left—Dunne to Protect Senator Chaffee's Half Million Dollar Loan to the Great Firm.

NEW YORK, Nov. 22.—Mr. Steve Elkins, in a closely fitting drab overcoat that outlined his well stuffed figure, a silk plug hat cocked well over his left ear, a flower in his button hole, and a cane dangling from his left wrist, walked into the office of lawyer Hamilton Cole, with his client Senator Chaffee's half million Dollar Loan to the Great Firm.

NEW YORK, Nov. 22.—Mr. Steve Elkins, in a closely fitting drab overcoat that outlined his well stuffed figure, a silk plug hat cocked well over his left ear, a flower in his button hole, and a cane dangling from his left wrist, walked into the office of lawyer Hamilton Cole, with his client Senator Chaffee's half million Dollar Loan to the Great Firm.

"Yes," responded Mr. Chaffee, as I was with Gen. Logan this afternoon for several hours."

Mr. Elkins was apparently about to tell what Gen. Logan had said to him when Col. Bliss seized Mr. Chaffee a question concerning his Mr. Chaffee's relations with Grant & Ward, the defunct firm of financiers.

Mr. Cole, the referee in the case, laid down the pen with which he had been scribbling and settled himself to be interested. His effort in this direction was probably due to the fact that Mr. Chaffee's petition for the recovery of $500,000 worth of securities loaned to Grant & Ward is only about the fortieth petition the referee has heard in the suit of John H. Moore, assignee for the benefit of the creditors of the broken Marine bank, against Ulysses S. Grant and others.

Mr. Chaffee displayed the laziness that has characterized the creditors of Grant & Ward. He said that he had lent his bondto the firm partly for the sake of his son-in-law, Ulysses S. Grant, Jr. He knew nothing about the profits, but understood they were large, and that he was to have a share of them. When Senator Chaffee got through with his testimony Col. Bliss, his counsel, said: "Mr. Elkins!"

The referee's languor vanished, and the lawyers all set up in their chairs like statues of expectancy. Mr. Elkins uncrossed his legs, got up and took the chair that Mr. Chaffee had vacated. He smiled at Col. Bliss as one who should say: "Fire away."

"Do you know Senator Chaffee intimately?" Col. Bliss asked.

"I have known him for the last 15 or 16 years, and have had dealings with him on various kinds."

"Do you remember having any transactions with Grant & Ward?"

"Yes. On the Saturday preceding the failure Grant & Ward—May 4 last, I believe—the firm failed at 2 p. m. on Tuesday—Ferdinand Ward, his partner, came and asked to borrow $150,000. He said the firm was in trouble, owing to its relations with the Marine bank, and that the bank would not advance it could get $600,000. If the bank failed, he said, the firm would follow suit. I asked him how it had come about. He didn't give me any explanation further than to make vague suspicions. I told him I didn't think $600,000 would save him, and that he might as well face the inevitable with equanimity. He was at first inclined to be angry, but suggested that I should go to see Gen. Grant about the matter immediately. He begged me not to say anything to the general. He said: I found $153,000 he would get the rest.

"The next day, Monday, Buck (Mr. Elkins then re-ered to young Ulysses S. Grant Jr.) came to my house and asked me to go to town and asked me to raise $500,000. He was greatly alarmed. I told him I thought it would be useless, but that I would try. He said that he thought it would help. I agreed. I did not go in. When Buck came out I asked him if Chaffee was secured. I found that he was not, and I resolved to do all I could to secure him. I got a letter from Ward saying that he had raised $150,000. I didn't believe him. I was apprehensive of a failure very soon after Monday.

"On Monday evening I went to Brooklyn with Buck. He seemed to think that the firm would get along all right. He showed me certificates for $700,000, and said: 'We ain't safe!'

"'Why, my boy,' I said, 'they're not worth the paper they're written on.'

"I took them and put them in my pocket. We went to Ward's house in Brooklyn. He was out. The bookkeeper, Mr. Spencer, was there. Before Ward came in Mr. Spencer said that $600,000 was waited to set things right. Ward came in about midnight. He said that the firm owed $3,000,000, and that variants besides them Mr. Spencer's and Ward's figures confirmed my suspicions that the firm was in a bad way. I told Ward I didn't think $600,000 would help him. He asked me to go to Washington and see Gen. Grant and Col. Fred Grant, and wanted to secure him against loss. He had put $300,000 into the business. Mr. Ward's part of it, as far as the firm's securities, Ward said there were others whose claims were as meritorious as Mr. Chaffee's—others would be no protection.

"I pressed Ward for information as to what I could to deliver some of the securities to Chaffee. He said that there were other creditors who deserved consideration. I was a little indignant with him, and told Chaffee, being the first claimant, should be satisfied first. I insisted that the second half million securities of Chaffee's should be protect him against loss, and he seemingly consented to do so.

"He said he would be at the office of the Safe Deposit company at 9 o'clock next morning with the key of the vault containing the lot of securities. He did not come. I suggested to Mr. Spencer that he should go to the Safe Deposit vaults with Buck. Spencer to the order of U. S. Grant, jr., to test the matter. He drew the check, and that's all I heard of it. I told Buck that the only thing for him to do was to go to the vaults containing the securities. We opened the safe and took out the box.

"He did not open the safe?" asked Mr. C. W. Bispham, Gen. Morris' lawyer.

"I didn't open it. A very expert man with a lot of long irons has succeeded it."

"Who is the man?"

"Ward. If Buck had had the key he wouldn't have gone to Ward," replied Mr. Elkins, laughing.

"What did you do next?"

"I went for my attorney, Mr. Lascoux, and we took out the securities and came into United States Court. Mr. Lascoux read them and I wrote them down. Buck wrote the names under the order at the bottom of the list, turning over the securities to Mr. Chaffee."

"Did you take all the securities?"

"No; I took all that I thought were good."

"Why did you leave any?"

"Because I thought it my duty, as a friend to protect the interests of my friend Chaffee. I protected myself his attorney. He was in Chicago."

"What became of the securities?"

"I saw Mr. Augustus Rost, who is my secretary, and also does work for Mr. Chaffee, and left them in his box. I told Mr. Davies, the receiver for Grant & Ward, to go there afterward."

The referee's gavel fell and the lawyers began to gather up the papers which littered the table. Mr. Elkins was the last to leave the room. He walked down the stairs with a jaunty air, and was met outside by Senator Chaffee and Col. Bliss.

THE COUNTRY'S CASH.

A Large Falling Off in the Net Revenue of the Year.

WASHINGTON, Nov. 22.—The annual report of United States Treasurer Wyman is made public. It shows that the net revenue of the government for the fiscal year ending June 30, 1884, was more than that of 1883 by $49,167,715, having been $253,519,989, while in 1883 it amounted to $203,387,681. The net revenue was higher in 1882 than now, being $257,320,607; in the receipts from internal revenue $23,134,296, and in the receipts from miscellaneous sources $6,849,299. From these receipts the total expenditures should be deducted, an increase of $1,854,980 in the receipts from ordinary sources, leaving the net reduction as stated above. The net expenditures were $244,671,874, a decrease from the amount in 1883 of $21,201,693. The surplus applicable to the reduction of the public debt amounted to $49,648,025, a decrease of $28,285,818 from that of the previous year.

The treasury reserve for the year ended June 30, 1884, decreased $12,724,516, or from $166,282,384 to $154,070,230 Nov. 1, 1884. The cash fell below the 40 per cent. in excess of demand liabilities, it wholly regained it in August only, having risen as high as 41 3-10 per cent. and on Nov. 1, '84, it was 42 7-10 per cent. The average since resumption has been 53 4-10 per cent. The net increase of the national debt has been $2,285,855,818 from that of the previous year.

The treasury reserve for the year ended Nov. 1, 1884, decreased $12,724,516, or from $166,282,384 to $154,070,230 Nov. 1, 1884. The cash fell below the 40 per cent. in excess of demand liabilities, it wholly regained it in August only, having risen as high as 41 3-10 per cent. and on Nov. 1, '84, it was 42 7-10 per cent. The average since resumption has been 53 4-10 per cent. The net increase of the national debt has been $2,285,855,818 from that of the previous year.

THE FARCE OF THE LAW.

How Big Thieves Escape Punishment on Technicalities.

LOUISVILLE, Nov. 21.—Robert Boyce McPhun, arrested here Nov. 15 on a requisition from Calcutta for forgery of the Hoita. The company stock has been set free on technicality. He was the company's chief officer and got about $6,000 on the stock from a leading Calcutta business man. His lost the money in Colorado mining and came here and engaged in business 18 months since.

Sergeant Welsh, of the Calcutta police, who came with the extradition papers has the certificate of the American consul general in Calcutta that the depositions to establish McPhun's criminality were in due form and exact copies of the originals. But the certificate fails to state that the depositions would be readable as evidence in Indian court. Welsh testified that the deposition would be readable, but admitted that his knowledge of the law was obtained by connection with the courts as a police sergeant. The defense objected to the admission of the depositions. Judge Barr held that it must be established that the depositions would be admitted as evidence in an Indian court, and that Welsh's testimony and the consul's certificate did not establish this. As Welsh was not personally cognizant of the facts criminating McPhun, he was ordered released.

MINERS IN CONVENTION.

Discussing Matters Affecting Their Interests—No Strike at Present.

PITTSBURG, Nov. 22.—The miners' convention assembled at 10 a. m., and resumed consideration of the rate paid to miners in the Allegheny valley district. These miners for a year back have been paid 1 cent per bushel price, because of the competition of natural gas, and had not been secured of any support paid in case of a lockout. A resolution to appoint a committee to visit the miners of Sandy and Plumb creek, and request the miners to cease mining until their employers agreed to pay the district price—namely, three cents—was adopted. The discussion of the arbitration fund was then begun, and a statement read showing the amount paid by each pit for that purpose. A motion was made and carried to the effect that all pits be required to pay 15 cents per ton per month for this purpose. The rest of the session was spent in discussing the advisability of reopening the strike along the river. It was finally decided that it would be unwise to inaugurate a new strike at present. The convention then adjourned sine die.

No Thought About Inauguration.

NEW YORK, Nov. 22.—An Albany special says: "Gov. Cleveland was very busy with executive business, and had but very little time to devote to callers. During the day he received visits from Hon. John C. Underwood, of Kentucky; Congressman Bagley, J. W. Doane, of Chicago; P. H. Kelly, of St. Paul, and G. M. Hard, of New York. The governor will devote a brief conference with Fairy Commissioner Brown, Adjutant General Farnsworth, and other state officers on official business connected with their departments, but arrangements of any kind have as yet been made as to the trip to Washington for the inauguration, or anything connected with national matters. The governor will devote the whole attention to the duties of his office here with the same care and attention he has exhibited during the past two years, until the time comes for his resignation, leaving all time enough to think of other duties and cares when he shall be relieved from those at present pressing on his attention."

Pendleton and Randall.

WASHINGTON, Nov. 22.—Senator Pendleton is said to be asked by the latter candidate for a place, and it is undoubted that his conspicuous and advanced civil service principles have made him a peculiar favorite in that direction. But by far the strongest name yet mentioned in connection with the cabinet is that of Randall, and the Democrats here appear to be confident in the belief in advance that the Pennsylvania statesman will be dignified with one of the most responsible portfolios as soon as the new administration comes into power.

The Western Union Beaten.

NEW ORLEANS, Nov. 19.—In the condemnation suit of the Baltimore and Ohio Telegraph company for right of way over the Louisiana Western railway route between Vermilionville, La., and Orange, Tex., Iberville, the court has granted the claim, fixing the compensation of the railway company at $1,000. The Western Union's claim for damages on account of an alleged contract for the right of way was disallowed. This action completes the Baltimore and Ohio's right of way for its line from Galveston to New Orleans.

America Proposes a Monopoly.

BERLIN, Nov. 22.—Mr. Sandford, the American delegate, presented to the committee of the West African conference a complete scheme for a railway from Vivi to Stanley Pool, to be sanctioned as a monopoly by all the powers, no rival line being permitted in the interest of any one nation. The proposal was a surprise to the other delegates, but was taken under consideration.

Print Mill Owners Feel Happy.

FALL RIVER, Nov. 20.—All the mills have started up. There is a decidedly good feeling among manufacturers caused by the stiffening in prices in print cloths. Textile will run here next week and the general opinion is that it will not be necessary to stop during the winter.

Mysteriously Disappeared.

HARTFORD, Nov. 22.—Last Monday Miss Mary Taylor, aged 23, daughter of John H. Taylor, left her home as she said for a few hours. She has not returned and there is no clew to her whereabouts. Miss Taylor's parents are of the highest respectability and she has many friends.

Dynamite Fiends at Work Again.

DUNDAS, Nov. 20.—An attempt was made with dynamite last night to blow up the mansion of Mr. Hoseyy, a land agent at Dundas Island, while the family were at supper. A loud explosion occurred, which partially shattered the building, but the family escaped without injury.

The War of the Railways.

NEW YORK, Nov. 23.—There is no change in the situation so far as the railroad war is concerned, but rates for passengers are still maintained. A meeting for arranging details for freight business was held at Post Commissioner Fink's office.

Killed After Thirty Years' Service.

WILLIAMSTOWN, Mass., Nov. 22.—J. R. Goldwin, station agent here of the Fitchburg and Lowell railroad, while shackling a train was crushed between the cars and instantly killed. He had been in the employ of the company for 30 years.

Failures for the Week.

NEW YORK, Nov. 22.—There were 207 failures in the United States reported to Bradstreet's during the week against 201 in the preceding week and 252, 180 and 168 in the corresponding weeks of 1885, 1887 and 1886 respectively.

A NEW PAVEMENT.
The undersigned has secured the exclusive agency for the sale of the
Diebold Patent Iron Stone,
whichfor elegance and durability, is unsurpassed, and in price will compare favorably with any other pavement now in use. It is the most beautiful pavement known for walks and yards, gutter stone, floor tiling and kitchen floors, for lining cellars and burglar proof vaults; and for building purposes generally. It is absolutely fireproof, and every way unobjectionable—They show no perceptible wear, are non-conductors, resist the action of snow, as well as all kinds of moisture. When dampness accumulates on the ordinary brick, the material remains perfectly free from dampness and dry. Samples can be seen at my office, where I will be pleased to receive orders. Diebold Patent Iron Stone Pavement will be laid on or address

BIRD'S Patent Coal Elevator.

This machine is now in use in my yard, No. 6 Park avenue. It thoroughly cleans the coal then passes onto the bin. The coal never comes in contact with the screen, so that the dirt goes straight through. I invite the public to call and see it work. I have the Hampshire and other grades of coal for sale. Also Kindling Wood, and A. Mitchell, Jr's. Fertilizers and lawn dressing.

A GALAXY OF NOTHINGS.

Portraits of Prominent Americans and Distinguished Foreign Visitors.

MICHAEL H. DE YOUNG.

The late shooting of M. H. De Young, of The San Francisco Chronicle, by Claus Spreckels, son of the great sugar monopolist, has begun to publicly again the career of the De Young brothers, who almost penniless and without experience built up the best paying single newspaper property on the Pacific coast. Though of a wholly original and extremely personal style of journalism which they adopted when requisite, yet their energy and enterprise in gathering news is without a superior, and the record for The Chronicle's circulation greater than any newspaper on the Mississippi. There were three of the De Young boys, who at quite early life proved great at mining camps in southern California. The family who no more that it is said the mother and she did all the work to support the family. One of the brothers is now in an insane asylum, another, Charles, was shot at the height of Kalloch's fame, and here the fortunes and fearlessness of the boys in their manhood was shown. While Charles De Young lay dying from Kalloch's bullet a special edition of The Dispatch was printed for the mother's perusal, leaving out the sad intelligence in the hope that he might recover. After a long struggle Charles died, and Mr. Michael has kept the paper up to the same standard of "enterprise, journalism and 1264 his brother has made it popular.

SISTER MARY FRANCES CLARE

This gifted and gracious lady, who has given her life and talents to the purposes of helping those less favored than herself, arrived in the country several months since, principal among which is to make arrangements for the publication of her many works, so that those various charities may derive some income from them. Another object is to introduce goods of Irish manufacture. She is of the opinion that an extensive market, by establishing a department for Irish manufactures, especially such as laces, pottery, all kinds of linen goods, etc., can be created for themself sold by Mr. Clarke. She was known before joining the Order of Poor Clares as Miss Anna Clarke, daughter of the late Thomas Clarke, Esq., of Limerick, Ireland. She has written over 50 books, chiefly histories and biographies also device to young girls. Her versatility

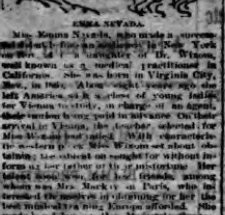
An American Songstress.

EMMA NEVADA.

Miss Emma Nevada, who made a success and delight in Europe, is a New York girl, the daughter of Dr. Wixom, well known as a medical practitioner in California. She was born in Virginia City, Nev., in 1865. Three years ago she left America as a scholar of young Indian for Vienna to study, in charge of an agent, and the intention was to keep the fact of her arrival in Vienna, the teacher selected for Miss Wixom had failed. With characteristic wisdom the agent of Nevada obtained the services of Madame Rudersdorff without information as to her letter or its importance. Her talent soon was her friends, among whom was Mrs. Rudersdorff, who introduced the maiden in obtaining for her the best musical training Europe afforded. She made her debut as Her Majesty's Theatre, London, in 1885, and has since filled engagements regularly at Paris, and other foreign capitals.

Governor Mount of Missouri.

The governorship of Missouri, one of the most important States in the Union, is held by Gen. A. M. Mansfield. He fought gallantly himself as an able general on the confederate side during our late rebellion, and has since then been considerably identified with leading interests in the State which now shows him as its chief executive.



Gen. J. S. Middleton.

The governorship of Missouri, one of the most important States in the Union, is held by Gen. A. M. Mansfield. He fought gallantly himself as an able general on the confederate side during our late rebellion, and has since then been considerably identified with leading interests in the State which now shows him as its chief executive.

Postmaster of the National Death System.

The Lime Kiln Club Philosophers.

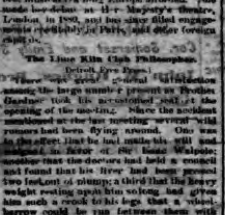
Detroit Free Press.

"There was a time," remarked the old man, as he smiled benignly down upon the shining pate of The Fire Fox, "when the pronunciation was a thing of do part. It was good humor. It was evidence of the ability to see in forgotten, day to be riveted with de rebuke of decay. It am well. Dar am some things we don't mind it."

"Let us now turn ober a new leaf. If pussy's bigotry was for de pas' three months prevented us from lovyin' collect of Shinplaster Corner, it need no longer stan' in de way. If de bits of our bodies has made us hesitate to lend our shi-tzuse to a Septimus, we can now offer him our whole person as well."

"De long night am clear, an' daylight has broken. Let us forgive an' forgit. De ivory am all heal yit, an' we'll get to it how survived de struggles wid some our hearts of rancor an' hate up de hoss again and another."

The Famous English Jockey.



FRED ARCHER.

Among the arrivals steamed from the Atlantic a few days ago was Fred Archer, the famous jockey, who has been engaged by Mr. Lorillard to ride his horses during the coming season. Archer is the son of the celebrated trainer of that name, and began his career as a jockey when very young. He was apprenticed to Mr. Jewitt, but frequently changed his employer, always finding better terms offered him. His success in his profession was remarkable, and he soon became the most famous jockey of his day. He rode the winning horse in the Derby of 1874, when he was only 18 years old, and has since ridden the winner of that race four times. He rode the winning horse in the Two Thousand Guineas in 1875, 1877, 1880, 1881, 1883 and 1884, and the winner of the St. Leger in 1880, 1881, 1882 and 1884. He rode the winning horse in the Two Thousand Guineas in 1875, 1877, 1880, 1881, 1883 and 1884, and the winner of the St. Leger in 1880, 1881, 1882 and 1884. He rode the winning horse in the Two Thousand Guineas in 1875, 1877, 1880, 1881, 1883 and 1884, and the winner of the St. Leger in 1880, 1881, 1882 and 1884.

Assistant Postmaster General.

Colonel J. Schuyler Crosby, recently appointed first assistant postmaster general, has proved himself courageous and efficient in the various positions he has heretofore held. He was born in Albany county, in New York state, in 1829. His grandfather, William Floyd, was one of the signers of the Declaration of Independence. He is a nephew of Dr. Howard Crosby. He served during the war as the regular army, where he was brigaded three times, and was in the Third Brigade in the army until 1871, when he resigned. Was consul at Florence, Italy, for six years after 1876. In 1882 he was made governor of Montana, which office was promoted to his present position. He passed the civil service examination in 1878 for his gallantry in saving the life of Miss May and after getting to two others on the occasion of the rescue of the yacht Mohawk in New York harbor.

What is Considered Desirable Seven Sheets.

[Boston Herald.]

Mrs. Partington, speaking of Mrs. Winslow's desire for a divorce, said: "Well, I declare for it, I don't see what the world is coming to. Why, when I was a girl, A. L. Fuddlewood, the governor of my native town, was considered the leading citizen of the place, and he was the leading citizen of the place, and he was the leading citizen of the place, and he was
